Problem Statement

A survey of educators that use robotics equipment reported spending an average of \$350 during the 2022-2023 school year due to parts being lost during project time. Some of this replacement cost is due to parts falling on the floor and becoming lost. Educators do not have enough time to confirm all parts have been acquired.

Present Solutions

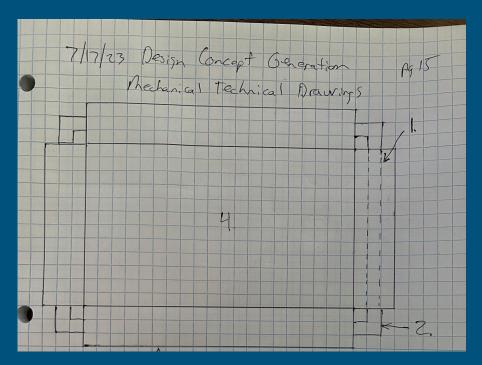

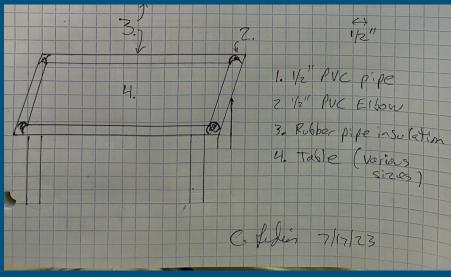

Design Requirements (Constraints)

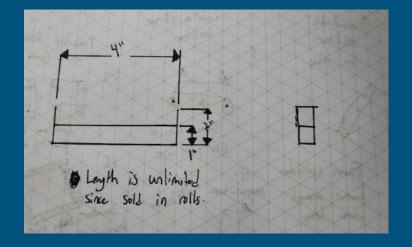

- 1. Mechanical only
- 2. Quiet operation
- 3. Able to collect large items
- 4. Efficient/Quick Operation
- 5. Collection bin is easily emptied
- 6. Lightweight
- 7. Prevents objects from falling off table
