Answer: B

Question No. 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You assign an Enterprise Mobility + Security license to User1. You instruct User1 to sign in to Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Question No. 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 8.1.

Two days ago, you upgraded the computer to Windows 10.

You need to downgrade the computer to Windows 8.1.

Solution: From View update history in the Settings app, you select Uninstall updates.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Question No. 4

You have 100 computers that run Windows 8.1.

You need to create a report that will assess the Windows 10 readiness of the computers.

What should you use?

- A. Windows Assessment and Deployment Kit (Windows ADK)
- B. Microsoft Assessment and Planning (MAP) Toolkit
- C. Windows Deployment Services (WDS)
- D. Microsoft Desktop Optimization Pack (MDOP)

Answer: B

Question No. 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.

You need to identify which computers can be upgraded to Windows 10.

Solution: You install the Microsoft Assessment and Planning Toolkit. From the Microsoft Assessment and Planning Toolkit, you collect inventory data and run the Windows 8.1 Readiness scenario.

Does this meet the goal?

- **A.** Yes
- **B.** No

Answer: B
