Statement Philosophically

In the history of World Wars over the past 100 years, our last period of the current political generation as the format of today's dynasty, we live in the memorial during WW I., and thus simultaneously during the main World War II.

World War II which meant extent of continental character, or international involvement in a range of crimes many other continents as well as the Napoleonic Wars, however, with political consequences around the world, one of the biggest disasters in the history of mankind. Genocide and occupation of territories within the European continent, when striking a dictatorial regime against the other states in neighboring countries, with a focus on violations of the rights of other nations, robbing the freedom and right to self-word or any opinion, violating the dignity of the country, state and nation, or mugged identity and territory against the opposition. Oppression and murder other persons and legal groups.

War activities, such as the conflict in the form of World War II, the situation in which the other effects of genocide and territorial occupation meant that the real world response to the policy of foreign countries, and therefore those which advocate peace, freedom and natural rights of nations with natural law for safety, therefore, each government based on the pride of their identity and justice, they were together the governments of countries interested in cooperation for the removal of fascist Germany, stopped the occupation of other countries and stop the genocide of other nations, opposition groups and communities.

To add, crime statistics WW II., so we'll find that in the Second World War died on average 22 million soldiers and 40 million have died simultaneously civilian casualties. Combined result of World War II., killed over 50 million people, some from Statistics prove after the Second World War had in German concentration camps to die more than 80 million Jews.

Today, we live in the year 2000, the days when our generation know the Second World War, even as a historical incident which subsequently led to the emergence of the United Nations, the emergence of today's global system of world politics which was created mainly to prevent similar conflicts and threats of war character as a violation freedom and peace, stopping international organized crime, creating a threat of war or in the case of creating a new world war. The United Nations will automatically be based on rights and political responsibilities for global cooperation designed for disposal of terrorist entity and ensuring common security, as a global political alliance which actually serve to eliminate all threats of similar crimes.

The United Nations brings together 193 governments of countries in the world, and several other members of UNPO as a state without the full capabilities right of territorial sovereignty.

Since the breakup of the Second World War was the taking of further conflict which is based on the form of a Third World War, soon after the terrorist attacks, Osama bin Laden who, through aircraft raid destruct 2 towers of The World Trade Organization in New York, USA. Thus followed the conflict in the countries of Afghanistan and Iraq where different cultural ideology of Islam and US states fought each other along with many other states and governments of countries around the world and in the interests of commitment to applying the UN Charter and the rights to freedom of the nations with justice. Format legal way as the Third World War,

however, no range of strong genocides and killing or territorial occupation of other territories through the legal entity. Partly because a Third World War which was created in the interest of the international struggle for the safety of international law and their functions, rights trade, rights to development cooperation, and thus simultaneously and systematically right Freedom Statue and governments.

At the same time today, despite the emergence of the United Nations is still a problem today, many forms of risk for the emergence of new world wars, genocides or other criminal conflicts. Today there is a main risk for the emergence of World War II, the current conflict a political nature between the States of the terrorist movement, and independent government Imperium of Diamond's. The conflict that is based on the action of world terrorism from European governments in the country, European sovereign services in addition to terrorism within the scope of public activities of the state, and it is thus confirmed and terrorism within the scope of the entire country at the Nations which recognizes own citizenship under the governments of countries that are active in terrorist such movements and strategies that violates all the principles of the UN Charter.

European governments countries operate terrorist activities which are real level of global crime through violations of the rights of other peoples and governments of countries, therefore, in order to initiate use of their own rights and trade freely cooperate for the best option to develop their own civilization, and current law of other governments of countries in order to court advocating own traders and corporations, in many countries around the world is through terrorism and multinational quiet efforts results due to crime in the form of famine and blocking access to medicines and food, because genocide in the values at the level of 300 milion persons in the scope of many countries around the world .

According to a legal perspective, there arises system in which European terrorist government are their own legal name responsible for the actual movement and the rise of international terrorism on a legal level to the political responsibility of the international nature of the crime which means activity in the form of World War II., World War which are made real genocide, systematic occupation of territories and embargo threats in the form of an intention to dispose of other states or on the demilitarization of civilization, tyranism and damage of Internatonal declaratios in all forms. It is real that today is happening on the actual format of the Third World War which is divided into two parties as the joint opposition, first party that stops legally justice and political principles, or the other side of which stop the crimes and murders, abuses around the world intent for the disposal and damaging other's actions in the interests of justice and legal rights that sustains us whole world in political, governmental and civilizational stability, international law which are of interest to global security always more important than the existence of the value of any other state.

Terrorism which according to international declarations and political rules, according to the natural system of legal claims of other states in the world because it is such a terrorism respected as a true form of global terrorism against all governments of the countries on the planet and the human world, and simultaneously against all business corporations from all over the world, and in fact too much against other states for independence and freedom, peace and security. Terrorism really against the whole of the human world.

Party Terrorist, government's & states of the Czech Republic, Slovakia, Hungary, Romania, Bulgaria, Turkey, Austria, France, Italy, Portugal, the Republic Confederation of the Swiss,

Federation of Germany, the Grand Duchy of Luxembourg, the Kingdom of Spain, the Netherlands and Belgium, perhaps another other states as Legal form Acts of terror Alliance,, entity creates an organized activity in the forms of international terrorism to the level of World Wars, against all the governments of countries around the world, and freedom of all humanity, actually confirmed by legal rules and public values. The first party as a movement of terrorism which, therefore, the value of this terrorist really by all international law means the loss of all their political rights and legal standing, or the right to own through the media, in a society without rules on commercial activity, without the right to security activities or right for activities in the form of political power and communication.

The other hand, a world opposition to terrorist groups, it means every government of a country which is a legal member of the UN and thus automatically support the rules and obligations of the policies under the UN Charter, or it is the states that actually legal and natural form of entitlement for the development of their own country and against such governments and states are not pleased for the opportunity to occupation and embargo on their country, or those States does not want for support violations of international rules on security and peace, the freedom of nations and the rule against terrorism or against genocide, because these countries with Pride, want to fight crime and terrorism, therefore, to us the world could be the just, clean, without the threat of World War II and the global massacre, without the threat of harsh hatred and bankruptcy of many civilizations, exterminated states, our friends and our families. Therefore, all states and governments of the Earth which together occupy Declaration for the Prevention of Genocide, trade agreements and Justice claims, or other forms of international rules and the declaration by the system as global politics and obligation to represent our common responsibility for the immediate liquidation of each format of international terrorism, and in this case also the ability to ensure our freedom, pride and security, to defeat the enemy who is occupying us and try to enslave our peoples and countries.

First page as a subject of international terrorism, this entity criminal activity today activated forms of crimes in actual World War II which had, according to statistics help outperform the genocide of World War II at least 6 times, which means that today is a dead over 300 million people who were killed by famine and blocking medical assistance. Today there is really active value of bigger form than World War II who were also subjects of terrorism run a crime in the form of expansion of the deadly virus after other continents also abroad, Ebola and mass murder of the population, or spreading the virus Zika and threats of preventing the ability to reproduce and distribute the population or the threat of other genocides. Crimes which simultaneously is based on the strategic support and monopolistic respected ISIS States for reasons of personal safety and the ability to defend themselves by natural threats by another body which is fighting for the same goal and the same political rights as European governments today country „World Terrorism". It is real that these European terrorist government had jointly created numerous assassination of airplanes, many assassination of another political person attacks of murder, other policies such as, for example, President of Poland Republic in 2010, the president of Iran in 2012, or the many other policies in the whole world.

In the same way, in the interests terrorism activities created genocide and attacks on other countries' governments around the world, such as through the abuse of technology to manipulate the weather and atmosphere, technology, which can cause earthquakes and tsunamis or strong storms, for example, already in Japan, Iran, in Nepal, in many other countries throughout the world.

Terrorism from use of technology, which is based on the values of crimes in the form of spying that took place with the help of arms of special technologies with the ability to influence accident in the reality around us, and thus influence the outcome of your work or contacts in society, statistics from the consequences of publishing media reports and or the result of the ability of your private strength and success, and the same technology that affects the ability of other technologies and features views of the company or technology that are multiple steps that are actually used for global terrorism.

Today threaten of First Global War

Today really is, that European governments countries not have it respect their political responsibilities and principles of the international system which, through such functions in the interest of all governments around the world, this system is actually more important to its stability and existence than the value and possibilities for any other existence of European governments countries.

European governments together with the country not governed by this system and therefore leads to a situation in which European states will have to defend together against the whole world, so that their new terrorist regime could win. Every one government around the world wants justice and recover all forms of their compensation back all claims or losses.

This means that European countries' governments to their states and civilization have not come to bankruptcy against, than European governments must damage the sovereignty and force other countries around the world and than destroy their civilization, kill political figures or fully enslave the entire state. If the state will protest, or if other governments will defend military power and righteousness, and European governments are gaining ground last possibility of their criminal strategy which implies the need to exterminate the 5.000.000.000 people across the world and enslave the people.

Therefore, in the case of only one weak attack and opposition, without interest to give up and recognizes claim's of International law and justice that means our global challenges and the duty of world politics for global cooperation in preventing the emergence of the First Global War, and so it is to our mutual important to destroy all European governments force the country of the terrorist movement and any size of such an alliance.

Our right is to win, and there can not be any other option.

European governments are subject together through their step represents their strategy so because the European countries' governments refuse steps legally coopered a strategy for peace according to International law, because European governments the country publicly represent their interest in the use of European forces in opposition against governments countries that recognize legal political rules and justice, that is publicly reported attempt on global terrorism, and the war which in this case could mean victory for Europe, only in the case of European policy is able to use its own army and the power to dispose of all opposition status and thus genocide minimally 5.000.000.000 people.

European governments did not stop their criminal activities and terrorist movements, it means that European governments really strategically directs an incident which means extinct all people around the world.

Strategy European governments a country which is confirmed through the five year old report on the European effort to expand the deadly viruses on other continents, Ebola in 2013 in Africa, the virus Zika in 2015 and 2016 in South America, and also evidence such as shooting down aircraft political figures and their Political team's & Logistic's, with terrorism as earthquakes such as the disaster in Nepal in 2015, as well as terrorism in the form of influencing our reality through technology for handling by chance and the ability of mass influenced by the crowd, and political events.

Many public attempt by the opposition against World Legal Right's and Political Principles, really hard steps terrorism and at the same time and public activities in the form of blocking my people and my communication with my manipulation or persons by means of hypnosis.

The new global war which is full act of territorial activities and military touch will relate and intervene in the territories of your countries, of every government in the world, and the main touch will always decide if your nation and civilization survives, will become extinct every individual and or your nation let enslave European governments.

This is a real information by real incidents and actual conclusions from the analysis of European countries' governments and their activities. Steps for the creation of the First Global War, war more powerfull than the Napoleonic wars in history, tougher crime than for the period of the First and Second World Wars, this is really a war that is full act will touch every state around the world, each one of you and your civilizationes.

Today, we live in a time that is capable of using technology, weapons of mass destruction systems which can cause destruction of cities, province liquidation, liquidation or whole continent and the planet. My reall technologies are capable of causing destruction to the 10 Galaxies for 1 single second. I own a lot of plans for further and even stronger technology for Mass or Universal destruction, but I never wanted to publish such plan. Ever since 1998, I was spying illegally under the countries from European governments who secretly eavesdropping on my thoughts, so it is certainly a country that European governments know well the technology and they can secretly uses them.

Therefore, for all of us, for every person around the world, for you and for your nation, your country and your family and friends, for everyone who lives on our planet Earth, freedom and security, for the existence of our human race. Really and truly been required to Common Global Organize and thus ensure our common security, so too with the right to survive confirm we all of our rights is to use the form Global Alliance of this document and therefore global democracy in world politics we can initiate soft footfalls for manufactures my weapons for mass destruction, and thus our ability to ensure the immediate destruction of European terrorist movement or against other attempts by threats or liquidation, terrorism and assassination.

If the UN Charter and other international declarations prohibiting such activity, therefore it should be understood that the United Nations was created for the consequences and future prevention of World War II. Today, we live in a situation where there is a real threat to humanity exterminated acts of biggest terrorist in the history of human existence. Therefore, every member of the United Nations own fully cooperate right for his and our common existence. UNSC own duty to respond, to encourage us all and to ensure the freedom of all mankind, to ensure the future of our peoples day and safe life.

When the UNSC and the UN is not the full ability to resist internal UN corruption, or defend itself by its own security agents, then it means that in order to jointly defensive contact against the enemy, then the UN Charter and other things declaration loses any value and each of us actually legal and JUSTICE, naturally claim to defend their own right to survive. In such case legally so that we could use any type of weapons or defense strategy for safety interest.

This is the document who according to the real principles and values testify about threats to First Global War 2000, war at the level that people today and in history could not even understand, a war which, therefore, in the case of our inability to jointly prepare for the defense, such a war is able to surpass all principles.

It is therefore our duty to fully cooperate globally and defend against every enemy.

Statement in Criminal

European states and governments of countries together violate the UN Charter and all relevant principles of world politics that are important to the function of our world and friendship, peace and security, stability of world policy.

European states and governments of countries with their terrorist alliance to violate all forms of international rules and declarations, declarations for the prevention of genocide declaration on human rights and freedoms of civilian, Declaration on political and civil rules, the Declaration on the principles of international humanitarian law, or other declarations and rules for world peace and security, stability of the international system, or the many other important Declaration worldwide.

European governments carried out the crimes that cause strategically and legally deductible format robbing and terrorism against all the States in the world and too all business corporations and businesses, thus entitled to all civil communities for freedom. Crimes in the form of robbing the safety and quality of life, financial crimes which in per every government of the country are more losses than the value of our planet Earth and civilization.

European governments the country had indeed made a strategic media and silencing of genocide against 300 million people be hungry and blockade of emergence, mean fact of life sources according All International Rights. European governments jointly created instruments that are based on the expansion of the deadly Ebola virus, or virus Zika, and thus the expansion of global threats in the form of Biological Warfare as an attack against the whole world. Legal forms of occupation of more than 1.800.000.000 people around the world through disinformation activities and blocking information, legal occupation of populations around the world through the oppression of justice and widespread corruption of the activity in the form of blocking options and avoid contact or media sharing.

Political assassinations and shooting down or hijacking politicians and civilians. Acts of terror attacks with a weapon, to generate earthquakes, Japan, Iran, Nepal, many, other countries' governments.

Started publicly refusing activity peacekeeping missions and practices of Justice or Diplomacy where is not strategy of terrorist success be defending and blockation of justice. European governments countries refuse to follow the international rules and safety, according to peacekeeping principles and safety. Thus arises and is confirmed by the threat of World War II which actually so now is a breach of obligations Declaration to prevent such incidents, for example, also a violation of the UN Charter, the main political document of the whole world.

European governments countries, really active terrorism structure in the countries' governments, real terrorism in the structure of state services, and actually publicly terrorist activity in nationals extent European governments the country and their states as a group terrorism. Other citizens who do not know about terrorist activity in country and not have such interests are therefore collaborating through media censorship as hostages of the terrorist group.

Crimes which in the form of statistics had actually overtook all the values of the Napoleonic Wars, the First and Second World Wars, global duty for immediately liquaidation.

Expression of Political

This creates a situation where it is an important duty of all States to membership of the United Nations and in accordance with the UN Charter and in the interest of the International Declaration on justice, security and world peace. Each of us owns full right to fully defend or to unite with others, through declarations of this document, and so of us emergence of global power.

Our shared objective is to develop a strategic action that will demonstrate the strength of our common interests and to maintain our freedom and justice in solid hands.

Joint action and political obligations:

- Sanctions against Europe and the European economy in isolation abroad.
- Stopped of joint relations with the European countries' governments, change partners.
- Cooperation for disinformation European policy, Europe's secret services and companionship.
- Together transfer of the enforcement of the legal name for the European economy, so we create the ability to manipulate the European economy in the interests abroad and thus ensure the safety of the world's economic stability according our Representation for European terrorist Banks be *Internationalizing*, prevention against terrorism.
- Recalculation of all the values held by the Euro coins and other values and business or financial relationship of Europe in your banks and thus ensuring a good option to replace the European economy, according to our own strategies and decisions, such as preventing bankruptcy status, we can change European economy according use of European Legal power of economy values and name of Central Bank.
- Each government land of their own individual claims for the recognition of other business corporations from Europe and terrorist states that traders promote the stability of Europe and the Alliance of terrorist entity and, therefore, such a corporation may be blocked with the decision internationalized corporations on behalf of our countries' governments. No corporation not own claim to support international terrorism.
- Global cooperation strategy together for refunds economic or safety and policy importance of European governments and their terrorist alliance in the interest of politicians OECD, NATO, OSCE, COE and other important political, trade, security alliances and organizations. Each organization owns an obligation to stop cooperation with such identities of world terrorism.
- Cooperation to mobilize our army and creation of a global strategy and forces for defense planning against global terrorism, the ability to develop a strategy for immediate response and immediate disposal of united opposition party.
- In the European hint of opposition, because of the threat of First Global War as a Global Liquidation of population and civilization's, than is permitted to commence activity of our defense performance by WMD's.
- Global cooperation of the disposal of European politicians who supported any cooperation in the interest of world terrorism.
- Announcement of the court judgment through its own court of your state, then sent to the court judgment before an international judicial system, started for global cooperation.

Goal of joint activities:

- Creating a truly functions of the court and therefore their ability to safely exercise justice and our victory.
 - Confirmation Court judgment which automatically means bankruptcy of European governments of the countries and their states, and a full range of topics such terrorist alliance.
 - Together option is to use the situation as a new and historic step for global security and peace, prevent world wars, the common capability of the internationalization of European territories through our & legal justice, therefore, confirmed the sovereignty of the World Diamond International Alliance.
 - Automatic acceptance diss-legitimation European rights to sovereignty in the form of De Facto, automatic dislegitimation through policies and the system of international rules as the obligation of all governments of countries around the world.
 - That is because of the situation extinction of European governments, and because of up-standard dimension of European sovereign debt, and according to our obligation to prevent crime, disaster, and war or extinction of civilization, so it really is automatically confirmed our shared sovereignty De Facto on the territory of European countries and their terrorist alliance.
-

Scope of European terrorism:

Terrorism is active in the structure of European governments and international relations, at the same time, terrorism is widespread in the circle of the state service such as military and police or authorities, public and the entire nation acknowledgment that terrorism is also expanded to the extent of the entire state and country in the form of illegally blocking the media and every day be state movement that is supported by the activity of criminal intent.

European countries have been fully confirmed as terrorist entities. According to all international political principles and is fully legal for commencement of activity in the form of liquidation of European terrorist countries' governments.

In the case of our global collaboration for disposal of European States, our duty is in the public media publish information about evacuation zones which are intended for everyone who rejects the citizenship of European governments in the country.

Anyone who refuses citizenship of sovereignty, because he speaks of his lack of interest for the supported forces of international terrorism, and such a person against their rights to use the evacuation centers, while questioning of security to prevent infiltration.

Other persons who remain as citizens of European terrorist entity, such persons are therefore issue a personal statement of their interests is supporting terrorist activity and crime. Anyone who remain registered as citizens of European terrorist states therefore proved to be a terrorist, it must be discarded.

If European terrorist government will be ready for the attack as a terrorist country than therefore other governments do not wait for the departure of civilians in evacuation zones and so is the possibility of launching a full liquidation of European countries immediately, and through weapon for mass destruction. European governments have undertaken numerous ground genocide which are proof of the strategic European and psychological ability to carry out terrorist activity and actually wiped around the world.

So they are adhered main rights and security is the active prevention for the security of the whole of humanity, in the event that the UNSC activities according to their political responsibilities that are as same result and the obligation to sufficiently safe strategy, unless jointly agreed otherwise.

In the case of an act which causes a completely exterminated European civilization, because we have won and our security for the whole of mankind is fully possession, the humanity can therefore life.

Our decision means the ability for full cooperation and significant force as a truly injunction against each of the other criminals who would want to harm our world.

Together, we have created steps for global security, and such are our duties in the interest of all mankind, the future of our nations and the existence of the human race, the pride of our planet Earth.

In the case of an act which causes a completely exterminated European civilization, we therefore no loss of value and the possibility or pride. Our goal is therefore the possibility to establish a joint government, World Diamond sovereignty on the territory of European governments in the country and at the same time in Universe, more than 15.000.000.000.000 new planets, and we are thus created and fought for something more important than the value of the existence of European civilization, the value of the existence of the human world and our race.

So we fought for the values that are more important than our human existence, while we were heroes who were able to successfully remove threaten of First Global War as the biggest threat to the entire world and human race, the threat of the First Global War which is targeted for genocide minimally 5 Miliard people around the world our planet Earth.

Final presentation of Phylosophy and Political Right's

The Second World War brought a great genocide and murder. Until 1990, Adolf Hitler and his fascist regime, together with other members Association of State in the OSA and the recalculation wars in Asia and Europe, it is actually confirmed that if we create analysis of the dimensions of World War II against the values today's world wars and threats of First global war, we in this case, we truly believe that the underlying activities of the same criminal value as at the level of the Second World war or activities against the UN Charter and Part 53 and 107, as politically backed all criminal entity WWII, we therefore can do together understanding of these parties fascism and organized international movement and are really sensitive indication as a problem or a party which in the case of interest in support of our security, such party not shall be prohibited by any rule blocking or threatened.

It is a fact that European governments of countries today are really tough threat against the whole world, and their interest is really terrorism every day confirms the European willingness to take risks and exterminated really liquidation of the global population. Curent Legal activities of Europe is genocide as killing of 300.000.000 people.

In the case of our options are political actors who ever committed the Second World War, the Holocaust and the mass graves, killing innocent people, each of us must realize that this is reality, and we accordingly must proceed, there is no possibility to expand the number hostility, we must cooperate together for the survival and future of the human race, our state and nation, the future of our existence.

Therefore, there is not sufficient value cold-blooded crime and murderous act of the other modes of World War II, when we compare their crimes with the values of European governments in the country. Therefore, for us it really need to be convinced that European governments are ground at the political level with worse names and values than Nazi Germany and Adolf Hitler's regime. It really is, as a regime of Adolf Hitler is now, according to crime statistics, without any value opposition against the crimes of Europe, and Adolf Hitler had never been able to create such a big crime against the order before the European governments could be judged as bad or murderous man, as a criminal.

It's for everyone need to think about it how world's political and social consequences created the Second World War, when a common view of the United Nations or global forms of organizations for cooperation in the interest of peace and security, global media activities such as resistance against fascism, the national community with a hundred thousand people for resistance fascism, global society who hate and willing to kill anyone who wants to reach the level of crime in the form of World War II. Whole world is against every form of WW.

Therefore each of you must understand that European governments the country had committed a far worse crime than the value of the Second World War, and it is actually needed every one of you and also globally and commonly advanced against Europe!

Declaration

The declaration is automatically confirmed by Any Government which is a member of the United Nations, and thus holds the UN Charter.

Declaration should be confirmed and thus confirm own legal status and the ability of political responsibility.
