## Sophie Thomson

---

27<sup>th</sup> February 1991

### Introduction

I was a dedicated and prolific online blogger with specific enthusiasm in the sciences, psychiatry and gendered research as well as, in adolescence and sparingly to this day, computing and economics as well as politics continuingly to this day of a formerly conservative, then socialistic, then pan-optic persuasion. I can write with disbrevery and drift dintingly of graft and witticious apaucity. Something of a wordsmith, roticiousness is a level of commitment to standard administrative maintenance to which I am not averse. I have recently managed to procure a basic research background from an American University and I am probably in the initial that adept by manner of previous research experience for a number of monographic releases to which benefit only of doubtlessness to the dedication of character and preeminence of experience can indubitably ascriptively be without suspicion. I am a transgender woman, formerly diagnosed with schizophrenia and Asperger's, now diagnosed with a different type (RAD vs. PDD), and have a high conscientiousness regarding issues surrounding the diversitarianistically divergent. BT as opposed to LG for the preference of aberrancy canvas advocatively speaking. I am officially be registration an agnostic but practitionally a Saganistic Counterfactual Christian leaning towards Reform Protestantism with some advanced neo-Catholicisms nominally reformative; in significance this is ultimately only leaning toward rejection of r-selection for Protestant views harboured, or proto-MacCallumism heaviest-of-light.

A psychopathic effort of denial of anxiety canvassibility has been performed formally although Hashimoto's treatment exists to evidence it circumstantially. Contrary to science there is TR,1 and PR/GABA interaction from any deservingly K-selection talent pool agglomerating

perspective regarding the delusions of the prestige and refinement of Scottish medicine that only wishes to aggrandise the real overdeveloped Temnentials like a racially blackened “North Korea”. To give it (Scottish civilisation's) more sickening exposure for deliberate “accidentally incompetent malice” I was result-impregnated to kill me off almost. I try to maintain faith in Celtic humanity's less retardedly psychopathic members regardless in uncontrived faith out of wist ☺.

In addition, office, administration, lower managerial, supervisory and receptional experiences are given some grift whereastowards in the prospective industrially and employmentally.

### **Former background**

#### **Impromptu researcher Autism Initiatives (2016 – 2017)**

I had been in charge of hypothetical speculations research with non-departmental significance in gender, anxiety, sexuality and intersegmentally sociological implications of autism. Despite having no degree, as part of the SVQ system, one may wish to refer to a PSA and SVQ6 listed accreditationally. In-kind remunerative.

#### **Autism Initiatives corporate assistant service conceptualiser; high and debating society inaugural chamberation for the spectrum (2017)**

The proof of concept to present debating society formation by conceptual proof was posited but shelved due to a lack of demand and some resistance by governmental expurgation chiefs in the Gypsy State councils of Liverpool and Glasgow HQ surrounding regions to suppress “annoying counterfactualisation” to certain subconscious anti-autism chauvinists. Regardless, remunerated in-kind. Rewarded as pioneering in Scotland, the North East, and Wales lattermostly with implementation. Owing to Scotland service beourgeoisization it may receive ambiguous canvas but can be uniformly vouched for.

#### **Monnoisseur Incorporated Concern (2010)**

Office administration, proof editing, accounts overview and accounts registration as well as database maintenance and mailing duties; the official role was as a Clleric General. Non-remunerative.

Contempo-Quarternary Marxist Party; outer-party command, inner-party liason, political scientific chief and policy writer, composer, theoriser and augurator(2011-12)

“Expurgated with honour”; policies and politico-theoretical chief and pervasive divergence ministrations. The primary role also was in critical journalism of the Occupy movement deliberately suppressed of spread although widely remembered for uniqueness in depicting the superficiality of attitudes without intimidating with emboldenments and grade overload snare except to “the right excess”. Primarily owing a dispute with a party hand of a newer generation neative segment, expurgation was decided and semi-reversed. Subordinatively an assistant web designer responsible for modifying an old HTMLy installation to feature party-relevant design thematics.

Holland and Barrett, team for corporate research as “autism maintenance marketing feasibility in concept proof” researcher (2014-2015; part of 2016)

Duties were to rigorously introspect into personal experience, analyse, research vitamin relationships to neurobioendocrine ones, research the role of certain generic endocrine maintaining ones, and conceptualise marketing. This was by no means helmed but greatly contributed by share. Ultimately although archived and rewarded it faced dubious ethical problems. In-kind remunerated.

Blogger and impromptu researcher (2010 – 2017)

Despite expurgations and hacks deleting all but scant archival evidence a great deal of time was spent learning the basics of scientific methodology from an undergraduate viewpoint in the utilization of engines to the inclusion of academic paper engines and academic review repositories. A lot of time was spent performing this sort of scientific background with impromptuity, blistering as to promptness in brevity of skill accumulation. It was mostly from a critique of empiricism as opposed to demagoguery perspective.

Natural health, pure biochemistry and endocrinology are the greatest familiarisations.

Previously, business and economics were the impromptu familiarisations with, in the former, 3 short-lived volunteer attempts whose denial of attribution to providing air to would be revealing. Counting online experiences, a slew of informal blogs and medium sized one-time news item counting the silenced marr of attempted Trotskyist-blitzed experience otherwise evidenced experience linguistically and literarily.

## **Education**

I had attended a high-end comprehensive with a high disadvantage canvas and high middle class catchment. Although records are now laid to expurgation from the secondary school's perspective the transcript remains clear as to initial basic achievement being practically prodigious by underclass Asperger suffering standards. Breaking down in non-compulsory, most academic experience has been a mixture of semi-informal by company training and distance accrued or, later, by correspondential continuation with module corresponded distance.

### **James Young High School (2003-2007):**

- Computing: 1/1
- English: 2/1
- Mathematics: 2/3
- Physics: 2/2
- Chemistry: 2/3
- Geography: 2/2

NB: A thoroughly overdone but under completed RMPS unit at Intermediate 2 received the A cut-off and Access 3 French was completed 3 years early, rewarded 2 years early; this is to some retrospective humiliation and pride (a GCSE E maximum theoretically done like a GCSE barest-C) as it virtue signals overcompensation. An Intermediate 1 French course is completed remotely outwith YPU school streaming for the opposing purpose, to an end...

### **James Young Temmentiations partnered from West Lothian College**

Communication 7 (2015-16): PASS (English ADVH D/C, C overall equivalency nominarily; for the actual piece, an A-2 practically)

A verstitualite – in the “gender dysphoric” sense – essay on the counterfacted unlikelihoods of DPRK society sponsoring an undisenlightening canvas for anything other than Lysistratean Zarathusrianism is entertained in the nature of Korean socialist philosophical discourse used to entertain the correct manner to discipline aspiring transgender and even young woman philosophers.

### **Durham University**

Literary Criticism with Gender minor focus, Ord. (2015 – 2017): 1<sup>st</sup> dissertatively, 1<sup>st</sup> overall

The degree primarily had concerned an especially fervent focus with criticality in the positive depiction of pro-transsexual themes throughout from a primarily non-masculinist but neither

feminist nor autistically gender blind perspective. It involved recursive modernity of Asperger transgender chauvanism.

### **Tuscon University**

ASc. Statistics (2009-2010): GPA; 3.49

Final examination and dissertation correspondence written and performed to various statistics methodologies including sigmatization and recursive sigmatization by subset in differential primacy of orders, recursive and differential meaning, distributive mode and median, and correctional technique, as well as many types of algebraical transformation post-Alg. 2. Standard and even many post-AP.

### **West Lothian College**

NC and part-HNC Computing of pass and B final grade unit (2007-2009)

Basic secondary make-up in the preservation of a programming “Aspiation” as it had been indeed for all but the HNC practical-elective of an economic simulator script. General computational understandings had been thoroughly demonstrated to an all-encompassing standard.

NC and part-HNC Business of Business Management of A pass (GCSE equivalent to A\*) and A final grade unit (2010-2012)

Basic secondary make-up in the newly found interest of economics, business dynamics and office administration, most saliently the foremost. The economics practical-elective was elected for final graded unit substitution of vestitural theory of Aspergian Royal Court vesture/vesturiae.

Social Science Intermediate 2 Philosophy Temnent-level A (2013)

A demonstration of counterfactual understanding critically of Critical Thinking principles.

Social Science Sociology and Psychology Higher Temnent-level D and C (2013)

Essentially, scriptively assisted questions of “sans study” and “wing it”.

SVQ2, 3, 4, 5 & 6: Various Autism, Psychology and Sociology modules (2016 – 17)

The cumulative result of important work per involvement with a QUANGO described in background.

PSA in Autism and Administration, SCQF 9 (2019)

Ibid.

### **Holland and Barrett Vocational and Academic**

NVQ 2 Natural Health (2012-13): GCSE grade equivalency; B/A theory/theoretical-demonstrative (in actuality: MERIT and DISTINCTION)

NVQ 3 Natural Health (2014-15): A-Level equivalency; B/A\* theoretical-demonstrative/theory (MERIT and DISTINCTION)

NVQ 4 Natural Health (2019-20): HND equivalency of PASS/bare C

NVQ 5 Natural Health with NVQ6-equivalency Studies in Business Administrative Networking and Economic Temnentiary Distributions (2020-21): Ord. equivalency bare-2:1 (DISTINCTION)

NVQ 6 Natural Health (2021): BSc. 1<sup>st</sup> equivalency (DISTINCTION)

### **Detroit State University as partered to Tusconville, Chicago in Illinois**

ASc. Dipl. Studies Pre-Medicine: 3.88 GPA (2020-2021)

### **Illinois Medical**

BSc. Pre-Medicine Endocrinology major: 3.49 GPA (2021)

### **Intangible skills**

**Languages:** French (Int 1 A qualified, preferred dialect formal Globish, speech paused but fluent to a lower average adolescently), Korean, Chosoneo dialect (reading: political speech terminology and advancedly basic sentences; speaking and writing: similarly, although romanised preferably), Latinate and English Latinate creole (fluent uniformly), Chinese (Pinyin only reading; moderate; understanding only, basic communication if necessary), Flemish (understanding only, highest basic or 7<sup>th</sup> grade equivalent), Serbo-Croat tongues (reading only: lowest full secondary competence), Norsk of Bokmal, Sveda dialect Swedish, Svierge dialect Swedish, Saami dialect Swedish (primary reading; mid-secondary reading except last at primary)

**Software, programming and general computing skills:** All transfer platform literate; Office savant (no package bares mention as to non-use); VB, C++ and VB module Excel scripts (ideally '03 - '07) moderate; HTML and CSS moderate; PHP basic; Word processing is variegatedly advanced as to publicatory customisation and printset

**Verbal IQ:** 145 (adulthood, temnent equivalency at Ward)

**Performance IQ:** 184 (adulthood, full version by feature of Raven)

**Childhood IQ:** 123 (age 17  $\frac{3}{4}$ ); verbal: 142, performance: 104 (age norm 15; age norm corrected: 135 - 96 verbal-performance bifurcation, 115 whole-scale); achieved during depression and gender amorphous anxiety treatment period at YPU, WASI

**EQ, various measures:** High neurotypical “male” to overlap of solid average neurotypical female variegatedly

**Interests: Literature,** DPRK music in both interpretation and casually (Wangjaesan and Pochonbo), philosophy, politics, debate and discursion, outward perspectival outlookingness, inward perspectival chauvinism, drink apertury law, gender philosophy and theorism, natural health, health and wellbeing theorism, psychology and speculative insight, the theory of science and the theories of ideas as well as those generally. It is advised to go on minichan.org to get a more immediate idea of whom I am as opposed to other search canvases.
