Group Members:

	Criteria					Points
	5 (Outstanding)	4 (Good)	3 (Okay)	2 (Sub-Par)	1 (Poor)	
Drawings Appearance (5 pts)	Very artistic, neat and easy to read, with clearly labeled lengths of different parts of the building, even details. Gives a very clear visual idea of what the finished model will look like.	Not cluttered, and provides a view of the important parts of the building. Details may be left out, but the overall picture can be seen.	Building may not be drawn the right shape, but important viewpoints are depicted. Drawings are not neat or easy to read, but understandable.	Very sloppy and/or cluttered. Difficult to see what is being depicted. Important features and/or viewpoints may be missing.	Woefully incomplete. Does not depict the appearance of the building.	
Drawings Content (5 pts)	Depicts all three viewpoints, possibly using a 3-dimensional perspective. Height, length, and width are all labeled, with units, both full-size and scaled-down. Includes measurements for details, like antenna or cool angles.	Includes real-world length, width, and height of building, labeled on the drawing. All three viewpoints are depicted. Nothing necessary to build the model is left out.	Drawings show the building from all three sides (top, front, side). Some real life measurements may be left out. Some guesses or assumptions need to be made to build the model.	Includes only the height, or only one viewpoint. Important information necessary for building the model is missing/incorrect.	Drawings are unlabeled or incorrect. Does not contain any content necessary to build the model.	
Model Appearance (10 pts)	Very artistic and detailed, and is an excellent representation of the real-life building. Group went above and beyond to make the model look convincing, even including small details.	No part looks visually out of place, or crooked, or mis-sized. The model "reads" the way it's supposed to. Noticeable details are included, with small details omitted.	Some parts may be a little disproportionate, or sagging, but overall, if you knew what it was, you could see it in the model. Details are left out, but it looks roughly like the real thing.	Building is unpainted, or made of raw material. Doesn't look much like the real building. May be falling apart.	Looks like cardboard held together with tape, not like a building. Building may have collapsed, or is the wrong shape.	
Model Content (10 pts)	To scale with great precision. Height is accurate within 2%. Length and width were calculated very accurately.	Basically to scale. Height is accurate within 5%. Length and width were estimated well.	Roughly to scale. Height is accurate within 10%. Length and width may have been somewhat miscalculated.	Scale is noticeably off. It is much too big or too small, in whole or in part.	This model is not to scale. Model is inconsistent with both itself and the real building.	
Fact Sheet Appearance (5 pts)	Visually interesting and eye-catching, with a very clear layout. Includes a beautiful color picture of the building. Pleasant and legible font.	Uses a clear, aesthetic layout and legible font. Includes a picture of the building. Not difficult to follow.	Visually imperfect, but understandable. May have a messy or hard to follow layout or hard to read font, or no picture of the building. May have numerous spelling or grammar mistakes.	Difficult to read or follow; because of so many grammar or spelling mistakes, or may be handwritten, or otherwise visually unpleasant.	So messy that it is totally incomprehensible.	
Fact Sheet Content (5 pts)	Very interesting and informative to read. Includes every required data point, with many (5+) interesting facts about the building's history, features, how it was built, things that happened there, etc.	Includes all the required information (Name, date completed, age, dimensions [see checklist]) and 4-5 interesting facts.	Includes most of the correct required information and 3 interesting facts. The facts listed are somewhat interesting.	Missing some required information. May not have enough interesting facts, or facts may be very unengaging.	Missing many required data points. Very incomplete. May not have any interesting facts listed.	
	Building turned in? (10 pts)	Drawings exist? (5 pts)	Fact Sheet exists? (5 pts)		Total:	/60
