

INTRODUCTION

We have made analysis and made very relevant findings that the rich people are getting richer and the poor ones are getting poorer because there is a key that is lacking in the life of the poor set of people, and the key is **RIGHT INFORMATION.**

Page |

Bank as a rich financial institution has gone deeply into telecommunication business just because they have seen the future of the Nigeria economy and have tapped into what both poor and rich masses often need.

Telecommunication business has been the oil business of this nation; maybe I should say that people even spend more on telecommunication products daily than the food we eat. When talking about airtime and Data bundles, can you calculate how much you have spent on both in the last few months? Analysis has shown that Nigerians spend quiet more on Calling and Data bundles than they actually spend on food they consume daily

You should also know this as a person, you know how much time and energy you spend on that phone daily to visit all the social Medias and read, post and chat with friends, compare to the time, money and energy you spend on food, it's simple. In this internet and telecom growing world we are, with Total subjection and clarity, everything will soon be controlled and monitored by the internet and telecom generally. And guess what; more data bundle and airtime will be needed to execute this task.

No wonder all the banks are jumping into VTU business to make their business gain more ground and attention.

In this Nigeria, any business you want to do must center on what meet the daily need of the masses, so believe me, coming into telecommunication business is never an error, but it's a blessing, in fact the biggest fish in the pull of Nigeria business. No wonder, Mike Adenuga the man behind Globacom Nigeria is going strength on the list of the richest people in Nigeria.

No company can survive without Telecommunication effect, no business can survive without the influence of telecommunication and there is practically nothing we can enjoy about communication if Telecommunication is taking out of our daily actions.

Welcome here, I am Akinsuroju Olubunmi , a graduate of Biochemistry, Adekunle Ajasin University Akungba Akoko Ondo State, an interpreneur, entrepreneur, an infopreneur, Online business coach with concentration on Digital, Electronic and Social Media marketing and am into business, content, idea development with strong passion in bringing to light and delivering with simplicity what can work and improve the financial ability of the general masses no matter their present financial status.

By God's grace, I have been privilege to authored many eBooks that has helped uncountable number of Nigerians in different age category, including the best-selling A-Z secrets of Mini Importation business, Telecommunication made simple, Banking System Money Making Secrets among others.

In the course of this eBook, I will be revealing how you can start Recharge card printing business, Data reselling and other wonderful business at the comfort of your phone and room.

My prayer is that you will not just take this opportunity for granted and joke with it. Because If you follow it, you will join others that are making it, if you neglect it, you won't make the money through it and that won't stop others from making their daily income. So, all the decisions you make will either change your financial status or you still remain who you are and you will keep searching for other Financial information that are not readily available.

Take your step and join the winning team. I pray God also favor you and give you wisdom to make this eBook work for you and change your desires in this eBook to testimony.

Your Brother and Son in the business world

How to start recharge card printing business in Nigeria with little capital

Page |

So many people in Nigeria are searching for new and fresh ways to earn money. And I use to smile when people neglect the power of Telecommunication business especially **Recharge card printing business**. It has been really profitable to a lot of people recently, but of course, you will need to know some specifics and strategies to make it work out for you as well. And this is what will make you make money out of it. So, how can you start recharge card printing business in Nigeria? Am sure this is also the question in your mind and that is why you are reading this right now.

Is Recharge card printing really lucrative? First of all, we will answer some common questions that people usually ask when they learn about this way to earn cash. Many potential entrepreneurs would like to know about the advantages of recharge card business. **The primary advantage is that people recharge their phones every day because they need to make calls and send messages**, so they will definitely buy a lot of cards. This means that the business can be **profitable as long as you have customers**. Attracting the customer base requires a lot of hard work, and you will also need to develop some strategic thinking.

If everything is done right, the recharge card business can bring a lot of profit. Now, we will give you some detailed information about starting your business in the recharge card printing sphere.

How to start recharge card printing business – basic information to starting your printing business, you will need the:

Pin codes/E-pin: that will be printed on the vouchers. Usually, it is able to get them from the major dealers, who will sell them for you at a reduced price.

Most often, the pins are sent via e-mail, so you can easily try to find a dealer online. But I won't let you to pass through that stress, through searching for dealers, many has been scammed and they were left alone at the junction of believing every online stuffs are scam. I am also a victim of scammers in different online business pursuit, my experiences online as a victim of scammers is part of what pushed me to go deeply into online training so as to help those that has been scammed, broken down and shattered by the so called scammer, one thing I am sure of is that no one can so good and reap evil, and no one can sow evil and reap good, So allow them to continue with their evil act, Judgment is coming upon them IJN.

Page |

Once you register with any trusted dealer, you will have to provide the proof of your identity and purchase a minimal amount of pins. But the reason behind this eBook is to make you know how to do this business by connecting a source that act as the link between you and the telecom companies (being it MTN, GLO, Airtel and 9mobile)

The payment for your pin codes will be done through the bank. The dealer will provide you with the bank account where you have to transfer money. Afterwards, you will get an e-mail with the pin codes that you have purchased. That is just in their own case, the one am teaching you is the one with which you can have a wallet, deposit your money in your wallet and that money can be used to generate the Pin code/E-pin you always see on the recharge card paper

It is strongly recommended to access them on your personal computer and not the Internet café, this is why I recommend and am training basically with the use of your personal mobile phone or computer especially if there is a chance you will forget to log out afterwards. If you are working with a local dealer, they can provide you with the pins by meeting up with you and giving you a CD or flash drive.

In my case, what I am training you on is using your personal phone, and will guide you on the steps to take and have a very wonderful business flow in this recharge card printing business.

What are the primary tools for starting the business? You will not need a lot of special tools for this business. You should only make sure that you have the following:

- **The working laptop or computer with stable internet connection Or a Good phone with better memory**
- **Valid e-mail address and phone number.**
- **Recharge card printing machine/Any printer that can print paper normally (Only print from people you trust, and always get a flash drive for them to print it from, never you allow them copy what to print on their system at all if you don't trust them)**
- **Printing press A3/A4 paper for printing out the recharge cards.**
- **WPS if you using Your phone like mine**
- **My training guide that gives you where to get the process done online and how to get all done**
- **Starting capital (No specific amount)**

In case you are confused about printing your cards, you should not worry – there are a few options that would be perfect for you. You can print your pin codes online in your house if you can afford some small printers, or blue bamboo machine that looks just like ATM machine and it does the work perfectly.

If you are unable to afford the expensive computers or printing press, you can receive a special device from the major card dealer which will allow you to print out your vouchers. Internet connection will not be necessary for printing out cards, but is crucial for your business, because if you are dealing with someone who is far away from you, you will need the Internet

to keep in touch with them. As for the one am teaching, you really need few moments online with the internet to generate your E-pin and extract it for necessary printing.

Page |

So, here are all the above steps, but summarized for your convenience.

To start your recharge card printing business, you will have to: Use a Good phone, laptop or computer with good internet connection or attend the internet café. Contact My secret guide to recharge card printing with the phone, Register and deposit you money with my trusted linking platform that links all the network provider to us and generate the recharge card pin codes on the platform. You will be sent some encrypted pin codes. They can be only de-encrypted with just your phone that you use for browsing. Now, use your phone with the simple guide to de-encrypt the codes and then copy, save and do some others or do all ones and copy into your word or WPS document. They are ready for printing and marketing for your good income.

It should be mentioned that Nigerians spend about N300 billion annually on recharge cards, which indicates how important they are in the everyday life of Nigerians. Everyone needs to make calls, and for that, they need their phone to be loaded with funds. If you have the primary tools for recharge cards production, good starting capital, and reliable information and customers, this business could bring you money in no time.

The questions jumping right now in your mind **are**

- ✓ **How much am I going to be buying the PIN?**
- ✓ **How many days will it expire?**
- ✓ **Who is this linking company?**
- ✓ **How do I start?**
- ✓ **How do I market my Card?**
- ✓ **How does it work really?**
- ✓ **Is it only for recharge card printing?**
- ✓ **These and many more are your questions and I will sit down conveniently and answer them easily.**

Page |

The image shows two side-by-side screenshots of mobile applications for selecting e-pins. The left screenshot is for Airtel, showing options to buy 100, 200, 500, and 1000 e-pins with their respective prices. The right screenshot is for MTN, showing options to buy 100, 200, 400, 500, 1000, and 1500 e-pins with their respective prices. A watermark 'PRODUCT OF CRE...' is visible diagonally across the middle of the page.

Quantity	Price
Buy Airtel 100 E-Pins	Price: ₦95.50
Buy Airtel 200 E-Pins	Price: ₦191.00
Buy Airtel 500 E-Pins	Price: ₦477.50
Buy Airtel 1000 E-Pins	Price: ₦955.00
Buy MTN 100 E-Pins	Price: ₦96.50
Buy MTN 200 E-Pins	Price: ₦193.00
Buy MTN 400 E-Pins	Price: ₦386.00
Buy MTN 500 E-Pins	Price: ₦482.50
Buy MTN 1000 E-Pins	Price: ₦965.00
Buy MTN 1500 E-Pins	Price: ₦1447.50

On each #200 MTN, YOU MAKING #7 PRFOT, if you supplying 10 shops 20 daily, your profit will be #1400 daily

These are the prices you will be buying them

It means that you will make #4 on a single pin if you sell MTN OF #100

If you are supplying 20 to 10 shops daily, you will be making

#1000-#1500 daily as your profit.

The screenshot shows the 'Select E-Pin for (GLO)' screen with three options: 100, 200, and 500 e-pins with their respective prices.

Quantity	Price
Buy GLO 100 E-Pins	Price: ₦93.00
Buy GLO 200 E-Pins	Price: ₦186.00
Buy GLO 500 E-Pins	Price: ₦465.00

The screenshot shows the 'Select E-Pin for (9Mobile)' screen with four options: 100, 200, 500, and 1000 e-pins with their respective prices.

Quantity	Price
Buy 9Mobile 100 E-Pins	Price: ₦95.50
Buy 9Mobile 200 E-Pins	Price: ₦191.00
Buy 9Mobile 500 E-Pins	Price: ₦477.50
Buy 9Mobile 1000 E-Pins	Price: ₦955.00

You have seen how much you can make on each network now, it all depends on how many customers you can control and build.

Even in some local places, they sell recharge cards for #110. Imagine selling your own for #105

Page | 10

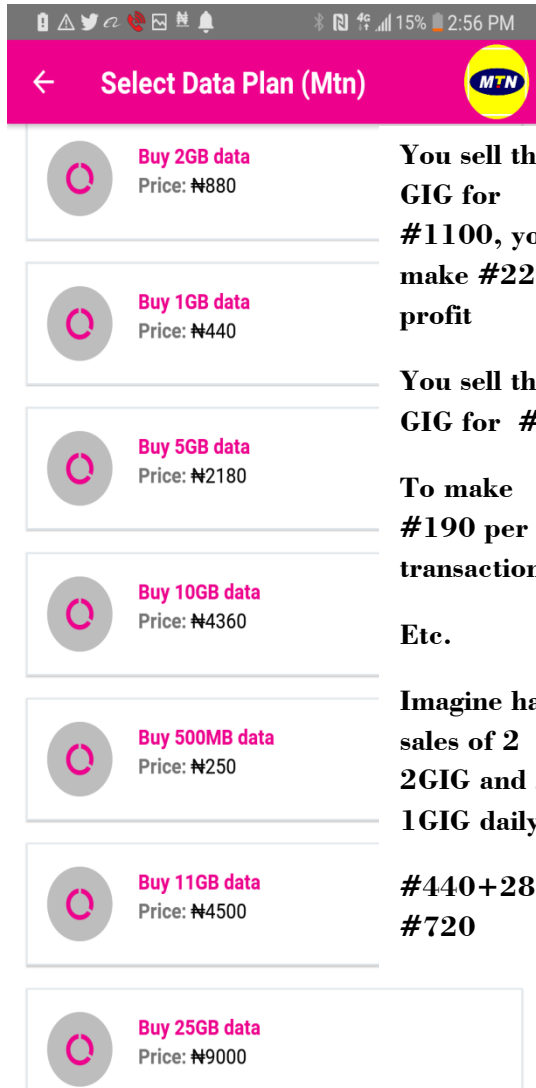

Meaning you will be having #105-#95 from selling one. That is #10 per 1.

If you sell 20 each for 10 shops daily, you will be making #2000 daily.

That is how you make your money daily, If you doubt me, go to the Northern Nigeria, some places in Niger state also, they sell recharge cards for #110

If #2000 profit is not too small for you daily, then you are good to go, And believe me, not only recharge card that you can do with this business guide.

Some Other Businesses in the same arena Online.

You sell this 2 GIG for #1100, you make #220 profit

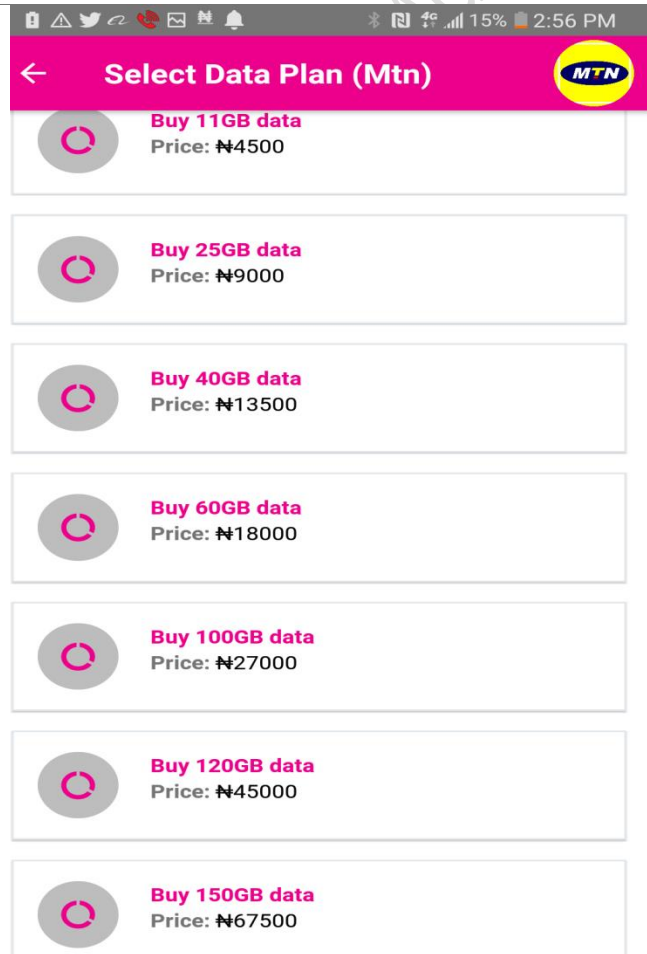

You sell this 1 GIG for #580

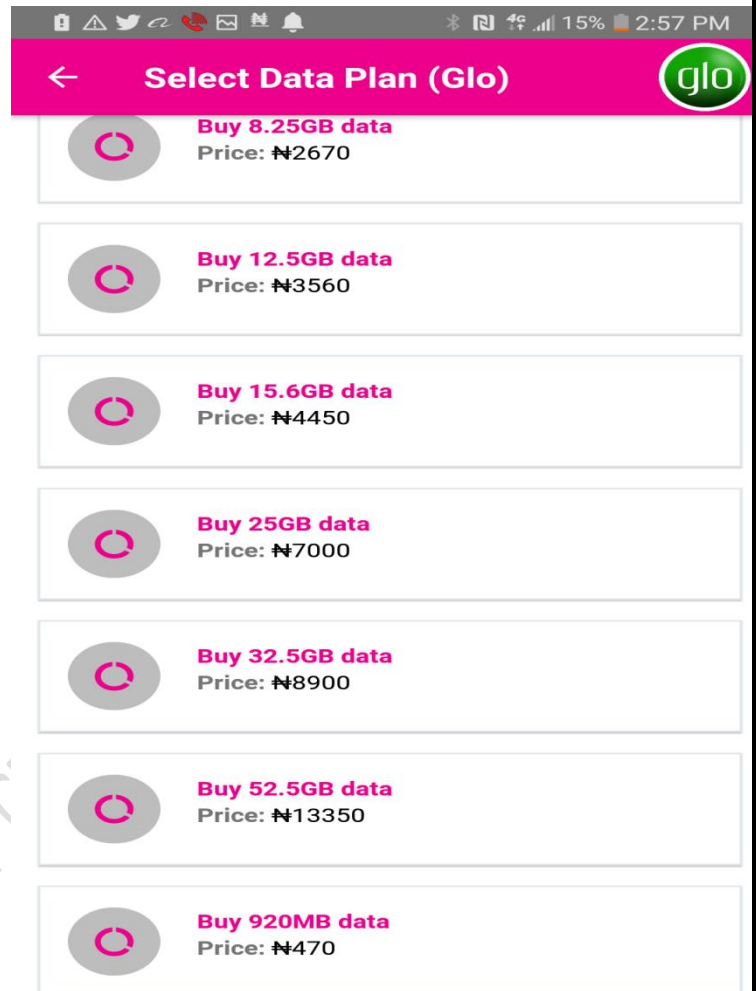

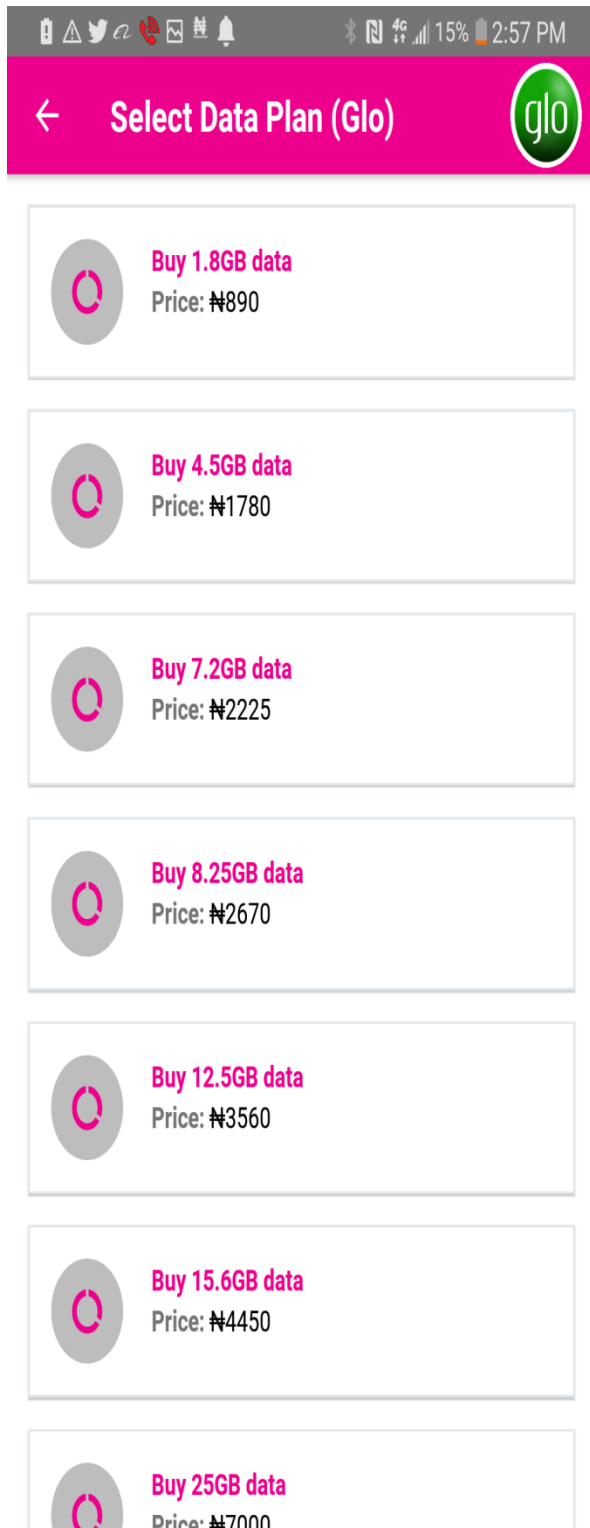

To make #190 per one transaction

Etc.

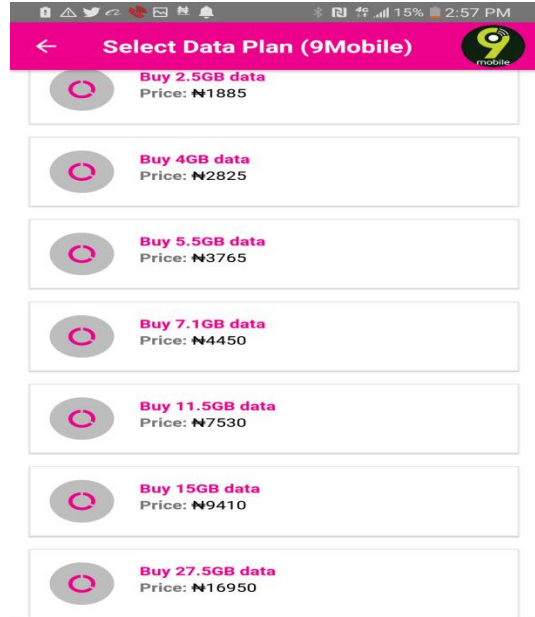

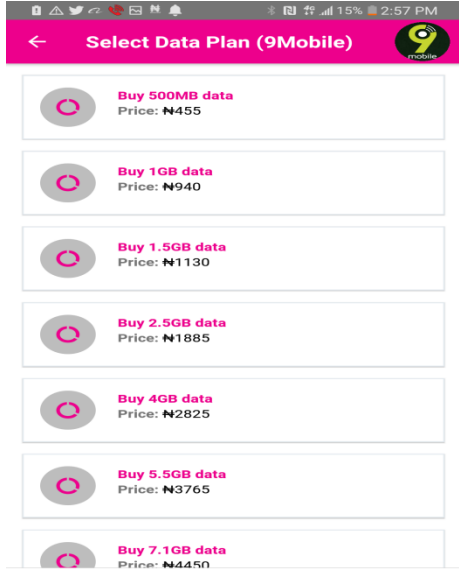

Imagine having sales of 2 2GIG and 2 1GIG daily

#440+280= #720

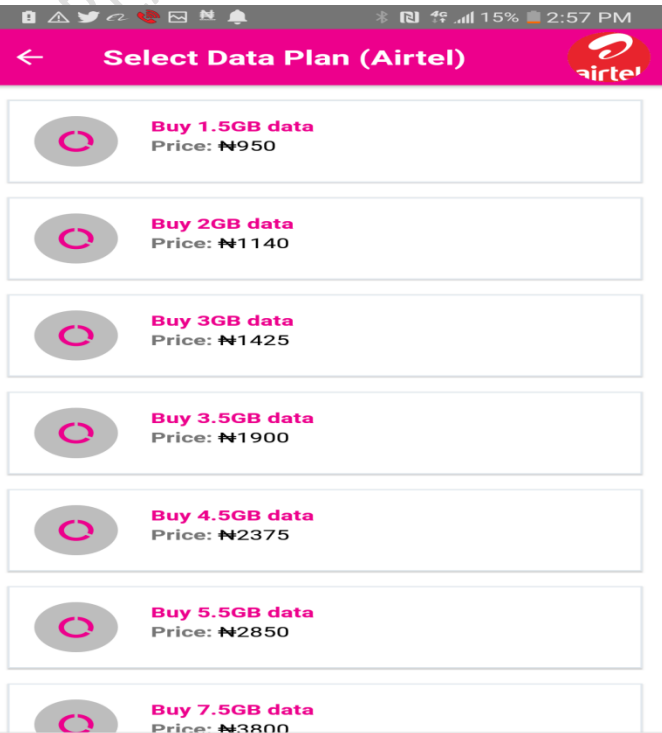

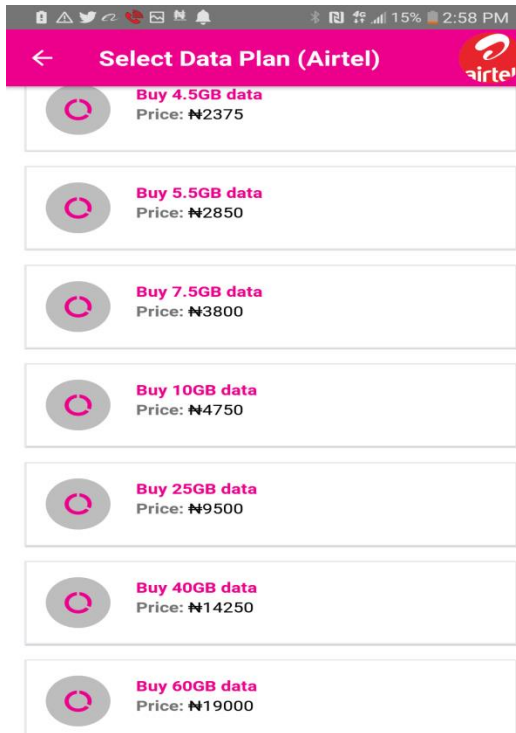

The prices for Data bundle is not constant everywhere, you can put any profit of your interest on the normal price, remember to lower your own compare to other peoples own around you so as to have more sales and thereby control the market.

WAEC CHECKING BUSINESS

Every year, thousands of students write WEAC exam around us and every student is to check their exam after the result has been announced released. If you can supply the WEAC checking E-PINS for 5 schools with an average of 50 students each. Checking and printing 1 for #1000

Page |

Now lets assume that you have 250 students, and #1000 each

Let us check how much you will be getting one WEAC checking card for from our vendor also

Now you buying 1 for **#800**

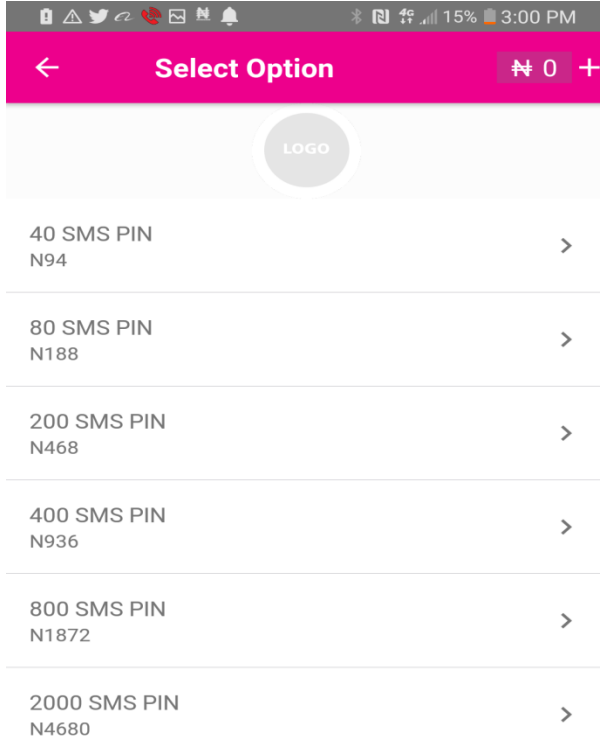

And you checking and printing for **#1000** for each person

If you check for 20 students, you will make a profit of **#2000**

If you check for 50 students, you will make a **profit of #10,000**

Your profit depends on how many students you are checking for

You just deposit your money and generate the e-pin for checking it, you can also print the e-pin and start supplying sellers in bulk

This Bulk SMS Unit purchase is the act of buying some units here with the money deposited in your wallet so as to send a customized message to any selected number of people from your contact.

Is there also a process of making money through this ?

O Yes, a lot of money comes with it.

For example, your Church, department or school or any other firm or institution wants to send bulk messages that will be customized with their name to any specific number of people at ones, you can take the task and help them send, maybe at #4 normal SMS charge, since its going to contain their names and other details.

Beside this, you can see how much you will be sending per one and see the profit you can make.

$$94/40 = \#2.35 \text{ per msg}$$

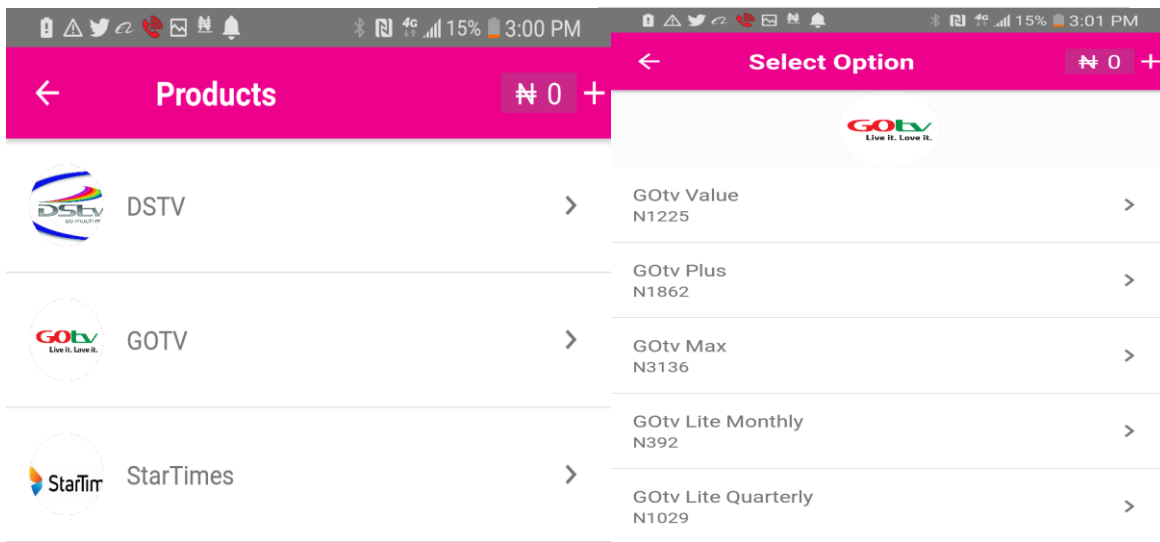

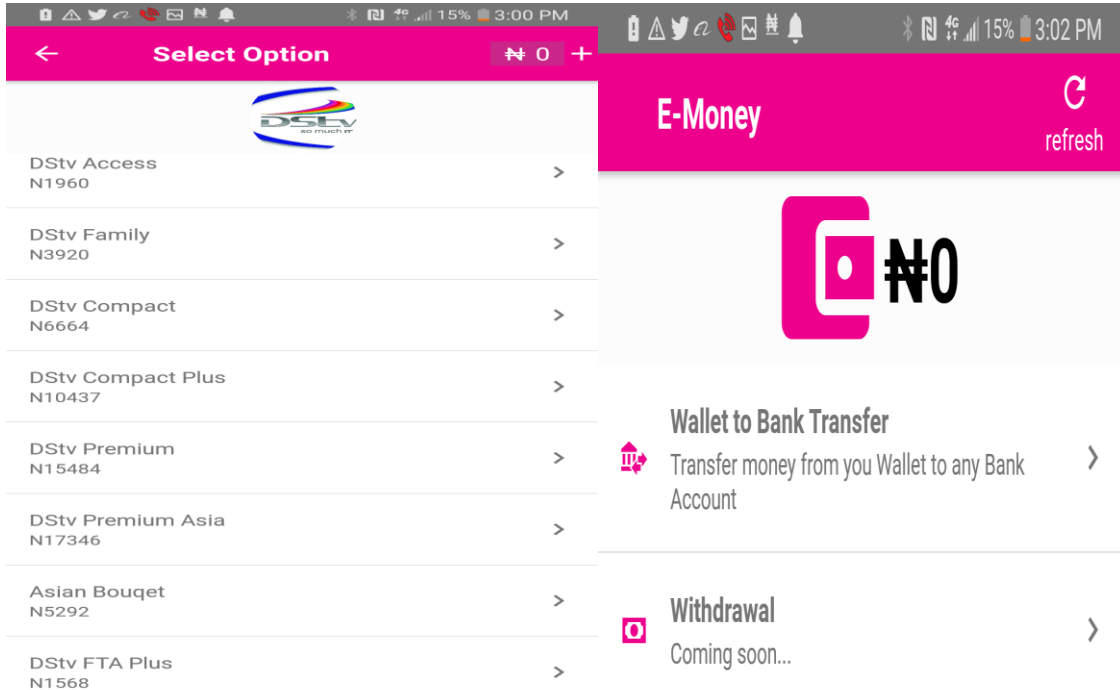

$$4 - \#2.35 = \#1.65 \text{ gain per one}$$

Lest assume you helping five churches to send this, and they have a capacity of 500 each and sending bulk SMS 3 TIMES A MONTH

500(5) = 2500 MEMBERS (UNIT) IN 3 TIMES MAKES IT 7500 UNITES IN A MONTH.

$$\#7500(\#1.65) = \#12,375 \text{ MONTHLY}$$

There are so many other things you can do on this platform such as TV subscription and others as you can see below.

That is the end of the volume one, as you can see clearly what this eBook entails, the volume two is the main Business eBook containing all the necessary information and the steps to take to enjoy all the benefits hanging in it.
