Introduction

Snoop Inu (SNI), the digital meme token that represents the daily struggles and aspirations of the general public in it's bids to find new means to generate and control money which has with each passing and approaching day become more devalued (FIAT) - Snoop Inu (SNI) truly representts what it means to be alive as a community.

SNI is a decentralized meme token to drive growth in the industry, decentralized finance-oriented activities across the world.

Snoop Inu, the massive Community Dog Meme with Perfect Sniffing abilities to locate Decentralized Gems, incredible hearing, and dominance; it captures the essence of exactly what it means to be successful - The true Miner.

Be a pioneer on this mission. Snoop Inu tends to outperform every meme coin out there. We are well on our way to inevitable widespread adoption.

Our Values

Transparency

To show our first commitment, there will be no singular Liquidity Provider in the project, and the public sale will be made available to all. All team members will go through the whitelisting / airdrop process just like every other member of the community. 80% generated from the public sale and presale will go for liquidity and locked, while the remaining 20% is for operation to ensure a successfully moon mission.

Charity / airdrops

Snoop Inu is a decentralized meme token to drive charity-oriented activities across the globe. 4% of the allocable tokens will be used for Airdrops. This is to promote a widespread community adoption.

Unity

\$SNI is a cryptocurrency token whose number one aim is to foster togetherness, facilitate social upliftment, and further the rise of the meme-powered metaverse controlled by a Democratic Community.

Snoop Inu is a decentralised community driven project. As such, the wish of the community will be carried out through a well organised community voting.
