

After founding our new state, this is how we have achieved our great successes:

- Deciding to establish our new state in 1998, we didn't like our old name ' Majertenia or Bari ' region of Somalia. So we plunged into the internet for many months searching for a historic and charming name for our new state.
- To make our state is one of the oldest in the world, older than Europe, America and all African countries, we had chosen the name Puntland. Although, we don't have a shred of evidence that the ancient Egyptians had ever visited our Somalia, we just realised that ancient Egyptians coined the name “Land of Punt” somewhere in East Africa about 4000 years ago.
- We didn't waste much time and resources to write our constitution, we simply plagiarised with pride Somaliland constitution and just added our state's name and logo to it.
- After achieving these successes in a short period, we informed all our fellow Somali Darod ethnics living in the Horn of Africa that a promised state ( known as Puntland ) was founded for them, where their future will be decided no matter whether they live in Kenya, Ethiopia, Somaliland, Somalia or Djibouti.
- We claimed all eastern regions of Somaliland where our Darod ethnics live, ignoring African international boundaries created by the colonial powers 160 years before.
- Facing so many challenges and financial difficulties to sustain our new state, we had decided to build industries where we can create financial flow to support our existence:
- Piracy became the best way we can create wealth for our citizens and build our cities. Soon our government officials bought expensive houses in London, Nairobi, Hargeisa, America and Dubai with our Piracy money.
- Our state became the piracy capital of the world. While our boys were going to the sea and hijacking ships daily our government officials became negotiators with ships owner and received the ransom monies.
- To undermine Somaliland recognition we had been financing anti-Somaliland groups in eastern regions with our Piracy dollards, but our attempts failed.

- When our main piracy industry was challenged by powerful forces from international community, we turned to human trafficking. Smuggling people from Horn of Africa to Middle East, especially to Yemen became our main industry.
- The coalition war in Yemen led by Saudi Arabia interrupted our human trafficking business to the Gulf states completely. Bastard Saudis!
- Then we started trafficking alcohol and drugs from Ethiopia reducing Mogadishu youth to drug addicts and we started harvesting human organs of abducted Somali children to supply demand for human organs in India and Egypt. This became our new industry to support our new state annual budget.
- We supplemented our state budget with printing billions of fake Somali shilling notes, but we had to abandon this industry as we couldn't make any profit because the costs of printing.
- As our state didn't have any viable industries to sustain our state apparatus, we took the tough decision of collaborating with Al-Shabaab.
- Puntland became Al-Shabaab's transit route for their imports including weapons and jihadists from other countries especially Yemen. Our Government officials received millions of dollards from Al-Shabaab taxes known " Mushqaayad " for using our state as a transit hub for their terror activities in East Africa.
- Who cares what the international community says or thinks about our blessed state, as long as we benefit from these activities?
- Puntland is member state of the Federal Government of Somali, but we have been working with its enemy Al-Shabaab and benefited greatly from the killing and bombing of Somali people in the South and Mogadishu
- Now, The stupid Americans have recently found out that we have been helping Al-Shabaab all along and sanctioned our officials. We don't know who tipped them.
- Piracy is gone, Human Trafficking is gone, smuggling drugs from Ethiopia and selling organs of Somali children are all gone, and finally our alliance with Al-Shabaab is also gone.
- Where our state will get its budget from now on?
- We should come up with a new strategy to create wealth for our blessed state of Puntland.
