<b>Total</b>		<b>100.00%</b>	<b>100.00</b>	

**Directions:**

Weigh propylene glycol and alcohol. Add salicylic acid powder. Heat on low heat until dissolved. Add water to 90% of formula weight. Check pH. Add TEA until pH reaches 3. Add remaining water and preservative. Place non-woven sponges in container and add product, making sure they are all soaked through. Seal container.

**NOTE: Ethanol may be sourced as 'grain alcohol', or 'grain neutral spirits'. 70 proof vodka may also be used at 20% (the cheapest kind is fine). DO NOT USE DENATURED ALCOHOL.**
