

Jews and Arabs cannot live in the same country.
The status quo works against Jews.
We need to get a divorce according to the Cypriot model.

The demographic expansion of millions of Arabs can be stopped and even reversed only if Jews stop giving Arabs work, benefits, health service, education, judicial protection, representation in the Knesset.

Israel is overpopulated. Jews don't need a demographic race.

The winner in a war does not give his land and citizenship to the defeated enemy.

A two states solution is meaningless without changing citizenship of Israeli Arabs.

The Jews are forbidden to settle and even visit many cities in Palestine.

The Arabs in their own way fulfilled the UN decision on the partition of Palestine.

The institution of **unified citizenship** for the Arabs of Jerusalem, Ramallah, Lod, Hebron, Jaffa, Jenin, Akko, Gaza, Haifa, Bethlehem, etc.

and separating peoples on the basis of citizenship - will be a fair solution to the age-old conflict.

1947 UN decision was to separate Jews and Arabs. Arabs' aim today is to destroy the Jewish state, via the state for everyone.

Arab autonomy without a single Jew was created in Palestine at the end of the last century.

Jews owe Arabs neither a centimeter of land nor a shekel of benefits.

There was no case in history that a victor in a war gave his land to a defeated enemy or fed millions of enemies for 70 years.

Solution of the decennary - natural, fair and fast:

ALL Palestinian Arabs between the sea and the Jordan receive identity cards issued in Ramallah and pay taxes to the Arab Authority.

After **2 million Arabs become citizens of their state** (without an army),

they will pay taxes (income tax and health tax) in Ramallah

and gradually all Arabs will be absorbed in Ramallah, Nablus, Jenin, Hebron, Jericho, Abu Dis, Bethlehem, Gaza etc.

It's time to release the "occupied" and compare the rights of Arabs in Haifa and Jaffa - to the rights of Jews in Ramallah and Gaza.

Palestinian-Jordanian ☹ citizenship, Abu Dis and Shu'afat - for Arabs,

Israeli ☺ citizenship and Jerusalem - for Jews !

Every Palestinian Arab deserves citizenship of his new state. This is a right and not a punishment.

The Jewish-Arab state will inevitably disintegrate.

How many Arabs there will be, 2 or 5 million, it doesn't matter.

The number of Arabs and Jews living west of the Jordan River is approximately the same.

Arab autonomy in Palestine exists for more than 20 years, on the territory of the Gaza Strip

and in areas A & B.

All Jews were expelled from there long ago.

120 years of living of two peoples on a narrow strip of land, in conditions of constant conflict, proved that Jews and Arabs cannot and should not live in one country.

Every nation must live in its own country.

This is the essence of the UN decision on the partition of Palestine.

The winner in a war does not give his land and citizenship to the defeated enemy.

In 1952, Jews rashly presented the Arabs with Israeli citizenship.

A two states solution is meaningless without changing citizenship of Israeli Arabs.

Separating peoples on the basis of citizenship is the most rewarding.

Checked in the past by:

Greeks - Turks, Hungarians - Austrians, Poles - Germans, Lithuanians - Russians,

Czechs - Slovaks, Irish - British, Serbs - Croats and so on.

6.5 million Palestinian Arabs have no rights to choose for themselves the particular citizenship.

It is necessary to initiate a referendum on the issue:

Separation of Jews from Arabs on the basis of citizenship.

Citizenship ☺ of a Jewish State - for Jews <-I->

Citizenship ☹ of an Arab State (without an army) - for Arabs.

The party that will organize a referendum will double its attendance in the Knesset.

In Palestine, Jews are again in the minority.

It's possible to save Israel for Jews only by separating from the Arabs, on the basis of the principle >

Two peoples - Two different citizenships.

* * *

Only the Arabs followed the 1947 UN recommendation and expelled Jews from many Palestinian cities.

Jews 🇮🇱 <-I-> 🇸🇩 Arabs

Israel is overpopulated. Jews are unable to support millions of Arabs in their small country.

Jordanians, Egyptians, Lebanese do not want Palestinian Arabs in their countries.

Jews in Israel also do not owe the Arabs a shekel of benefits or a dunam of land.

* * *

1st condition to end the conflict: ALL Palestinian Arabs must obtain an unified (non-Israeli) citizenship.

Jews 🇮🇱 <-I-> 🇸🇩 Arabs
