700 Band  
Monroe and Ontario Counties have a 700/800 MHz trunked P25 Phase I interop system that barely works with the few scanners that receive Phase II P25 due to the "beat" between towers on the simulcast system. The parameters of the system are constantly changing.

For the latest log on to Radio Reference:  
<http://www.radioreference.com/apps/db/?sid=7308>

Note that it states Genesee and Orleans Counties are part of the interop. This is NOT correct. Repeated notifications to RR of this error have been ignored.

Likewise Genesee County is also P25 Phase II. Again nearly impossible to listen because of the beat.

800 Band

- VR Vehicle repeater
- Minus amateur repeater input
- + Plus amateur repeater input
- \* Little or no traffic. Moved to another frequency and/or system

The Open Sky/MA COMM system originally proposed for New York State has been abandoned

Livingston County will soon migrate to an all high band system, which will include Ontario County's former frequencies. ☺

The chart below was compiled from the new KEA535 license. The license is for an analog conventional rather than a digital trunked system.

Livingston County High Band 042115

FB Fixed Base	FX Repeater In	MO Mobiles	IO Interop
151.1375 IO			151.1375
