

Humanitarian Project Ideas - October 2016 -

Entry Submitted Anonymously at 1:42 PM EDT on October 11, 2016

I want to renovate and repair small rural churches at no cost to the churches.

Entry Submitted Anonymously at 1:49 PM EDT on October 11, 2016

An orphanage or home for children add bldgs on expand an dbuy them enough of their supplies for several years

Entry Submitted Anonymously at 2:08 PM EDT on October 11, 2016

One of my ideas is to provide the funds, which is in the billions, to complete a section of interstate highway that has been planned for a long time. It goes through my community and state and would certainly help bring a lot of business here along with jobs!

A Chosen One

Entry Submitted Anonymously at 2:30 PM EDT on October 11, 2016

This is more like it, sending out positive thoughts.

I want to fix and update ac/heating systems. Replace old washers and dryers with new ones.

Pay utility bills off. Increase distribution and add new items at the food banks

The list goes on.

Entry Submitted Anonymously at 2:32 PM EDT on October 11, 2016

And thank you again for your presence in our life!

One of my projects is to distribute to all the children of the world, a cookie which is a complete meal so that no children ever go hungry again. It will be called LIFE !

Entry Submitted Anonymously at 2:47 PM EDT on October 11, 2016

Some of the projects on my list of projects are:

1. Enable people to grow their own healthy organic food by funding construction and setup of greenhouses together with the equipment for hydroponic or aquaponic systems;
 2. Build big greenhouses for large scale production of organic vegetables and fruits;
 3. Repair, update, remodel homes for people that cannot otherwise afford to do so;
 4. get rid of lots of old vacant delapidated homes - refurbish or replace;
 5. Pay good wages to people to assist elderly, handicapped, or otherwise incapacitated persons with cleaning, cooking, running errands, paying bills, mowing, yard cleanup, etc
- I have read about hemp-crete being used for building. It is clean, breathable, no lime, and saves our trees.

Entry Submitted Anonymously at 2:48 PM EDT on October 11, 2016

My project would locate single parent families who are homeless are living in substandard dwellings. I would provide or refurbish homes they currently live in to above standard dwellings for the families free of charge I would also pay for training or education to the parents so they will be able to support their families in the future.

Entry Submitted Anonymously at 2:48 PM EDT on October 11, 2016

My ideas for Humanitarian Projects are:

In Rhode Island, we have the worst roads and bridges in the nation. I think we are ranked 50 out of the 50 states. We are facing having all of our bridges (i.e. overpasses) tolled in order to generate money for fixing our roads and bridges. The government says they will only toll the "big trucks" because "they cause the damage". However, we all know that as soon as the revenue drops from these taxes (I mean, tolls) or a judge rules it unconstitutional, they will toll cars as well, including small business vehicles. I plan to just pay for fixing all the roads and bridges in the state. I also want to pay for all septic systems to be brought up to code. We have

a lot of wetlands in Rhode Island and we don't want septic systems to cause further damage to our waters.

I LOVE the ideas of Free Cars, Free public transportation, and eat out FREE at restaurants. I'll add to that FREE Farmer's Market day. Your idea made me realize that I could organize this gift with the providers to help all people, instead of trying to find the individuals who need the money. Going to do that in RI as well. Pay deductibles for all "middle class" people who don't qualify for free Obamacare but who have a difficult time paying premiums and who usually have a high deductible. Another person posted about setting up a Family Office to help individuals. My thought here is to help those who come to our church's non-food pantry and try to help them with any expenses they have for the month that would be causing them to come that day. It might be rent, medical bills, veterinary care, food, etc. I'll see if they would like any financial assistance to help get their lives back on track. If that works, then I can expand the program to reach all those who go to food pantries, homeless shelters, etc.

Another thought is to fund the public pension funds in RI. There are thousands of state teachers and other employees who have been mandated to contribute to their pension, but recently have been screwed by our state government, who had to reduce the amount they will get and how soon they get it because the accounts are unfunded.

Outside of RI, I was thinking of helping to retrieve and recycle the floating island of plastic garbage in the Pacific Ocean. I have no idea how a single person would even start something like that. I assume the angels will guide those I need to meet into my life, just as they have been doing all along. -Also One Who Believes

Entry Submitted Anonymously at 3:09 PM EDT on October 11, 2016

Band together (strength in numbers!), buy the Monsanto-Bayer Corp. (generous hostile takeover if needed...) and close divisions -- ELIMINATING GMO's, RoundUp/glysophate, and aspartame/Splenda, etc. from the planet. Forever.

1. set up a fund to pay folks for their time witnessing/attending any and all government-related meetings
2. free educations for prison guards and prisoners, via a computer room hooked up to various schools and universities, free yoga and meditation as well, of course
3. subsidize vegetarian-only menus in all institutions
4. pay food trucks to pass it out for free in poverty-stricken areas, and/or retrofit themselves to distribute from food banks
5. guarantee a yearly income for all organic and bio-farmers, based on acreage
6. set up exchange centers for repurposing items destined for the wastebasket, place next to community landfills and transfer stations
7. help to promote copper-clad farming and home garden tools

Entry Submitted Anonymously at 3:12 PM EDT on October 11, 2016

PROJECT - CREATE AN INTERNATIONAL MEDIA BLITZ TO SAVE THE KOREAN DOGS AND CATS FROM THE HORROR OF THE DOG/CAT MEAT INDUSTRY. SUPPORT OUR DEAR SISTER KIM BY SENDING SIGNIFICANT DONATIONS TO CREATE MORE SHELTERS/SANCTUARYS AND LOVING HUMANS TO HELP THESE INNOCENT CREATURES TO FEEL SAFE, LOVED AND TO TRUST HUMANS.

Entry Submitted by Tasha Pup at 3:23 PM EDT on October 11, 2016

First, may I say that I am loving reading all these wonderful ideas for HPs (Humanitarian Projects)!! It is awesome to finally see "us", the "wanna be humanitarians", come out of our closets, and speak up! I realize that I have been hesitant to do so, on any of these Dinar websites, probably having to do with my own lack of self-esteem.

But I am here now, as are all of us, who are patiently waiting for our "blessing", so we can then act on, all of these wonderful ideas! You know, when I get frustrated with the waiting, I go to my "Abundance List"...and keep thinking of new ways to help others, and add to the List. I have since created an "Addendum", because of all the ideas which keep being suggested, or I

think of myself.

I also want to do a shout out, and say "kudos!" to those who have posted either positive thoughts, and/or HP ideas...(I apologize if I left anyone out...it is not intentional)....to One Who Believes, CV, Ag Man, Soaring Dove, Buckshot Willy, EthericBlue, CapnGriff, Eponymous, Suite11eleven,
So...my ideas are these...

1) As others have said, I feel if we can first address the "needs" of local residents (the town where I live, as an example), then hopefully, they will feel liberated enough, to begin doing what they are passionate about, living out their life path! So first, I want to pay off all the mortgages (and rents) for the whole town. Where I live there are 15,000 people...so I figure it would be about \$3.7 Billion, to do so, but well worth it, in my opinion. I am hoping that, when it happens, the residents will feel like they got a huge "raise", and then will be energized to do more compassionate, fun and innovative things, with their "raise". My ultimate hope is that, after addressing the needs (paying the mortgage is just one idea...many others will be begun, also), then we, as a community, can really become our "true selves", and create and imagine, like never before! And, then the community will have more energy to care for each other, and get involved in our new governmental system, from the grass roots perspective. Hopefully, this new way of doing and caring, will then expand outward, into other towns, cities, and states.

2) Another local idea...is to put ads out to "call all dreamers!" Anyone who has ever had a passionate idea, that they have been unable to fulfill, we will fund it, for them (as long as it is good for all).

3) Someone else mentioned converting to hemp...well, I live in an agricultural, farm, ranch land, area...and I would love to help fund any farmer or rancher who is willing to convert to growing hemp...because, as the other person said, it has a multitude of uses! In fact, it was grown and used a long time ago, then the Cabal made hemp "illegal", because it was cutting into their oil money.

4) As someone else also mentioned...building and creating holistic healing centers...with the latest technologies...including light, color, and sound, healing technologies!

5) As I was working on myself to "act as if" I were Abundant, I realized there were certain areas where the biggest stressors fell away...such as being able to buy all organic food, and all the supplements for my better health. So, I want to create an agency who will fund all people who have been unable to meet their "needs". I am thinking medical bills, prescriptions, food, housing, clothing...any dire, "just to get me over this hump" situations. I think this is the biggest stressor, in my opinion.

6) Convert the local water supply to "structured" water. That is a biggie, in my opinion.

7) Last, is to buy up the debt, of all residents...credit card, I already mentioned mortgages...any kind of debt...another big stressor!

Well, thank you all for listening. I know some of these duplicate some other's ideas, but I thought they might be worth repeating. Love to all of you...I am very excited to begin this new and wonderful journey! Maybe we will meet each other along the way!

Blessings, All...Tasha Pup.

Entry Submitted Anonymously at 3:53 PM EDT on October 11, 2016

With gratitude! I plan to assist veterans with healthy eating and brain rehabilitation using light and frequency technologies and a radical thing called "vegetables". ;-) I want to fund the purchase of conventional farmland to be converted to grazing land to sequester carbon and offset climate change; train people (veterans too) to be organic farmers and place them in jobs with abundant resources to grow healthy food for all of humanity; fund the purchase of "rust belt" factories to create urban aquafarms using solar and healthy water; free energy, solar, water systems; fund the incentives and educational transition for medical doctors to adopt functional medicine and create functional integrative clinics in all medical centers; fund lab testing for all who need testing; teach basic nutrition and cooking in neighborhoods; support community gardening; provide healthy (unprocessed) meals for all, so humanity can feel the love and nourishment we were designed to experience! So be it!

Entry Submitted Anonymously at 4:16 PM EDT on October 11, 2016

I adore the idea of sharing our HP plans! The reality of being a full time Philanthropist AND sharing this wealth in the correct manner is a very serious subject. To whom much is given, much is required.

In my opinion, Nesara and Gesara will be implemented and the monies will be dispersed as fast as possible, but how much time will that take? I urge you all to implement a "911 Humanitarian Program" to ease the immediate suffering of those that lack the essentials such as food, housing and clothing. I currently reside in Las Vegas, Nevada where the homeless population is 10,000. What if a team of Zim holders chose cities and hired a team of professionals to purchase the necessary amount of empty dwellings for sale and move the homeless off the streets? Clean out every family owned furniture , home and grocery store in the city to stock these homes! This can be done in every major city! GLOBALLY! WE GOT THIS!

Simultaneously, other teams can implement the new technology to clean the air, water and soil. This idea just covers the basics, The "911 HP!" I am honored to be given this task. Let's GO NOW!!

Vivre le Rêve.. !

"The meaning of life is to find your gift. The purpose of life is to give it away." ~ Picasso

Entry Submitted by Leenish at 4:38 PM EDT on October 11, 2016

For as long as I can remember, since I was a small child, I have wanted to help our animal friends. I've been wanting to start a rescue farm for those in need, and provide free veterinary services for people who can't afford proper care for their beloved pets. The last few years, I've thought that if I ever had the money, I would also build apartments on my farm to house any homeless folks willing to help me with the daily needs of the farm.

Now that I know about (and am in possession of) ZIM notes, the plan has expanded greatly! I would not only start my own farm(s), but I would be able to financially assist already established rescue farms all over the world! I would love to see all kill shelters shut down, and all beings in any type of shelter have homes where they are as loved and free as they deserve to be. I feel that by doing this, I could provide homes and jobs for many homeless/low income people, as well as serving our animal friends that so often get left behind. A lifelong dream about to come to fruition? I think maybe so!

Many thanks to God/Creator for giving me this opportunity. My heart is overflowing with joy and anticipation! Namaste everyone!! In love and light, Leenish

Entry Submitted Anonymously at 4:39 PM EDT on October 11, 2016

Job Creation/Education:

- 1) One of my projects is to build a foundation for Single Mothers that don't have a high school Diploma! In the building will be a Full time Daycare for Toddlers for the Mothers that are enrolled in the class!
- 2) Open a daycare center with affordable prices with field Trips and regular agendas to prepare them for their future !

Entry Submitted Anonymously at 4:39 PM EDT on October 11, 2016

- 1} Make a generous donation to my church to help with missionary work both here and abroad.
- 2} feed the children, my heart breaks when I see starving children.
- 3} make a donation to the wounded warrior project.
- 4} UNICEF, United Nations Children's Fund.
- 5} Doctors without Borders.
- 6} World Wildlife Fund
- 7} National Wildlife Federation
- 8} Mission Blue – protect health and productivity of the ocean
- 9} Water.org Safe Water and sanitation solutions – freedom from women and children hauling

water

10} Aid the farmers and ranchers; provide more efficient practices and more humane treatment.

11} Business that provides basic survival packages, self efficiency literature and programs, stores for items to become self sufficient

12} Getting America off the power grid – solar to unplug and freedom from dependency

13} I also would like to provide jobs for ex-military and Felons.

These people seem to have the hardest time to find jobs, the way I would want to do this is through agriculture, building a dairy farm would be a good first start, I see this as a good first pilot project, these jobs require several different types of professions from grounds keepings to carpentry to plumbing, manual labor and all of these jobs would be a beginning place, Braums is a good example, it's possible that housing would have to be provided but it would get people off the streets and put a roof over their head, give them a reason to get up in the morning and teach them a trade that might help the find employment elsewhere or stay with the company, of course every felon would have to be vetted through the probation and for the military people the VA and these jobs would not be limited just too those groups if started in smaller communities and towns where people may have to drive 20 to 30 miles one way to work or job opportunities are very limited. This would also help the rural areas and maybe get people started back farming and ranching again, I know every time I go back down where I used to live farms are very few and good pasture land and fields are grown up and not maintained, this could be a good jump start to get these areas back to farming and ranching if there is a market where they could get a fair price for their goods, also I have no interest in becoming a land baron let them farm and ranch their own land or possible lease because the stock is like everything else they have to eat. Somewhere down the road start a processing plant, I would want to be able to train the people to utilize every part of the animal where there be minimal waist, I see where these could grow into a jobs that would offer a 401K, health insurance. This would relieve some of the finical burdens on the County, State and Federal governments by taking people off the streets and making them taxpaying citizens, also this project could grow to each county and state across the US that would provide good holism food products at and the smaller family farm may start playing a bigger part of the economy by starting a local Farmers Market where people could sell or trade the produce and products they had grown or made themselves.

15} Fund and build affordable housing and provide medical help for seniors citizens, veterans, and low income families.

Entry Submitted Anonymously at 5:00 PM EDT on October 11, 2016

I am a firm advocate of the elderly. Especially those who have been left alone without resources for their own care and livelihood.

Older women who have not learned to fend for themselves suffer the most. I would make sure they were financially taken care of. Have their bills paid, homes paid for and secure, healthy food and vitamin supplies provided for the rest of their lives.

Depression and futility is a major DIS—EASE that occurs when one has no hope for a better, healthier life. I have a person in mind and plan to start with my own family.

2. Veterans suffer from post traumatic syndrome. I plan to set up a fund that would assist them financially and also with psychological treatments, FREE of CHARGE. so they can re-enter the mainstream of life instead of taking their own lives!

3. As or the wildlife and the animal population, I would fund organizations that use their money to help take care of and place a; animals that have been abused and abandoned. Having my own animals, I know how costly it is to take good care of them. They give us so much unconditional love and attention. Rather than see them destroyed, I would fund no-kill facilities and provide excellent wages to those caring for them. Healthy food and clean facilities are imperative...&require funding. I will provide the funding necessary, starting with local shelters and wildlife habitats.

4. There are so many humans suffering from Cancer, autoimmune diseases, Lyme and tick

borne maladies, all caused by the greed of Big Business and Lobbyists who do not care about humanity except for their own gains. There are Holistic approaches to cure the incurable yet most can not afford the High Cost of these remedies. There is no reason why should limit cures only to the Wealthy. All people should be able to live healthy, productive lives. I know a friend who had to declare bankruptcy to pay for treatments and is still suffering from residual effects of Lyme. This is not to be tolerated. When I have the means, I will help fund more affordable or even FREE treatments. Even trying to keep myself healthy is very costly and I struggle financially to keep up. I am so grateful for the upcoming Blessings for us all to help ourselves and each other. More to come! In Love and Gratitude! A Faithful Servant

Entry Submitted by Shannon at 5:32 PM EDT on October 11, 2016

Animals – land, air, and water. The other species with whom we share this planet, over which humans have assumed domination, control, exploitation and horrendous abuse – torture, imprisonment, neglect, and murder, of them. My intention is to network with other organizations and individuals to remedy the current situation, so these species can now live in freedom and thrive on this planet. That will involve rescues, medical treatment, therapy, caretakers, transportation (very carefully) to new homes created as sanctuaries.
Thank you! Shannon

Entry Submitted Anonymously at 5:47 PM EDT on October 11, 2016

High schools with FFA Clubs (Future Farmers of America) can find farms in need of extra help , then the students can learn firsthand , earn money paid by the trust , and increase the farmers product at the same time.

Entry Submitted Anonymously at 5:48 PM EDT on October 11, 2016

The problem has always been corrupt legislation. Once we do away with all the lies, the truth will set us free! Fossil Fuel pollutes Hemp regenerates! Hemp Plastic decomposes in months not centuries! Enzymes created in the roots of Marijuana heals and nourishes soils. Cannabidiol pre-exists within the the immune systems of Humans and heals the body of many of the manufactured diseases that exist in the world today. I could go on and on, but the bottom line is we must get the old line of Cronyism out of our State and Federal governing bodies.

Entry Submitted Anonymously at 5:54 PM EDT on October 11, 2016

I would like to offer down payment assistance programs for first time home buyers

Entry Submitted Anonymously at 6:21PM EDT on October 11, 2016

"To clean up the Fukushima Radiation "spill" that is still pouring out 300 tons a day into the Pacific Ocean and has been doing that since March 11, 2011!

The whole Pacific Ocean is radiated (check out Google or Yandex for map of radiation contamination). I see this as a MOST URGENT category!" Always in the Light

Entry Submitted by peteaxehandle at 6:25 PM EDT on October 11, 2016

finally some people wanting to organize. if we don't I am sure we will be stepping on each others toes. I'm sure most of us want to put an end to homelessness in the republic, if we aren't organized we will surely waste a lot of money. my thoughts are to buy and rebuild old rundown houses putting people to work, but that doesn't solve the immediate problem they need shelter now. so I was trying to figure out what to do and what I think might be the answer is to buy motels, hotels with restaurants to keep them warm and fed while being transitioned into their new home. and yes we can just buy new homes to and that is good keeping in mind that they will also need a car [possible EV conversion], furniture, clothing and money in the bank to get going again. personally I cant bare the thought of children sleeping on the streets. all consideration must given to this crisis first. so, a few thoughts, does anyone feel like jumping on the band wagon?

yes great start everyone. the key word here is going to be organization. about downing is going

to hear feed and shelter the homeless a million times. which is good, good hearts, but if we could get organized we could have this done in a sweep a week after we are hydrated. and move on to the next beautiful project. some thoughts: we cant buy Monsanto, Baer, Dupont, Phipper, or any of these cabal organizations it would be putting the money in their hands. holistic hospitals is a great idea maybe with housing and security for the doctors, perhaps one in every state. maybe we should get our ideas down and everybody take a state [2 or 3 for California] same for texas perhaps by per capita.be careful giving to charities we all know the canton foundation and the red cross stole the money from the Haitian people, it might be wise to go straight to the charity don't do it through a third party. Peteaxehandle

Entry Submitted Anonymously at 6:33 PM EDT on October 11, 2016

---Since new homes for the homeless will likely take several months to complete, I was thinking of shipping large amounts of supplies to homeless shelters that can go around and distribute (such as care packages of basic hygiene items, transit tickets, grocery store gift cards, running shoes, large backpack, bicycles, and mini bicycle campers for portable shelter until the newly built housing is ready for them. However, the organizing and importing aspects of this would require a large team of experienced people.

---I started my own business last year for the first time ever, and I can't believe how quickly I spent my business loan of \$70,000. So I can relate to how expensive and difficult new businesses are to get off the ground. Therefore, I'm thinking that it would be a great advantage for all small business owners to be able to receive a free \$100,000 business grant. Free and not to be paid back. For everyone worldwide who either has a current business or a great future business idea.

---Since deforestation has been negatively affecting our entire planet and atmosphere in so many ways, it would be great to hire millions of tree planters for every town, city, and nation, and pay them twice the previous rate (since it's very difficult work). This could provide millions of jobs for several years and help to rehabilitate the earth as well.

---Free housing complexes, or condos for those that are sixty years old or older. These units would not be owned or rented. But lent out to whoever needs them. They could be built like villages complete with theaters, shopping, banking, etc. This could be worldwide.

---Employment agencies that send free help to senior citizens. This could be part time casual work for high school students and college students. Whether the senior citizens need deliveries, or rides, or massage therapy, or help with fixing items, cooking dinner, computer lessons, private language lessons, or even simply an hour of companionship.

---Regular crowd funding. We could all take turns funding everyone on Kickstarter, Indiegogo, and Gofundme.

Entry Submitted by Karolann Hoeltzle at 6:39 PM EDT on October 11, 2016

I have several ideas, this is the latest...Hire workers who will answer calls as "Homefront Clean-Up" service technicians. Hire property opportunity investigators, and an office manager to do the intake and dispatch documentation. There are many ways to help people clean up unwanted and unsightly home front debris, but who do not have the ability or resources to get it done. "Homefront Clean-Up" will be able to come to the rescue. The opportunity investigators will be able to travel, identify potential avenues for service, introduce the services that the community based company will provide free of charge. it can become a win win situation for the client and the community. There will be several technician teams trained to provide courteous and rewarding services for any size clean-up. Dumpster services will be contracted from local trash haulers. " Homefront Clean-Up" will have it's own trucks and rent or own its' own equipment. The clean-up opportunities are too numerous to mention in our PA northwestern location. I would like to see this business become well known and grow into other communities where additional jobs will be made available, and additional communities begin to become brighter. Karolann Hoeltzl

THE NEW SCORE: To help would be entrepreneurs and business minded individuals develop business plans, programs and directions from retired professionals in taking their projects/ideas from start to finish.

Help single parents, battered women and kids build a foundation to become functional citizens in life. Shelter, support and prepare for employment i.e., GED, self confidence, physical appearance, attitude adjustment, communication skills, etc. For the kids provide tutoring, counseling, self development, mentors, college scholarship.

Entry Submitted Anonymously at 6:44 PM EDT on October 11, 2016

Early 80's : I was a victim of the farm crisis in the 80's, in the state of Mo. My wants , with the help of all banks, all city halls, all the court houses n the help of all agriculture resources, to locate all the families that had lost there farms, due to the farm crisis, to give each head of the original surviving family's between 500,000 to 1 million with a thought out plan, for them to help all the immediate family members, of which their parents or grand parents were taken their life n hard work, away from them because of high interest rates (18-20 per cent) . I know a personal friend in Henry County , Mo. that took his life, because of losing his pig operation on the farm, felt destroyed, betrayed by banks and/ or GOVERNMENT. I would appreciate any n all advice, to accomplish this, (My wants), to help million of families, recognize the fact that there parents n grand parents, were hard working, not foregotten important people that gave their wants, to their children n grand children.

The Mothers n Grand mothers worked their gardens, canning food, for their families, to live though the winter, They are the original organic farmers. Unless you have been brought up on a family farm, this probably does not mean anything to you, just remember, the nx time you go grocery shopping, some where, some body, had to grow the products you are enjoying now, at dinner time. Thanks

Entry Submitted Anonymously at 7:17 PM EDT on October 11, 2016

I want to donate to The Humanitarian Project They work with third world countries bringing health and nutrition. They also are working on a cure for cancer and reseeding our crops with real fruit and vegetables(back to non gmo seeds)

I also want to set up a farm for run away teens and children to have a safe loving place to come to when their families do not take care of them.l

Entry Submitted Anonymously at 7:46 PM EDT on October 11, 2016

#1 is to go hospitals and doctors offices that do their own surgical outpatient surgeries and set up a plan so thtter who they are. I just had a recent experience where I had a very serious accident and found I was not insured because it was now considered an outpatient surgery. Hospital wanted 8,000 dollars before they would do the surgery. I was fortunate enough that I qualified for the charity that was available. But I never want anyone to have to be concerned about how they are going to get the quality care with top specialists that they need.

#2 A positive living environment which includes but not exclusive to: Housing, education, babysitting, support along with other needs for single parents trying to get ahead. Also programs to include helping those who have lost hope that they could ever have a quality life.

#3. Heroin addiction is rampant here in the US. Yet finding a quality healing center that actually addresses the addiction problem and. cures is non existent here in America because every one of them has been forced out of the US.

I plan to bring them back and until that happens pay to have the patients sent to the best place I know of where they are treated like a true patient and cured. And also not just cured but taught how to live a healthy productive life.

Once cured and ready to leave the facility, then they are offered education or training to lead a productive life.

Entry Submitted Anonymously at 7:56 PM EDT on October 11, 2016

I live through Katrina, but it took our city years to get close to being the same. I want to assist people who have no flood insurance to rebuild their homes. The government never gives you enough to get it right. Also control the cash to contractors. Many were robbed of their funds by bad contractors who took the money and never did the repairs. This will be in Louisiana with the recent floods in areas that never flooded before and in the Carolina area where the rivers are overflowing from the hurricane.

Operation Smiles - I will donate to these wonder medical people who go world wide in fixing children with clap lips who are made fun of because their parents cannot afford operations for their children. Habitat for Humanity - rebuilds homes all over the country for low income people. The labor is free but they need funds for the materials.

St Jude Children's Cancer Hospital - donate because they do not charge anything for their services including the parents who stay with their children while are treated.

Get a list of home owners who are in foreclosure and will loose their homes. I will pay their mortgages in full so they can keep their homes. Work with the utility companies who are ready to shut the lights off because people cannot afford their bills. Donate to food banks like Catholic Charities and Second Harvest for free food for the community. It is hard to wait and be patient to get started. I have lived through hard times in my younger life and want to help people as much as I can. Go RV!!!

Entry Submitted Anonymously at 8:02 PM EDT on October 11, 2016

I want to build and set up free dental center for pediatric to senior citizens, to receive free dental care. The clinic will have it's own lab and make dental crowns, bridges, dentures, caps, etc. Dental implants are a priority consideration because better than dentures, but have holistic dentist to do the implants so that no nerve or body organ is affected by implants being installed to create organ symptoms later on.

Also donate to Schreiner's hospital where they treat children absolutely free. I was a nurse and often suggested to parents with very sick children to check this hospital out. each time the results were wonderful and the parents received free housing and meals.

Entry Submitted Anonymously at 8:13 PM EDT on October 11, 2016

Here are the 5 main HUMANITARIAN PROJECTS I will fund when the time comes:

1. Aquaponic Farming food production
2. Water from Air
3. Free Energy mass productions
4. 3D PRINTING
5. LIFI Internet technology communication

In Love, in Light and in Unity Consciousness.

We have a 4 year old grandson with Autism. Do to the lack of money and poor coverage from Medicad he has received almost no help. We, with our Zim, are going to provide physical, speech, and occupational therapy for under privileged autistic children that is so critical in their early years. We also want to provide service dogs to these children. This is our main goal. Other projects include supporting a poor orphanage in Nicaragua. Also, setting up help for foster children that are kicked out of the system at 18. We would provide living expenses while we pay for vocational school.

1. I want to give first responders a raise.
2. I want to be a private investor to other humanitarian projects especially the ones in third world countries.
3. Help veterans the best i can financially.
4. The best one is bless my parents financially because i know they will help other people that i don't know.

Entry Submitted Anonymously at 8:58 PM EDT on October 11, 2016

We are also in the final stages of development of hydroponic and aquaponics food growing, which is the growing of fruit, vegetables, and fish in completely controlled environment. However, we will be using only green energy, most likely solar and geothermal power, and we will be recycling and filtering our water supply so that the program will only use about 10% of the water that normal plants use. We have existing negotiated contracts, as well as interest from other parts of the world. These facilities can be built anywhere there is a water supply, regardless of the quality of the water, or the availability of power grids. Our project encompasses the three things that are truly humanitarian, food, green energy, and job creation! If anyone has interest in further info, we would enjoy the conversation!

Entry Submitted by KPL Foundation Trust at 8:58 PM EDT on October 11, 2016

I want to contact St Jude hospital in Memphis and tell them I want to fund the hospital cost of operations every year. Then I want to ask them for a list of patients that need help in housing and I will build them a house to live in free of charge. Then I have a foundation plan to build houses and find struggling young families and put them in those houses. They will have to pay a payment to an account in which they will work with money advisers to invest and be shown how to save for their family future. There are so many young kids that get out of school start having children and can't and or have never been taught how to save. This program will help them with that. After 5 to 10 years living there making that payment they will be able to put the down payment on a brand new home that I will build for them and the great thing is when I get done building the home of their dream it is paid for. God is good all the time. They will not know that last part will happen. That is what they get for working hard and saving for 5 to 10 years.

- Housing for single parent households. New furnishings. Automobile + insurance. Medical & dental insurance. Education for parent. Trust fund put in place for children for education. Childcare for after school with qualified tutors. All food & utilities paid as long as parent in school. Bank account.
- Repair or replace housing for elderly.
Sitters, house cleaners. Drivers for appointments, shopping. Bank account.
This to start in my neighborhoods, then Counties, then my states. Plural because we live in 2 states.
- Our Church supports mission projects in New Mexico for Navajo Indians.
Housing. Churches. Medical facilities, also schools.
Supply funds for existing projects for schools & churches & medical facilities in Honduras.
Bank account. Roads & Bridges need repairing or replacing in counties. Historical Buildings need refurbishment in county. Cancer treatment centers so patients won't have to travel so far. Free treatments. Family facilities near by. Free also. Pay all County debts.
This is only a start. I am ready to begin.

Single payer Uber for all in need of transportation

Entry Submitted Anonymously at 10:17 AM EDT on October 13, 2016

A few projects that can be followed upon rather I intend working if given a chance:

1. A pool of e-cars for people to commute to their offices, Schools, colleges...
2. Involving military veterans for managing dairy products. Milk and distribution to societies.
3. Involving military veterans in managing and maintaining the homes for the elders, pensioners.
4. Enabling cluster of villages adjoining the cities to bring their farm produce, Vegetables,

handicrafts etc in weekly haats(markets) Directly without any middle level handlers.

5. Provisioning and enabling the townfolks with a conservancy manpower and include the residents themselves for Swach Abhiyaan (Cleanliness drive), thereby generating employment.

6. Provisioning of employment for swach force to clear the railway tracks of the muck and filth surrounding these place

7. Provisioning of alternative dwelling units for the population that encroached upon the 60 meters « no construction zones » by the side of railway tracks.

I want to purchase healing machines and place them in a mobile home to bring them to small communities, old age homes and native reserves and other locations to help heal people.

Entry Submitted by Gena at 6:30 PM EDT on October 16, 2016

I live just outside of Chicago... 30 miles west.

Homelessness has always had me by my heart strings...I have always helped anybody in need ...my last dollar would go to them...for I always knew that God always took care of all my needs

...and still does...I Am very grateful indeed. Back in the early ninety's I was calling around to start up a way of taking these people of God off our streets, and give them their dignity back.

Letting people know to « Stop turning your cheek and pretend that they don't exist !».

My thoughts back then and now... were to buy up abandoned apartment buildings...hotels etc... Re-store and furnish them with bedding/beds, furniture, clothes, etc...from donations from our communities.

Help from many diff. support groups to help re-integrate back into society. all at no cost.

A dream that has pre-occupied me lately ...is to buy a hotel in most large cities or any areas for that matter where needed. Bring them all in out of the elements...and give them the VIP treatment ...The hotel would run as usual with employment the same or less...and they would have daily room service, cleaning and food service...abilities to use all accommodations ...pool, work out rooms...stores...restaurants, cleaners...etc. while we build and find them their own homes. I would pay the staff extra for their part in helping our humanitarian project.

Also to start in my area and then keep branching outward and fund all families in need ...cars..homes renovations roofs...new siding..monetary and so on...

infrastructure rebuild... schools.. churches ..streets ..buildings...parks...forest cleanups of downed trees bridges etc

And to visit food pantries.. people shopping in low income stores...driving troubled cars or on bikes... and hand them an envolpe of cash or check, with enough means to live as they should have always been living....with no worries and joy to be alive. And say to them ... This is a gift from OUR BEAUTIFUL GOD to YOU... and to pay it forward someday soon. even if its only kind words to another in need, or a smile of LOVE from the HEART.

In love and Light ~ Amen All are ONE Gena

1. I would like to help single moms get an education without causing entitlement. Working with people of poverty now, entitlement quickly becomes an issue when things are given for free. So my idea is to pay fully for college and housing for one year. Each year after that they pay a percentage more. They would take classes in addition to college on finances, relationships, parenting. They would also be required to volunteer a few hours a week.

2. I work with an organization in Ghana Africa and I want to give them a sanitation infrastructure as well as build a high school and fund teacher salaries for 10 years.

Entry Submitted Anonymously at 6:47 PM EDT on October 16, 2016

By 2050 the world will not have enough food to feed the world.

What I want to do is build a greenhouse by 5 acres by 3 acres, 4 floors high.

The bottom floor will be growing fish. The other top floors will be top vegetables to grow, peppers, tomatoes, lettuce, beans, okra, etc.

May go 5 floors high with rabbits, chickens on top floor so smell won't be bad.

Will build one by every big city. Cost \$25 million.

Entry Submitted Anonymously at 7:29 PM EDT on October 16, 2016

Buy up as much stock in Monsanto, get on the board, stop them from killing bees and forcing GMO into our food.

Purchase "problem child" properties from those who refuse to repair, upkeep and control their tenants. Once purchased, either renew the property to house those you know who need help or tear the building down and plant wildflowers and clover for bees.

Walk into any laundromat, spot a senior citizen, chat them up, go buy them a new washing machine and dryer. Have it delivered and installed. If they need help with accessing it due to poor housing design, fix it for them. If they need help paying for detergent, buy enough stock in Proctor & Gamble that the dividends will keep them in detergent for the rest of their lives. Stock stays in that family and cannot be sold per agreement with recipient.

Contact the warden of your state penitentiary, ask which prisoner is due for release and would be an exceptionally good candidate for help. Give this person a good used car, a decent wardrobe to go job hunting in and three month's worth of food and prepaid housing. This gives that person a solid start. If they are unemployed, keep them safe and fed but push them to get hired. Give them three months to get a job. Warn them that this is temporary, not permanent.

Help those in your community who are eating just one meal a day at your local soup kitchen.

Volunteer there, find out who needs help and then buy them enough food to get their place stocked. If they are unemployed, keep them safe and fed but push them to get hired. Give them three months to get a job. Warn them that this is temporary, not permanent.

Toys for Tots, backpacks, winter coats, boots, gloves for kids.

If it is still standing, contact the school where you went as a kid, find out what they need to make life better for the students and teachers. Focus on things that aren't tech related as this could become a drain. If the place needs landscaped, powerwashed and painted, hire it done.

If the kids need help with science, math and English, hire an after-school tutor.

Pay off past due property taxes for those that you know.

Provide a \$12,000 annual scholarship to the kid that wants to go to an in-state college and help them do it.

If you see a homeless person, don't be afraid to ask them what they need. Help them with food, hygiene, safety and housing. Put them in touch with every volunteer organization that is available in your community so they can begin getting a foothold towards a job. Find them a shelter and get them placed so they aren't living in frigid conditions.

Pay off the student loans of every member in your extended family.

Hire Vets who are staying at Volunteers of America homeless shelters to do work around your

home and business. They need the money, would like the work and it would give you a chance to help our own.

Buy as much land in the Amazon Rain Forest as you can afford.

Contact your local Goodwill, ask to speak with their employment counselor. Offer to help Goodwill by paying for training, licensing or education for those people who are lacking just one semester or one certification to gainful employment.

If you know of a person who is in a very abusive situation, pluck them up and dust them off! Reset their life by moving them out, getting them transportation and leaving them with enough of a financial cushion that they can function on their own without the economic choke of their abuser. Your local SPCA and no-kill shelter always needs help with utilities, postage, pet supplies, meds, leashes, toys and cleaning supplies.

If you know of a family who has a child or spouse that is dealing with a terrible disease, quietly pay off their mortgage - you will have saved them from ever being homeless and the stress of that big bill will make life sooo much easier for the caretaker.

Spend time volunteering at a local senior citizen center. You will suddenly find out that many of our elderly are not making it and they are too old to work. Help them by buying food and getting their utilities paid up. Find out what they have in terms of income and then quietly purchase an annuity to make up for the shortfall. Annuity stops at their expiry.

Pay to remove stumps from public property, notably the parkstrip between the city sidewalk and the street. Offer to help renew an aging park by installing either a new gathering place, updating the bathrooms and drinking fountains or putting in a new ball diamond/basketball court.

Pay for the groceries of the person behind you without ever letting the cashier say anything until after you've left. Do this for senior citizens and single parents.

Once a month from March through October, plant a tree where one is needed.

Entry Submitted Anonymously at 7:49 PM EDT on October 16, 2016

I want to close all refugee camps in the world, including Haiti.

I will do whatever it takes to give the current refugees a home, a job, and a community.

Each refugee/family will have an interview and have the opportunity to be placed elsewhere in the world, with a home and a job, or to stay in the area. Those who choose to stay in the area will be put to work building the new , city/community. This community will eventually have all of the infrastructure needed, including but not limited to: schools, businesses, homes, hospitals, medical offices, roads, internet, phone service, areas to grow food, animals for farming, a food distribution system, clean water, sewage disposal, security.

Entry Submitted Anonymously at 8:58 PM EDT on October 16, 2016

This is an immediate need for those displaced or totally devastated by Hurricane Matthew Housing, food, clothing, hygiene products (from babies on up to elderlies), cars, medicine, school supplies, etc...

This is to cover those outside the US as well as along our southern states.

Entry Submitted by Kathy at 4:19 AM EDT on October 17, 2016

There are so many places to go but my heart is with the animals. They can not speak for themselves, so I will. Puppy mills need to be shut down. There are three rescue organizations (2 in the USA) that could use a hospital on wheels. Another big problem (one of many) is bait dogs. There needs to be Much tougher laws for mistreated animals. There are no words to

describe what they allow to happen to bait dogs. I would like to work with Vets and get animals fixed at no charge to people. Kathy

Entry Submitted Anonymously at 6:33 AM EDT on October 17, 2016

I do not have any currency to exchange but have ideas.

Food growing network all organic/healthy meals cooked from it/distribution to the most needy. Health assessments for all who need them/ and natural cures and healing via all the natural resources on this planet including mental health wellbeing. Healing camps for everyone to come together and be treated and restored. Care for the sick and dying and the community coming together for them in all ways. Mentors for all that need support in this life ie money/health/mental/wellbeing/diet/work/education. Clean water/unpolluted land/air projects. Housing projects/community living for all. Basic income for all. Technology for all to communicate with the whole earth free.

Education projects to tailor ability rather than everyone treated the same and to learn about real life and the the importance of love and and friendship. and to find your real abilities.

Elderly wellbeing and care /diet /mental health/ social/support.

Entry Submitted by G.R. at 8:23 AM EDT on October 17, 2016

Hello my dear friends, I thank you for your service, I am a holistic life coach and producer of 432 hz dance music ; I thought it is interesting to share this info with you about me.

For obvious reasons I prefer to be anonymous, if you decide to post the projects I have in mind. These are a few of the ideas I am working on:

- 1 Electra Free Energy Invention that will be able to replace electricity plants using carbon polluting the atmosphere. Invention is already accomplished and a team of 12 people waiting for the fund.
- 2 Factory with natural clean spring water for distribution. Complete business plan terminated.
- 3 Creation of SUSTAINABLE Holistic Centers using Light Technology. 12 in various places around the world connected with Teleportation machines. These will become Galactic Hubs where ships from our Galactic neighbors will be able to land.
- 4 A company that is dedicated in buying Keshe's products Health Pen Belt Magrav for house or car and advanced technologies for clean water alkalizing machines donating to specific areas where the knowledge didn't reach yet.
- 5 Feeding the poor in celebration with a moving circus of artists to entertain them while they are been taken care off in every sense each and everyone by donating them money and education to be happy in their lives with true understanding of Our Ascension process
- 7 Modernize Villages in need. These can become the center for future cities replicated models of Jacques Fresco's Venus Project.

Namaste & Aloha G.R.

Entry Submitted by David Brown at 8:25 AM EDT on October 17, 2016

Simply giving money to people in need, doesn't supply a long term solution. In fact it may hurt people versus helping them. Guiding people and providing tools to learn how to be self-sufficient, versus free hand-outs is crucial. Education must be part of the component.

For First Nations Canada, I have several considerations to help achieve a truly self-sufficient program:

1) Provide immediate necessities that impact lifestyle first.

a) New technology for treating waste water that does not require chemicals. Much lower cost to operate as there are no chemicals to purchase, less training on how to handle and maintain the solution. Poor quality drinking water is a major factor in health issues. Provide quality drinking water, and people have a higher capacity to learn and assimilate information.

b) Renewable energy solutions to replace diesel generation at 100%.

Technology is now here to do this. Diesel generation costs between \$.60 per kWh to \$1.50 per kWh in remote communities where you have challenges bringing in diesel fuel. Generators also require major upgrades as they are over 30 years old in many cases.

c) Grow food locally in Vertical Farming operations. Technology exists to increase yields 100X and more, with 95% less water and all energy supplied from renewable resources. Local people maintain the operations, thus creating jobs. Less product is shipped in by air, thus lowering costs of distribution significantly.

d) Housing designed and built by First Nations. Crucial to use housing that is not traditional wood materials. There is a tendency to burn the wood in fires. Using materials that will last 100s of years and withstand tough environmental challenges offers an area of building they have not utilized.

2) Long term preparation through education.

e) Boys And Girls Club facilities for young people to be active in sports and learning skills. A straight school setting often does not attract young people to get involved.

Taking Ownership of their situation versus someone else, i.e. Cdn. Government.

e) Ownership and development of all projects must be carried out by First Nations people with the guidance of people who know how to make this work.

The cost to doing this is well in the \$100s of billions, as this is a complete rebuild of a society that has essentially been neglected. Filling in holes of a sinking ship doesn't provide for a healthy long term solution.

My company has been working with developing an extensive array of:

- renewable solutions - waste water and waste treatment solutions - vertical farming
- coordination of housing development with a First Nations builder.

Serious investment in infrastructure and staffing is needed to support this development, plus to pay for the technology for communities. Its impossible for 1person to carry this out, so I'm putting this before the people who really care about changes. This program is also ideal for the Haiti people, who have lost everything.

Thank you for your prayers and vision. Sincerely, David Brown, President **EnShift Power Inc.**

Entry Submitted Anonymously at 10:05 AM EDT on October 17, 2016

I want to build small, cluster community pods for the disabled and elderly.

Each will have their own private pod in a community with a central GH to grow their own healthy foods and gardens. In climates where heating is a necessity, use geothermal or solar.

Pay for an on call medical person. ALL communities I build MUST be pet friendly. Too many elderly have no family except their pets and they need the companionship and love of their pet to live with them. For larger spaces, create a farm sanctuary for the abused/neglected larger animals. Bring the kids in every day/week to learn from the elders and help with the critters and the gardens.

Buy up all lands destroyed by industrial/agricultural abuse and neglect and disease. PLANT HEMP EVERYWHERE to heal the lands and water of the toxins of industry. Establish bee colonies everywhere. In vast areas of agricultural or industrial damage, return ALL lands to the indigenous grasses, trees and animals. Give them their safe, habitat back. Release ALL wildlife from zoos, dolphinarium and any confined display back to nature in a vast open sanctuary. Thank you and Blessed Be

Entry Submitted Anonymously at 11:19 AM EDT on October 17, 2016

I have a project based in my experience in building houses for others.

Entry Submitted Anonymously at 11:51 AM EDT on October 17, 2016

1. ORMUS (orbitally rearranged monatomic elements) GREENHOUSES

food that is grown with ORMUS is exceptionally larger with more vitamins and minerals.

An orange grown with ORMUS is the size of a cantelope...a walnut is the size of your palm.

www.subtleenergies.com

Operation of these greenhouses will be 12 months, and operated by free energy devices

2. DRUG AND ALCOHOL REHABILITATION CENTERS beginning at the root of the

problem...patients will be fed a HEALTHY DIET (ORMUS rich foods)...along with

BOOMERBOOST PRODUCTS neuroplasticity...a meditation process that actually REWIRES

THE BRAIN structural integration...properly align the body to help open up the 7 chakras in order to reach enlightenment. People have been taken over by the drug epidemic, and they need our help.

3. CROSS FIT TRAINING AND WELLNESS CENTERS

Huge training centers that are equipped with a variety of things

- a) elderly and disabled area containing similar equipment that one would see at physical rehabilitation...along with staff to assist
- b) huge kitchen area where people can learn how to ferment, can, freeze dry
- c) a toddler area for children to exercise and play
- d) 2 tracks...one for walking and one for running
- e) saunas, showers, and lockers
- f) coffee and smoothie bar

Denise

Entry Submitted by GregON at 1:03 PM EDT on October 17, 2016

Hi, this is GregON, in Spokane. I have 2m VND given to me by a good friend who wants to see me get my White Tiger Farm project underway, and replicated in many nations to end thirst, hunger, homelessness, and energy deficits, with existing technologies and sustainable materials I have access to. While we are all tired of this continual roller coaster of misinformation, disinformation, and outright lies, regarding the IMF GCR/RV, we are still here on the ride, hanging in by the skin of our teeth in many cases. As a Vietnam vet, and veteran of two services, honorably discharged from both, I left the Vietnam 'conflict' determined to find viable answers to solve many problems that cause local, regional and international conflicts, and I found them, now my mounting frustration is over how to deploy these proven answers, without getting killed by the 'monsters among us' who control our energy, food and water resources, as what I and my group of determined friends are intent on doing will literally 'pull the plug' on these special interest groups who are determined to hold onto their power as long as they can, even if it means killing innocent people who dare to oppose them.

<http://whitetiger511.tripod.com> is my site online, I hope those of you reading this far will take a look when you get a chance. I am here to tell you that there is no shortage of opportunities to provide clean energy, food and water to people, their communities and nations in need of them, along with sustainable, plant-based materials to build homes with, and to fabricate with the new 3d printing systems now available.

Entry Submitted Anonymously at 2:22 PM EDT on October 17, 2016

To help provide to Service men and women transportation Van Converted so they can drive because of injuries. Food Banks. School Scholarships. Childrens Hospitals. Homeless Housing. Cancer Centers of America. Medical equipment for Doctors. Rehab older people's homes

Entry Submitted Anonymously at 2:47 PM EDT on October 17, 2016

My ideas have been developing over 3 1/2 years when I finally realized just how much even 1 Zim note could do. Not many people will talk to you unless you actually have \$\$ in your hands. While waiting for the RV your project list can become your "To Do List". Check out things like zoning, annual reports, local campaigners for election to sound them out about your ideas. Check averages for rent, utilities, construction costs, etc.

My list begins with the easiest &/or most urgent needs in my community. I began locally with our county library system, now closed on Fridays, computer classes suspended for seniors, as well as pre-school, lectures, music and other programs.

Here's 10 more:

1. Replacing a bridge connecting 2 adjacent towns which has been in disrepair for many years.
2. Fund expansion to Experience Works which provides part time jobs for seniors
3. Rural retreat and rehab centers for homeless vets. (PTSD can be cured but is not readily

available because there is no money to be made in HBOT.)

4. Establish centralized location for individual alternative health practitioners for awareness & easy access to potential patients.
5. New school buses and retro fitting all with seat belts.
6. Four Foot Garden Towers for seniors and disabled, schools and assisted living homes where space and access to garden plots is limited.
7. Fund/establish local Bicycle Trails, Bicycle Clubs at schools, Scouts, Boys & Girls Clubs. Refurbish & repair bicycles collected by local police and distribute to needy kids.
8. Give memberships to local Food Bank patrons to the CSA farms in your area. (Consumer Supported Agriculture)
9. Become a member of a local food cooperative, support it or start one yourself.
10. Convert large empty box stores to ice or roller skating rinks, hockey fields, Bowling Lanes or winter shelters for Farmers' Markets.

Entry Submitted Anonymously at 7:29 PM EDT on October 17, 2016

I have worked in social services for over 15 years, and have seen the 'revolving door' recipients who take advantage, and those because of pride never ask. But there is a way of sharing where those truly in need get help. I believe education is the answer to change. By providing the education, those who can and want to...will change. Building a doorway with a door to be opened is something all that is needed for people to move forward in life.

#1. I see a need for basic skills to be taught for personal self sufficiency. I envision a place where healthy and wholesome homesteading skills can be seen, taught, and experienced. Where crops are planted and harvested and processed. Where water is utilized in the most efficient way, where composting, worm farming and gardening is taught. Where farm animals are raised and utilized. Where sewing and cooking along with food preservation is taught. Where basic wood, and metal skills are taught. Where a children's hands on museum will entertain and teach. There will be a electronic and book library with nothing but HOW TO's available. From various lakes and waterways, the skill of fishing is taught, harvested and processed. Where experts in these different fields can come to teach. Where a camp ground is available for travelers, and self contained solar energized cabins can house workers. From my research this will be classified as a 'park' but the theme will be education on approximately 600 acres with full access to fresh water. I see this run by veterans with their many different skills being utilized.

#2 Creating a manufacturing plant run by disabled vets making firebricks / logs and many other products from shredded paper that is collected from large offices, and shredded paper companies. Manufacturing, packaging and distribution of products that will utilize something that normally fills waste areas costing the city and counties money. Saving a tree, money and creating jobs.

#3 Creating research and development program combining the positives from others across the nation that can providing adaptable and affordable housing for the homeless. Then implementing it statewide, and with success, nationwide.

#4 Establish funding to increase and maintain the availability of 3-D printing equipment and materials in veteran and children hospitals for prosthesis.

#5. Create education on wheels to seniors with a fleet of converted school buses to travel to senior communities and teach basic computer skills, how to communicate Utilizing the latest phones and equipment. To instill confidence, decrease depression thru being able to communicate more effectively and efficiently through today's technology.

#6 Support and expand the local Meals On Wheels program in this county with a facility and vehicles to better serve the shut in seniors.

Humanitarian Projects

Provide to a Pastor and his wife with whatever they need to spread a ministry that God gave them that is called "inner healing project". This program was created mostly for people with addictions or in a family where there is someone addicted. But even if there hasn't been any of that I believe that every person should go through this inner healing class. It's life/changing.

International Projects

I want to create a trust to provide with food and clothing for people of a church in Venezuela that are awaiting for this blessing. About 100 families. People have been dying of hunger because they don't get any food. The project is called Church by church. It will start with this one church that have been praying and fasting for this blessing. Same in Panama. In Mexico help them grow their land, build schools and strong housing. Help people in Haiti with houses and food and clothing.

Projects in the US

Project "Fix your home and your city" I will create a Trust which will fund street by street homes to be fixed and nice looking. Starting with the people that attend church. Church by church. And then spread city by city. Starting with the city where I live but doing everything anonymously. Build and fund a Free Christian college and university.

I am partnering with Bruce in Humanitarian projects. The Big ideas group. Also I will Help veterans with homes and some kind of work just to keep them kind of busy but enjoying the good of the land that they fought for. It bothers me to see veterans that served this country begging for money on the streets. Help and organization called Paralyzed veterans, also help native Indian America children suffering of hunger.

Also Create a trust to fund good business ideas of people that have projects but don't have the resources to make them come to pass.

Help hungry kids in the U S and then around the world. Improve lunch systems in schools with healthy food. Like in Japan.

There are "Abused" women having to live with abusive people because they can't support themselves and their children.

Also I know there is a cure for many sicknesses (autism, cancer, Alzheimer's , Parkinson's) not out there because it's a profitable business to the medicine industry(FDA) they even put the sicknesses in the vaccines. I want to help put those cures out to increase the quality of life of humanity and stop somehow the evil in the pharmaceutical industry.

Create jobs for every level of intellect through businesses like hospitality businesses like resorts, construction companies with good salaries to improve the lifestyle of the workers.

Create a trust to Help kids with scholarships for Christian universities and colleges.

Improve soil for planting. What's the need of having to buy organic food more expensive than food with pesticides??? Everyone should be getting organic food in the first place. Not poisoning themselves because they can't afford organic.

There is people with great business ideas but no money for start up costs. I want to create a foundation to help those people accomplish their dreams and succeed in life.

I'm already helping some organizations like Child Fund International and many others.

Continue helping them.

God bless you all and thank you for keeping us informed on this site.

I pray that God will move His Almighty Hand and this blessing will come to pass in the next few

days. We need it desperately and the world is crying out loud with silent pain for this. May the love of God abound in your lives forever in Jesus Christ.

I plan to Invest in a new forms of energy, that will eliminate the oil wars. There is one that is based on Einstein's work that I plan to start with. It Will make energy for pennies. This will help promote world peace, and help especially the impoverish areas of the world.

Entry Submitted Anonymously at 10:35 AM EDT on October 18, 2016

I would like to propose that eco-friendly half-way living communities be built to accommodate non-violent prisoners who would be released from the over crowded prisons with "time served" to relieve the over crowded system and get them started on the road to recovery.

We are the only civilized country that uses GMO by the way the O stands for organisms (Yes they are alive) many of our health issues come from GMO 's destroying our good bacteria. They need to be banned, I will invest in this battle for our children's health and future.

Entry Submitted Anonymously at 10:38 AM EDT on October 18, 2016

I would like to change the kind of food served in school that the kids are eating. Right now, they are eating crap, non- nutritious junk food like corn dog, hotdog full of artificial colors and preservatives, french fries cooked in cancer causing soybean oil called vegetable oil, there is nothing vegetable to it. I would like to change it to food more from nature like NON- GMO fresh cooked vegetables, fresh fruits, meat with no preservatives, antibiotics and artificial colors. This is how to start a healthy generation and therefore not depending on Big Pharma for their quack medicines. Real Food is medicine because it is what you eat or what you put in your body that determines your well being, not medicine.

I would love to create schools where the elderly share their skills and trades with the young to learn how. What a precious thing to see them working together for the betterment of a new world together.

Entry Submitted Anonymously at 3:34 PM EDT on October 18, 2016 First I want to say Thank You for this community where we can spread Love & Light together as Brothers and Sisters :)

Thanks to DinarChronicles I've been lifted up even higher on my journey. We are One and there is no Separation. Here are some of the organizations that Divine Trust will be working with:

- Amnesty International - Make A Wish Foundation - Wounded Warrior Project - Covenant House - Big Brother Big Sister - Meals On Wheels- Randolph Street Community Gardens
The above are existing programs but after reading all the posts on this page I have been inspired to start Light projects of my own as well. One thing I had struggled with was how to address the homeless situation in our town and then saw a post that was a terrific idea, buy or construct a hotel to house our homeless with all the amenities of a Hotel, what a beautiful idea. Had also tried to stay away from existing programs that were government run but that was not always possible for instance Covenant House, Meals On Wheels, then I thought our Government will be changing for the BETTERMENT of the all an besides GOD's got our backs ! There is no room for fear in our future :) May Love & Light be our first choice and if it's not

GOD will help us.

Love & Light to ALL

Entry Submitted Anonymously at 4:57 PM EDT on October 18, 2016

If I had Zims or the Dinars that had been stolen from me, I would like to get people involved in changing the structures of the Cities.

1. Starting with Government, it needs to be public involvement.

We do not need to be Controlled.

Government means: *Govern* : to control

Ment : the mind (*note LFL* : in french, it means **lying** !)

We need councils where people can voluntarily serve without pay to help each community.

The size of the Council can be determined by Community Size.

We can have many communities. Then a larger Council of volunteers to represent the City.

This will be on a rotating basis, so that no one person thinks themselves above the all.

2. Police: Do away with Po-lice and Hiway Pay-the-trolls, totally. Go back to having an Elected Sheriff who will deputize people on a needed basis. All people working for the Sheriff, will be volunteering their time because they want to. It should be more of a Social Program than a Fleecing of the public as it currently is. This should be totally funded with buildings and the needed equipment.

The following actions will not be allowed : speeding tickets, parking tickets, license of any kind, inspection stickers and car registration. Highway robbery must stop! All natural substances grown from Nature are legal and everyone has the right to their own body.

For those who over indulge, ask if they want or need help, don't force our opinions or create rules to follow, thus the same old crap that ruined Eden in the first place. No laws will be made or passed. We have the 10 Commandments and the Original Organic Constitution and Bill of Rights for all.

Get the Technology as shown on StarTrek where a the only weapon a Peace Officer (Sheriff or their volunteer deputy) has is a phaser, but it sends out frequencies of Love, and on high beam the larger the beam of love is produced, so if the being is of the dark they will just be Uncreated while others will awaken and then volunteer to make up for any wrongs.

3. Change the citywide water/sewage systems. No chemicals allowed. Only fresh pristine water to be pumped into homes. It is possible because we have what is called Primary Water.

The Water Company will Supply all homes with pure water free, and refund all money stolen by means of poisoning the population with Fluoride and the drugs by recycling the poisoned water.

1. A new technology needs to be developed on how to dispose of waste and make it biodegradable. Sewage needs to be made natural and non-toxic and not allowed into the water supply.

No Company will be allowed to dump waste or chemicals on the land or into the water.

Violations will forfeit their Companies and have to do volunteer clean up projects.

2. Electric Companies will provide Free Energy via Tesla inventions and any new technology available. They will also refund the money stolen from the public. CEO's will make the same wages as the installers of the new Electronic Systems.

3. A crew of volunteers in supplied energy efficient vans travel around the City and Countryside scouting for the Homeless and mental ill. Drive them to a safe house and provide the needed assistance for these lost children of GOD.

4. A special crew of volunteers will go to Rest Homes and rehab centers, give council and needed vitamins and minerals to help the aged and those suffering from malnutrition. Provide healing technologies that do not have drugs in them. Have these Healers come in and work with these people. Re-education will need to be done to help them with the changes. Help them get back on their feet and back into life if that is their desire. For those who are able to exit, give them a vehicle a pieces of land and a home that is durable and modern.

4. Schools need to teach what the children want, not brainwashing and testing. Learning needs

to be an adventure and fun. All teachers need to be volunteers and are graded by the students. Smaller classes and more arts are needed.

5. Private Farmers volunteer to provide free food to retirement homes and schools because it will be an exchange. The students from the schools take turns working for week or a brief amount of time on the farm to help the farmer to provide the food, the students learn about caring for animals and the Earth and get to share their experiences when the healthy food is shared at school. Students can also provide training for the new volunteers and pass a valuable knowledge on about respecting the Earth and the rewards that it brings.

Transportation will be provided from the schools each day as activity buses pick up children from the school early take them to the Farm and return them back to school before school lets out. Children get to eat at the farm home cooked food and learn how to prepare it. Learn how to milk cows, grow vegetables, pick fruit, canning, feeding and caring for live stock.

Each Farmer that volunteers to supply food will be provided with the needed tools and supplies to do this, such as ample farm land, volunteers and all the live stock they want to handle, such as a variety of hens for eggs, dairy cows for whole milk and goats to keep the brush back and some horses for some old fashion hay rides.

All crops need to be pesticide free and no chemicals will be allowed on crops used to feed the schools and the elderly.

Hydroponics farming would provide the best amount of produce and fish. A controlled environment for clean pesticide-free food. Some farms may consist of this, where there are greenhouses set up with tanks and pumps to recycle the water and produce large amounts of food in a smaller area. The school students will learn about the care and harvesting and canning and preparing of organic foods and the maintenance of the equipment and buildings. People will learn about different foods instead of fast food, they get to experience real Soul Food.

School, *continued* :

Offer students curriculum such as gymnastics, dance, how to cook, how to repair, how to build, how to create. Math and Geometry are vital, Spirituality is crucial for growth.

Classes in herbal medicine should be taught, and How to heal with crystals and light.

Schools need to be open, where parents can also attend to learn something new then the parents can get more involved and turn around and become a teacher volunteer.

No grades needed, each student gets to talk about what they learned that year and enjoyed the most prior to vacation break. They will grade their teachers, so the teacher will be asked to volunteer again. The student will then progress to the next level of learning but only if the student feels ready. Otherwise there may be other classes on that level that the Student wants to explore.

These are the basic levels for fixing a broken system. Indoctrination needs to stop! That is brainwashing and it is against our freewill. Teach someone to fish and they can feed themselves for a lifetime.

6. Animal life. Stop hunting for sport ! Use clay pigeons or paper targets on special walls for those who feel the need to shoot. All life is a valuable contribution to our lessons and growth. Meat needs to be replicated from mushrooms or natural organic substances, no chemicals. Farms that produce cows for slaughter need to be changed over to dairy farms with limited amount of cows. The cows need to free range. So land is important. No animal should be living in cages. Pig farms need to be shut down, they produce toxic water and waste, and the animals suffer. Lets take away puppy mills that can't take care of their puppies. Have Veterans visit each puppy mill and provide special care.

People who violate other species will get the Phaser gun on high Love Frequency. If they have a dark heart, then they will be uncreated. Otherwise they will come to their senses and appreciate all of GODs creations.

If I had the money I would like to set up a hydroponic farm to produce for schools and the

elderly. I would also love to teach how to value nature and create healing from the gifts of nature. How to can, how to cook. Good old fashion hands on learning.

We have a small farm but it is in dire need of some major work.

Thank you for all your great ideas and perhaps someone will want some of these projects implemented. By making changes on the local levels, it will effect all communities and can spread into a loving harmonious society where humanity thrives beside nature.

I do what I can online and share your good works via my website Angel4Light.WordPress.com

My first goal, since winter is approaching rapidly, is to arrange for people who have to live in tents (especially women with children) to transition to some kind of shelter - even if I have to rent/buy a series of motels or hotels to do it!

Animals suffer so much from neglect and cruelty, but with care we can turn their lives around.

I am going to support organizations that rescue and rehabilitate abused animals, and establish more no-kill animal shelters. I am also going to facilitate children being taught how to respect and care for animals. I want to do what I can for our wounded warriors, whether it's medical care and rehabilitation, or jobs or re-training. They deserve much better treatment, and the full gratitude of our society. There are a lot of things I'd like to do, but I think it is most important to ask them what they want or need. I'm sure they will have plenty of ideas, much better than my own. Can't wait to get started! What a wonderful Christmas season this will be when we can heal hearts and uplift souls! I'd like to get a million shiny silver dollars and fill all those Salvation Army kettles to the brim!

Entry Submitted Anonymously at 10:00 PM EDT on October 18, 2016

- Joining (or re-joining) already established worthwhile organizations I care about, who are helping People (Habitat for Humanity, Heifer Project for example), Nature (Save Our Shores, all local parks), Wildlife (Nature Conservancy, etc...) with enough funds to cover their expenses so more money can go to their projects, & they won't need to advertise.

- Assisting local artists in putting their creations out on display in the community through providing more gallery space - rent free, and supporting already-established galleries.

~ Signed: Passionate about nature and art!

Our intent is to initiate reform in local schools with art, music and physical educational programs, facility and equipment improvements, as well as bringing in healthy foods for improved nutrition. Therapeutic restoration centers will be provided for those in need of physical, emotional, mental and spiritual care. We will create food distribution services that provide for under-resourced individuals and families. We will provide construction jobs to improve housing in disadvantaged neighborhoods. We will train individuals to work as carpenters, farmers, chefs/cooks, landscapers and maintenance workers. From there we plan to hire them in an area appropriate to their interests and gifts.

Hi. Thanku to all our clever people for setting this up. I would like to contribute to helping our children in orphanages, refugee camps & the likes worldwide to get rid of all the silly red tape & rules. To be housed in a loving, caring & safe enviroment. I would also like to be part of stopping vaccinations in our children lives in our western world!!!! I would like to assist in helping homeless people find a place to call home-worldwide. I would like to help bring in new clean energies for us all. & to assist with cleaning up all the water ways & oceans of our beautiful earth& replanting of our beautiful trees & forests. Together we can do all this & so much more. Namaste dear souls. Much love to us all.

Replace water lines everywhere needed in US where needed, then work my way everywhere else it is needed including digging wells for water in other countries.

Entry Submitted Anonymously at 9:09 AM EDT on October 19, 2016

The family unit is the basic foundation of society...the state of the family eventually is reflected in the state of the nation. One suggestion for investment is to work for adoption of a national curriculum that progressively educates children K though 12 on human development and family studies, that also includes focused career development. The Virginia State Board of Education has already adopted such a curriculum to consider. You may view its goals for each year of the child's education from kindergarten through high school at http://www.doe.virginia.gov/testing/sol/standards_docs/family_life/familylife_guidelines_standards.pdf

Another idea: promote the safe advancement of free energy technology such as scalar energy and zero point energy as discovered by Nicola Tesla and others. Tom Paladino's scalar work centers on wholistic health for all and includes projects in third world countries; The Orion and Disclosure Project directed by Dr. Stephen Greer is another avenue to investigate... I'm sure there are others.

Funding for water wells in Africa and sustainable living communities everywhere.

Funding for universal education of children everywhere...building schools and making available computer technology for all.

A large portion I receive will be reversing the past bad stewardship of America I call this repentance. I will set up a donors trust, to reverse what was done here as bad stewards of God's word, including, but not only, First Nation People, Afro-Americans, and reversing Anti Semitism which is currently on the horizon again. My desire is for America to be One Nation under God "One new man" with equal opportunity for all.

Entry Submitted Anonymously at 9:38 AM EDT on October 19, 2016

To change the way our elders are treated! I would like to start a Holistic Rest-Home /hospice. When they come it is till the end of life. Stop drugging them so they will behave. Let them participate in everything from cooking, gardening sewing meditation yoga etc. Let them still have purpose in life! I would have college students live there for free to learn from the elders as they pass on their wisdom.

Among those wonderful, helping and spiritually lifting projects I would like to add also something for people to enjoy: music and singing, theater, movies. These after all are ways people can get social and spiritual well-being and healing and just to enjoy life with others. There are many new technologies and ways these artistic performances can be made, which might need new buildings and/or performance spaces to be built. Also beautiful parks and gardens with waterfalls would raise the spirit of people to new heights or just be spaces to relax and enjoy Nature itself. And let's fix and renew all those beautiful wonderful historical buildings (castles, mansions, museums), maybe for another use than they used to be :)

These are not my main projects but I am including some of it into my Humanitarian Projects.
Light to Everybody, "TwinkleStar"

Entry Submitted Anonymously at 9:41 AM EDT on October 20, 2016

Good Morning, I had planned several levels of humanitarian projects. I am putting first the children. The flooding in the part of the state had completely gutted five public schools. I wanted to give them the money to rebuild those schools better than ever. I wanted to help the homeless there. While putting families up in hotels while their houses are being rebuilt. I wanted to stand at Home Depot one day and Lowe's another day and pay for everyone who is rebuilding from hurricane Matthew. I am friends with twenty single moms that I have worked with in the restaurant industry. I wanted to buy an apartment building and let them live there rent free, until they have saved up enough money to purchase their own house. We have a veteran's restoration facility. I wanted to purchase land next to there and build an apartment building for them and let them live there while they get their lives back on track. At both buildings, I would pay everyone who lived there and they would be responsible for maintaining the buildings, within reason. Then I wanted to help the farmers by purchasing one building or lot in each county and set up a farmers station. At this building they would have free access to a computer with internet. The building would serve as a backup so if farmers accidentally run out feed they can come get more for free. If a tractor part breaks we will have spare common parts for them. I will pay two high school or college students to work there. When no one is in the building they can study. So they actually get paid to study and improve their own life. When that is all set. I wanted to do the same for the farmers for rest of state. Then I wanted to take this to TN, MO, KY, IL, NE, IO, KS, and IN. I wanted to set up in a trust one million for each school district in the state and this would continue for twenty years.

I would have tithed and that money would have been set up to go to the head of the Baptist, Presbyterian, and Lutheran churches. 65 percent of each year's tithes from me, goes domestically, 35 percent must be used for global missions and helping poverty stricken nations. This money will be in an interest bearing trust set up for twenty years. I am hoping that the interest will build up and keep this going for an additional ten years but that will be in God's hands. Helping create jobs is number one, while also protecting our children, respecting and helping our veterans, and taking care of our elderly are also very important to my heart. I really wish that they would release the 1-800 numbers so we can actually begin to help. I wanted to help Baton Rouge LA but that is not possible. Soon my plans will no longer be feasible for me to participate in. *Proverbs 22:3 A prudent man/woman foresees evil and hides him/herself. But the simple pass on and are punished.*

Simply stated when you see evil in a person's actions you stay away. You try to negotiate with evil and you will be punished. So take my ideas like everyone else and keep me shut out so I can never know the blessings of having a family or finishing college. For the evil in this world runs so deep, after all everyone just seems to turn their head and not help the brothers and sisters that God has put in their everyday life. Remember this, we are all children of God, it's just : do you want to listen to God, Satan, or just do your own thing ?

Entry Submitted by Steve at 12:43 PM EDT on October 20, 2016

Hi my name is Steve. I am new to All this amazing new future which is almost upon us, "WoW" mind blowing and so Beautiful.

People all around the World helping each other, it's how it always should have been, but hey, looks like we are getting back on track.

My wish is to Help my village to become energy self-sufficient, enough energy to power each house with free electricity to provide all the energy they need i.e. for day-to-day appliances and heating. I am a qualified Electrician and measurement and control technician, so i'm sure I can help here. My wife grows organic vegetables and there is great scope to expand this endeavour and end up feeding the whole village.

And I see lots of people saying mortgage free living...would this apply to rented accommodation, would our rent be sorted, what is the criteria for such things to occur. Any

information would be gratefully received. Then who knows help more villages and similar projects as the new horizons come into view. Exciting times for Mankind.

God Bless Us All Steve :-)

Projects: - **Tithing**

1- Salvation army, missions, churches/organizations that focus on developing a relationship with Jesus, sailing sermons, help refugees, Christian radio/social media/pamphlets.

2- Humanitarian

A- Veterans and fam.

1- Veterans Retreat Network(with Bruce)

2- Temporary and permanent housing

3- Families of fallen/disabled/job training/Kickstart

B- End hunger and homelessness

1. Hunger-church farms, urban farms, aquaponics, greenhouses, underground gardens, community gardens, yard gardens, food delivery trucks to neighborhoods.

2. Homelessness-supply housing independently, partner with organizations, 18+aged foster kids apartments, support adoptions, sponsor orphanages.

C-Water - Holograms, structured water units, plugs, portables, save the water organization, heal the bay, atmospheric water generators, filtration, replace pipes.

D- Police department - Security accessories, community unity, financial programs

E- Medical

3d printing, orbis flying eye hospital, aerobridge disaster relief, healing chambers, aircare alliance, medical missions, medical bills paid, prescription drug relief, charms/holograms, vibration core massagers, boat hospitals, organic medical farms, anti vaccine organizations

F-Farmers rescue-nongmo help, floods, equipment, etc.

G- Educational scholarships

H- Village with facility resource center including career services, free educational lifeskill classes, free coops to find your calling. Facilities with free classes golf, tennis, swim, trampolines, obstacle course, gym, dance, dance events,play theater, movie theatre, music instruments, fashion, art, cooking, car, home. Library with tea/coffee house, art gallery with cafe, bookstore. Indoor/outdoor meeting facilities. Prayer and meditation fountain facility. Art sculptures, gazebos, swings, trees, flowers, horses, tram. Culture of the month.

I- Foster orphan adoption match to home/family. Separate program for 18+ kids, as well as a home for the holiday program.

J- Animals. End killing of animals. No kill animal shelters. No kill horse farms Free spay/neuter and medical bill programs. Match animals to loving homes with free transportation. Therapeutic horses and dogs for people, farm animal rescue, free range chicken.

K- Money help 911. Free plane ticket 1x a year. Grocery bills, haircuts, hairstyled, relocation service, elderly/widow bill assistance, middle-class bill assistance.

L- Parks, trees, flowers, roads, bridges beautification.

M- Inner city parks

N- Pastoral retreat

O- Children of God for life

P- Humanitarian network connection.

Q- God's prayer team

R- Inner-city work programs for boys

S- Co-op programs cross skills

T- Home school funds

U- Books for libraries in jails, prisons, communities.

V- Car ride programs

W- Bioplastics-make all biodegradable

X- Music frequencies

Y- Weight loss shapeup groups

Z- Smog cleanup

AA- Ocean plastic cleanup

AB-Space programs

AC- Buy several companies make them give back to communities, change to healthier products, treat employees better.

from « the One Who Dreams Big »

Entry Submitted by Rick Cortright at 1:35 PM EDT on October 20, 2016

Kind people of Dinarland, below you'll find listed a few ideas that may work in your community or out in the world.

1- Funding all local food banks and homeless shelters.

2- The People's Constitutional Law Center

3- The Open Land's Project

4- Wild Horses Mustang Rescue Project

5- Klamath River Reclamation Project

6- Cloud 9 Hot Springs and Healing Light Center

7. Community Art Galleries (for local artists only)

8. Hydroponic growing facilities with mass production of food on stacked trays (super high yield)

9- Greenhouses

10- Advanced Dome Elderly Care Project

11- Chlorella Production Plant/Facility

12- Distribution of the Argonaut Power Wheel Chair (GI Gadgets) to the handicapped

13- Fund Gaia.com TV -- greatly expand their facilities

May you walk in peace and light. God Bless. Rick Cortright

Entry Submitted by Rick Cortright at 3:18 PM EDT on October 20, 2016

In the Bahamas, there are mountains of conch shells. I am sure that scientist/s can test and find out how they can best be utilized for health and building purposes. They are just there and the mountain is evoking increasingly high once the animal is removed.

2- Build more state of the art hospitals, fully equipped and furnished.

3- Provide computers for schools with programs to improve science, math, reading and economics.

Entry Submitted by Jeannie Anderson at 4:10 PM EDT on October 30, 2016

1. THE WATER PROJECT [1 800 460 8974](tel:18004608974)

2. THE SOI DOG Foundation : End dog meat trade, ert.soidog.org

3. MEALS ON WHEELS for every homebound person and pet

4. STOP DEFORESTATION

5. SALVATION ARMY

6. STOP TROPHY ANIMAL KILLING

7. TEACHING FARMING TO EVERYONE

8. STOP FACTORY FARMING

and all projects everyone has already listed

Love and Light Our dreams come true Jeannie anderson

Entry Submitted by Pinky at 4:31 PM EDT on October 30, 2016

Stars are aligned to this energy shift and stars don't lie.

Our energies are geared towards fulfilling these projects. These projects will tap into humanities own powers and elevate their understanding of our own potentials and the planet

we live. They will learn to utilize with respect local natural resources, provide awareness and elevate potentials of people of the Philippines by developing programs directed to all generations, provide employment to younger generations who have proven to us their desire to change their world and dogmatic life. We will provide professional project studies and implement these projects with partnerships with local residents and tribal inhabitants of remote villages. The funds we beseech will also provide financial assistance to a few families here in US to build respectable living conditions.

1- Funding assistance to families who need and deserve to have respectable living conditions. (US)

a) To a retired couple who are taking care of their 40 year old paraplegic son. With their SSS and small retirement income and the cost of health care for both of them and the care assistance for their son, their home is slowly deteriorating that is not conducive to their living needs.

b) To a couple with 1 disabled child. Living in their minimum wages and cost of education for their 2 other children

2- Develop local vegetation (Philippines) into herbal products supported by clinical studies and trials.

3- Develop green path loop for Metro Manila region

4- Develop eco-villages in remote area in Mindanao

5-Develop a dignified and transcendental program for senior citizens' remaining presence in our planet

6- Provide an institution for street children and develop the children's infinite potential

7-Develop programs for students in utilizing their own potential in learning

8- Funding to local villages particularly in Mindanao and outlying islands where local government cannot provide assistance in developing their local means of livelihood

9- Funding to protect and propagate "Mangkono" tree (iron tree), indigenous to this region, devastated by illegal logging.

Light is within us, Pinky

I want to provide housing for all...there are too many homeless

Entry Submitted Anonymously at 10:13 PM EDT on October 30, 2016

I would like to purchase a building with several rooms and take in young pregnant. women who have nowhere to go. Teaching them how to be a good mother, and letting them know God loves them so much.

Stop human trafficking. Once a human trafficking ring has been located, arrested , &

prosecuted, the children and adults will be removed so their medical and psychological needs(ongoing treatments)can be met.

Families will be notified , so reintroduction will begin as soon as possible.

This also includes tracking down the online pornography; sales of children and adults going on around the world.

This will require many trained professionals to do online tracking and good old legwork. Law enforcement will be advised as to what has been uncovered, so they may remove the criminals. Medical personnel, recovery teams, pilots to fly these people to safety.....the list grows on what professionals are needed to complete this job.

- Fund the world
- I want to help Renovate/Refurbish the Veteran Homes in USA.
- Build buildings for the Homeless and offer them jobs in that building.
- Clean up the oceans
- Renovate buildings in surrounding towns that are vacant and eye sores
- Fund where disasters hit
- Fund and build affordable housing
- Pay off local Town Debt in USA
- Build healthy restaurant with organic, gluten-free, healthy food
- Donate to food pantries around the world
- Open up Charity stores with clothes

This is awesome ...I was thinking about how we need a place / way to communicate with each other instantly about who, how, and when,....We can go over the information ... like in different parts of the world who will take on that immediate emergency ...and focus that money and solutions there...We can always group up if necessary. We can hire or just do it ourselves...to find the resources to accomplish all needs of immediate response....like how we can get the food and water to those remote and battered places. We (144.000) are all over this world for a reason... We are needed in each place where we live at this point, God has this planed perfectly. Now we must take the baton from this point on...and help each other to get to the finish line... We will find the solutions TOGETHER .Our work here is just beginning...WE will have much help from the divine every step of the way ...when it is for the highest good of all Amen How may I serve Love and Light to our Lightworkers Gena

Hello everyone, the research I've done we have so many wonderful organizations out there tailoring to the needs of over 69.5 million people. UNICEF, bordering bridges or just a few of the many many existing wonderful humanitarian organizations. I would like to structure and help. They know the immediate help that's needed and have done all the homework and see it

every day. I want to be hands-on and help. God bless everyone

I have been paying it forward for about 20 years----using my own money----and have now run out----however as I am considered a whale, I will be able to continue doing what I have been doing and now take on the most important project that one can. The project concerns the following. There are about 20 to 21,000 people, mostly children dying per day, from starvation, world wide. Most of these children are in Africa and Asia. It is my avowed intent to completely eradicate that situation. This I will do. I have already made my plans, and will implement them, on completion of the R/V. I am going to need about 350 people, hired over the first year, alone. I will need people from many different walks of life and many occupations, from --jack of all trades--to doctors and nurses--to---you name it. Needless to say, many of you will be doing a tour in Africa or Asia, probably on a rotational basis. While wiping out starvation will be our primary objective, we will also be responsible for greatly improving the standard of living of thousands of people, most of which are living on less than two dollars a day. We are going to help educate as many people as possible, so they can become self sufficient, and they then in turn can educate their own people. To make a difference---you have to know the difference. We know the difference This is the plan. WE WILL SUCCEED. If you feel like I do, that it is a crime, that GODS children are dying from starvation, in a world that for the most part is bountiful, and if it pains your heart, you may want to join me. I am setting up Divine Healing Ministries to be the avenue for these projects. After the RV I expect it will take two to three months to be ready to ---start making a difference. SO----if you feel you will want to be part of this mission----please send me an email to pjweather@gmail.com with your thoughts as how you may be able to help in our mission. As my workload now is horrendous, I will not be able to reply right away, but I will reply to you. I thank you for your kind attention to the above. GOD BLESS to you all PJ.

Entry Submitted by Diana Baez at 4:05 PM EDT on October 31, 2016

Hello, my name is Diana Baez, and I have this dream to create a Tiny House, Mud House, and Tree House Community. And we would have gardens, and everyone would exchange what they create. Also, If one makes belts, and the other shoes, then they can exchange their creations. No money, just trade what we create. There will be one big community building, where we would have meetings, gatherings, events, and fun times. With swimming pools, and lots of Palm Trees. You can eat right from the trees, and no one will ever be hungry. Everyone will have a house, and everyone will be Loved. There's Harmony. I can see it now, that, instead of a city, which I live in, there is this growing community, living with nature, as family. That's my idea. Thank You. <3

Entry Submitted Anonymously at 4:32 PM EDT on October 31, 2016

it would be a good idea, and I am sure it is. to make a law that make each owner of a car or any vehicle that produce any amount of smog, to plant a tree for each vehicle owned. sorry if my english isn` t good enough, I` m a mexican follower of your page. I actually would go farer with this law, by making any living human to plant a tree, and if a baby born his parents should plant one! Imagine millions of new trees pumping oxygen and cleaning the air!!

Gentrification and lack of financial stability is partly responsible for the displacement of many long-term families in neighborhoods in Harlem and Bedford Stuyvesant, New York. Many families can no longer afford to live where their roots were thought to be firmly planted. Similarly, many generations of West African people are unable to provide adequate housing for themselves and their families.

Both demographics are in need of financial stability, competitive entrepreneurship and basic job skills. Yet the inevitable is happening- people are aging and becoming homeless. I believe when individuals commit to helping humanity, most of society's ills can be eradicated. This initiative will bring about self-empowerment and lasting international relationships

My dream and passion is to provide training and self-empowerment as a means to eradicate homelessness among the underserved population in my community and in West Africa.

My initiative will provide:

- *Training and Entrepreneurial skill development
- *Gratuitous housing for 3 years
- *In lieu of free housing, every participant must commit to a minimum of 20 hours per week in service hours (as a means of dignified support and giving back to the initiative)
- *Access to basic computer/technological training.
- *Eldercare training and certification
- * Computer-based crafting
- *Selfhelp and improvement courses
- *Mentoring and counseling

The goal of this initiative is to prepare the disenfranchised, homeless or underserved for a future in service-related careers of their choice as well as entrepreneurship. The entrepreneurial arm will focus on uplifting, upgrading and empowering members of these specific communities. Through regular go-to-meeting or skype sessions, a symbiotic relationship will be formed between clients from Bedford-Stuyvesant and Harlem with West Africans. This relationship will be accomplished with purpose and dignity. A key component of the training will be Eldercare services. All participants will be required to embrace the initiative's "Pay It Forward" model, thereby spreading the important message of Service to Humanity. Ultimately, this humanitarian outreach will bring about lasting partnerships between the two continents.

I am thankful for the opportunity to share... Because the world is deserving of joy, I remain positive and encouraged! THE WORLD AWAITS JOY! Vel
