

10 Best Minecraft Servers For PvP

This is the best Minecraft PvP server for you if you don't like resets and changes. Foxcraft is known for constantly running its worlds, often for years at a stretch. If you build a base and gather items in this server's universe, there is a good chance that they won't disappear until at least 2024. There is an unfair game of power when it comes to PvP servers.

Because of the time they've spent to improve their skills and be ready to fight other players, many players are the dominant players on this server. It's a great challenge to topple them from the top. If that's not your style, though, the server also has classic game modes, including prison, sky-block, and creative. 3. Purple Prison

Java Address: purpleprison.org Purple Prison is our next entry and is a popular PvP server that is also peaceful. MINECRAFT SERVER LIST It features cells, yards and prisoners. To earn in-game rewards, players can take part in daily PvP events that allow them to use server shops or auction houses.

Purple Prison offers peace in its world, which is something that no other PvP server can offer. It is a server where you have the option to fight other players. Purple Prison has safe zones and designated sitting areas so you can just hang out and make new friends. 4. Mineplex

Java Address: us.mineplex.com Bedrock Address: pe.mineplex.com

Mineplex is one of the most popular Minecraft servers of all time. There are thousands of players who log in daily to play Minecraft Java and Bedrock. Mineplex offers many games including survival, skywards and clans. There are also some non-PvP games to keep you entertained. However, the server's main focus is more on mini-games or custom content than a vast open PvP world.

Because of its ever-growing community, Mineplex keeps adding new themed content around every major festival. So, you get scary Halloween, wholesome Christmas, and a lot in-between. There is always something new for players to explore, both in solo and group settings. You just need to find what appeals to you.

5. PvP Hub

Java Address: pvphub.club (version 1.18)

Our next entry will be a custom-coded Minecraft PvP client that offers a variety unique features. The most fun part of this server is the UHC mode, which isn't common nowadays. This mode allows players to spawn in random areas of a Minecraft world. Then they get a few minutes to prepare before a full "last-person-standing" battle begins. This game mode is similar with PUBG.

Other than that, it has several custom game modes, including PvP arenas, bed-wars, and more. This server does have one problem, though. This server only works on Minecraft 1.8. You must downgrade your Minecraft game before you can play on it. 6. Donut SMP

Java Address: DonutSMP.net

DonutSMP.com - Bedrock Address

Donut SMP is the next best Minecraft PvP server. It is an active hardcore server. If a player is killed, they can't rejoin the server until after two real-world day. This server is only for those who can trust their combat skills and can survive against the most cruel players. PvP is open to all types of griefing, theft, and killing.

The server offers many game modes, including survival, anarchy (hardcore), vanilla, One Life and OneTrySMP), Lifestealsmp, and other game modes. Each of these game modes has high stakes. Donut SMP awaits players who are looking to improve their combat skills. 7. Wild Prison

Java Address: play.wildprison.net

Wild Prison, as the name suggests, is one of the most competitive PvP Minecraft servers. It features a major prison theme and tons of custom features. To earn a place in the world, you get tokens. The server offers players the chance to test their skills and win PvP games.

Other than the PvP experience, the server also has custom Minecraft enchantments, gangs, free ranks, and even unique pets. Overall, Wild Prison offers a lot for you to discover and keep yourself entertained. 8. Hypixel

Java Address: mc.hypixel.net

The Hypixel server is an online community favorite. It's one of the longest-running Minecraft servers with a huge community and unbelievable game modes. We have an additional guide that will help you to get to know Hypixel better. But more or less, it has everything you can

wish for in an online Minecraft server.

The server supports players from all over the world and has 18 languages and 19 game modes. So, if you don't have a Minecraft crew already, Hypixel and its creative server have you covered. 9. Galaxite

Bedrock Address: play.galaxite.net

Most PvP player servers usually focus on the vanilla survival world of Minecraft. The best Minecraft prison server is the exception. But that's not the case anymore. Galaxite is a Bedrock Minecraft server for PvP that has a cosmic theme. It features unique planets, alien structures and a lot more active players.

The game modes include "Prop Hunt", Fill the Gaps and a custom-made bed-wars mode called, "Planets". Other than these three-game modes, the server has creative features like player parties, seasonal updates, and an in-game battle pass to unlock custom skins.

10. Complex Gaming

Java Address: hub.mc-complex.com

Complex Gaming is a Minecraft PvP server that is well-known for its many features. It has its own Pixelmon server and realms, Tekkit, vanilla and even FTB. Each of these modes is filled with a number of the best Minecraft mods, and together, they deliver a unique and entertaining Minecraft experience.

This server offers unique Minecraft custom maps to help you stand out from the crowd. These maps are dedicated to pop culture icons such as Spongebob and Marvel superheroes. These Top Minecraft Servers for PvP will help you fight and survive.

Now you have a list of the best Minecraft server PvP servers. Some are more competitive than others and some are more open to battle. You can choose the one that interests you the most. To get a performance boost, make sure you install OptiFine in Minecraft Java. It also allows for the use of the best Minecraft shaders, which will enhance the visual appeal of the already incredible maps. Each of the PvP servers here is home to a variety of skilled players ready to take on combat. Some players find this the ultimate dream, while others find it overwhelming. If you are in the latter bunch, the better option is to create a private Minecraft server. Only a select group of players can play and compete on this server. But if you are planning to play with the online community, which best Minecraft PvP server are you going to choose? We'd love to hear from you in the comments TAGS minecraftMinecraft PvP
