ECHELON PRIME FOUNDATION

2023 Community Memo
January 25, 2023

Over the past year, we have experienced tremendous growth and development. As the first Emissary term comes to a close, we want to reflect on the achievements and evolution of our community and ecosystem.

Highlights

- Community ratification of the Echelon Whitepaper (EWP)
- PRIME distribution framework outlined and launched via Prime Events and caching
- Updates to the EWP with the release of:
    - EWP Addendum
    - PRIME Update
    - Bulletin 2201 Governance Update
    - Bulletin 2202 Sink Update
- PRIME ERC20 token launched as non-transferable
- Governance framework drafted and established via Echelon Charter
- Community vote to unlock PRIME with target of March 1, 2023
- First PRIME grant awarded for database / API
- PRIME treasury established

Coming Soon

- Prime Event 5
- DEX liquidity incentive program
- PRIME transferability unlock
- Echelon.io website overhaul and upgrade
- PRIME emissions via game partner
- Ardent Prime collectors program
- Bulletin 2301 Glint Revenue
- Emissary Prime general election 2023
- Community contribution opportunities via Dework
- Community technical bug bounties via Immunity
- Echelon protocol and technical infrastructure updates
- Echelon profile system and Bonds

Broader Community Projects

- Prime Wiki
- Paragons DAO / The Priming
- Paralleldecks.xyz
- Tessera Vaults

◢◢ ECHELON PRIME FOUNDATION

Year one was centered around establishing operating foundations for Echelon, developing a token distribution framework, and releasing PRIME. As we move into year two, we will shift our focus to these four key areas.

1) Emphasize partnerships and business development
With the operating framework established and token released, we plan to prioritize outreach to new partners and games studios. Our goal is to position PRIME as the premier web3 network token for multiple titles.

2) Broaden community activation
PRIME as a transferable token allows us to activate our community in new ways. We will establish a program to provide bounties and mini-grants to encourage content creation, gaming research, web tooling, community building, and other ventures.

3) Support the launch of Parallel TCG
Parallel Studios is launching Parallel TCG this year. We will work with the studio through each phase of release to provide community support and robust economic infrastructure for those who choose to opt in to the PRIME ecosystem.

4) Continue striving for greater decentralization
Echelon has established a strong foundation this year with the support of our community and Parallel Studios. As our ecosystem matures, will we continue to strive for greater self-sustenance and decentralization. We can do this by focusing on innovation, expanding our pool of contributors, and adding new features that create value for our community and ecosystem.

We encourage anyone with strengths in these areas to submit their name in the [upcoming Emissary Prime election](#).

Regards,

Emissaries Prime
