Fast

Pojav Launcher is fast and smooth. Play Minecraft with no lag

Minecraft is a brand name with millions of users and several sports franchises across the globe. For a video game, it's rare how far Minecraft made and remained popular. In a cut-throat industry, Minecraft got a foothold thanks to the rapid updates and innovations.

There are many versions of Minecraft that you can launch using one of the few Edition launchers available on the internet. In this blog, we'll be learning about one such launcher named 'Pojav Launcher'.

What is Pojav Launcher APK?

Pojav Launcher is a Java-based game launcher that allows the user to launch almost any version of Minecraft available online. Developed by Artdeell, Pojav Launcher was released in 2009 and is available for Android as well as Windows operating systems.

With the Pojav launcher, the user can launch the much older Minecraft versions on their latest smartphones and computers. Pojav launcher is a result of an unofficial development for altruistic reasons. However, you will encounter many crashes or lag while playing your favorite games. For any bugs, the developers usually fix them before the release of the latest version.

Gacha Neon mod is an alternative game to gacha club which allows you to customize the appearance or outfit of your character. Designing an avatar is excellent when it wears beautiful items, along with rare items.

## Features of Pojav Launcher

Here are some of the best features of Pojav Launcher APK:

**Privacy:** Although Pojav is a third-party software application, it encrypts your files and keeps them private. Moreover, you can hide the icons of different video games and keep your interface cleaner.

**Smoother and Faster:** Pojav launcher has been optimized for a low slower internet connection, meaning it can provide you a smoother experience even if your network is slow.

**User Interaction:** The app works as it allows the user to choose from a ton of options and gameplay modes. With a simple UI, you can go through various options and seamlessly choose any video game. In the latest release, it dynamically refreshes the version lists along with the skins in the profile selector.

**Bug Fixes:** The developers fixed a number of crucial bugs including the input pipeline, IME support, TF2 stuff mod, full hardware mouse support, full keyboard support, and cursor resize.

**Free Download:** Pojav is a free software application that provides all the resources without asking you for any money. Here, you'll not find any third-party advertisements or slow service.

## Install Pojav Launcher APK on Android or IOS Smartphones

>> In order to install the application, you need to download the Pojav launcher APK file.
