Clenbuterol cycle Clenbuterol has a different kind of intake together with a different form such as injectable, oral and liquid. Each form should have at least a small concentration of clenbuterol in its composition. We use both micrograms/mcg and milligrams to measure concentration of steroids. Astralean (Clenbuterol HCL) 40 mg belongs to a group of drugs known as sympathomimetics and is

taken to mimic adrenaline and noradrenaline in the human body. It is a selective beta-2 agonist that is used to stimulate the beta-receptors in fat and muscle tissue in the body. Clenbuterol exhibits most of...
