

# **ROXANE**

## **WHITEPAPER**

## INTRODUCTION

ROXANE is a crypto payments Token that expanded into an ecosystem of services dedicated to providing our clients with the right tools that enable them to use cryptocurrencies on a daily basis.

Our technology is designed to simplify cryptocurrency transactions for businesses and consumers in the ecosystem.

Roxane has the answer to the Questions being asked by crypto enthusiasts  
What would happen if a cryptocurrency project was 100% run by its community?

While the term DeFi literally includes the word decentralized in its definition, this is in reference to economic status as opposed to its internal hierarchy.

While none of us could have imagined it at the time, this was the start of a revolution.

Projects built on the foundation of community involvement are the untamed wilderness of our future. As we move further away from rigid social structures and traditional mindsets, we become free to discover new ways to solve problems and relate to one another.

In a world ruled by the commodification of time, community-based projects are more than just a change of pace, they are a way to practice the

radical acceptance of others. When success depends on the shared strength of the individuals who make up a collective, we are forced to shift our perspectives to align with those around us. The Roxane Ecosystem is our way of recognizing the importance of tearing down a long-established paradigm of a formulaic success and building a path to freedom and creativity in its place.

A community is held together by hundreds, if not thousands, of interconnected moments. By studying those drawn to our project, we realized that true power doesn't come from a single perspective, it comes from working together in harmony.

With that thought bright in our minds, we began developing the Roxane Ecosystem in earnest.

## The Project

1. The token Launch
2. Community Management
3. Token Development
4. Token Listing

### **Roxane Token Launch**

The absolute protagonist of the Roxane project is the token, launched on the Binance Smart Chain network, it is negotiable just like all existing coins. Each investment, both incoming and outgoing, provides for automatic rewards, specifically preset percentages are redirected to wallets of holders (investors), liquidity and marketing. On the other hand, the manual BURN which will see a onetime burn of 33% of the token. In this case the DEV's "burns" a part of tokens is definitively to reduce the number of tokens circulating (thus decreasing the total supply), this will produce an immediate increase in value of the token itself.

**Token name: Roxane (RAO)**

**Decimal:18**

**Total supply: 250,000,000,000**

## **Roxane Community Management**

We at Roxane strongly believe that investors are a cornerstone of our project. Our community is the heart of Roxane. To grow and develop it we have the following weapons:

Telegram channels and groups

Instagram

Facebook

Twitter

Telegram channels will be managed by mother tongue administrators to provide information to users as clearly and quickly as possible, all of them will be coordinated by the dedicated admin. All social media will be managed independently by the admin who will take care of both posting the news regarding Roxane, daily charts and much more to tighten new relationships with sponsors and influencers.

## Token Listing, Marketing and Sponsorship

The token will be listed on the major platforms including the most important:

**[Pancakeswap.finance](https://pancakeswap.finance)**

**[Poooin.app](https://poooin.app)**

**[Coinmarketcap.com](https://coinmarketcap.com)**

**[Coingecko.com](https://coingecko.com)**

Progressively, Roxane token will be listed on many more DEXs and CEXs. The investments usually diverted in this sense will be utilized in areas that are most profitable for our holders, like marketing, boost etc.

MARKETING, will have a dedicated portfolio that will convey part of the entry and exit fees, it will be managed to expand the knowledge of the ROXANE project. In addition to the social media already mentioned, it will also invest in channels like YouTube that are dedicated to the cryptocurrency world, this will include all platforms that we will deem suitable and feasible. The sponsors and influencers we choose will be directly or indirectly of the financial world, we want to utilize the available sums in such a way that it would be as profitable as possible.
