আবশ্যিক বিষয়  
(Compulsory Subjects)

বাংলা প্রথম পত্র  
(আবশ্যিক)  
বিষয় কোড: ০০১  
পূর্ণমান- ১০০

১। ব্যাকরণ		- ৫ X ৬= ৩০
	ক) শব্দগঠন	
	খ) বানান/ বানানের নিয়ম	
	গ) বাক্যশুদ্ধি/ প্রয়োগ-অপপ্রয়োগ	
	ঘ) প্রবাদ-প্রবচনের নিহিতার্থ প্রকাশ	
	ঙ) বাক্যগঠন	
২।	ভাব-সম্প্রসারণ	- ২০
৩।	সারমর্ম	- ২০
৪।	বাংলা ভাষা ও সাহিত্য-বিষয়ক প্রশ্নের উত্তর	- ৩০

বাংলা দ্বিতীয় পত্র  
(আবশ্যিক)  
বিষয় কোড: ০০২  
পূর্ণমান- ১০০

১।	অনুবাদ (ইংরেজি থেকে বাংলা)	- ১৫
২।	কাল্পনিক সংলাপ	- ১৫
৩।	পত্রলিখন	- ১৫
৪।	গ্রন্থ-সমালোচনা	- ১৫
৫।	রচনা	- ৪০

**ENGLISH  
(COMPULSORY)**  
Subject Code: 003  
Total Marks-200

**Part-A  
Marks-100**

**1. Reading Comprehension**

An unseen passage dealing with a topic relevant to our times will be set. Candidates will be required to answer (a) a number of thematic questions that will test their understanding of the passage (30 marks), and (b) a number of questions related to grammar and usage. (30 marks)

2. Candidates will be required to write a summary of the given passage in their own words within 100 words. (20 marks)

3. Candidates will have to write a letter relating to the thematic issue of the given passage to the editor of an English newspaper. (20 marks)

**Part-B  
Marks-100**

1. Candidates will be required to compose an essay on a topic related to an issue of topical relevance. The essay must conform to the word limit set and must convey a candidate's ability to express his or her ideas clearly and correctly in English as well as reflect and analyze a topic of contemporary interest. (50 marks)

**2. Translation from English into Bangla and Bangla into English**

Candidates will be required to translate a short passage from Bangla into English and another from English into Bangla. (25+25=50 marks)

**BANGLADESH AFFAIRS  
(COMPULSORY)  
Subject Code: 005  
Total Marks: 200**

This paper is designed to cover various issues/topics concerning Bangladesh affairs which include history, geography, environment, society, culture, economy and politics.

The topics/areas that should be covered are stated below:

1. Geography of Bangladesh that should include topographical features of different areas/regions and their developments over time.
2. Demographic features including ethnic and cultural diversity.
3. History and culture of Bangladesh from ancient to recent times.
4. Economy, society, literature and culture of Bangladesh with particular emphasis on developments including Poverty Alleviation, Vision- 2021, GNP, NNP, GDP etc. after the emergence of the country.
5. Bangladesh's environment and nature and challenges and prospects with particular emphasis on conservation, preservation and sustainability.
6. Natural resources of Bangladesh with focus on their sustainable harnessing and management.
7. The Constitution of the People's Republic of Bangladesh: Preamble, Features, Directive Principles of State Policy, Constitutional Amendments.
8. Organs of the Government:
  - a) Legislature: Representation, Law-making, Financial and Oversight functions; Rules of Procedure, Gender Issues, Caucuses, Parliament Secretariat.
  - b) Executive: Chief and Real executive e.g., President and Prime Minister, Powers and Functions; Cabinet, Council of Ministers, Rules of Business, Bureaucracy, Secretariat, Law enforcing agencies; Administrative setup- National and Local Government structures, Decentralization Programmes and Local Level Planning.
  - c) Judiciary: Structure: Supreme, High and other Subordinate Courts, Organization, Powers and functions of the Supreme Court, Appointment, Tenure and Removal of Judges, Organization of Sub-ordinate Courts, Separation of Judiciary from the Executive, Judicial Review, Adjudication, Gram Adalat, Alternative Dispute Resolution (ADR).
9. Foreign Policy and External Relations of Bangladesh:
 

Goals, Determinants and policy formulation process; Factors of National Power; Security Strategies; Geo-Politics and Environment Issues; Economic Diplomacy; Man-power exploitation, Participation in International Organizations; UNO and UN Peace Keeping Missions, NAM, SAARC, OIC, BIMSTEC, D-8 etc, and International Economic Institutions, Foreign Aid, International Trade.
10. Political Parties: Historical development; Leadership; Social Bases; Structure; Ideology and Programmes; Factionalism; Politics of Alliances; Inter and Intra-Party Relations; Electoral Behaviour; Parties in Government and Opposition.
11. Elections in Bangladesh. Management of Electoral Politics: Role of the Election Commission; Electoral Law; Campaigns; Representation of People's Order (RPO); Election Observation Teams.
12. Contemporary Communication; ICT, Role of Media; Right to Information (RTI), and E-Governance.
13. Non-formal Institutions; Role of Civil Society; Interest Groups; and NGOs in Bangladesh.
14. Globalization and Bangladesh: Economic and Political Dimensions; Roles of the WTO, World Bank, IMF, ADB, IDB and other development partners and Multi National Corporations (MNCs).
15. Gender issues and Development in Bangladesh.
16. The Liberation War and its Background: Language Movement 1952, 1954 Election, Six-Point Movement, 1966, Mass Uprising 1968-69, General Elections 1970, Non-cooperation Movement, 1971, Bangabandhu's Historic Speech of 7<sup>th</sup> March. Formation and Functions of Mujibnagar government, Role of Major Powers and of the UN, Surrender of Pakistani Army, Bangabandhu's return to liberated Bangladesh. Withdrawal of Indian armed forces from Bangladesh.

**INTERNATIONAL AFFAIRS**  
**(COMPULSORY)**  
 Subject Code: 007  
 Total Marks 100

**Brief Description**

International Affairs is a compulsory paper for candidates of competitive examinations under the Public Service Commission, Bangladesh and applicable to both general and professional cadre. This paper deals with conceptual issues and actors in the study of international affairs. It starts with a basic understanding of international affairs, its nature and evolution. It focuses on both conceptual and empirical issues in international affairs. Under this paper basic concepts and theories such as power, balance of power, realism, liberalism/neo-liberalism, foreign policy, security, trade, and environment will be addressed. The empirical focus of the paper is on understanding bilateral and multilateral relations, processes, functions, and politics of regional and global institutions. The paper is divided into two sections: conceptual and empirical issues.

**Objective**

The paper strives to understand a basic knowledge about international affairs. It aims to examine whether the candidates are well equipped with the key concepts, perspectives and theories for explaining global phenomena to deal with policy matters effectively. Another purpose of the paper is to examine analytical capacity of the candidates about global issues and events that are closely linked with domestic arena.

**Proposed Distribution of Marks:**

1. Short Conceptual Notes : 10 out of 12	10 x 4 =40
2. Analytical Questions: 3 out of 4 questions	3 x 15 =45
3. Problem-solving question	1 x 15 =15

**Section A: Conceptual Issues**

**Introduction to International Affairs:** Significance of international affairs; meaning and scope of international affairs; linkage between international affairs and international politics

**Actors in the World:** Modern state, types of state, sovereignty, non-state actors, international institutions, relations between state and non-state actors

**Power and Security:** power, national power, balance of power, disarmament, arms control, geopolitics, terrorism

**Major Ideas and Ideologies:** Nationalism, imperialism, colonialism, neo-colonialism, post-modernism, globalization and new world order

**Foreign policy and Diplomacy:** concepts of foreign policy and diplomacy, decision-making process, determinants of foreign policy, diplomatic functions, immunities, and privileges

**International Economic Relations:** International trade, free trade, protectionism, foreign aid, debt crisis, foreign direct investment (FDI), financial liberalization, regionalism, regionalization, North-South gap, global poverty, MDGs

**Global Environment:** Environmental issues challenges, climate change, global warming, climate adaptation, climate diplomacy

**Section B: Empirical Issues**

**The United Nations System:** The UN and its organs, importance and limitations of the UN, Reforms of the UN, Role of the Security Council, UN Peacekeeping and peace-building functions, Human rights agenda, Environmental agenda, International Court of Justice, and Women empowerment

**Foreign Relations of Major Powers:** USA, Russia, UK, China, France, Germany, India, Japan etc.

**Global Initiatives and Institutions:** World Bank, IMF, ADB, G8, G-77, WTO, Kyoto Protocol, COP etc.

**Regional Institutions:** SAARC, BIMSTEC, EU, ASEAN, NATO, APEC, OIC, AU, GCC

**Major Issues and Conflicts in the World:** The Palestine Problem, the Arab Spring, the Kashmir Issue, the Syrian Crisis, Persian Gulf Conflict, nuclear issue and Iran, the North Korean issue, territorial disputes in Southeast and East Asia, Nuclear proliferation and other contemporary issues.

**Politics in South Asia:** India-Pakistan relations, Bangladesh-India relations, regional integration, water dispute, border problems and terrorism

**Bangladesh in International Affairs:** Major achievements, challenges, future directions

**Section C: Problem-solving**

The candidates may be asked to come up with an analysis of a problem and its solution on any aspect of global developments and security issues, such as trade, climate change, foreign aid, arms proliferation etc.

**MATHEMATICAL REASONING  
(COMPULSORY)**

Subject Code: 008

Total Marks-50

Mathematical Reasoning is based on the principles of Logic. A sound knowledge of Mathematical Reasoning prepares one not only to solve mathematical problems but also develops the intellectual ability to resolve problems in all spheres of public life and to arrive at impartial and impersonal intelligent decisions.

The examination in Mathematical Reasoning will test the ability of the candidate to apply knowledge of Mathematics and Mathematical Reasoning acquired up to secondary level, especially to concrete application-oriented problems.

The syllabus of the examination is given below:

1. Simplification of Arithmetic and Algebraic Expressions.
2. Unitary Method, Average, Percentage, Simple and Compound interest, LCM, GCD, Ratio and Proportion, Profit and Loss.
3. Algebraic Formulas, Factorization of Polynomials, Linear and Quadratic Equations, Linear and Quadratic Inequalities.
4. Systems of Linear Equations with two or three unknowns.
5. Exponents and Logarithms. Exponential and Logarithmic functions.
6. Arithmetic and Geometric Sequences and Series.
7. Line, Angle, Triangle related theorems. Theorem of Pythagoras, Circle – Theorems, Corollaries.
8. Area related theorems and construction, Mensuration – plane figures and solid objects.
9. Cartesian Geometry- Distance, Equation of a Straight Line.
10. Trigonometric ratios and functions. Problems on height and distances.
11. Set theory. Venn diagram.
12. Counting Principles, Permutations and Combinations. Elementary Probability.

**MENTAL ABILITY  
(COMPULSORY)**

Subject Code: 009

Total Marks-50

The objective of mental ability test is to assess differential aptitude of the candidate. The following areas are likely to be covered:

- 1. Verbal Reasoning:** The verbal reasoning test, as its name implies, is a measure of ability to understand concepts framed in pairs of words. The word used in these items may come from history, geography, literature, science, or any other content area. The item thus samples the candidate's knowledge and his/her ability to abstract and generalize relationships inherent in that knowledge.

**Example:** Man has an inborn desire to.....the unknown.

**Answer:**

- Invent
- Discover
- Recover
- Solve
- fear

- 2. Abstract Reasoning:** The abstract reasoning test is intended as a nonverbal measure of the candidate's reasoning ability. The series presented in each problem requires the perception of an operating principle in the changing diagrams. In each instance, the candidate must discover the principle or principles governing the change of the figures and give evidence of his understanding by designating the diagram which should follow.

**Example:** Program figures

Answer figures

- 3. Space Relations:** The Space Relation test is a measure of ability to deal with concrete materials through visualization. The ability to visualize a constructed object from a picture of a pattern has been used frequently in test of structural visualization. The ability to imagine how an object would appear if rotated in various ways has been used effectively in the measurement of space perception.

**Example:** A man travels 1 mile, then turn left and travels 1 mile, then he turns right and travels 2 miles, then again he turns right, and travels 5 miles. How far is he from the starting point?

**Answer:**

- 5 Miles
- 1 mile
- 9 miles
- 6 miles

- 4. Numerical Ability:** The test is a measure of the candidate's ability to reason with numbers, to manipulate numerical relationship and to deal intelligently with quantitative materials.

**Example:** What number has been left out?

4	$\sqrt{25}$	6	$\sqrt{49}$	?
---	-------------	---	-------------	---

**Ans:**

- 8
- $\sqrt{81}$
- 24
- $\sqrt{121}$
- None of these

5. **Spelling and Language:** The spelling and language test is intended to measure the candidate's ability to detect errors in grammar, punctuation, and capitalization. The items reflect the principles of present day formal writing, and the ability measured by the test is highly predictive of success in a variety of academic courses.

**Example:** নিচের অক্ষরগুলো দিয়ে শব্দ গঠন করুন।

র      লা      দা      প      ফ      ল

6. **Mechanical Reasoning:** The ability measured by the Mechanical Reasoning test may be regarded as one aspect of intelligence, if intelligence is broadly defined. The person who stands high in this characteristic finds it easy to learn the principles of operation and repair of complex devices.

**Example:** আয়নার মধ্যে একটি ঘড়িকে যেমন দেখায় তা কোন ছবিতে দেখা যাচ্ছে?

GENERAL SCIENCE AND TECHNOLOGY  
(COMPULSORY)

Subject Code: 010

Part – A: General Science

Marks - 60

- i. **Light:** Nature, Spectrum, Different colours and wavelengths, UV, IR, and LASER, Reflection of Light, Refraction of Light, Total Internal Reflection of Light, Lenses, Thin converging lens, Dispersion of light, particle nature of light, Einstein's photoelectric equation, photocells
- ii. **Sound:** Hearing mechanism, Decibel, Frequency, Sound machines in home and around – , Microphone, Loud speaker, Public address system, Characteristics of a sound note, Formation of stationary waves in stretched string, Laws of vibrating strings, Beats, Doppler Effect, Applications and limitations of Doppler Effect, Echoes, Absorption of sound wave, Reverberations, Fundamentals of Building acoustics, Statement of Sabine's formula
- iii. **Magnetism:** Polarity and relationship with current, Bar magnet, Magnetic lines of force, Torque on a bar magnet in a magnetic field, Earth's magnetic field as a bar magnet, Tangent galvanometer, Vibration magnetometer, Para, dia and ferromagnetic substances with examples, Electromagnets and permanent magnets
- iv. **Acid, Base and Salt:** Acid-base concepts; characteristics of acids and bases; acid-base indicators; uses of acids and bases in daily life and caution in handling them; social effects of misuse of acids; reason for acidity in stomach and selection of the right food; pH; measurement and importance of pH of substances; salts; characteristics of salts; necessity of salt in daily life; uses of salts in agriculture and industries
- v. **Water:** Properties of water; melting and boiling points of water; electrical conductivity; structure of water; hydrogen bonding; sources of water; sources of fresh water in Bangladesh; water quality parameters (colour and taste; turbidity; presence of radioactive substances; presence of waste; dissolved oxygen; temperature; pH and salinity); recycling of water; role of water in conservation of nature; necessity of quality water; purification of water (filtration; chlorination; boiling and distillation); reasons for pollution of water sources in Bangladesh; effects of water pollution on plants, animals and human beings; effects of global warming on fresh water; strategy for preventing water pollution and responsibility of citizens or public awareness; prevention of water pollution by industries; prevention of water pollution due to soil erosion from agricultural land; conservation of water sources and development
- vi. **Our resources:** Soil; types of soil; soil pH; reasons and effects of soil pollution; natural gas and its main compositions; processing, uses and sources of natural gas, petroleum and coal; forestry; limitations and conservation of our resources
- vii. **Polymer:** Natural and synthetic polymer; polymerization process; sources, characteristics and usage of natural and synthetic polymers; manufacturing process, characteristics and uses of fibers, silk, wool, nylon and rayon; physical and chemical properties of rubber and plastic; role of rubber and plastic for environmental imbalance; aware of using rubber and plastic
- viii. **Atmosphere:** Biosphere and Hydrosphere, Ionosphere, role of oxygen, carbon dioxide and nitrogen. Potable and polluted water, Pasteurization.
- ix. **Food and Nutrition:** Elements of food; carbohydrates; protein; fats and lipid; vitamins; types and sources of carbohydrates, proteins; nutritional value; menu of balanced diet; the pyramid of balanced diet; body mass index (BMI); fast food or junk food; preservation of food; various processes of storing food; use of chemicals for preservation of foods and its physiological effects
- x. **Biotechnology:** Chromosome; shape, structure and chemical composition of chromosome; nucleic acid; deoxyribonucleic acid (DNA); ribonucleic acid (RNA); protein; gene; DNA test; forensic test; genetic disorder in human beings; Biotechnology and Genetic Engineering; cloning; social effects of cloning; transgenic plants and animals; Use of biotechnology in agricultural, milk products and pharmaceuticals; Gene therapy; Genetically modified organism; Nanotechnology; Pharmacology; Pharmacokinetics
- xi. **Disease and Healthcare:** Deficiency, Infection, Antiseptic, Antibiotics, Stroke, Heart Attack, Blood Pressure, Hypertension and Diabetes, Dengue, Diarrhoea; Drug addiction, Vaccination, Cataract, food poisoning, X-ray; Ultrasonography; CT Scan; MRI; ECG; Endoscopy; Radiotherapy; Chemotherapy; Angiography; uses, risk and side-effects of above techniques; Basic concept of Cancer, AIDS and Hepatitis

**GENERAL SCIENCE AND TECHNOLOGY**  
**(COMPULSORY)**  
Subject Code: 010

**Part – B: Computer and Information Technology**  
**Marks - 25**

- i. **Computer Technology:** Organization of modern personal computer and its major functional units, computer generations, History of computers, central processing unit and microprocessor, computer memories and their classification and characteristics, input and output devices with characteristics and uses. The role of BIOS. Bus architecture, Motherboard and its components, functions and organization of microprocessors, Arithmetic Logic Unit(ALU), Control unit, Language translator, Text editor, Compiler, Interpreter, Computer software, system software, operating system, application software with examples of applications, Computer virus, office automation. Computational biology; Role of computer in Drug design; Programming languages, their types and levels, steps for software development. Impacts of computer on society.
- ii. **Information Technology:** Data communication and information, information collection, processing, and distribution, System analysis and information systems, expert systems. Database software and structures, Database Management System (DBMS), Basics of multimedia systems with examples of hardware and software, concept of data compression, multimedia system development life cycle. Local area, metropolitan area and wide area computer networks,(LAN, MAN,WAN ), LAN Topology, Networking devices(Router, Switch, HUB),TCP/IP Protocol suite, Internet, Internet services and protocols, Internet Service Providers(ISPs) and their responsibilities, intranet and extranet, Word Wide Web(WWW) and web technology. Popular websites. Access control security and privacy. E-mail, Social media (facebook, twitter, blog) and their impacts. Different types of Transmission media with examples, bandwidth. Major components of telecommunication systems, mobile telephone systems, satellite communication systems and VSAT, importance of fibre optic communication system, Wi-Fi, E-Commerce technology and its impact to society, examples of E-Commerce websites, B2B, B2C, M-Commerce, Smart phones, GPS

**Part – C: Electrical and Electronic Technology**  
**Marks - 15**

- i. **Electrical Technology:** Electrical components, voltage, current, Ohm's Law, Electrical power and energy, Electromagnet and magnetic field, electromagnetic induction, Circuits Breakers, GFCI's and Fuses, Power Distribution and Series circuit, Voltage Sources in a Series, Kirchoff's Voltage Law, Voltage Division in a Series Circuit, Interchanging Series Elements, Voltage Regulation and the Internal Resistance of Voltage Sources, Parallel Resistors, Parallel Circuits, Power Distribution in a Parallel Circuit, Kirchoff's Current Law, Open and Short Circuits, Generation of AC and DC voltages, thermal, hydraulic and nuclear power generators. Electric motors and their applications. Transformers, AC transmission and distribution, Electrical instruments, voltage stabilizers, IPS and UPS
- ii. **Electronics Technology:** Electronic components, analog and digital signals, analog electronic devices, amplifiers and oscillators, resistance, types of resistors, conductance, ohmmeters, Capacitance, Capacitors, Inductors, Inductance, Sinusoidal Alternating, Waveforms, Frequency Spectrum, The Sinusoidal Waveform, General format for the sinusoidal Voltage of current, Phase Relations, The Basic Elements and Phasors, Response of Basic R,L and C, Elements to a Sinusoidal Voltage or Current, Frequency Response of the Basic Elements, Average Power and Power Factor, Complex Numbers, Rectangular Form, Polar Form, Conversion between Forms, Impedance and the Phasor Diagram, Introduction to 3 phase Systems, Elementary Concepts of Generation, Transmission, and Distribution, Various Levels of Power, Basic Concepts of Transformers, radio, television, and radar. Digital devices and digital integrated circuits, impact of digital integrated circuits, counters and digital display devices, digital instruments.

Mind as a spiritual substance, the empirical concept of the self, Theories of mind-body relationship.

**Immortality of the Soul:**

Its meanings and implications, Classical proofs for immortality, Kant's ethical proof.

**Value:**

Fact and Value, Intrinsic and Extrinsic Values, Three cardinal values: Truth, Beauty and Goodness, Subjectivity and objectivity of values.

**Truth:**

What is truth? Three main theories of truth: Correspondence, Coherence and Pragmatic theories.

**Philosophy of Religion:**

What is meant by God? Three concepts about God: Pantheism, Deism and Theism, Proofs for God's Existence, God and the Problem of evil.

**Major Trends in Contemporary Western Philosophy:**

Existentialism, Logical Positivism, Pragmatism, Neo-Idealism, Neo-Realism, Intuitionism and Analytical Philosophy.

**PHILOSOPHY**

Part-II

100 Marks

**Modern Philosophic Trends in Bangladesh:**

Materialism, Idealism, Humanism and Mysticism.

**Philosophic Approach to Certain Problems of Practical Life:**

Suicide, Abortion, Environmental Pollution, Terrorism, Hoarding, Corruption in Profession, and Dealings with Lower Animals.

**Moral Standard:**

Evolution of moral standard.

The nature of moral standard. Theories of moral standard: Hedonism, Perfectionism and Law (Categorical Imperative).

**Right and Duty:**

Mutual involvement of right and duty. Duties towards one's fellow-human beings.

**Moral Pathology:**

Wrong-doing and punishment. Main theories of punishment: The Retributive Theory, the Deterrent Theory and the Reformatory Theory.

**Individual and Society:**

Egoism, Universalism and Altruism, Justice and Beneficence.

**Muslim Philosophy:**

Four great medieval Muslim philosophers: Al-Farabi, IbnSina, Al-Ghazali and Ibn Rushd. Modern Muslim Philosophers: Shah Waliullah Dehlawi and Muhammad Iqbal.

**Indian Philosophy:**

Buddhism, Sakhya, Naya and Vedanta Schools Swami Vivekananda and Aurobindo Ghosh.

**EDUCATION**  
(POST RELATED)  
Subject Code: 221  
Total Marks-200

Part-I  
Marks-100

1. Concepts and Connotations of commonly used Educational Terms:
  - Education: Origin, meaning, concept. Continental and western definitions;
  - Literacy and Education: Literacy and its conditions, literate and illiterate, education for all, mass education, compulsory education, work experience vocational and technical education, professional education.
  - Basic Education: Concept, components-life skills, rights of Basic Education with regard to declaration of Human Rights, Rights of the Child, Constitutional Provision, EFA and DFA.
  - Informal, Non-formal and Formal Education: Connotation, concept, nature, scope, significance of Non-formal Education, Continuing Education, Life-long Education.
2. Foundations of Education:
  - Philosophical: Theme-based major philosophies-idealism, naturalism, pragmatism, materialism, realism and existentialism.
  - Sociological: Child-society and Education, Social bases of Education and Social functions of Education.
  - Psychological: Human psychology and Education, individual needs and Education, human ability, personality and Education.
3. Organization and Management in Education:
  - Concepts and significance of Education Organization, Management, Administration, Monitoring, Inspection and Supervision;
  - Principles and functions of organization, management, monitoring and supervision;
  - Roles and Functions of Heads as Leaders;
  - Management of Curricular Activities;
  - Mobilization and Management of Funds and Resources.
4. Curriculum:
  - Concept, nature, scope and significance;
  - Curriculum and syllabus;
  - Aim, objective and competency, domains of objective;
  - Principles of Curriculum;
  - Major components of Curriculum.
5. Roles of Education in Human Resource Development:
  - Roles of Basic Education - literacy and life skills;
  - Roles of Secondary Education;
  - Roles of Higher Education;
  - Roles of Vocational/Technical Education;
  - Roles of Women's Education;
  - Roles of Professional Education;
  - Roles of Environmental Education;
  - Roles of Non-formal Education;
  - Education as a means for Poverty Reeducation: PRSP and Education.

**EDUCATION**

Part-II

Marks-100

1. Learner and Learning:
  - Concepts of learner and learning ;
  - Child and adolescent physiological and psychological needs and characteristics of child and adolescent;
  - Piaget's and Bruner's theories of cognitive development;
  - Insightful learning theories and their applications;
  - Connectionism, classical conditioning, operant conditioning and Gestalt Theories and their application in learning.
2. Learning Experience:
  - Concepts effective learning experience;
  - Changing roles of teacher as facilitator;
  - Criteria of facilitating learning;
  - Maxims of effective learning;
  - Learning how to learn than what to learn;
  - Child centric and joyful learning strategies;
  - Activity based learning strategies;
  - Reinforcement for effective learning;
  - Effective communication in classroom;
  - Classroom methods and techniques;
  - Classroom management and learning environment.
3. Assessment of Achievement:
  - Assessment, Measurement and Evaluation: concepts, nature, significance Test: classification, characteristics, standardization, administration, scoring
  - Analysis of test-results: use of descriptive statistics, interpretation.
4. Education in Bangladesh:
  - Historical background
  - Structure, organization and management;
  - Constitutional provision and legal framework.
  - Primary Education: structure, statistics, curriculum, development programs, major issues and problems and their solutions
  - Secondary Education: structure, statistics, curriculum, development programs, major issues and problems and their solutions
  - Higher Education: structure, statistics, curriculum, development programs, major issues and problems and their solutions
  - Language Education: nature, scope, limitation and shortcomings, possible solutions
  - Social Science Education: nature, scope, limitation and shortcomings, possible solutions
  - Mathematics, Science and Technology Education: nature, scope, limitation and shortcomings; possible solutions;
  - Technical, Vocational and Professional Education: programs, statistics, major issues and problems and their solution.
5. Teacher Education and Research in Education:
  - Primary Teacher Education: initial and in-service short programs, curriculum, modalities of delivery, shortcomings and problems, possible solution
  - Secondary Teacher-Education: initial and in-service short programs, curriculum, modalities of delivery, shortcomings and problems, possible solution
  - Provisions and Scope of Higher Degree in Education: Master's M.Phil and Ph.D
  - Research in Education: Nature, scope, limitations and future directions.

**ARCHAEOLOGY**  
(POST RELATED)  
Subject Code: 231  
Total Marks-200

Part-I  
Marks - 100

1. Definition of Archaeology as an Interdisciplinary Approach.
2. Nature of Archaeological Data.
3. Relation of Archaeology with other Disciplines; Multidisciplinary vs. Interdisciplinary.
4. Dating Methods in Archaeology.
5. Some Basic concepts (i) Artifacts; (ii) Typology, (iii) Industry; (iv) Ecology; (v) Society; (vi) Culture.
6. The Origin and Growth of Archaeology in World Context.
7. Indigenous (Sub-continent) Conceptions of the Study of the Past.
8. Early (Pre-1981) Western Perceptions of the India's Past.
9. The Establishment of Asiatic Society of Bengal and Archaeology.
10. Alexander Cunningham's Surveys and the work of his contemporaries and successors.
11. John Marshal and His Successor's Period (1902-1944).
12. Sir Mortimer Wheeler and the Scientific Archaeology in the Sub-continent.
13. Present Structure of Archaeology in India, Pakistan and Sri Lanka.
14. Archaeology of Bangladesh from the Beginning till Date:-
  - (I) Differential levels of culture/development in space and time and the persistence of ancient modes of life into the present.
  - (II) Roots and migration of ancient peoples of Bengal.
  - (III) Origin and migration of Society and Religion in the Sub-continent.
  - (IV) Important social institutions: - Family, Kinship, Caste, Tribe, Totem, Magic, Religion.
  - (V) Early important archaeological sites of Bangladesh:-
    - (i) Mahasthangarh;
    - (ii) Mainamoti;
    - (iii) Paharpur.

## ARCHAEOLOGY

Part-II

Marks - 100

## 1. Archaeology and Fieldwork and the Basic Units Archaeology.

The Goals and the Framework of Archaeological Inquiry. What is field archaeology? Theoretical Archaeology vs. Field Archaeology: Meaningless Opposition. Theoretical basis of archaeological Fieldworks; Culture, Historical, Processual and Post-processual theoretical paradigms in Archaeological Fieldwork. Archaeological Fieldwork Management in the sociocultural context of Bangladesh.

**Basic Units:** Artifacts and Ecofacts: Definition, Classification and interpretation. Importance of Artifacts and Ecofacts in archaeological interpretation.

**Stratigraphy:** Law of Superposition. Law of Uniformitarianism. Law of sequence. Strata and **Stratification:** Identification, Stratigraphy, Interpretation. Significance of Stratigraphy in the reconstruction of chronology and culture.

**Archaeological sites:** Kinds of archaeological sites and their formation process.

**Settlement Pattern:** Definition, Determining factors of a settlement pattern.

**Context:** Definition, Space, Time, Form, Function, Structure and Content as dimensions of context.

**Culture:** Culture Historical view, Functional view and Interpretive view of Archaeology Culture.

2. Surface Exploration and Discovery: Methods, Equipment and Record. Objectives. Importance of having objectives in exploration. Survey of Pre-historic, Proto-historic and Historical Sites. A General Survey. Survey for a Specific Problem.
3. Methods of Sites Survey. Library and other types of pre-survey research. Ground Survey. Aerial Survey. Map Reading, Geophysical Prospecting. Chemical Survey, Physical Features Rocks and Minerals. Soil Sampling, Ethnological Data Collection. Legends and Folktales. Methods of Data Retrieval. Methods of Recording. Site Survey Data. Staff. Exploration Kit.
4. Excavation: Principles and Methods. Problems and Strategy. Permission, Funding and Law with special reference to Bangladesh. Mapping. The Processes, Methods and Types of Excavation. Recurrent Types of Context and their excavation. Excavation of Structures. Excavation of Sites without Features. Excavation Staff, Equipments and Logistics. Planning and Management of Excavation. Field Preservation. Responsibility and Qualifications of an Excavation Team.
 

Importance and Methods of Recording in Excavation. Recording of pottery and Small Finds. Artifacts and Ecofacts: Their Recovery and Treatment.
5. Post Fieldwork Planning, Processing and Finds Analysis and Dating:
 

Post-Fieldwork Planning. Finds Analysis. Pottery Analysis, Stone, Metal and Organic Artifacts Analysis, Bones, Seeds and Other Plants Remains Analysis. Soil and Sediments Analysis. Pollen, Land Snail and other Environmental Sample Analysis.

Dating, Absolute and Relative Dating Techniques. Radio Carbon Dating. Thermoluminescence Dating, Archaeomagnetism. Dendrochronology, Stratigraphic Dating, Cross Dating. Fluorine-Uranium-Nitrogen Dating.
6. Interpreting the Evidence: What is Interpretation? Levels of Interpretation. Interpreting Site's Environment. Interpreting the Household Activity Areas, Community Activity Areas. Interpretation of How People Lived.
7. Prehistoric tools, techniques and uses.
8. Human achievements during Paleolithic and Neolithic periods.
9. Urban Revolution and Criteria of Civilization.
10. Egypt Civilization, Mesopotamian Civilization and Indus-Civilization.
11. Second Urbanization: Various Resource and sequences.
12. Paleontology: Its history and development from classical stage to the present.
13. Meaning of Epigraphy, types, nature and importance of Epigraphy and Numismatics in the Context of Archaeology of South Asia, especially Bengal.
14. Social, economic, religious and cultural aspects as reflected in ancient and early medieval Indian Coins.
15. Geographical Information System (GIS) and its implications in archaeology.

16. Archaeology and Fieldwork and the Basic Units Archaeology.  
The Goals and the Framework of Archaeological Inquiry. What is field archaeology? Theoretical Archaeology vs. Field Archaeology: Meaningless Opposition. Theoretical basis of archaeological Fieldworks; Culture, Historical, Processual and Post-processual theoretical paradigms in Archaeological Fieldwork. Archaeological Fieldwork Management in the sociocultural context of Bangladesh.
17. Definition of terms: Preservation, Conservation, Restoration, Artifacts, Cultural Property, Archaeology and archaeometry.
  - (a) Ethics and principle of conservation purpose of conservation.
  - (b) Conservation of organic objects, building materials and other archaeological materials.
18. Definition, scope and limitation of Ethnoarchaeological research. Role of Ethnographic evidence in the interpretation of archaeological record and reconstruction of past societies and culture.

**WATER RESOURCES ENGINEERING**

(POST RELATED)

Subject Code: 241

Total Marks-200

Part-I

Total Marks-100

Marks

50

Fluid properties, fluid flow concepts and basic equations, similitude and dimensional analysis, laminar and turbulent flow, pipe flow and problem.

Open channel flow and classification, energy equations, critical flow concepts, uniform flow, hydraulic jump.

Flood management, its causes and economic aspects of floods, Principles and design of river training and hydraulic structures such as dams, barrages, cross-drainage works, revetments and guide banks, coasts and coastal features, ports and harbours, coastal sedimentation process, shore protection works and dredging.

**Structure**

20

Analysis of beams, truss, Influence lines for beams, truss, Deflection of beams. Statically indeterminate structure, beams, trusses.

**Geotechnical**

15

Soil exploration, properties of soil, bearing pressure, settlement of structure.

**Environment**

15

Water supply. Theory of water treatment, sewage treatment and disposal.

**WATER RESOURCES ENGINEERING**

Part-II

Total Marks-100

Hydrologic cycle, precipitation, stream flow. runoff relations, hydrographs, routing and statistical methods.

50

Integrated water resources management. O&M of water resources projects, principles of project management, contracts and specifications, quality control cost accounting system, report preparation and project evaluation; Groundwater and well hydraulics, environmental aspects in water resources; waterways systems, measures of improving waterways, navigational aids, waterways of Bangladesh.

**Structure**

30

Design and analysis of RCC beams, one way to way slab, column design, introduction to Prestressed Concrete.

**Geotechnical**

20

Design of foundation, retaining wall, sea wall. Deep excavation. Introduction of transportation Engg.

**MINING ENGINEERING**  
(POST RELATED)  
Subject Code: 251  
Total Marks-200

Part-I  
Marks-100

Course Outline:

Introduction to mining: Elements of mining, development of mining technology, stages in the Life of a Mine, Unit operation of mining, consequences of mining, governments influence and regulation; Stages of mining: prospecting, development, exploration etc, calculation of ore reserve estimate; Unit Operation of mining: fundamental operation and cycles, drilling, blasting, loading and excavation, explosives: different mining methods and their scope: surface mining, underground mining, other methods; Selection of mining method.

**MINING ENGINEERING**

Part-II  
Marks-100

Course Outline:

Fundamentals of Mineral Processing; characterization of Particles; Analysis of Separation processes; fluid Dynamics; Mechanisms and Processes of Particulate Separations; Mechanisms of Fracture; Crushing and Grinding; Surfaces and Interfaces; Flotation and other Surface Separations; Ore Sorting; Magnetic Separation; Electrostatic Separation; Screening and Sieving; Classification, Gravity & Dense Medium Separation, Sedimentation, Filtration.

**ELECTRONIC ENGINEERING**

(POST RELATED)

Subject Code: 271

Total Marks-200

Part-I

Marks-100

**Electrical Circuits:**

Circuit variables and elements: Voltage, current, power, energy, independent and dependent sources, resistance. Basic laws: Ohm's law, Kirchoff's current and voltage laws. Simple resistive circuits: Series and parallel circuits, voltage and current division, wye-delta transformation. Techniques of circuit analysis. Nodal and mesh analysis, Network theorems: Sources transformation. Thevenin's Norton's and superposition theorems. Energy storage elements: Inductors and capacitors, series parallel combination of inductors and capacitors. Responses of RL and RC circuits: Natural and step responses.

Instantaneous current, voltage, power, effective current and voltage, average power, phasors and complex quantities, impedance, real and reactive power, power factor. Analysis of single phase ac circuits: Series and parallel RL, RC and RLC Circuits, nodal and mesh analysis, application of network theorems in a c circuits, circuits with non-sinusoidal excitations. Passive filter. Resonance in a c circuits: Series and parallel resonance. Magnetically coupled circuits. Power calculation.

**Electronic Circuits:**

P-N junction as a circuit element: Intrinsic and extrinsic semiconductors, operational principle of p-n junction diode, contact potential, current-voltage characteristics of a diode, simplified dc and ac diode models, dynamic resistance and capacitance. Diode circuits: half wave and full wave rectifiers, rectifiers with filter capacitor, characteristics of a zener diode, zener shunt regulator, clamping and clipping circuits. Bipolar junction transistor (BJT) as a circuit element; bipolar junction transistor; current components. BJT characteristics and regions of operation, BJT as a switch. Single stage mid-band frequency BJT amplifier circuits; Voltage and current gain, input and output impedance of a common base, common emitter and common collector amplifier circuits. Metal-oxide-semiconductor field-effect-transistor (MOSFET) as circuit element; structure and physical operation of an enhancement MOSFET, threshold voltage, Body effect, current voltage characteristics of an enhancement MOSFET, biasing discrete and integrated MOS amplifier circuit, single-stage MOS amplifier, MOSFET as a switch, CMOS inverter. Junction field-effect transistor (JEFT): Structure and physical operation of JEFT, transistor characteristics, pinch-off voltage. Differential and multistage amplifiers; Description of differential amplifiers, small-signal operation, differential and common mode gains, RC coupled mid-band frequency amplifier.

**Frequency response of amplifiers:**

Poles, zeros and Bode plots, amplifier transfer function, techniques of determining 3 dB frequencies of amplifier circuits, frequency response of single-stage and cascode amplifiers, frequency response of differential amplifiers. Operational amplifiers (Op-Amp): Properties of ideal Op-Amps, non-inverting and inverting amplifiers, inverting integrators, differentiator, weighted summer and other applications of Op-Amp circuits, effects of finite open loop gain and bandwidth on circuit performance logic signal operation of Op-Amp, device imperfections. General purpose Op-Amp; DC analysis, small-signal analysis of different stages, gain and frequency response of 741 Op-Amp. Negative feedback: properties, basic topologies, feedback amplifiers with different topologies, stability, frequency compensation. Active filters; Different types of filters and specifications, transfer functions, realization of first and second order low, high and band pass filters using Op-Amp. Signal generators: Basic principle of sinusoidal oscillation, Op-Amp RC oscillators, LC and crystal oscillators. Power Amplifiers; Classification of output stages, class A,B. and AB output stages.

**Electromagnetic:**

Static electric field: Postulates of electrostatic, Coulomb's law for discrete and continuously distributed charges, Gauss's law and its application, electric potential due to charge distribution, conductors and dielectrics in static electric field density-boundary conditions; capacitance electrostatic energy and forces, energy in terms of field equations, capacitance calculation of different geometries, boundary value problems Poisson's and Laplace's equations in different co-ordinate systems. Steady electric current, Ohm's law, continuity equation. Joule's law, resistance calculation. Static magnetic field, Postulates of magnetostatics, Biot-Savart's law, Ampere's law and application, Vector magnetic potential, magnetic dipole, magnetization, magnetic field intensity and relative permeability, boundary conditions for magnetic field, magnetic energy, magnetic forces, torque and inductance of different geometries. Time varying field and Maxwell's equations; Faraday's law of electromagnetic induction, Maxwell's equations differential and integral forms, boundary conditions, potential functions; time harmonic fields and Poynting theorem. Plane electromagnetic wave; plane wave in lossless media - Doppler effect, transverse electromagnetic wave, polarization of plane wave, plane wave in lossy media-low-loss dielectrics, good conductors, group velocity, instantaneous and average power densities, normal and oblique incidence of plane waves at plane boundaries for different polarization.

**ELECTRONIC ENGINEERING**

Part-II

Marks-100

**Digital Electronics:**

Introduction to number systems and codes. Analysis and synthesis of digital logic circuits: Basic logic functions, Boolean algebra, combinational logic design, minimization of combinational logic. Implementation of basic static logic gates in CMOS and BICMOS: DC characteristics, noise margin and power dissipation, Power optimization of basic gates and combinational logic circuits. Modular combinational circuit design: pass transistor, pass gates, multiplexer and their implementation in CMOS, decoder, encoder, comparators, binary arithmetic elements and ALU design. Programmable logic devices; logic arrays, field programmable logic arrays and programmable read only memory. Sequential circuits: different types of latches, flip-flops and their design using ASM approach timing analysis and power optimization of sequential circuits. Modular sequential logic circuit design: shift registers, counters and their applications.

**Electrical Properties of Materials:**

Crystal structures: Types of crystals, lattice and basic, Bravais lattice and Miller indices. Classical theory of electrical and thermal condition: Scattering, mobility and resistivity, temperature dependence of metal resistivity, Matthiessen's rule, Hall effect and thermal conductivity. Introduction to quantum mechanics; Wave nature of electrons, Schrodinger's equation, one dimensional quantum problems infinite quantum well, potential step and potential barrier, Heisenberg's uncertainty principle and quantum box. Band theory of solids; Band theory from molecular orbital, Bloch theorem, Kronig-Penny model, effective mass, density-of-states. Carrier statistics, Maxwell-Boltzmann and Fermi-Dirac distributions, Fermi energy. Modern theory of metals: Determination of Fermi energy and average energy of electrons, classical and quantum mechanical calculation of specific heat. Dielectric properties of materials, Dielectric constant, polarization electronic, ionic and orientational, internal field, Clausius-Mosotti equation, spontaneous polarization, frequency dependence of dielectric constant, dielectric loss and piezoelectricity. Magnetic properties of materials; Magnetic moment, magnetization and relative permeability, different types of materials, origin of ferromagnetism and magnetic domains. Introduction to superconductivity; Zero resistance and Meissner effect, Type I and Type II superconductors and critical current density.

**Communication Theory:**

Overview of communication systems: Basic principles, fundamental elements, system limitations, message source, bandwidth requirements, transmission media types, bandwidth and transmission capacity. Noise: characteristics of various types of noise and signal to noise ratio. Information theory: Measure of information, source encoding, error free communication over a noisy channel, channel capacity of a continuous system and channel capacity of discrete memory less system. Communication systems, Analog and digital, Continuous wave modulation, Transmission types-base band transmission, carrier transmission, amplitude modulation introduction, double side band, single side band, vestigial side band, Quadrature: spectral analysis of each type, envelope and synchronous detection, angle modulation instantaneous frequency, frequency modulation (FM) and phase modulation (PM). spectral analysis, demodulation of FM and PM. Pulse modulation: Sampling: sampling theorem, Nyquist criterion, aliasing, instantaneous and natural sampling, pulse amplitude modulation-principle, bandwidth requirements; pulse code modulation (PCM)-quantization principle, quantization noise, non-uniform quantization, signal to quantization error ratio, differential PCM, demodulation of PCM; delta modulation (DM)-principle, adaptive DM, line coding-formats and bandwidths, digital modulation.

Amplitude-shift keying-principle, on-off keying, bandwidth requirements, detection, noise performance, phase-shift keying (PSK)-principle, bandwidth requirements, detection, differential PSK, quadrature PSK, noise performance, frequency shift Keying (FSK)- principle, continuous and discontinuous phase, FSK, minimum-shift keying, bandwidth requirements, detection of FSK. Multiplexing: Time-division multiplexing (TDM)- principle, receiver synchronization, frame synchronization, TDM of multiple bit rate systems; frequency division multiplexing principle, de-multiplexing; wavelength-division multiplexing, multiple-access network-time-division multiple-access, frequency-division multiple-access; code-division multiple-access (CDMA)- spread spectrum multiplexing, coding techniques and constraints of CDMA. Communication system design: Design parameters, channel selection criteria and performance simulation.

**Microprocessor and Interfacing**

Introduction to microprocessors. Intel 8086 microprocessor, Architecture, addressing modes, instruction sets, assembly language programming, system design and interrupt. Interfacing: programmable peripheral interface, programmable timer, serial communication interface; programmable interrupt controller, direct memory access, keyboard and display interface, introduction to micro-controllers.

**GEOGRAPHY**  
(POST RELATED)  
Subject Code: 311  
Total Marks-200

Part-I  
Marks –100

- A. Physical Geography
  - Definition, history and development
  - Nature and scope of Geomorphology
  - Recent trends in physical Geography
- B. The Earth as a Planet
  - Origin of the earth
  - Shape and Size
  - Rotation and Revolution
  - Perihelion and Aphelion
  - Earth's orbit: Solstice and Equinox
  - Internal Structure of the Earth
  - World time zones
  - Geological Time Scale
- C. The Lithosphere
  - Composition of the earth crust: Minerals and rocks
  - Diastrophism and Volcanism
  - Denudation and Weathering
  - Agents of earth sculpture: Landforms produced by the work of rivers, glaciers, wind, oceanic waves and ground water
  - Pre-Davision geomorphology
  - Davision cycle of Erosion
- D. Theories on the Various Tectonic Aspects of the Earth's Surface Processes
  - Plate Tectonic Theory
  - Wegner's Continental Drift Theory
  - Theories of Isostasy and Gravity Tectonics
- E. The Atmosphere
  - Composition of the atmosphere
  - Elements of climate:
  - Insulation and temperature, horizontal and vertical distribution of temperature;
  - Air pressure and pressure belts;
  - Winds and planetary wind system;
  - Humidity, types of rainfall;
  - Airmass; cyclones and anticyclones; Thunderstorms;
  - Major climatic types.
- F. The Hydrosphere
  - Hydrological cycle
  - Oceans and their locations
  - Profile of the ocean floor
  - Major ocean currents
  - Marine resources and deposition
- G. The Biosphere
  - Definition of Ecology and Ecosystem
  - Soil Profile
  - Factors of soil formation
  - Major soil types of the world
  - Geographical Distributions of Plants
  - Biodiversity and conservation
  - Flora and Fauna of Bangladesh

**GEOGRAPHY**

Part-II

Marks-100

(Human Geography and Geography of Bangladesh)

**Part – I Human Geography 80**

- A. Human Geography  
Definition scope and methodology  
Branches of human  
Current approaches to human Geography  
Man environment interaction
- B. Population  
Definition and concept of population Geography  
Global distribution and density  
Population dynamics (fertility, mortality and migration)  
Population growth theories  
Population Projection  
Life table  
Population Policy
- C. Settlements  
Definition, scope and approaches of settlement Geography  
Types and patterns of settlements  
Rural and urban settlements
- D. Economic Activities  
Primary activities:  
- Agriculture (major crop types, agricultural systems, livestock);  
- Fisheries  
- Forestry (distribution and principal use/products)  
- Mining (industrial minerals and energy resources)  
Secondary activities:  
- Vocational factors of industry  
- Global distribution of iron-steel and textile industries  
Tertiary activities:  
- Internal and international trade  
- Transportation: land, water, air  
- Service industries: commerce and finance
- E. Urban Geography  
Definition, scope, methodology of urban Geography  
Urbanization concepts  
Internal structure of the city  
Hierarchy of urban areas (Christaller's theory and Growth Pole concept)  
Transportation system

**Part – II Geography of Bangladesh**

**20**

- A. Natural Environment
  - Geographical location and boundary
  - Geology: Relief and physiography
  - Soils
  - River system
  - Climate
  - Wet lands
  - Natural hazard
  
- B. Population
  - Population composition
  - Density and distribution
  - Population dynamics (fertility, mortality and migration)
  - Population policy and problems
  
- C. Natural Resources Base:
  - Natural vegetation and forest
  - Agriculture and fisheries
  - Minerals and fuel energy
  - Water resources and land resources
  
- D. Economic Base:
  - Industry: Nature, growth and location
  - Transport and Communication
  - Trade and commerce
  - Urbanization and economic development

**MASS COMMUNICATION AND JOURNALISM**

(POST RELATED)

Subject Code: 321

Total Marks-200

**Part-I**

Marks-100

- (a) Journalism.
  - (i) Aims, objectives, functions, nature & scope;
  - (ii) Terminology;
  - (iii) Contents of Newspaper.
- (b) News.
  - (i) Definitions, elements, functions & types;
  - (ii) News value, News sense, News analysis.
- (c) Reporting.
  - (i) News gathering and writing;
  - (ii) News structure;
  - (iii) Reporting: types & writing;
  - (iv) Lead: types & writing;
  - (v) Interview: types & writing;
  - (vi) Practical report writing exercise based on information/setting to be provided in the question paper;
  - (vii) Parliamentary reporting: terminology, importance of parliamentary reporting, bill & its passage in parliament.
- (d) Editing.
  - (i) News room: functions;
  - (ii) Art of selection, correction, compression & improvement of news;
  - (iii) Headline: types & writing;
  - (iv) Make-up-types & functions.
- (e) Law relating to Journalism.
  - (i) Defamation: libel & slander;
  - (ii) Contempt of court;
  - (iii) Copyright.
- (f) Ethics of Journalism.
- (g) Pressures on the Press
- (h) Role & responsibilities of the Press.
  - (i) History of Journalism in Bangladesh (since 1947).
- (j) Radio & Television Journalism.
- (k) Publicity, Public Relations & Propaganda.
- (l) Handout, Press release and Press note.
- (m) Editorial.
- (n) Feature.

**MASS COMMUNICATION AND JOURNALISM**

Part-II

Marks-100

- (a) Communication.
  - (i) Definitions;
  - (ii) Scope & purpose of communication;
  - (iii) Process of communication;
  - (iv) Functions of communication;
  - (v) Types of communication;
  - (vi) Models of communication;
  - (vii) Barriers to communication.
  
- (b) Mass Communication.
  - (i) Nature of mass communication.
  - (ii) Scope of mass communication.
  - (iii) Functions of mass communication.
  - (iv) Communication policy & planning.
  - (v) Communication & development.
  
- (c) Media.
  - (i) Media's watchdog role in society;
  - (ii) Governance and media;
  - (iii) Media's role in shaping public opinion;
  - (iv) Media effects;
  - (v) Media research.

**ECONOMICS**  
(POST RELATED)  
Subject Code: 331  
Total Marks-200

Part-I

Marks – 100

Principles of Economics

1. Micro and Macro economics. Basic Macro economic concepts in relation to the Keynesian model of income determination – relevance of Keynesian economics for underdeveloped countries.
2. Concepts of supply and demand and their determinates – concepts and measurements of various elasticities of demand and supply.
3. Cardinal and Ordinal utility – law of diminishing marginal utility – equimarginal principle.
4. The Indifference Curve analysis – Properties of Indifference Curve – consumer’s equilibrium – income substitution and price effect.
5. Analysis of Production costs – Production function, Isoquants and return to scale – short run and long run cost curve – Producers equilibrium.
6. Price determination in a perfectly competitive market – equilibrium of the firm and the industry – short run and long run equilibrium – pricing under monopoly, oligopoly and monopolistic competition.
7. The Marginal Productivity theory of distribution – determination of rent, wages, interest and profit.
8. Types of function – linear, Quadratic, Hyperbolic, exponential and log functions – graphs of function. Equation of a straight line – Rectangular hyperbola – coordinates and location of points.
9. Concept of national income, utility of the study of national income, methods of measuring national income, nominal income and real income.
10. Theory of international trade: Necessity of Trade, Theory of Comparative advantage, Heckscher-ohlin theory of trade, terms of trade, gains from trade, tariffs and their justifications.
11. Globalization and its necessity, effects on the developing countries, Globalization under WTO regime.

**ECONOMICS**

Part-II

Marks – 100

- a) Meaning of development and under development, causes of under development and their remedies – characteristics of a developing economy like Bangladesh, prospects of development of Bangladesh.
- b) Issues related to development of Bangladesh: Population growth, level of unemployment, inequality in distribution of income and wealth, gender inequality, economic governance, corruption and poverty.
- c) Role of Fiscal Policy in economic development: Government’s budget, taxes, borrowings and repayments.
- d) Role of monetary policy in economic development : role of central bank, commercial banks, specialized banks, Grameen bank, PKSP, NGOs and micro credit programs, money market, capital market, credit policy, exchange rate policy, devaluation.
- e) Growth of exports, imports, terms of trade, balance of trade, foreign aid, balance of payments.

(POST RELATED)

Subject Code: 441

Total Marks-200

Part-I

(Drama/Theatre)

Marks – 100

Part 1. Dramatic Literature and History of Theatre:	30
a. Theatre of Ancient Greece;	
b. Roman Theatre;	
c. Classical Sanskrit Theatre;	
d. Elizabethan Theatre;	
e. French Neo-classic Theatre;	
f. Western Theatre of the Nineteenth and the Twentieth Century;	
g. Indigenous Theatre of Bengal/Bangladesh;	
h. Colonial and post-colonial Theatre of Bengal/Bangladesh.	
Part 2. Theory of Drama and Performance:	30
a. The Poetics by Aristotle;	
b. The Natyashastra by Bharatmuni;	
c. Neo-classic criticism;	
d. Symbolism;	
e. Expressionism;	
f. Epic Theatre;	
g. Theatre of the Absurd;	
h. Postmodernism;	
i. Indigenous Theatre of Bangladesh.	
Part 3. Theater as Practice:	30
a. Theory of Acting (Konstantin Stanislavshy, Bertolt Brecht, Vsevolod Meyerhold and Jerzy Grotowski);	
b. Principles of Play Direction;	
c. The Elements and the Principles of Set Design;	
d. Basic Concepts of Light Design;	
e. The Elements and the Principles of Costume Design;	
f. Concepts of Makeup.	
Part 4. Applied Theatre:	10
a. Theatre for Development;	
b. Theatre in Education;	
c. Television Drama.	

**DRAMA AND MUSIC**

Part-II (Music)

Marks - 100

- Part 1. History of Music (Theory): 25  
 (Ancient, Medieval & Modern Age)
- a. Classical Music;
  - b. Bengali Music;
  - c. Folk Music;
  - d. Eastern & Western Music-a comparative study.
- Part 2. Practical Oriented Theory (Music): 25
- a. Bengali Folk songs: characteristics and varieties;
  - b. Classical Music : Dhrupad, Dhamar, Khayal, Thumri;
  - c. Definition of Talas and Ragas (According to Eastern system);
  - d. Rabindranath Tagor's Songs : Characteristics and varieties;
  - e. Kazi Nazrul Islam's songs: Characteristics and varieties.
- Part 3. Life and Works of Musicians: 25
- a. Ustad Alauddin Khan, Ustad Fayaz Khan, Ameer Khasru, Mian Tansen, Baiju Baora, Ustad Vismilla Khan, Ustad Amir Khan, Ustad Karamat Ullahi Khan, Ustad Enauet Khan, Pandit Omkarnath, Ustad Ali Akbar Khan, Pandit Ravi Sankar.
  - b. Beethoven, Mozart, Sebastian Bach, Hayen, Richard Wagner, Robert Schuman, Franz Liszt, Frederic Handel, Oscar Straus, Fraunz Schubert.
- Part 4. Musicians of Bangladesh: 25
- a. Ustad Munsai Raisuddin, Ustad Aeyet Ali Khan, Fuljhuri Khan, Ustad Fozlul Haque, Pandit Barin Majumder.
  - b. Abbasuddin Ahmad, Folk Poet Jasimuddin, Sahid Altaf Mahmood, Samar Das. Abdul Ahad, Abdul Latif, Azad Rahman, Sekh Sadi Khan.
  - c. Baul Lalon, Radharamon, Hason Raja, Pagla Nanai, Pangu Shah, Jalaluddin, Ukil Musshi, Bioy Sarkar.
  - d. Mass Media & Stage Performance.
  - e. Modern Lyricist of Bengali Music: Abu Hena Mustafa Kamal, Dr. Maniruzzaman, Sabir Ahmed Choudhury, Nazrul Islam Babu, Abu Bakar, Rafiduzzaman, Fazal-E-Khoda.

Marks-100

1. Basic Design: Definition of design, Elements of design, Principles of design, Different types of design, Bao House School of design, Pushpin studio. Discussion about the countries those who have in leading position making designs.
2. Folk design: Folk design adaptation of Folk-art in various uses in our modern life style such as in wearing clothes, invitation card, cover & jackattes of books & periodicals and poster.
3. Drawing: Human figure drawing of male & female Study and exercises of different parts of body.
4. Perspective: Definition of perspective, Linear & Arial perspective, Square, cube, cylindrical objects study, Perspective drawing of still life objects & architectural buildings.
5. Typography: Definition. Copy of Bangali & English alphabets. Study of different type faces. Know-how of measurement. Face and constructions. Creating new & modern type faces. Calligraphy drawing.
6. Poster: Definition of Poster. Varieties of poster procedure of applying technique & method to create a poster.
7. Art & Civilization: Pre-historic art & civilization, History, Analytical study of Egyptian art, Greek art, Roman art, Bygantian art & Indo-Pak sub continental art.

**GRAPHICS**  
Part-II  
Marks-100

1. Illustration: Definition of Illustration, Variation of Illustration, Knowing about subjects, Characteristics, materials, method & Technique of Illustration, Drawing new Illustrations.
2. Advertising art: Definition, Ancient history of advertising forms, Modern applications, advertising new product, Organogram of advertising agencies, Discussion of systems how they work.
3. Logo or Corporate Identity: What is Logo or why Logo? Its different uses & applications.
4. Book designing: Book production. History of book-publishing & printing. Cover & Jackette design for books, definition and usefulness. Thorough studies of books title page and paper, inner illustrations, printing & binding.
5. Computer basic: Definition history of its invention, Discussion on computer and its major equipments, knowing various software's, about personal computer, use & works of its various parts.
6. History of art: Study of South Asian art, Western art, Pre renaissance & post renaissance, World's art movements and isms – detail study.

**AL-FIQH**  
(POST RELATED)  
Subject Code: 457  
Total Marks-200

Part-I  
Marks-100

**A: Principles of Al-Fiqh****15 (Marks) ×2(Questions) = 30**

Study of Islamic legal foundation, namely, al-Qura'n, al-Sunnah, al-Ijma, al-Qiyas, al-Ijtihad, al-Istihsan, al-Istidlal and al-Istilah. Legal connotation of words and sentences of these foundation such as al-Am, al-Khas, and al-Amar, al-Nahy, al-Mujmal and al-Mufassal, al-Haqiqah and al-Majaz al-Nasekh and al-Mansukh etc. Utilization of usul-al-fiqh in the daily life of Muslims.

This course will cover a discussion of important concepts and principles of usul-al-fiqh, such as methods of extracting the rules (Istinbat al-ahkam) from the texts, the evidence over which the jurists differed, the objectives of shariah (maqasid al-shariah) and conflicts of evidence and methods of resolving them. The course is also designed to train the students to use and be familiar with the early texts of usul-al-fiqh. The application of usul-al-fiqh in contemporary society will also be discussed.

**B: History of al-Fiqh****15 (Marks) ×2(Questions) =30**

Development of Fiqh in the periods of the Prophet (Sm.), Companions, Tabi'un and Tabi Tabi'un; the emergency of various schools of fiqh such as Maliki, Hanafi, Shafi-i, Hambali and Ja'fari. This course will focus on the reason for al-ikhtilaf (difference of opinion among fuqaha) and the muqaran in the study of Fiqh.

**C: Fiqh al-Ibadat [Tharat, Salat, Sawm, Zakat, Hajj] 20 (Marks) ×2(Questions) - 40**

**AL-FIQH**  
Part-II  
Marks-100

**A: Fiqh al-Muamalat and al-Jinayat****15 (Marks) ×2(Questions) =30****(i) Fiqh al-Muamalat: [Buyu (Trade, Commerce)]**

Definition of al-Buyu, various types of al-Buyu and its provision in Islam.

**(ii) Fiqh al-Jinayat (criminal law): al-Qisas, al-Hudud and al-Tazir.****B: Fiqh al-Nikah and Talaq****15 (Marks) ×2(Questions) = 30**

**(i) Fiqh al- Nikah (Marriage):** (Definition; the words by which marriage is contracted and not contracted. goals, purpose witnesses and its qualifications.) **Muhramat** (Meaning of the women whom it is Lawful to marry and of those with whom marriage is unlawful; Nikha Mut'ah (Usufructuary) and Nikha Muwakkat (Temporary marriage). **Wali and Kufo (Guardianship and equality)** (Who is one allowed to marry? Qualities to look for a spouse.) **The Mahr or Dower:** Meaning, amount of Mahr, various types of Masalah and solution related to the mahr or dower. **Nikah-e-Raqeq** (The Marriage of slaves) **Nikah-e-Ahlo-Shirk** (The marriage of infidels), **Riza of fosterage:** Definition and tenets related to Riza or fosterage.

**(ii) Fiqh al-Talaq(Divorce) :** Meaning, the Talaq-al-sunna or Regular Divorce, Execution of Divorce, Delegation of Divorce, Divorce by a conditional vow, the Divorce of the sick, Rijat or returning to a divorced wife, Hila, Khoola, Zihar, Liaan or Imprecation, Impotence, the Iddah, the Establishment of parentage, Hiz or the care of infant children and Nafqa or subsistence.

**C: Fiqh al-Farayed (Law of Inheritance and Disposal of Property),****Al-Shufa, al-Hiba, al-Waisyat and al-Waqf.****20 (Marks) ×2(Questions) =40**

**(i) Fiqh al-Farayed (Law of Inheritance and Disposal of Property) :** Definition of Ilm al-Farayed (Law of inheritance), Meaning of the Dhawil Furud, different kinds, and their rights, definition of al-Asaba and its kinds, Meaning of al-Awl and its kinds, definition of 'Tamasul; Tadakhul; Tawafuq and 'Tabayun, definition of 'al-Rad' and its method, definition of 'al-Munasakha' and its method).

**(ii) Al-Shufa****(iii) Al-Hibah****(iv) Al-Waisyiyah****(v) Al-Waqf**

## HISTORY OF MUSIC

Part-II

Marks-100

(Each part of the syllabus obtained 25 marks equally)

- Part 1. History of Instrumental Music:** 25
- Sitar, Sarod, Violin, Tanpura.
  - Pankwaj, Tabla-bia, Dubki-Khamak, Dhool, Mondira.
  - Ektara, Dotara, Sanai, Flute, Sarangi.
- Part 2. Oriental Music and Western Music:** 25
- Bengali Music of thousand years.
  - History of Western Music.
  - Eastern and Western notation System.
- Part 3. History of Dance:** 25
- History of Classical Dance (Bharat Natyam, Kathakali, Katthak, Manipuri).
  - Rabindranath Tagores Dance Drama, Kazi Nazrul Islam's Dance Drama, Folk dance Drama & Purbabangla and Mymensingha Gitika.
  - Folk-Dance of Bangladesh.
- Part 4. Evolution of Patriotic Song:** 25
- Songs of Language & Liberation Movement.
  - History of Patriotic Song.
  - People Songs of Bangladesh.

**DRAWING AND PAINTING**

Subject Code: 463

Total Marks-200

Part-I

Marks-100

**History of World Art:**

1. **Introduction:** Art and Artist, Art and Society etc.
2. **The Ancient World:**
  - a) Prehistoric Art: The Old Stone Age,  
Alta Mira cave Paintings.  
Cave Paintings of France.
  - b) Bronze Age:
    - i) Egyptian Art: The old kingdom, the middle kingdom, the new kingdom  
(Painting, Sculpture & Architecture)
    - ii) Mesopotamian Art: (Sumerian Art, Assyrian Art, Babylonian Art)
    - iii) Persian Art.
    - iv) Aegean Art.
3. **Greek Art:**
  - i) Vase Paintings: (Black figure and Red figures Pottery)
  - ii) Sculpture: (Archaic and classical Period)
  - iii) Architecture: Pillars.
4. **Roman Art:**
  - i) Etruscan Period Sculpture.
  - ii) Roman Architecture; Arches; Parthenon;
  - iii) Roman portrait Sculpture.
5. **Islamic Art:**

Definition:

  - i) Persian Miniatures:
  - ii) Mughal (Akbar, Jahangir, Shajahan, Aurangzeb and decline of Mughal painting.)
6. **Modern period:**
  - i) Renaissance Art: The Eyck Brothers.  
Donatello, Fillippo Brunelleschi Masaccio; Fra Angelico.
  - ii) High Renaissance Art: Leonardo-Da-Vinci Michelangelo,  
Raphael.
  - iii) The Baroque Art, Rococco Art, Neo-classicism Romanticism,  
Realism and Impressionism.
7. **20<sup>th</sup> Century Art:**

Post War Art: (after 1945)  
Modernism. (Cubism, Surrealism, Dadaism, German  
Expressionism, Abstract-Expressionism.)

**DRAWING AND PAINTING**

Part-II

Marks-100

**1. Art and Literature of Bangladesh:** (Introduction Geographical and Cultural Survey).

- i) Pala period Paintings; Architecture.
- ii) Mahasthan Gar, Paharpur, Maynamati, Kantajeer Mandir and other temples of medieval Bengal.
- iii) Mosque of Bangladesh:  
(Shat Gambooge Mosque, bagha Mosque, Chotto Sona Mosque, Lalbagh Fort etc.)

**2. Folk Art:**

Gazir Pata.  
Laxmi Sara.  
Monosha Pata.  
Sokher Handi.

**3. Crafts of Bangladesh:**

Zamdani Sari, Sika, Nakshi-Kantha, Ornaments, Weaving, Metal Crafts.

**4. Modern Art of Bangladesh:**

Shilpacharaya Zainul Abedin and other artists who established the Art Institute of Dhaka.

**Artists of Bangladesh:**

1. Zainul Abedin
2. Quamrul Hassan
3. S.M. Sultan.
4. Safiuddin Ahmed.
5. Mohammad Kibria.
6. Kazi Abdul Baset.
7. Rashid Chowdhury.
8. Novera Ahmed.
9. Aminul Islam.
10. Murtaza Bashir.

1. Elements of Design.
2. Definitions of different subjects:
  - a) Drawing
  - b) Painting
  - c) Graphics (including Computer Graphics)
  - d) Print Making
  - e) Sculpture
  - f) Ceramics
  - g) Crafts
  - h) Oriental Art
3. Descriptions, use and appliances of (Techniques) Medias, Painting, Drawing, Graphic Design, Oriental Art:
  - a) Oil
  - b) Water Color (Transparent and Opaque Gouache)
  - c) Acrylic
  - d) Pen and Ink
  - e) Pencil and Charcoal
  - f) Poster
  - g) Mixed Media
4. Cave paintings: Techniques Materials used.
5. Material and Technique: Ceramic.
6. Print Making: Material and Technique: including Medias such as Lithograph, Etching, Aquatint, Wood Cut, and Wood Engraving.
7. Material and Technique: Sculpture.
8. Craft: Media: (Weaving, batik, Texture Design, Wood Carving etc.)
9. Graphic Design: definition of Ad-Art, Poster-Art, Illustration and Jacket design.
10. Terracotta: Material and technique.

**FINE ARTS**  
Part-II  
Marks-100

1. Modern Sculptures of 20<sup>th</sup> Century.  
Henry Moore, Giacometti, Revolutionary Sculpture in Russia, Barbara Hepworth, Brancusi.
2. Modern art of Europe and America.  
Cubism, Dadaism, Fauvism, Futurism, Abstract Expressionism etc.
3. Modern Art movement in 50's and 60's in Bangladesh.  
Zainul Abedin, Quamrul Hasan, Safiuddin Ahmed, Anwarul Haque, Novera Ahmed, Mohammad Kibria, Aminul Islam, Hamidur Rahman, Qayyum Chowdhury, Rashid Chowdhury, Abdur Razzaque, Murtaza Bashir, Kazi Abdus Rouf, Kazi Abdul Baset.
4. Post liberation era of Art and Artists. (4 decades since 1971).
5. Asian Art Biennial and its impact.
6. Folk Art of Bangladesh.
7. Art Education: Necessity and Development.
8. Installation Art.

**PHYSICS**  
(POST RELATED)  
Subject Code: 511  
Total Marks-200

**Part-I**  
**Marks: 100**

- (a) **Mechanics:**
- i. Particle Dynamics: Newton's law of motion, Motion in one dimension, Motion in a plane, Work, energy and power, Conservation laws, Conservative force, Mass-energy relation.
  - ii. Rotational Motion: Angular velocity, Angular acceleration, uniformly accelerated angular motion, Torque, Kinetic energy of rotation, Angular momentum, Moment of inertia.
  - iii. Gravitation: Newton's law of gravitation, variation of acceleration due to gravity, Gravitational field and gravitational potential, Calculation of potential and force in simple cases.
- (b) **Properties of Matter:**
- i. Elasticity: Stress and strain, Hooke's law, Elastic moduli, bending of beams, Torsion.
  - ii. Surface Tension: Adhesive force, cohesive force, Molecular theory of surface tension, Surface energy and surface tension, Angle of contact and capillarity.
  - iii. Viscosity: Newton's law of viscosity, Streamline and turbulent motion, Poiseuille's formula, Bernoulli's theorem, Applications.
- (c) **Waves and Oscillation:**
- i. Waves: Transverse and longitudinal wave, Traveling and stationary wave, Vibration in strings, Resonance, Beats, Doppler effect.
  - ii. Sources and propagation of sound, Speed of sound, Ultrasonic.
  - iii. Oscillation: Definition of simple harmonic motion (SHM), combination of two SHM's, damped oscillation, Forced oscillation, Resonance, Power and intensity of wave motion, Simple and compound pendulum.
- (d) **Heat, Thermodynamics and kinetic Theory of Gases:**
- i. Heat and Temperature: Concept of temperature, Thermal equilibrium, Temperature scale, Mechanical equivalent of heat, quantity of heat, Specific heat and heat capacity.
  - ii. Transmission of heat: Conduction, Convection and Radiation, Conduction of heat in solids, Co-efficient of conductivity, Measurement of conductivity of a poor conductor.
  - iii. Thermodynamics : First law, difference between  $C_p$  and  $C_v$  for an ideal gas, Adiabatic process for an ideal gas, Second law, Entropy and disorder, Absolute scale of temperature, Thermodynamic functions, Maxwell relations, Clausius-Clapeyron equation, Gibbs phase rule.
  - iv. Kinetic theory of gases: Basic assumptions, Equation of state of an ideal gas, Kinetic interpretation of temperature and pressure, Mean free path, Equipartition law, Van der Waal's equation of state.
- (e) **Electricity and magnetism:**
- i. Charge and Matter, Electric field, point charge in an electric field, Dipole in an electric field. Gauss's law and Coulomb's law: Application to a spherically symmetric charge distribution and a charge sheet; Electric potential: potential and field strength; potential due to a point charge; Due to a dipole; Calculation of E from V.
  - ii. Capacitance and dielectric: Calculation of capacitance, Dielectric and Gauss's Law, Energy storage in dielectric.
  - iii. Current and Circuits: Ohm's law, Resistivity and atomic view, Electromotive force Kirchoff's law, Wheatstone bridge, Potentiometer.
  - iv. Magnetic field: Definition of B, Ampere's law, Biot-Savart law, Magnetic force on a current, Torque on a current loop, Electric meters.
  - v. Faraday's law: Inductance, Energy density and the magnetic field, Diamagnetism, Paramagnetism and Ferromagnetism.
  - vi. Electromagnetic Oscillation: LC oscillation, Maxwell's field equations.
  - vii. Alternating current: Alternating emf, LCR circuit, Effective of RMS value of voltage and current.
- (f) **Optics:**
- i. Nature and propagation of light: Light and the electromagnetic spectrum, Velocity of light, Huygen's principle and the laws of reflection and refraction, Total internal reflection.
  - ii. Interference and Diffraction : Young's experiment, Coherence, Michelson's interferometer, Diffraction from single slit, double slit and grating, X-ray diffraction and Bragg's law, Resolving power.

**PHYSICS**  
Part-II  
Marks: 100

- (a) Classical Mechanics and Special theory of Relativity:
- i. Conservation laws of a system of particles. Rocket motion. Generalized coordinates.
  - ii. Euler-Lagrange equations of motion. Hamilton's Principle.
  - iii. Principle of least action, Hamilton's equation of motion.
  - iv. Postulates of special theory of relativity. Lorentz transformation.
  - v. Relativistic equations of motion.
- (b) Quantum Mechanics:
- i. Schrodinger equation. Postulates of quantum mechanics. Probability in quantum mechanics.
  - ii. Fundamental commutation relations.
  - iii. Heisenberg's uncertainty relations.
  - iv. Operators and Eigenvalue equation.
  - v. Eigenvalue and Eigenfunctions.
  - vi. Hermitian operators.
  - vii. Eigenvalues of the angular momentum operator. Spin angular momentum operator.
  - viii. Approximation methods. WKB Approximation.
- (c) Atomic and Molecular Physics:
- i. Quantum character of radiations.
  - ii. Photoelectric effect. Compton Effect.
  - iii. Wave-particle duality. De Broglie wave.
  - iv. Electron diffraction.
  - v. Rutherford experiment
  - vi. Bohr's theory and hydrogen atom.
  - vii. Atomic spectra.
  - viii. Pauli's principle. Electronics configuration of atom.
  - ix. Production of X-ray, Moseley's law.
  - x. Molecular spectra.
  - xi. Laser. Three and four level lasers.
  - xii. Properties of a laser beam. Ruby, He-Ne,
  - xiii. Nd: Y and CO<sub>2</sub> lasers, Applications of lasers.
- (d) Nuclear Physics:
- i. Constituents of Nuclei, Nuclear density, nuclear spin and angular momentum, Nuclear force.
  - ii. Nuclear binding energy, Liquid drop model, Shell model.
  - iii. Radioactive decay, Decay law.
  - iv. Radioisotope-productions and uses.
  - v. Alpha particle emission, Beta decay, Gamma radiation.
  - vi. Nuclear reaction, Q-value.
  - vii. Nuclear fission and fusion, Nuclear reactor.
  - viii. Particle accelerators-Van-de-Graff accelerator, Linear accelerator, Cyclotron, Sychrotron.
  - ix. Elementary particles.
- (e) Solid State Physics:
- i. Crystalline nature of solids. Unit cell, Classification of solids-Ionic, Valence and Vander Waals Crystals. Madelung constant, Theory of specific heats, Einstein and Debye model.
  - ii. Defects in crystals-Schottky and Frenkel types, Dislocations, Consequences of defects on Mechanical properties.
  - iii. Band theory of solids.
  - iv. Semiconductors-Extrinsic, Semiconductor, Density of states. Charge carrier.
  - v. Superconductivity, Introduction to high T<sub>c</sub> superconductivity.

- (f) Electronics:
- i. Semiconductor diode. P-n junctions.
  - ii. Breakdown Avalanche and Zener Mechanism
  - iii. Rectification.
  - iv. Bipolar Junction Transistor (nnp & pnp)
  - v. Transistor action, Amplifiers (CB, CE & CC)
  - vi. Operational Amplifier, Inverting amplifier non-inverting amplifier, Adder subtractor, Comparator, Integrator, Differentiator, FET and MOSFET Applications.
  - vii. SCR and TRIAC action and characteristics.
  - viii. Modulation and Demodulation (AM, FM)
  - ix. Television and RADAR.

**APPLIED PHYSICS**

(POST RELATED)

Subject Code: 521

Total Marks-200

**Part-I**

**Marks: 100**

Electrostatics	:	Coulomb's law, The electric field, Dipole in an electric field, Potential and field strength, Capacitance, Dielectric, Gauss's law.
Steady Current	:	Ohm's law, Heating effect of current, Electric power and energy, Kirchoff's law, Thevenin's theorem, Norton's theorem, Superposition theorem.
Magnetic effect	:	Ampere's law, Forces between currents, Biot-Savart law of current and Faraday's law, Lenz's law, Self and mutual inductance.
Electromagnetic Induction	:	L.R circuits.
Alternating Current	:	Generation of alternating E.M.F. Impedances in A.C. circuits. A.C. power, Resonance circuits, D.C. and A.C. generators and motors, Measuring instruments.
Electron Emission and Electron Ballistics	:	Work function, Thermionic emission, Field emission, Secondary emission, Photoelectric effect and emission, TV picture tube, Electrostatic and Magnetostatic deflection, CRT, Electron optics and Electron microscopy.
Physical Electronics	:	Electron theory of metals, Fermi Dirac distribution function, Fermi level, Band theory of solids, intrinsic and extrinsic semiconductors, Hall effect.
Electronic Devices	:	Diode, BJT, SCR, JFET, MOSFET, LED, LCD, Solar cell, LASER.
Rectifier circuits	:	P-N junction diode, Load line of a diode circuit, Half wave and Full wave rectifier, Bridge rectifier Filters, Zener diode and voltage regulation.

**APPLIED PHYSICS**

**Part-II**

**Marks: 100**

Transistor Equivalent Circuit	:	A.C equivalent circuit with Y,Z and H parameters for CB, CE and CC Configuration. Small signal analysis of a transistor amplifier using H parameter at low frequency, small signal JFET parameters.
Transistor Amplifier Circuits	:	Different methods of transistor biasing, D.C and A.C operating characteristics, Amplifying action of a transistor, Classification of amplifiers, Tuned amplifier, Power amplifier, Negative feedback amplifier.
Oscillator Circuits	:	Principle of positive feedback, Tuned collector oscillator, Hartley oscillator, Phase shift oscillator, negative resistance oscillator, Crystal oscillator, Frequency stability.
Pulse and Switching circuits	:	Wave shaping, Clipping and Clamping circuits, Astable, Monostable and Bistable multivibrators. Schmitt trigger, Blocking oscillator, Voltage time base generators.
Digital Circuits	:	Logic gates, Combination logic circuit design, Clock signal and clocked Flip-Flops, Synchronous and asynchronous counter design, Half adder, Full adder, Digital to Analog and Analog to Digital converter.
Operational Amplifiers	:	Differential amplifier circuits, Ideal operational amplifier, Inverting and non-inverting amplifier, Summing amplifier, Integrator and differentiator, Active filters, Multivibrator with op.amp.
Communication	:	Different type's of modulation and demodulation, Super heterodyne receiver, Noise in radio communication, Digital communication, Mobile telephony and Cellular telephony, Principles of TV and RADAR.
Microprocessors and Computers	:	Microprocessors as the CPU of microcomputer, General purpose and single chip microprocessor, Organization of RAM, Static and dynamic RAMs, ROMs, PROMs and other types of memories, The computer system, Input output devices, CPU structure and function, computer control system.

**CHEMISTRY**  
(POST RELATED)  
Subject Code: 531  
Total Marks-200

**Part-I**  
**Marks: 100**

- I. Gas Laws, Kinetic theory of gases, Liquifaction of gases, Energy changes, Enthalpy changes & determination, The law of energetics, Elementary principles of thermodynamics, the nature of  $\Delta S$ ,  $\Delta H$  and  $\Delta G$ , Electro chemistry-Electrode potentials, Voltace cells, Redox electrodes, The Nerust equation, Colligative properties of solutions, Phase rule, Chemical equilibria and chemical kinetios, pH and buffer solutions, Conductance Theoretical aspects of chemical equilibria and chemical kinetios, pH and buffer solutions, Conductance Theoretical aspects of chemical and instrumental methods of analyses and their applications.
- II. Atomic Structure, Periodic table and Classification of elements, Chemical bonds, Oxidation and reductions, detailed group chemistry.
- III. Radioactivity, Nuclear reactions and atomic energy, Elementary aspects of environmental chemistry.
- IV. Organic compounds-aliphatic, aromatic and heterocyclies, Synthesis and chemical properties of different classes of compear, Confirmation, Stereochemistry, Optical activity, General concepts of nucleophilic, electrophilic and free radical reactions.
- V. Aromatic and heterocyclic substitution reactions.
- VI. Principles of manufacturing common organic and inorganic industrial products. Disposal of Industrial wastes.

**CHEMISTRY**  
**Part-II**  
**Marks: 100**

This Paper should contain advanced Topics of Physical, Inorganic and Organic Chemistry including Chromatography and Spectroscopy.

- I. Acids, Bases, Nucleophiles, Electrophiles.
- II. Hard and soft Nucleophiles and electrophiles Molecular or bitals & Frontier or bitals-HOMO & LUMO Kinetics and energetics in reaction mechanism. Comprehensive treatment of solvolytic reactions substitution reactions of ambident nucleophiles, Multicentre addition reactions, Carbonium ion rearrangements.
- III. Chirality, Molecular dissymmetry, Atomic asymmetry & conformational asymmetry, Circular birefringence & circular dichroisers, Cotton effect, Optical rotatory dispersion and their application, Purity of optical analysis, Conformational analysis.
- IV. Atropisomerism.
- V. UV, IR, Raman, ESR,  $^1\text{H}$  &  $^{13}\text{C}$  NMR, Mass spectrometry-Principles and utility (application).
- VI. Different chromatographic techniques-
- VII. Principles and applications, Advantages & disadvantages.
- VIII. Carbohydrates & Polysaccharides, Cellulose, Aminoacids, Proteins, Vitamins, Hormones, Antibiotics, Alkaloids, Dyes.

**APPLIED CHEMISTRY**

(POST RELATED)

Subject Code: 541

Total Marks-200

**Part-I****Marks: 100**

1. Importance of Chemical technological processes. Development of Chemical technology, Classification of Chemical technological processes.
2. Techno-economic feasibility study of a project. Site selection for chemical industry. Unit process and unit operation. Design and implementation of a chemical project.
3. Chemical Process Industries: Fundamentals of Chemicals Industries, Importance of Chemical Technology for Industry. Pre-conditions for setting up of a new Chemical Industry. Problems of Chemical Process Industries in Bangladesh and their solutions.
4. Fluid Mechanics: Types of fluid, general properties of fluid, Fluid statics, Fluid dynamics, Euler's equation, Bernoulli's equation, Fluid flow measurement.
5. Corrosion: Corrosion damage. Types of Corrosion. Corrosion prevention. Electrochemical aspects of Corrosion, Corrosion Testing.
6. Metallurgy of Iron: Detailed Study on Pig iron, Wrought iron and steel.
7. Principles of industrial separation processes. Distillation: Design & operating characteristics of plate column, operation efficiency. Analysis of fractionating column by McCabe-Thiele method and enthalpy-concentration method. Construction details of plate column, sieve column.
8. Refrigeration and Air conditioning: Basic theory. Compression and Absorption Refrigeration Cycles. Ammonia Absorption machines. Refrigerants.
9. Air and water pollution. Greenhouse effect. Ozone hole. Kyoto protocol. Industrial waste management.
10. Water conditioning and water treatment. Physical and chemical methods of treatment. Municipal water supply. Boiler feed water. Water treatment plants in Bangladesh. Electrodialysis, ultrafiltration, activated carbon absorption, BOD, COD.

**APPLIED CHEMISTRY****Part-II****Marks: 100**

1. **Sulphur and sulphuric Acid:** Sources of sulphur, Recovery of sulfur from nature, Manufacture of sulphuric acid, Environmental aspects.
2. **Fertilizer Industry:** Technological aspects of Fertilizer industries of Bangladesh. Ammonia, Urea and triple superphosphate manufacturing processes. Environmental aspects.
3. **Sugar industry:** Manufacture of sugar from sugarcane and sugar beat. Utilization of byproducts. Sugar Industry in Bangladesh.
4. **Coal:** Coal deposits in Bangladesh. Composition, classification, carbonization, gasification. Utilization and environmental aspects.
5. **Petroleum:** Atmospheric and Vacuum distillation. Thermal cracking, catalytic cracking, Reforming, Hydrocracking. Products of petroleum processing and their uses. Petroleum refining industry in Bangladesh.
6. **Glass and Ceramics:** Composition, classification, manufacturing processes, special glasses and ceramic products.
7. **Cement:** Classification, strength of cement. Cement kilns. Manufacturing processes. Cement industry in Bangladesh.
8. **Caustic-Chlorine Industries:** Methods of production of caustic soda and soda ash. Electrolytic process for caustic soda and chlorine. Diaphragm, Mercury and Membrane processes. Caustic soda-chlorine industry in Bangladesh. Environmental aspects.
9. **Plastic Industry:** Polyethylene, polypropylene, polyvinyl chloride, polymethylacrylate, polystyrene.
10. **Pulp, Paper and Rayon Industries:** Manufacturing processes and their comparisons. Environmental aspects.
11. **Soaps and Detergents:** Manufacture of Soap, Detergent and Glycerine.
12. **Leather Industry:** Leather processing including Chrome and Vegetable Tanning.
13. **Edible oils:** Extraction, Purification and Hydrogenation, Different Tests for Oils.
14. **Surface Coatings:** Paints; Pigments; Varnishes; Lacquers-constituents, manufacture, classification and application.

**MATHEMATICS**  
(POST RELATED)  
Subject Code: 551  
Total Marks-200

**Part-I**  
**Marks: 100**

Group-A. Algebra, Analytical Geometry, Linear Algebra.

1. Order properties of real numbers. Inequalities involving different types of means, Chebyshev's inequality.
2. Complex numbers, DeMoivre's theorem and its applications.
3. Summation of finite algebraic and trigonometric series.
4. Polynomials and their roots, Horner's scheme (synthetic division), Descartes rule of signs.
5. Relation between roots and coefficients. Symmetric functions of roots.

Analytical Geometry

1. Pairs of straight lines. Transformation of coordinates.
2. General equation of the second degree, Reduction to standard forms, Conics in general.
3. Planes and straight lines in three dimensions, shortest distance between two straight lines.
4. Vector algebra with applications to geometry.

Linear Algebra

1. Algebra of Matrices. Systems of linear equations and their solutions.
2. Vector spaces over the field of real numbers, Subspaces, Linear dependence and independence of vectors, Basis and dimension.
3. Linear transformations, Rank and nullity.
4. Eigenvectors and eigenvalues.

Group-B. Differential and Integral Calculus (including Elementary Real Analysis)

1. Sets of real numbers, Supremum and infimum, the completeness axiom Dedekind's theorem, The Archimedian property.
2. Convergence of infinite sequences and series of real numbers, Standard theorems and tests of convergence. Absolute convergence.
3. Continuous functions. Intermediate value theorem. Uniform continuity.
4. The derivative. Rolle's Theorem, Mean value theorems, Taylor's theorem with remainder, Taylor's series, indeterminate forms.
5. Maxima, minima, tangents and normals.
6. Indefinite integrals, Techniques of integration, Recurrence Relations.
7. The Riemann integral, The fundamental theorem of calculus.
8. Improper integrals. Tests of convergence.
9. Determination of areas and volumes.

(Five questions will be set from each group; candidates will be required to answer SIX questions, taking at least TWO from each group.)

**MATHEMATICS****Part-II****Marks: 100****Group-A. Mechanics**

1. General conditions of equilibrium, Principle of virtual work, Stable and unstable equilibrium, Centre of gravity.
2. Rectilinear motion, simple harmonic motion, Motion in a plane, Motion under a central force.
3. Dynamics of rigid bodies, Moments of inertia, A' Alembert's principle.
4. Motion about a fixed axis.
5. Lagrange's equation for holonomic systems.

**Group-B. Methods of Applied Mathematics**

1. Ordinary differential equations of first and second order.
2. Linear equations with constant coefficients.
3. Solution of differential equations in series.
4. Beta and Gamma functions.
5. Special functions, Legendre, Hermite and Langerre polynomials; Bessel functions. Generating functions, recurrence relations and other properties.
6. Complex functions, Differentiability, Cauchy-Riemann equations, Analytic function. Complex integration, Cauchy's theorem and Chuchy's integral formula, Taylor and Laurent expansions. Singularities, poles and residues.
7. Cauchy's residue theorem, Evaluation of definite integrals.

(Five questions will be set form each group; candidates will be required to answer SIX questions, taking at least TWO from each group.)

**APPLIED MATHEMATICS**

(POST RELATED)

Subject Code: 561

Total Marks-200

**Part-I****Marks: 100****Group-A: Statics**

- (a) Forces acting in a plane, parallel forces, moments and couples.
- (b) Equilibrium of coplanar forces. Astatic, stable and unstable equilibrium.
- (c) Work, Virtual work.
- (d) Centre of gravity. Forces in three dimensions.

**Group-B: Dynamics**

- (a) Motion in a straight line, Simple harmonic motion.
- (b) Motion in a plane referred to Cartesian and polar coordinates. Radial and transverse velocities; central, tangential and normal acceleration. Central forces.
- (c) Motion in resisting medium.
- (d) Motion in three dimensions.

**Group-C: Mathematical Methods**

- (a) The Laplace Transform: Definition, existence and basic properties Differentiation and integration, Inverse Laplace transform and convolution, Solution of linear differential equations with constant coefficients.
- (b) Bessel's Equation: Solution, Generating function, Recurrence relation, Orthogonality.
- (c) Legendre's Equation: Solution, Generating function, Recurrence relation, Rodrigui's formula and orthogonality of Legendre Polynomial.
- (d) Fortier Series: Fortier Coefficients, Sine and Cosine series, Dirichlet's theorem, Properties and applications.

**APPLIED MATHEMATICS****Part-II****Marks: 100****Group-A: Real Analysis**

- (a) Metric Spaces: Definition and examples. Open and closed sets, Compact sets, perfect set and cantor set.
- (b) Sequence: Convergent sequence, bounded' sequence, subsequence, Cauchy sequence, and completeness of IR.
- (c) Differentiation: Continuous function. Derivative of a function. Rolle's Theorem, Mean-value theorem, Taylor's theorem.
- (d) Functions of Several Variables: Limit and Continuity. Partial differentiation. Schwarz's theorem, Young's theorem.

**Group-B: Complex Analysis**

- (a) Complex Functions: Single and many valued functions. Limit, Continuity and differentiability of complex function.
- (b) Analytic Functions: Necessary and sufficient conditions. Harmonic functions. Mobius transformation and power series.
- (c) Complex Integration: Zeros of analytic functions, Cauchy's theorem, Morera's theorem, Cauchy's integral formula, Singularities, Classification of singularities.
- (d) Complex integration: The open mapping theorem, Taylor's and Laurent series. Fundamental theorem of algebra, Rouches theorem, The residue theorem, Contour integration.

**Group-C: Numerical Analysis**

- (a) Solution of algebraic and transcendental equation, Interpolation.
- (b) Numerical solution of linear and non-linear system of equations.
- (c) Numerical differentiation and integration.
- (d) Numerical solutions of ordinary differential equation.

**Group-D: Hydrodynamics**

- (a) Velocity and acceleration of fluid particles, Steady and unsteady flows, Uniform and non-uniform flows, Stream lines, path lines, vortex lines and velocity potential. Rotational and irrotational flows. Equation of continuity.
- (b) Euler's equation of motion, conservative field force. Lamb's equations of motion. Bernouli's equation.
- (c) Motion in two-dimensions, stream function and its physical meaning, velocity in polar coordinates, relation between stream function and velocity.
- (d) Sources, sinks and doublets. Complex potential and complex velocity, stagnation points, Complex potential due to a source and a doublet. Circulation and vorticity, relation between circulation and vorticity. Kelvin's Circulation theorem.

**GEOLOGY**  
(POST RELATED)  
Subject Code: 571  
Total Marks-200

Part-I  
Marks -100

1. Physical Geology and Geomorphology:

Introduction to the science of Geology and historical development, the Earth and its position in space and solar system; its origin; interior of the Earth; the Earth materials and crystal processes. Evolution of crystal features and fundamentals of plate tectonics. Theory of Isostasy, Diastrophism, Magmatism and volcanism.

Earth's surface processes-Natural agents of sculpturing the Earth's surface(Running water, Glaciers, wind) and their origin; alluvial processes and morphology; geo-morphological tools; methods of study of geomorphic features; morphometric units of Bangladesh.

2. History of Geology:

Fundamental laws of historical geology; geological time and methods of measurements; geological column; geological time scale; evolution of the Earth and origin of life; fossils; major physical events and life forms and their evolution through geological time; glaciation; palaeomagnetism; polar wandering; brief geological history of the Indian subcontinent.

3. Petrology and Mineralogy:

Introductory crystallography and different crystal forms. Study of the physical properties, and classification of common rock forming minerals. Rocks and rock cycle, study of the mode of occurrence, texture, structure, composition and classification of Igneous, Metamorphic & Sedimentary rock.

4. Structural Geology and Tectonics:

Deformation of the earth crust: structural features (fold, joint, fault and unconformity). Concept of continental drift, Rise of theory of Plate tectonics, and Sea floor spreading. Tectonics and Structural framework of Bangladesh. Causes, types, distributions and effects of earthquake & tsunami and volcanoes.

5. Rock Mechanics & Engineering Geology:

Stress analysis-theory, stress components, stress ellipsoid, relation of rupture to stress, Strain analysis-theory, geological significance of strains, mechanics of deformation. Surface and subsurface investigations, sampling and sampling methods. Engineering properties of soil geological criteria for site selection.

6. Oceanography:

Distribution and origin of the ocean; ocean morphology-physical features of deep ocean floor including the ridges, rises and trenches. Sea-floor spreading, major tectonic features and tectonic history of the oceans. Bengal Deep Sea Fan and other bottom topographical features of the Bay of Bengal. Mineral resources of the oceans.

**GEOLOGY**

Part-II

Mark-100

1. **Stratigraphy:**  
Principles of Stratigraphy, Stratigraphic Correlation; Stratigraphic outline of Bangladesh and adjoining areas. Quaternary geology of the Bengal basin-physical framework and its landforms, distribution of the Quaternary deposits.
2. **Exploration methods:**  
Widely used methods in exploration like: Seismic method-Importance of seismic work, geometry of seismic wave path, reflection and refraction field methods and equipment, elevation and weathering correction of seismic data, velocity, and depth and dip determination by reflection and refraction data both for single layer and multi layer, interpretation of seismic sections. Gravity method-introduction, earth's gravity field and its variations, reduction of gravity data, gravity instruments, techniques and field survey, interpretation of gravity data. Electrical method-elementary theory, effect of inhomogeneous ground, electrode configuration, field procedure, interpretation of profiling and sounding data.
3. **Petroleum Geology:**  
Chemistry of petroleum, formation of oil and gas; generation of hydrocarbon, organic matter in sedimentary basins, diagenesis, catagenesis, kerogen composition and classification. Petroleum migration and accumulation, primary and secondary migrations and their mechanism. The traps and their classification. The reservoir properties-porosity and permeability, diagenesis with emphasis on clay mineral diagenesis, reservoir continuity and reserve estimation. World's major oil provinces; a brief account of the petroleum geology of Bangladesh.
4. **Hydrogeology:**  
Origin and occurrence of ground water, rock properties affecting ground water, subsurface distribution of groundwater, geological formations as aquifers, and types of aquifers. Ground water movement, Darcy's law, permeability, transmissibility, tracing of ground water movement, ground water flow lines and contours. Ground water exploration, presentation and interpretation of results; determination of aquifer characteristics pumping test. Water wells, well design and well development. Ground water resources of Bangladesh: Problems and Prospects.
5. **Mineral Resources:**  
Classification of economic mineral deposits; mode of occurrence, controls of ore localisation, formation of ore mineral deposits by magmatic and metamorphic processes including magmatic concentration, hydrothermal processes, contact metamorphism, metamorphic minerals, submarine, exhalative and volcanogenic minerals; Mineral resources of Bangladesh - occurrence, distribution, stratigraphic relationship, reserve and uses of gas & oil, coal, peat, limestone, glass sand, white clay, placer deposits, hard rocks, building materials and metallic minerals.

**BOTANY**  
(POST RELATED)  
Subject Code: 581  
Total Marks-200

Part-I  
Marks: 100

Plant Diversity: Morphology, Anatomy and Reproduction. (Microbiology, Mycology and Plant pathology, Phycology, Higher Cryptogams, Angiosperms, Plant anatomy, Embryology of Angiosperms)

Microbiology:

1. Nature and structure of simple RNA virus (TMV) and DNA virus (T2 Phase), multiplication and transmission.
2. Prion and viroid: Structure, properties and importance.
3. Bacteria: Classification (different types), reproduction, bacterial photosynthesis, transformation and transduction.
4. Economic importance of microbes

Mycology and Plant pathology:

1. Modern classification of fungi and the bases of classification;
2. Economic importance of fungi,
3. Concept and causes of plant diseases,
4. Stages in the development of plant diseases : Inoculation, infection, growth and reproduction of the pathogens, dissemination of pathogens, over-wintering and over summering of pathogens)
5. Control of plant diseases.
6. Symptom, causal agents, disease cycle control measures of the following diseases: i. Blast of rice, ii. Stem rust of wheat, iii. Late blight of potato, iv. Stem rot of jute, v. Red rot of sugarcane, vi. Tungro disease of rice, vii. Panama disease of banana.

Physiology:

1. Modern classification of algae based on different characters.
2. General characteristics of all the major division of algae.
3. Range of vegetative structures in algae.
4. Phytoplankton-General features, biological and economic importance.

Higher Cryptogams:

1. Characteristic features and methods of reproduction with examples.
2. Distribution of bryophyte and pteridophyte genera in Bangladesh with examples.

Angiosperms:

1. Concept about ICBN, cytotaxonomy, chaemotaxonomy, ecotype and biosystematics.
2. Different systems of classification (i) Artificial; (ii) Natural and (iii) Phylogenetic.
3. Definition and importance of herbarium. Information and activities of world herbaria including Bangladesh.

Plant anatomy:

1. Stele in Pteridophyte
2. Vascular tissue system in angiosperms.
3. Meristem (origin, classification, structure, development and function).

Embryology of Angiosperms:

1. Mega-sporogenesis and Mega-gametogenesis.
2. Micro-sporogenesis and Micro-gemetogenesis.
3. Different types of embryo sac and their development (with examples).

**BOTANY**

## Part-II

Marks: 100

## Functions and Applications.

(Plant Physiology and Biochemistry, Cytology and Cytogenetics, Genetics and Molecular Genetics, Tissue Culture, Horticulture, Ethnobotany, Ecology.)

## Plant Physiology and Biochemistry:

1. Photosynthesis: Details of C<sub>3</sub> and C<sub>4</sub> pathways.
2. Comparison between C<sub>3</sub>, C<sub>4</sub> and CAM pathways.
3. Respiration: (i) Aerobic respiration, Glycolysis, (ii) Anaerobic respiration, fermentation with special reference to alcohol fermentation.
4. Physiological and biological nitrogen fixation.
5. Mechanism of salt absorption.
6. Dormancy, Photoperiodism and Vernalization.
7. Biosynthesis of some important carbohydrates (a) Sucrose, (b) Starch and (c) Cellulose.
8. Alkaloids: (a) Classification with examples and distribution and (b) importance of alkaloids.
9. Fats: (a) Chemical constitution of fatty acid and (b) Biosynthesis of fatty acid.

## Cytology and Cytogenetics:

1. Chromosome: Physical structures.
2. Karyotype and genome analysis.
3. Chromosomal aberrations.

## Genetics and Molecular Genetics:

1. Mendel's Laws of inheritance.
2. Sex determination.
3. Physical structure and chemical composition of DNA and RNA.
4. Plasmid: Structure, function and importance.
5. Recombinant DNA (rDNA): Method of construction and importance.
6. Genetic engineering for crop improvement.

## Tissue Culture:

1. Cell suspension culture.
2. Somatic embryogenesis.
3. Haploid production.
4. Clonal propagation and its commercial application.

## Horticulture:

1. Classification of fertilizer, composition, doses, application and procedures.
2. Application of growth regulating chemicals in horticulture.

## Ethnobotany:

1. Ethno-botanical research in Bangladesh
2. Medicinal plants of Bangladesh, their conservation and sustainable use.

## Ecology:

1. Methods of studying vegetation.
2. Ecosystem: (i) Structure and components of ecosystem, (ii) Pond ecosystem.
3. Pollution: Kinds of pollution, harmful effects, effects of dams and embankment on vegetation.
4. Methods of measurement of primary production, Factors limiting primary productivity in aquatic and terrestrial communities.
5. Environmental hazards: Green house effect, ozone depletion, desertification, aridity and drought. Salinity flood and water logging in the light of Bangladesh condition.
6. Different forest types and forest area of Bangladesh, causes of depletion of forests of Bangladesh and the ways and means to prevent it.

**ZOOLOGY**  
(POST RELATED)  
Subject Code: 591  
Total Marks-200  
Part-I  
Marks-100

**Animal Biodiversity.**

- (a) Concept of biodiversity.
- (b) Classification of major phyla up to classes with diagnostic characteristics and examples.
- (c) Morphology, biology and life-history of *Entamoeba*, *Paramecium* and *Eimeria*.
- (d) Canal systems and affinities of Porifera.
- (e) Morphology, reproduction and life-history of *Obelia*. Polymorphism and coral reefs in Cnidaria.
- (f) Life-history and parasitic adaptations of *Fasciola hepatica*, and *Taenia solium* and *Ascaris*, Epidemiology and Control measures.
- (g) Mode of life and reproduction of *Nereis* and *Hirudo*; Vermicomposting.
- (h) Mouth parts of insects, Respiration, Excretion and Metamorphosis in insects.
- (i) Biology, mode of life and reproduction of *Pila* and *Sepia*. Structure and formation of shell in Mollusca, Economic importance of mollusca.
- (j) Morphology and reproduction of *Astropecton*, *Echinus* and *Cucumaria*. Water vascular systems in Echinodermata.
- (k) Morphology and mode of life of *Ascidia*, *Branchiostoma*, *Petromyzon* and *Myxine*. Metamorphosis in *Ascidia*. Affinities of *Ascidia*.
- (l) Morphology, digestive and respiratory system of *Scoliodon* and *Labeo rohita*. Types of Scales and fins in Pisces.
- (m) Mode of life, reproduction and parental care in Amphibians. Economic importance of toad and frogs.
- (n) Venomous Snakes and Snake bites, Morphology, habit and habitats of crocodiles and alligators. Dinosaurs.
- (o) Flight adaptation, Migration of birds, Flightless birds.
- (p) Egg laying mammals and marsupials; aquatic mammals.

**ZOOLOGY**  
Part-II  
(GENERAL ZOOLOGY)  
Marks-100

**Cytology, Genetics and Evolution**

- (a) Ultrastructure of an animal cell; Structure and functions of different organelles of cells; Mitosis and mitotic cell divisions; Chromosomes.
- (b) Nucleic acids; Structures of DNA and RNAs; replication of DNA, transcription of mRNA and translation (Protein synthesis).
- (c) Mendelian ratios and their modifications, linkages and crossing overs; multiple alleles, blood groups; epistasis; gene interactions.
- (d) Genetic engineering, steps in preparing insulin from genetically engineered *E. coli*.
- (e) Evidences of evolution; early theories of evolution; Darwin's Natural Selection theory of evolution, Speciation; allopatric and sympatric evolution.

**Ecology**

- (a) Ecosystem, food chain, food web; food pyramids, ecosystem of a typical pond.
- (b) Causes of environmental degradation; air, Water and Soil pollutions.
- (c) Effects of pollution on human health and the economy of Bangladesh.

**Wild-life:**

- (a) Wild-life fauna of Bangladesh; Principles and Significance of wild-life conservation in Bangladesh.
- (b) National parks, game reserves and Sanctuaries.
- (c) Ecotourism.

**Zoogeography:**

- (a) Zoogeographical regions and their characteristics, bird and mamalian fauna.
- (b) Wallace's line and Weaver's line, endemic fauna.
- (c) Oriental Region and its relationship with Bangladesh.

**Human Physiology, reproduction and population dynamics:**

- (a) Physiology of digestion, Circulation, respiration and excretion.
- (b) Metabolism: Carbohydrate and protein metabolism.
- (c) Gametogenesis; ovarian cycle; role of hormones in ovarian cycle; fertilization, implantation, placenta and birth.
- (d) Principles of population dynamics; human population and its control strategies in Bangladesh; and principles of birth control practices.

**Embryology.**

- (a) Egg types, fertilization, Cleavage types and gastrulation.
- (b) Early embryonic development of *Amphioxus*.

**Economic Zoology.**

- (a) Culture of Carp, Prawn and Shrimps in Bangladesh. Factors responsible in decline of fishery resources in Bangladesh.
- (b) Major insect pests of rice, jute, sugarcane and stored products: Biology, nature of damage and control measures of these major pests.
- (c) Apiculture and Sericulture in Bangladesh.
- (d) Role of mosquitoes in transmission of diseases in human. Malaria eradication and measures of mosquito controls.

**BIOCHEMISTRY**  
(POST RELATED)  
Subject Code: 601  
Total Marks-200

Part-I  
Marks-100

**A. Biophysical Chemistry**

- (i) Atomic structure: Fundamental particles, atomic number, atomic mass, isotopes, relative atomic mass, the mole concept, atomic models, Avogadro constant.
- (ii) Periodic property: Periodic table, Mosley's law, ionization potential, electron affinity and electro negativity.
- (iii) Gas laws, Ideal gas equation, Kinetic theory of gases, Dalton's law of partial pressure, van der Waals equation.
- (iv) Thermodynamics: First and second law of thermodynamics, enthalpy, entropy and free energy change, standard free energy change of chemical and biochemical reactions.
- (v) Solution: Types of solution, Collogative properties of solutions, Osmosis and osmotic pressure, Molecular weight determination by the use of osmotic pressure.
- (vi) Acids and bases: Brown stead-Lowry concept of acids and bases, Lewis concept, netralisation, indicators, ion product of water,  $p^H$ , Buffer, Handerson Hasselbalch equation, biological buffers, buffering capacity.
- (vii) Spectrophotometry: Beer-Lambart laws, optical density, standard curve and its use for quantitative determination of biochemical substances.

**B. Organic Chemistry**

- (i) Aliphatic compounds: Hydrocarbon, Alkanes, alkenes, alkynes-their nomenclature, structures, properties and reactions. Alcohols, aldehydes, Ketones, carboxylic acids and derivatives-their nomenclature, structures, physical and chemical properties and reactions.
- (ii) Aromatic compounds: Aromatic hydrocarbons, nitrobenzenes, aromatic amines, deazonium salt, phenols-their structures, preparation, properties and reactions.

**C. Biomolecules:**

- (i) Carbohydrates: Nomenclature, classification, structures and important reactions, mutarotation and optical properties. Some important polysaccharides-Starch, glycogen, cellulose, mucopolysaccharides-their structures and functions.
- (ii) Proteins: Biological functions of proteins, Classification of amino acids, their structures and properties, essential amino acids, identification of amino acids, classification of proteins, primary, secondary, tertiary and quaternary structures of proteins. Sequencing of proteins.
- (iii) Lipids: Classification, biological function, characterization of fat's and oils, essential fatty acids, role of phospholipids, glycolipids and cholesterol in membrane formation. Structures of phospholipids, glycolipids and cholesterol.
- (iv) Nucleic acids: Purines and pyrimidines, nucleosides, nucleotides, Classification of nucleic acids-DNA double helix, other structures of DNA. Types of RNA-their structures and functions.

**D. Nutrition**

- (i) Classification of food, importance of carbohydrate, proteins and fat, their energy values. SDA, RQ.
- (ii) Balanced diet chart for different physiological condition, nutritional diseases and nutritional status of people in Bangladesh.
- (iii) Vitamins: Classification, structures, dietary sources, recommended daily allowances, deficiency symptoms and functions of different vitamins. Coenzyme activity of Vitamin B Complexes.
- (iv) Minerals and trace elements: Biochemical functions, sources, daily requirements and deficiency symptoms.

## BIOCHEMISTRY

## Part-II

## Marks-100

**A. Intermediary Metabolism:**

- (i) Enzymes, characteristics, classification, active sites, enzyme activity units, factors affecting enzyme activity, Michaelis-Menten equation, significances of  $K_m$  and  $V_{max}$ , Inhibition of enzymes, Allosteric enzymes.
- (ii) Carbohydrate Metabolism: Glycolysis, TCA cycles, Pentose phosphate pathway-their regulation and energetics. Gluconeogenesis.
- (iii) Lipid metabolism: Detradation of triglycerides and phospholipids, oxidation of fatty acids, ketone bodies, production of energy by complete oxidation of palmitic acid, fatty acid biosynthesis and its regulation, biosynthesis of cholesterol.
- (iv) Protein Metabolism: Outline of metabolism of amino acids by transamination, deamination and decarboxylation, glucogenic and ketogenic amino acids, urea cycles.

**B. Physiology:**

- (i) Blood: composition, function, blood cells, blood grouping, Heart structure and coronary heart diseases.
- (ii) Digestion: Structure of the gastrointestinal tract, composition of digestive juices, Digestion and absorption of carbohydrates, proteins and fat.
- (iii) Structure and functions of liver, lung and kidney.

**C. Endocrinology:**

Classification of hormones, mechanism of hormone actions, synthesis, physiological functions and biochemical functions of Pituitary, thyroid, parathyroid, pancreatic and gonad hormones.

**D. Clinical Biochemistry:**

- 1) Diagnostic importance of ALT, AST, CK, LDH, acid phosphatase, alkaline phosphatase, urea, uric acid, bilirubin, glucose, cholesterol, calcium ion, iron ion, phosphate and bicarbonate ion. Genetic basis of some Biochemical disorders-phenylketonuria, alkaptonuria, sickle cell anemia, thalassemia, gout.
- 2) Biochemistry of some diseases: Diabetes, Jaundice, Cholera, Diarrhoea.

**E. Molecular Biology:**

- (i) DNA replication, Structure of m-RNA. Transcription, structures of t-RNA and ribosomes, Translation, Genetic code, Mutation, DNA sequencing, Northern blotting, Southern blotting and Western blotting.
- (ii) Restriction enzymes, Vectors, DNA ligase, Cutting and joining of DNA, cDNA, reverse transcriptase, transformation. Host control restriction and modification, cloning of particular gene in different vectors, Polymerase chain reaction (PCR), Human Genome Project.
- (iii) Regulation of Gene expression, Lac operon and arabinose operon, catabolic repression.

**PHARMACY**  
(POST RELATED)  
Subject Code: 611  
Total Marks-200  
Part-I  
Marks-100

- (a) Chemical bonds: Electronic concept of valency, different types of chemical bonds, theories of covalent bonding and hybridisation.
- (b) pH and buffer: Determination of pH of acids and bases, salt solutions and buffers. Preparation of buffers. Buffers in pharmaceutical and biological systems.
- (c) Principles and applications of absorption spectroscopy such as UV- Visible spectrophotometry, nuclear magnetic resonance spectroscopy and mass spectrometry.
- (d) Separation techniques: Basic principles of chromatography, layer chromatography, ion exchange chromatography, gas chromatography, gas liquid chromatography and high performance liquid chromatography. Applications of chromatography in pharmaceutical fields.
- (e) Quality control and quality assurance: Method validation, calibration, SOP and CGMP.
- (f) Chemistry, SAR and mechanism of action and pharmacological properties of individual class of drugs.
  - (i) Analgesics and antiinflammatory agents.
  - (ii) Antihistamines.
  - (iii) Antibiotics.
  - (iv) Antihypertensive agents.
  - (v) Antidiabetic drugs.
- (g) Vitamins and antioxidants: Classification and uses of vitamin preparations. Properties and uses of antioxidants.

**PHARMACY**  
Part-II  
Marks-100

- (a) Pharmaceutical dosage forms.
  - (i) Tablets: Manufacturing of tablets by wet granulation, dry granulation and direct compression, advantages and disadvantages of different processes, common tableting problems and evaluation of tablets.
  - (ii) Capsules: Classification, advantages and limitations of capsule dosage form, properties of capsules, formulation of capsules, problems in capsule manufacturing, quality control of capsules.
  - (iii) Suspensions: Advantages and disadvantages, aggregated and dispersed systems, formulation of suspensions, stability of suspension, quality analysis of suspension.
  - (iv) Emulsions: Applications, advantages and disadvantages, theory of emulsion, formulation of emulsion, classification of emulsifying agents, HLB values of surface active agents, quality analysis of emulsion.
    - (i) Sustained release drug delivery systems: Principle of SR dosage forms, advantages and limitations of SR dosage forms, classification and types of SR dosage forms, drug release mechanisms from SR dosage forms, dose calculation for SR dosage forms.
    - (ii) Parenteral products: Classification of parenteral products. Formulation considerations. Vehicles, additives and containers.
- (b) Skin creams and dental products: Introduction, classification and formulation of skin creams. Anticaries and antiplaque agents. Properties and types of dentifrices, formulation of powder dentifrices and pasts.
- (c) Biopharmaceutical consideration: pKa and gastrointestinal absorption, important pharmacokinetic parameters such as biological half life, apparent volume of distribution, area under the curve, elimination rate constant etc. First pass effect, bioavailability and bioequivalence studies.
- (d) Pharmacy act, new drug policy of government, drug act, drug rules, poison act, poison rules, dangerous drug act and dangerous drug rules as in force in Bangladesh.

## SOIL, WATER AND ENVIRONMENT SCIENCE

(POST RELATED)

Subject Code: 621

Total Marks-200

## Part-I

Marks- 100

**Soil formation:** Soil forming materials—rocks and minerals primary and secondary minerals; silicate and non minerals; clay minerals – their formation and importance weathering of rocks and minerals; soil profiles and pedons; formation of soil horizons; master horizons and diagnostic horizons; factors of soil formation; important soil forming processes; major soil groups of the world.

**Physical properties of soil:** Soil as a three – phase disperse system; mass and volume relationship of soil constituents; soil texture; soil structure – classification, evaluation, management and importance; soil water – energy state of soil water, soil water potential; retention and movement of water in soil; concepts of available water; soil air and soil temperature.

**Irrigation and drainage:** Sources and quality of irrigation water; methods of irrigation; irrigation requirements of major crops of Bangladesh; irrigation projects in Bangladesh; drainage – types and benefits.

**Soil survey and soil classification:** Different types of soil survey; techniques of soil survey; agricultural and non agricultural uses of soil survey data; soil Taxonomy; properties and uses of soil orders.

**Land evaluation:** Concept of land evaluation; techniques and importance of land evaluation; land use planning.

**Soil of Bangladesh:** General condition of soil formation in Bangladesh; nature of soil forming factors; dominant soil forming processes; characteristics of major soil groups; agro ecological zones of Bangladesh.

## SOIL, WATER AND ENVIRONMENT SCIENCE

Part-II

Marks- 100

**Chemical properties of soil:** Chemical composition of inorganic components of soil; humus – its characteristics and importance; soil solution – composition and importance; ion exchange in soil – origin of ion exchange properties, ion exchange capacities of various soil constituents, importance; soil reaction – measurement of soil acidity, importance of soil pH; liming of acid soil; non – biological fixation of N, P, and K in soil.

**Biological properties of soil:** Macro microorganisms in soil – their morphology, structure and classification; factors affecting microbial growth in soil; nitrogen and sulphur transformation in soil; biological N<sub>2</sub>- fixation; bio-fertilizer.

**Soil fertility and plant nutrition:** Concepts of soil fertility and soil productivity; essential nutrient elements – macro – and micronutrients; physiological function of N,P and K; fertilizers – sources, types and grades; fertilizer law; diagnosis of fertilizer needs in soil; methods of fertilizer application; residual effects of fertilizer; manures and compost; nutrient status and fertilizer needs of different AEZ of Bangladesh.

**Soil pollution:** Sources of pollutants in soil; effects of soil pollution on ecosystem and food quality; permissible limits of heavy metals in soil, plants, sewage sludge, city wastes, irrigation water, industrial wastes and effluents; waste management.

**Soil degradation and conservation:** Types and processes of soil degradation; assessment of soil degradation; soil quality – concept and assessment; soil conservation and reclamation – principles of soil conservation; agronomic and mechanical practices of soil conservation.

**NURSERY**  
(POST RELATED)  
Subject Code: 631  
Total Marks-200  
Part -I  
Full Marks- 100

1. Meaning and importance of nursery school education.
2. Historical background of development of nursery schools in different countries.
3. **Different stages of child development:**
  - (a) Infancy and toddler hood.
  - (b) Early or pre-School years.
  - (c) School age child.
  - (d) Preadolescence and adolescence.
4. **Different aspects of child's development:**
  - (a) Physical development.
  - (b) Motor development.
  - (c) Mental development.
  - (d) Social development.
  - (e) Emotional development.
5. **Child's Learning:**
  - (a) Theories of how children learn.
  - (b) Methods of child's learning.
  - (c) Guidance of child's learning.
6. **Care of a nursery school child:**
  - (a) Parenting.
  - (b) Attachments.
  - (c) Diet and nutrition.
  - (d) Immunization.
  - (e) Care during illness.
7. **The child with special needs:**
  - (a) Autistic child.
  - (b) Handicapped child.
  - (c) Mentally retarded child.
  - (d) Advance and exceptional children.
8. **Family crisis and its influence on nursery school children:**
  - (a) Divorce and separation.
  - (b) Death.
  - (c) Family violence.
  - (d) Unemployment and migration.
9. **Common childhood diseases:**
  - (a) Measels and mumps.
  - (b) Pox.
  - (c) Diphtheria.
  - (d) Fever and cold.
  - (e) Diarrhoea.
  - (f) Polio.

## NURSERY

## Part-II

Full Marks- 100

- 1. Characteristics of Babyhood:**
  - (a) Development- physical, language and social.
  - (b) Proper child rearing practices.
- 2. Principles of effective parental guidance:**
  - (a) Types of guidance.
  - (b) Factor affecting parent-child interaction and guidance.
  - (c) Principles of effective guidance.
- 3. Organization and set-up of good nursery school:**
  - (a) Factor to consider in a good nursery school.
  - (b) Setting up of daily work-plan.
  - (c) Parent-teacher counseling.
- 4. Significance of play in child development:**
  - (a) Type of play.
  - (b) Selection of play equipments.
  - (c) Guiding children's play.
- 5. Common behavioral problems of nursery school child:**
  - (a) Bedwetting.
  - (b) Stuttering.
  - (c) Lying and stealing.
  - (d) Day dreaming.
  - (e) Attention deficiency disorder.
- 6. Different teaching methods in nursery school:**
  - (a) Montessori Method.
  - (b) Traditional Method.
  - (c) Teaching by learning and doing.
  - (d) Teaching through play and music.
- 7. Theories of child's learning:**
  - (a) Different theories on how children learn.
  - (b) Presenting materials to improve learning in a child.
  - (c) Qualities of a good nursery school teacher in initiating learning and behavior modifications.
- 8. Social and language development in nursery school children:**
  - (a) Development of socialization in young children.
  - (b) Peer group and its influence.
  - (c) Different stage of a child's language development.
  - (d) Guiding child's social and language development.
- 9. Emotional development of young children:**
  - (a) Basic emotions in young children.
  - (b) Characteristics of young children's emotion.
  - (c) Guiding young children's emotional development.

## CHILD DEVELOPMENT AND SOCIAL RELATIONSHIP

(POST RELATED)

Subject Code: 641

Total Marks-200

Part-I

Full Marks- 100

1. **Basic concept of child development:**
  - (a) Meaning of development.
  - (b) Stages of development.
  - (c) Principles of development.
2. **Beginning of life:**
  - (a) Stages of pre-natal development.
  - (b) Genetic factors in development (heredity and environment).
  - (c) Environmental effect on foetus during pregnancy.
3. **The newborn:**
  - (a) Characteristics of the newborn.
  - (b) Care of the newborn.
  - (c) Hazards of the newborn.
4. **Babyhood (birth to 2.5 years):**
  - (a) Characteristics of babyhood.
  - (b) Babyhood development (physical, language and social).
  - (c) Hazards of babyhood.
  - (d) Importance of attachment and mothering.
  - (e) Proper child rearing practices.
5. **Early childhood (2.5 years to 6 years):**
  - (a) Concept and ecology of early childhood.
  - (b) Developmental tasks of early childhood.
  - (c) Characteristics of early childhood development.
  - (d) Importance of nursery education.
  - (e) Principles of guidance.
6. **Childhood (6 years to 11 years):**
  - (a) Physical development, cognitive development, common skills and developmental task.
  - (b) Development of personality and self concept.
  - (c) Moral development, effect on family, culture and society.
  - (d) Psychological and psychosomatic problems.
7. **Adolescence:**
  - (a) Concept of adolescence.
  - (b) Physical changes, growth spurt, hormonal changes.
  - (c) Development of personality and self-concept.
  - (d) Parent adolescent's relationship.
  - (e) Adolescent's career development.
  - (f) Behavioral problems in adolescence.
  - (g) Counseling of parents and adolescents.
8. **The child with special needs:**
  - (a) Definition and classification of special need of children.
  - (b) General causes of disability.
  - (c) Need of identification and early intervention.
  - (d) Special methods and techniques for inclusive education.

## CHILD DEVELOPMENT AND SOCIAL RELATIONSHIP

## Part-II

Full Marks- 100

1. **The child, its family and society :**
  - (a) Family as a social institution.
  - (b) Family forms effect on child development.
  - (c) Interpersonal relationship effect on child development.
  - (d) Family crisis and children.
2. **The concept of child and family welfare:**
  - (a) Basic factors in welfare- economic security, enlightening parenthood, physical and mental health facility, education and recreation, special care for children.
  - (b) Welfare services of child and families.
  - (c) Preventive services- play center, baby care, foster home, adoption center, day care center, Planned Parenthood Organization.
  - (d) Curative services- homes for the crippled, correction center, vagrant homes and homes for the aged.
3. **Welfare agencies for children:**
  - (a) Ministry of Child and Family Welfare in Bangladesh.
  - (b) National and international welfare agencies.
  - (c) Activities of some leading organizations.
4. **Socialization of children: Role of parents-**
  - (a) Two ways of interaction, bi-directional and dynamic interaction.
  - (b) Parental care giving practices- types of care, permissive and authoritative.
  - (c) Child abuses- family interaction in abuse, neglectful and normal family.
5. **Influences of the external environment:**
  - (a) The child and the school- children and their friends.
  - (b) Peer groups, group structure and conformity to group pattern.
  - (c) Patterns of behavior learned from gang membership.
6. **Theories of child development:**
  - (a) The learning theory of B.F. Skinner.
  - (b) The cognitive theory of Jean Piaget.
  - (c) The affective theory of Erik H. Erikson.
7. **Counseling in various family relationship:**
  - (a) Need for counseling in family life.
  - (b) Parental counseling.
  - (c) Family and marital counseling.
  - (d) Counseling of women and girls.
  - (e) Counseling elderly.
8. **The Family and women in society:**
  - (a) Women and development- women's rights as human rights- CEDAW.
  - (b) The changing status of women role- conflict, the female dilemmas.
  - (c) Violence against women: Causes and trends of violence against women- domestic violence, acid throwing and other forms of violence.

**HOME MANAGEMENT AND HOUSING**

(POST RELATED)

Subject Code: 651

Total Marks-200

Part -I

Full Marks- 100

1. **Philosophy and Purpose of Home Management:**
  - (a) Meaning of Home Management.
  - (b) Objectives and scope of Home Management.
  - (c) Family life in changing world and management in the changes.
  - (d) Motivational factors of management- goal, value and standard.
2. **Functions of Management:**
  - (a) Planning;
  - (b) Organizing;
  - (c) Controlling; and
  - (d) Evaluating.
3. **Decision making- crucial process of management:**
  - (a) Role of decision making in management.
  - (b) Decision terms defined.
  - (c) Dimensions of decision.
  - (d) Decision making process.
4. **Resources:**
  - (a) Definition, characteristics and classification of resources.
  - (b) Principles of using resources.
  - (c) Utilization of time and family interaction.
  - (d) Work simplification.
5. **Money Management:**
  - (a) Income concepts.
  - (b) Factors affecting the use of income.
  - (c) Budget-types, steps in making budget.
  - (d) Account keeping process and accounting system.
6. **Human Resource Management:**
  - (a) Definition of education and training.
  - (b) Importance of training.
  - (c) Training methods.
  - (d) Objective of career development.
  - (e) Career development activities.
7. **Consumer behavior and education:**
  - (a) Meaning, necessity and importance of consumer behavior.
  - (b) Interdisciplinary dimensions of consumer behavior.
  - (c) Environmental and personal influence of consumer liking behavior.
  - (d) Social and cultural determinants.
  - (e) Personal determinants.
  - (f) Consumer rights and responsibilities.
  - (g) Consumer problems and consumer protection.
8. **Analysis of consumer behavior (consumer behavior theory):**
  - (a) Utility analysis of consumer behavior (Marchallian theory of consumer behavior).
  - (b) Indifference curve analysis- budget line, income effect, substitution effect and price effect.
  - (c) Elasticity of demand- price elasticity of demand, income elasticity of demand, substitution elasticity of demand and cross elasticity of demand.

9. **Appropriate technology for better living:**
- (a) Concepts, characteristics of appropriate technology.
  - (b) Significance of appropriate technology with special reference to developing countries.
  - (c) Women and appropriate technology.
  - (d) Employment generating technology for rural women in Bangladesh.
  - (e) Appropriate health technologies at home.
  - (f) Energy saving simple technology- solar cooker, solar dryer etc.

## HOME MANAGEMENT AND HOUSING

## Part-II

Full Marks- 100

1. **Family Housing Concepts:**
  - (a) Family housing needs– protective, economic, affection, social status, family goals, family values.
  - (b) Family size and composition.
  - (c) Family resources.
2. **House Planning:**
  - (a) Nature of housing- traditional, normal and low cost building materials.
  - (b) Principles of house plan.
  - (c) Factors of influencing house plan.
  - (d) Factors considered for comfortable housing.
3. **Providing efficient work center and adequate storage space for a home:**
  - (a) Planning of an efficient kitchen.
  - (b) Planning adequate and desirable storage space at home.
  - (c) Planning and efficient laundry and work areas at home.
4. **Elements of design and interior decoration:**
  - (a) Meaning of interior design and interior decoration- elements of interior design, purpose of interior design.
  - (b) Basic principles of interior design.
  - (c) Design vocabulary (visual character).
    - Forms.
    - Shape.
    - Texture.
    - Colour.
    - Light.
5. **Landscaping:**
  - (a) Definition and scope.
  - (b) Necessity and modern approach of landscaping.
  - (c) Design process– develop a plot plan, site analysis, family needs and desires, activity analysis, design activity areas, plant selection and placement.
6. **Housing situation in Bangladesh:**
  - (a) Nature of housing- traditional, modern and low cost building materials.
  - (b) Nature of urban and rural housing in Bangladesh.
  - (c) Role of women in housing improvement.
  - (d) Role of real estate in housing situation of Bangladesh
7. **Ecological aspects of home management:**
  - (a) Meaning of ecology and ecosystem.
  - (b) Family and ecosystem.
  - (c) Components of the environment.
  - (d) The effect of human activity on the global ecosystem.
  - (e) Types of pollution and effects to human life.
  - (f) Family's efforts to cope with problem.
8. Wiring the house, household water supply and sewerage disposal.
9. **Energy (fuel) management:**
  - (a) Sources of fuel.
  - (b) Energy crisis and measures to be taken to meet up the energy crisis in Bangladesh.
  - (c) Construction and use of bio-gas plant.
  - (d) Construction and use of improve stove (chula).

**FOOD AND NUTRITION**

(POST RELATED)

Subject Code: 661

Total Marks-200

Part-I

Full Marks- 100

**1. Definition of Nutrition, Health and Malnutrition:**

- (a) Relation of nutrition and health.
- (b) Major nutritional problems of Bangladesh- PEM, micronutrient malnutrition.
- (c) Classification and functions of nutrients.

**2. Carbohydrates:**

- (a) Classification, chemical nature, source and functions of different types of carbohydrate- simple and complex carbohydrates.
- (b) Functions of dietary fiber.

**3. Proteins:**

- (a) Classification, chemical nature and sources of different proteins.
- (b) Essential amino acids.
- (c) Functions and deficiency of proteins in the body.

**4. Fats and fatty acids:**

- (a) Classification and chemical nature of different fats in the body.
- (b) Essential fatty acids- Omega 3 and Omega 6 fatty acids- their role in nutrition.
- (c) Disadvantage of excess fat intake.

**5. Vitamins:**

- (a) Classification, chemical nature and food sources.
- (b) Co-enzyme functions of vitamins.
- (c) Deficiency of vitamins in the body.

**6. Minerals- their physiological roles- functions and food sources:**

- (a) Major minerals
- (b) Minor Minerals

**7. Energy intake and expenditure:**

- (a) Measurement of energy expenditure.
- (b) Factors influencing energy requirement.
- (c) Calculation of ones energy requirement.

**8. Enzyme and hormones:**

- (a) Classification and chemical nature of different forms of enzyme and hormones.
- (b) Physiological role and disease states of hormones action.

**9. Metabolism of carbohydrate, fats and proteins:**

- (a) Glycolysis, TCA cycle, fatty acid oxidation, deamination and transamination.
- (b) Inborn errors of metabolism- Glycogen storage disease, fructosuria, phenylketonuria etc.

## FOOD AND NUTRITION

## Part-I I

## Full Marks- 100

1. Approximate composition of common food stuffs cereals, meat, fish, eggs, milk, pulses and legumes, nuts and oil-seeds, vegetables and fruits.
2. **Nutrition during normal life cycle:**
  - (a) Pregnancy and lactation- nutrition requirement, effect of malnutrition during pregnancy.
  - (b) Infancy and early childhood- nutritional requirement breast-feeding and weaning.
  - (c) Elderly- health problem and nutritional modification of adult diet for old people.
3. **Assessment of nutritional status of community:**
  - (a) Types of assessment- anthropometry, clinical, biochemical, dietary assessment and surveys.
  - (b) Advantage and disadvantages of each type.
4. **Concept and importance of nutrition education:**
  - (a) Objectives of nutrition education and implementing nutrition education program in a community.
  - (b) Use of audio-visual aids in nutrition education.
5. **Community based approaches to solve nutritional problems:**
  - (a) Improving household food security.
  - (b) Food fortifications and supplementation.
  - (c) Promoting appropriate dietary guidelines.
6. **Causes, symptom and nutritional management in-**
  - (a) Diarrhea;
  - (b) Constipation;
  - (c) Diabetes mellitus;
  - (d) Hypertension;
  - (e) Liver and kidney diseases.
7. **Food additives and Food Preservation:**
  - (a) Classification of food additives and their uses in food industry.
  - (b) Method of food preservation- heating, refrigeration, drying, use of chemicals, irradiation, pasteurization, canning, bottling, jams, pickles etc.
  - (c) Causes of Food spoilage.
8. **Antioxidant in health and nutrition:**
  - (a) Chemical nature and sources of anti-oxidants.
  - (b) Role of anti-oxidants in detoxification of the body.
  - (c) Free radicals and oxidative stress.
9. **Micronutrient malnutrition in Bangladesh:**
  - (a) Prevalence of vitamin A deficiency, IDD and anaemia.
  - (b) Steps and measures to remove micronutrient malnutrition among the population.
  - (c) Importance of nutritional rehabilitation for the vulnerable group.

**RELATED ART**  
(POST RELATED)  
Subject Code: 671  
Total Marks-200

Part-I  
Full Marks- 100

1. **Art Elements and Principles:**

- (a) Review and further study of the following concepts:
- Art Elements,
  - Art Principles,
  - Source,
  - Classification,
  - Function of Elements, and
  - Principles of Design.
- (b) Elements and principles of Art as everyday experience utilized for the enrichment of living.
- (c) Relation of Art Elements and principles to- Home Furnishing, Architecture, Clothing and other aspects of daily living.

2. **History of Art:**

- (a) Primitive Art.
- (b) Egyptian Art- Architecture, Sculpture, Painting and Pyramid.
- (c) Greek Art :
- i. Sculpture, Architecture and Painting,
  - ii. Minoan Art, Terracotta Art, Hellenistic Art and Sculpture.
- (d) Renaissance Art:
- i. Leonardo-Da-Vinci,
  - ii. Michael Angelo,
  - iii. Raphael.

3. **Textile Printing:**

- (a) Materials and Equipment for textile printing.
- (b) Dyeing of textile :
- i. Dyes used for textile fibers and fabrics- Direct, Basic, Acid, Mordant, Sulfur, Vat, Anilines etc.
  - ii. Vegetable dye- classification, preparation.
- (c) Pre-treatment of fabric.
- (d) Printing technique- block printing, batik printing, stencil printing, screen printing and tie & dye.

4. **Recreational Crafts:**

- (a) Recreation Crafts- Definition: Educational, Social & Economic Values.
- (b) Possibilities, Limitation and Solution to the problems of craftwork in recreation.
- (c) Collage.
- (d) Family Art & Craft gallery.

5. **Art & Artist of Bangladesh:**

- (a) Artists of Bangladesh- their lives and art works: Zainul Abedin, Qamrul Hassan, Quayum Chowdhury, S.M. Sultan, Sahabuddin, Rafiqunnabi, Hashem Khan, Abdus Sattar, Nitun Kundu, Kanak Chapa Chakma, Novera Ahmed, Shamim Sikder & Dr. Farida Zaman.
- (b) Meaning & Definition of Architecture and Sculptures.
- (c) Study of some mentionable architecture and sculpture of Bangladesh:
- i. Historical: Ahsan Monjil, Sona Masjid, Kuthi Bari, Tara Masjid, Shat Gambuj Masjid & Lalbag Fort.
  - ii. Modern: Sangshad Bhaban, Smriti Shaudha & Kendrio Shahid Minar.

6. **Essence of Design:**

- (a) Definition, aim & objective of design.
- (b) Sources of design- natural and man made.
- (c) Functions of design- aesthetic function, practical function.
- (d) Classification and evaluation of design:
  - i. Structural and design,
  - ii. Natural Forms,
  - iii. Geometric Forms,
  - iv. Nonobjective Design,
  - v. Abstract Design,
  - vi. Decorative Design.
- (e) Physiological, social, economic & therapeutic value of design.
- (f) Development of good design sense.

7. **Art of Weaving:**

- (a) Weaving- Definition & History.
- (b) Importance of weaving.
- (c) Weaving process & handloom.
- (d) Loom- parts of the loom, Assembling, repair & care of the loom,
- (e) Fibers, yarn and their uses in waving. Counts of Yarn.
- (f) Dyeing of yarns of weaving- methods, equipment needed, commercial dye & natural dye.

8. **Pottery Making:**

- (a) Pottery- Definition, Functions, Tools & equipments.
- (b) Types of clay- wedging & cutting of clay, removing air bubbles etc.
- (c) Techniques & ideas for hand building: Pinching method, Coil method, Slab method, etc. Learning the art of working on the potter's wheel.
- (d) The firing of clay wares.
- (e) Basic techniques and types of decoration.
- (f) Types of glaze, experiments, mixing glaze, spraying, blushing, pouring, dipping, etc. & equipments needed for that.

## RELATED ART

## Part-II

Full Marks- 100

1. **Jute Craft:**
  - (a) Botanical Origin of Jute.
  - (b) Cultivation of Jute.
  - (c) Grading of Jute.
  - (d) Usage and marketing of Jute.
  
2. **Wood Craft:**
  - (a) Trees and their different layers.
  - (b) Growth of tree.
  - (c) Seasoning defects, diseases and preservation of timber.
  - (d) Characteristics of good wood.
  - (e) Harvesting and wood preparation.
  - (f) Wood joinery.
  
3. **Art of South Asia:**
  - (a) Shind Civilization.
  - (b) Gupto Period:
    - (i) Kushan Period,
    - (ii) Gandara and Mathura art.
  - (c) Muslim Period (1200 century to 1500 century).
  - (d) Modern art of Bangladesh.
  
4. **Interior Design in Home Living:**
  - (a) Use of art elements and principles in making home living artistic and comfortable.
  - (b) The modern style pf interior decoration- Modern use of materials, architecture and dwellings.
  - (c) Art design in home furnishing- Selections and use arrangements of furniture.

7. Compromise Decree and res-judicata;
8. Execution of Compromise Decree.

## 13. Death, Marriage and Insolvency of Parties:

1. Death of Party Consequences;
2. Marriage of party Consequences;
3. Insolvency Consequences;
4. Insolvency of Plaintiff;
5. Insolvency of defendant.

## 14. Trial:

1. Summons and attendance of witnesses;
2. Adjournment;
3. Heavy of suit-Right to being recording of evidence.

## 15. Judgment and Decree:

1. Judgment-definition-Essentials;
2. pronouncement-contents-attention

## 16. Suits in Particular Cases:

- (a) Suits by or against government or Public officer;
- (b) Suits by or against aliens and foreign rulers;
- (c) Suits by or against soldiers, sailors, airmen;
- (d) Suits by or against Corporation;
- (e) Suits by or against firms;
- (f) Suits by or against trustees, executors & administrators;
- (g) Suits by or against minors and lunacies;
- (h) Suits by or against indigent persons;
- (i) Suits relation to mortgages;
- (j) Inter-pleader suit;
- (k) Suits relating to public nuisance;
- (l) Suits relating to public characters.

## 17. Appeal, Reference, Review and Revision.

## 18. Execution:

1. Modes of Execution;
2. Stay of Execution;
3. Arrest and Detection;
4. Attachment of Property;
5. Sale and Delivery of Property;
6. Distribution of Assets.

## 19. Miscellaneous:

1. Transfer of Causes;
2. Restitution;
3. Caveat;
4. Inherent Powers of Court.

## Limitation Act

Objects, Interpretation and application of statutes of Limitation -Limitation of suits, Appeals and Application-Computation of period of Limitation-Extension and Exemption of period of Limitation Suspension of Limitation Waiver of Limitation -Effect of Fraud and Acknowledgement of Limitation- Adverse possession-Acquisition of easement rights-Limitation in suit for recovery of Land.

**The Code of Criminal Procedure**

- Definitions;
- Evolution of Criminal judicial System in Bangladesh;
- Constitution, Jurisdiction & Powers of Criminal Courts;
- Summons and Warrants;
- Arrest Bail & Bail Bonds;
- Prevention offences Security for keeping good behaviours & peace;
- Unlawful Assembly;
- Public Nuisances & Temporary orders in urgent cases of Nuisance or apprehended dangers;
- Disputes as to Immovable Property;
- Preventive Action of the Police;
- Police Investigation and Inquiry;
- The mode of taking evidence in trials;
- Complaints to Magistrates, Charge, Summary Trials, Trial of Summons and Sessions Cases, Judgment, Acquittal, Conviction, Appeal, Reference & Revision;
- Submission of sentences for confirmation;
- Provision as to Execution;
- Provision as Lunatics;
- Disposal of Property;
- Proceedings in cases of certain offences affecting the Administration of Justice;
- Transfer of Criminal Cases;
- Suspensions, Remissions & Commutations of Sentences;
- Irregular Proceedings;
- Public Prosecutor;
- Inherent Power of the Court;
- Miscellaneous.

**Penal Code**

- Definition of Crime.
- Essential elements of Crimes.
- General exceptions from Cr.liabilities.
- Right of Private Defense.
- Punishments.
- Abetment.
- Offence against public tranquility.
- Criminal conspiracy and Sedition.

Offences by or relating to Election

- False evidence.
- Offences relating to coin & Govt. Stamps.
- Offences by public Servants.
- Contempt's of Courts.
- Public Nuisance.
- Offences relating to religion.
- Offences relating to human body.

Culpable Homicide, Murder, Hurts, Wrongful Confinement, Wrongful Restraint, And Criminal Force. Assault. Kidnapping, Abduction, Rape unnatural offence.

- Offences against property.

Theft. Extortion, Robbery, Dacoity, Cheating, Criminal Misappropriation of Property, Criminal Breach of Trust.

- Mischief
- Trespass: Criminal trespass, House-trespass, House breaking.
- Forgery & Falsification Accounts.
- Offences Relating to Marriage.
- Defamation.
- Criminal Intimidation, Insult and Annoyance.
- Attempts of offences.

**Law of Evidence**

## Evidence Act

## A. Law of Evidence

1. Function of the Law of Evidence.
2. Preliminary: Short Title–extent and commencement of the Act. Definitions.
3. Scheme of Evidence Act.

Relevancy of facts–Mode of proof–Production and effect of Evidence.

Improper Admission or Rejection of evidence.

**Relevancy of facts**

Facts in issue and Relevant facts. Facts connected with the facts to be provided. Statement about the facts to be proved. Decision about the facts to be proved. Opinions of the facts to be proved. Character of the persons who are concerned with the facts to be proved.

**Mode of Proof**

Judicial notice. Facts admitted. Proof of facts other than contents of documents. Proof of documents including proof of execution of documents and proof of existence.

**Production and effect of evidence**

Burden of Proof. Presumptions, competence of the witness. Privilege, Examination of witnesses. Impeachment or confirmation of the credit of the witness. Power of the court in relation to examination witnesses.

**Improper Admission or rejection of evidence****Specific Relief Act**

Equitable remedies, Rules regarding Possession of Immovable and Movable Properties, Specific performance, Declaratory suit, Receiver, Injunction.

**Company Law**

Company: Definition and Nature

Nature of Company Law

Company Law as applied in Bangladesh

Types of Companies

Formation of Company

Memorandum and Articles of Association

Promoters

Prospectus

Management of Company: Directors, Managing Director, Manager and Managing Agent Raising and Maintenance of Capital; Share, Debenture and Dividends.

- Members and Shareholders
- Meetings and Resolutions
- Accounts and Audits
- Winding up

**Commercial Law**

**The Sale of Goods:** Formation of the Contract Subject–matter of the Contract–Condition and Warranties–Transfer of Property between Seller and Buyer–Islamic Principle in this matter Performance of the Contract–Rights of Unpaid Seller–Suit for Breach of the Contract.

**Partnership:** Definition and Nature–Distinction between Partnership Firm and Company– Islamic Principles in these matters–History of Partnership Law in Bangladesh.

**Partnership Relations:** Relations between the Partners–Relation between the Partners and Third Parties–Inclusion and Exclusion of Partners, Registration of a Firm–Dissolution of a Firm–Consequence of Dissolution of a Firm–Islamic Regulations.

**Carriage of Goods:** Contract of Carriage –Classification of Carriers–Railways as Carriers– Carriage of Goods by Sea–Charter–Party–Bill of Lading–Carriage by Air.

**Insurance:** Nature of the Contract of Insurance—Fundamental Principles—Premium—Policy— Reinsurance—Double Insurance—Marine Insurance: The Policy—Warranties—the Voyage—Perils Losses—Particular average, General average—Termination of-Risk-Fire Insurance—Life Insurance. Islamic Principle in the matter.

Law of Insolvency: Principles and objects of Insolvency legislation. Insolvency Court: Functions and jurisdiction.

Negotiable Instruments: Promissory Notes –Bill of Exchange—Cheques Holder in due Course—Negotiation—Endorsements—Defective Title—Liability of Parties—Discharge.

Law of Arbitration: Defining Arbitration-Submission and modes of submission. Appointment and removal of arbitrators. The Award, Power of the Court in respect of the award.

### **Land Laws of Bangladesh**

Evolution of Tenancy—From ancient period to the passing of the State Acquisition and Tenancy Act. 1950.

State Acquisition Act. 1950

Definitions

Special provisions for the acquisition of the interests of certain rent-receivers.

Special provisions regarding lands on lieu of service Preparation of records-of-rights.

Assessment of compensation and acquisition of interest of rent-receivers and of certain other interests.

Special provisions for preparation of compensation Assessment rollers in respect of properties required under chapter-II

Authorities for preparation of compensation Assessment rolls.

Revision of the compensation Assessment roll and the decision with regard to compensation.

Payment of compensation.

Provisions relating to arrears of reverate, rent and assess.

Special provisions relating to arrears of rent provision relating to indebted rent-receivers. Miscellaneous.

Application of Parts V and class of agricultural tenants Incidents of holdings of raiyats and transfer, purchase and acquisition of lands.

Provisions as to enhancement and reduction of rent.

Amalgamation, sub-division and consolidation of holdings.

Provisions as to rent and realization of rent maintenance and revision of the record of rights.

Jurisdiction, Appeal, Revision, Review.

Land Reforms Ordinance, 1984.

### **Non-Agricultural Tenancy Act, 1949**

Non-Agricultural Tenancy Act, 1949

Preliminary

Classes of non-agricultural tenants.

Tenants

Under Tenants

Provisions as transfer of a non-agricultural land

Improvements

Other incidents of non-agricultural tenancies

Judicial procedure.

**INTERNATIONAL LAW**

(Physiology and Anatomy)  
Marks-100

**Part-I: Physiology**

**50**

- a. Physiology of basic tissues.**
- b. Blood and circulatory system.**
- i. Haemostasis
  - ii. Coagulation of blood
  - iii. Cardiac cycle
  - iv. E.C.G.
  - v. Blood pressure
  - vi. Cardiac out put
  - vii. Physiology of shock
  - viii. Regional circulation
- c. Respiratory system:**
- i. Lung function tests
  - ii. Mechanism of rhythmic breathing
  - iii. O<sub>2</sub> and CO<sub>2</sub> carriage
  - iv. Regulation of respiration
  - v. Cyanosis and hypoxia
- d. Digestion, Metabolism and Nutrition**
- e. Kidney and body fluid:**
- i. Mechanism of urine formation and concentration.
  - ii. Renal circulation.
  - iii. Renal function tests.
  - iv. Regulation of body fluids.
- f. Endocrinology and reproduction:**
- i. Hypophysis.
  - ii. Thyroid.
  - iii. Parathyroid.
  - iv. Pancreas.
  - v. Adrenal gland.
  - vi. Ovary and testis.
  - vii. Reproduction and control of fertility in the male and female.
- g. Nervous system:**
- i. General organization of nervous system.
  - ii. Reflexes.
  - iii. Cerebellum.
  - iv. Hypothalamus.
  - v. Emotion.
- h. Special senses:**
- i. Visual pathway.
  - ii. Light reflex.
  - iii. Accommodation reaction.
  - iv. Vestibular apparatus.
  - v. Pathway for test and audition.

**Part-II: Anatomy**

50

- a. Anatomy of cells.
- b. Cell divisions.
- c. Elementary genetics.
- d. Tissues of the body:
  - i. Epithelial tissue.
  - ii. Connective tissue proper.
  - iii. The skeletal system functions of the bones, Ligaments cartilages, structures of the bones and joints.
  - iv. The muscular tissues
- e. The nervous system—structures of the nervous tissue—neurone and neuroglia; Central nervous system; peripheral nervous system and autonomic nervous system.
- f. The sense organs.
- g. Dermatomes.
- h. The skin.
- i. The circulatory system—Heart, arteries, veins.
- j. The Respiratory System—Nose, Throat, Larynx, Trachea, Bronchi and Lungs.
- k. Digestive system—Mouth, Pharynx, Oesophagus, Stomach, Intestines, Salivary glands, Liver, Gall bladder, Pancreas and Spleen.
- l. Urinary system—Kidneys Ureters, Urinary bladder, Urethra.
- m. The reproductive system Male and Female reproductive system.
- n. The endocrine glands.
- o. General embryology.
- p. Special embryology of the human body.

## MEDICAL SCIENCE

## Part-II

(Medicine and Pathology)

Marks: 100

**Part-I: Medicine:**

50

**1. Objective: A graduate doctor will be able to:**

- Diagnose and manage various common medical conditions prevalent in the community (particularly in Bangladesh) and give proper counseling to patients and relatives.
- Recognize, provide competent initial care and refer complicated cases to secondary and tertiary centers at appropriate time.
- Diagnose and manage medical emergencies commonly encountered in hospital practice.
- Demonstrate the awareness of the need to keep abreast of new knowledge and techniques in medicine.

**Introduction to General Medicine:**

- Overview to medicine as a discipline and subject
- Approach to common symptoms of diseases: e.g. pain, edema, cough, vomiting, dysuria, paralysis, joint pain, weakness, enlarged lymph node, anaemia etc.

**Blood Transfusion:****Clinical Medicine:**

Nutritional Factors in diseases:

- Energy yielding nutrients.
- Protein energy malnutrition in adult.
- The vitamins-deficiency and excess.

**Diseases due to infections:**

- Approach to infectious diseases-diagnostic and therapeutic principles.
- General principles and rational use of antibiotics.
- Dengue.
- Enteric fever.
- Amoebiasis, Giardiasis.
- Kala-azar.
- Malaria.
- Filariasis.
- Rabies.
- Tuberculosis.
- HIV/AIDS.
- Leprosy.
- Cholera, Diarrhoeal Disease.

**2. Approach to common symptoms of disease:** Fever, Pain, Palpitation, Jaundice, Anaemia, Bleeding, Hemoptysis, Dyspnoea, Paralysis, Syncope, Ascitis, Oedema, Cough, Vomiting, Dysuria.

**3. Nutritional, Metabolic and Environmental diseases:** Protein energy malnutrition, Obesity, Diseases due to Vitamin deficiency and excess.

**4. Respiratory disease:** Bronchial asthma, Chronic obstructive pulmonary disease, Pneumonia, Pleural effusion, Pneumothorax, Bronchogenic carcinoma.

Cardiovascular disease: Hypertension, Ischaemic heart disease. Acute rheumatic fever, Valvular heart disease, Heart failure.

Blood disorders: Leukemia, Lymphoma, Hazards of blood transfusion etc.

**5. Helminthic diseases:**

- Nematodes
- Trematodes

HIV and infections in the immuno compromised conditions.

Syphilis, gonorrhoea.

**6. Diseases of the cardiovascular system:**

- Ischaemic heart disease.
- Rheumatic fever and Rheumatic heart disease.
- Valvular diseases of heart.
- Infective endocarditis.
- Hypertension and hypertensive heart diseases.
- Cardiac arrhythmias (common).
- Heart failure – Acute–chronic
- Acute and chronic pericarditis, pericardial effusion & cardiac tamponade

**Diseases of the gastrointestinal tract:**

- Peptic Ulcer disease and non-ulcer dyspepsia.
- Malabsorption syndrome.
- Irritable bowel syndrome and inflammatory bowel disease.
- Acute viral hepatitis and chronic hepatitis.
- Abdominal tuberculosis.

**Nephrology & Urinary System:**

- Nephritic & Nephrotic Illness.
- UTI/Pyelonephritis.
- ARF
- CRF

**Neurological System:**

- Cerebrovascular diseases.
- Meningitis: viral, bacterial and tuberculosis.
- Encephalitis, viral.
- Peripheral neuropathy.

**Water and electrolytes and acid-base homeostasis:**

- Diagnosis and treatment of specific fluid and electrolytic disorders.

**Endocrine and Metabolic diseases:**

- Diabetes mellitus.
- Thyrotoxicosis.
- Hypothyroidism and Iodine deficiency state.
- Cushing's syndrome and Addisons disease.

**Connective tissue Disorder:**

- Rheumatoid arthritis and reactive arthritis
- Degenerative joint diseases including cervical spondylosis.
- Gout.

**Geriatric medicine:****Common Genetic Disorders:****Common Immunologic disorders:****7. Diseases of the blood:**

- Anaemia: iron deficiency.
- Common Haemolytic anaemia (Thalassaemia and acquired haemolytic anaemia).
- Common bleeding disorders (Thrombocytopenia and haemophilia).
- Agranulocytosis and aplastic anaemia.
- Leukaemas: Acute and chronic.
- Lymphomas.
- Multiple myelomas.
- Blood transfusion.

**Diseases of the respiratory system:**

- Upper respiratory tract infections.
- Pneumonias.
- Tuberculosis.
- Lung abscess and bronchiectasis.
- Diseases of the pleura: Pleurisy, Pleural effusion & empyema. Pneumothorax.
- Chronic Obstructive lung diseases and cor pulmonale.
- Bronchial asthma & pulmonary eosinophilia.
- Acute and chronic respiratory failure.
- Neoplasm of the lung.

8. **Pancreatic disease:** Acute pancreatitis, Chronic pancreatitis.
9. **Liver and Biliary tract disease:** Viral hepatitis, Chronic liver disease, Cirrhosis of liver Carcinoma liver, Liver abscess.
10. **Neurological disease:** Cerebro vascular disease, Meningitis, Encephalities, Epilepsy, Peripheral neuropathy, Management of unconscious patient.
11. **Musculoskeletal disorders:** Rheumatoid arthritis, Seronegative spondarthritis, Low back pain, Osteo-arthritis, Gout, Reactive asitritis etc.
12. **Geriatric medicine:** General principles of treating elderly, Health problem of the elderly.
13. **Poisoning and drug overdose :**
  - Initial evaluation of the patient with poisoning of drug overdose.
  - General principles of management.
  - Treatment of common specific poisoning: OPC, sedatives, kerosene, alcohol, methanol, Dutra poisons.
  - Venomous stings, insect bites, poisonous snakes and insects.

**Emergency Medicine:**

- Cardiopulmonary resuscitation.
- Acute pulmonary oedema and severe acute asthma.
- Hypertensive emergencies.
- Diabetic ketoacidosis and hypoglycaemia.
- Status epileptics.
- Acute myocardial infarction, shock and anaphylaxis.
- Upper G.I bleeding and hepatic coma.
- Diagnosis and management of comatose patient.
- Drowning, electrocution.

**Common skin diseases:** Scabies, eczema, fungal infection

**Common psychiatric conditions:** Somatoform disorders, depressive illness, schizophrenia, substance abuse.

**Clinical Methods in the Practice of Medicine:**

- History Taking.
- Physical Examination.
- Investigations.
- Diagnosis.
- Principles of treatment.
- Interpersonal skills.
- Communication skills.
- Doctor-patient relationship.
- Ethical Behavior.
- Referral services.
- Medical Certificate.
- **Common Clinical Procedures :**
  - Injections.
  - Nebulisation.
  - IV infusion.
  - FIRST AID.
  - Intubations.
  - CPR.
  - Hyper pyrexia.
  - ECG
  - Skin Sensitivity Test.

14. **Clinical genetics:** Introduction to medical genetics, Modern techniques of medical genetics, Down's syndrome, Klinefelter's syndrome, Turner's syndrome etc.
15. **Immunologic disorders:** Basic facts of Immunology, Immunologic deficiency diseases.
16. **Sexually transmitted disease:** Gonorrhoea, Syphilis, Non Gonococcal urethritis.
17. **Skin disease:** Scabies, Superficial fungal infection, Dermatitis, Psoriasis, Drug reaction etc.
18. **Medical Psychiatry:** Anxiety neurosis, Depression, Dissociative disorder, Somatoform, disorder etc.
19. **Communication skill**
20. **Terminal Care**

**Part-II : Pathology :**

50

- a. Cell biology general concept.
- b. Inflammation, Degeneration, Necrosis and gangrene.
- c. Sterilization and disinfection.
- d. Disorder of growth: Tumors including cancers.
- e. Radiation, Hazards and prevention.
- f. Immunity, Immunization against common bacterial and viral infection. Immuno deficiency syndrome with special reference to AIDS.
- g. Common cause of diarrhoea and pathogenesis and complication. General reaction to trauma, hemorrhage and shock.
- h. Bacterial infections with special references to Enteric fever, Tuberculosis, Leprosy, Diphtheria, Whooping cough, Tetanus, Gas gangrene, Food poisoning, Strepto and Staphylococcal infections, Bacillary dysentery, Cholera.
- i. Common viral disease like poliomyelitis, Chickens pox, Measles, Viral hepatitis, Rabies, Herpeszoster, HIV. AIDS. Dengue.
- j. Common parasitic disease Ascariasis, Ankylostomiasis (Hook worm infection).
- k. Common protozoal disease Malaria, Kala-Azar, Giardiasis.
- l. Sexually transmitted disease like, Gonorrhoea, Syphilis, elaneaid, Nongonococcal urethritis.
- m. Routine laboratory procedure for peripheral blood film Urine, Stool malarial parasite examine sputum for Gram stains and AFB examine Blood examine for Hb% and ESR.
- n. Special pathology for some diseases like Tuberculosis, Pneumonia, Bronchial Carcinoma, Chronic Bronchitis, Empygenia, Bronchicetasis, Respiratory failure, pleurisy, pleural effusions, Pneumoconiosis.  
Liver disease like viral hepatitis, Hepatic amebiosis, liver abscess, primary and secondary carcinoma of liver  
Collagex diseases like systemic lupus erythomatosus, Systemic sclerosis, Dermatomyositis-Rheumotoid arthritis. Diabetes Mellitus.  
Joint disease – Gout, spondylitis Psoriatic arthritis. Osteo arthritis Seronegetive arthritis  
Endocrine disease: Pituitary tumors, Acromegaly, Thyroid tumors, Hyperthyroidism, Hypothyroidism.  
GI tract: Peptic ulcer disease, Carcinoma, Stomach Carcinoma, colon, renal disease: Acute and chronic glomerlo nephritis, Acute and Chronic pyeto nephritis. Polycystic disease of Kidney, Renal artery stenosis, Renal failure.  
**Neurological disease:** Cerebrovascular disease, multiple Meningitis, Epilepsy, multiple sclerosis, Neurosyphilis, ryopathy mysthesis grovis.  
**Cardiovascular disease:** Congenital and acquired valvular heart disease. Ischemic heart disease, Hypertensive heart disease. Cardiomyopathies Heart failure.

**DENTAL SCIENCE**

Subject Code: 791  
Total Marks-200

Part-I

Marks-100

1. **Oral Surgery and Anesthesia:**

- i. Acute infections of the Oral cavity–Acute infections of the jaws, periapical abscess, pericoronal infections, dissecting subperiosteal abscess, periodontal abscess, facial planes and spread of infections, acute cellulitis, Ludwig's angina, cavernous sinus thrombosis, differential diagnosis of neck swelling and lymph node enlargement in and around the jaws and the neck.
- ii. Hemorrhage diseases, disorders and lesions and complications associated with oral surgery.
- iii. Extraction of teeth-Indications and contra-indications for extractions or other surgical operations.
- iv. Cysts of bone and soft tissue of the oral cavity-Classification, development of cyst, general consideration of cystic lesions, treatment, post operative complication.
- v. Wounds and injuries of the soft tissues of the facial areas-General consideration and classification of wounds: concussion, abrasion, laceration, penetrating wounds, gunshot wounds, burns, treatment of wounds & burns.
- vi. Fractures of the jaws-Etiology, classification, examination, diagnosis, management and complications of fractures of mandible, maxilla zygoma and other facial bones.
- vii. Surgical aspects of the oral tumours-Tumours of the hard tissues of the cavity, odontogenic tumours, osteogenic tumours, pregnancy tumours, tumours of the soft tissues of the oral cavity, carcinoma of the oral cavity, diagnosis and treatment.
- viii. The temporomandibular joints-Anatomy, painful temporomandibular joint, aetiology symptoms, clinical findings, roentgenographic findings and treatment of T.M.J. dislocation, Ankylosis with complications.
- ix. Pre-prosthetic Surgery-Edentulous ridge criteria, types of oral and extra oral surgical procedures, abnormalities of soft & osseous tissues, Frenectomy, ankyloglossia, ridge extension procedures.
- x. Plastic Surgery-Embryology, etiology, classification objectives, surgical correction of lip, alveolus and palate.
- xi. Local anaesthesia-Infiltration nerve block technique, the art of local indications and contra-indications of local anaesthesia.
- xii. General Anaesthesia-Role of general anaesthesia in dentistry, indications for general anaesthesia, preoperative preparation for in-patient or out patient general anaesthesia.

2. **Conservative Dentistry and Dental Radiology:**

- i. Dental caries and classification of caries.
- ii. Class I and II cavity preparation in extracted molar teeth for silver amalgam restorations, Matrix band application, Insertion of lining materials, Amalgam plugging and finishing.
- iii. Class III and IV cavity preparation in extracted teeth and insertion and finishing of different anterior filling materials.
- iv. Class V cavity preparation in the extracted teeth and insertion and finishing of different filling materials.
- v. M.O.D. cavity preparation.
- vi. Retentive pin technique for different restoration.
- vii. Inlay preparation in the extracted teeth.
- viii. Jacket crown preparation in the extracted teeth.
- ix. Preparation of teeth for root canal treatment-Anaesthesia-isolation, surface sterilization.
- x. Root canal therapy.
- xi. Endodontics in children.
- xii. Periodontal diseases and the dental pulp.
- xiii. Problems in endodontics treatment.
- xiv. Technique of dental and oral radiography.
- xv. Radiation Hazard.

## DENTAL SCIENCE

## Part-II

Marks-100

1. **Prosthodontics.****Complete Denture Prosthesis-**

- i. Impression procedure, preliminary and final.
- ii. Construction of cast from impression, base or permanent base & wax rim.
- iii. Selection of teeth (Shade & Mould).
- iv. Alignment of teeth.
- v. Trial of complete denture.
- vi. Finishing of complete denture, fitting the finished denture (insertion).
- vii. Complaints of patients.

**Partial Denture Prosthesis-**

- i. Impression.
- ii. Treatment planning and mouth preparation.
- iii. Model Surveying.
- iv. Component parts of partial denture.
- v. Materials used in partial denture construction.
- vi. Design of partial dentures.
- vii. Wax pattern for cast denture and acrylic dentures.
- viii. Recording of occlusion.
- ix. Trial of partial denture.

**Crown and Bridge Prosthesis-**

- i. General indication of crown.
- ii. Tooth reduction steps & preparation of principle crown.
- iii. Full veneer crown.
- iv. Partial veneer crown.
- v. Inlay retainer.
- vi. Impression technique.
- vii. Construction of porcelain jacket crown.
- viii. Construction of veneered gold crown.
- ix. Construction of veneered jacked crown using resin.
- x. Abutment general principles retention and support.
- xi. Pontics.
- xii. Design of the pontic.
- xiii. Construction of bridge.

**Cleft Plate and Oro-Facial Prosthesis-**

- i. Obturation for intra oral loss at tissue by surgery.
- ii. Implant denture.

**Orthodontics-**

- i. Definition, Aims objectives and scope of Orthodontics.
- ii. Growth and development of jaws, face and skull.
- iii. Normal occlusion and its characteristics, factors responsible for establishment and maintenance of normal occlusion.
- iv. Soft tissue morphology and behaviour.
- v. Malocclusion, Types: Arch and skeletal classification.
- vi. Aetiology of Malocclusion.
- vii. Types, design of appliances and anchorage.
- viii. Appliances for different tooth movement.
- ix. Preventive, Interceptive and corrective treatment of Malocclusion.
- x. Extractions in orthodontics.

**2. Children Dentistry, Preventive and Community Dentistry-**

## Children Dentistry-

- i. Scope and importance of pedodontics.
- ii. Diagnosis and treatment planning for child patient.
- iii. Diseases of the oral mucous membrane and related problem in children.
- iv. Nutritional factors in diseases.
- v. Child psychology and management of child patient in dental office.
- vi. Oral habits in children.

**3. Preventive & Community Dentistry-**

- i. Prevention of dental caries with fluorides.
- ii. Food and dental caries.
- iii. Prophylactic and operative technique in dental caries prevention.
- iv. Prevention of periodontal disease and dental caries in individual and mass level.
- v. Dental ancillaries.
- vi. Dental epidemiology, survey, and Introduction to Biostatistics.
- vii. Parent counseling and child behavior.
- viii. Planning for Manpower requirements in dental public health.
- ix. An approach to dental Health Education for school children.
- x. Field programme-for oral health surveys, motivation and oral Health Education.
- xi. In rural areas to conduct survey of dental disease, provide dental health education and emergency treatment.
- xii. School-Health Programme-Dental care for school children and preventive Programme-Topical fluoride application and oral hygiene demonstration.

**4. Dental Jurisprudence-**

- i. Legal rights and protection.
- ii. Dental record keeping and person identification.
- iii. Ethics, particularly as they apply to the dental surgeon in his relation with parents, the public and his colleagues.
- iv. The ethics of epidemiological studies and other projects.
- v. An outline of forensic odontology.

**AGRICULTURE**

Marks-100

- a) Production technology and costing of field crops- rice, wheat, maize, jute, sugarcane, tea, tobacco, lentil, groundnut, soyabean and mustard. External morphology and desirable qualities of these crops.
- b) Production technology of horticultural crops-Banana, papaya, pineapple, potato, tomato, cabbage, cauliflower, brinjal, onion, garlic and chili. Post-harvest management (e.g. processing and storage) of these crops.
- c) Importance of irrigation and drainage for crop production. Merits and demerits of different methods of irrigation. Irrigation seedling in crops. Quality of irrigation water in relation to crop production and soil condition.
- d) Crop nutrition and fertilizer management: sources and available forms of plant nutrients, fertilizer and manners, judicious application of fertilizers and organic matters in different agro-ecological zones (AEZ) of Bangladesh. Use of Bio-fertilizers in agriculture and water management utilization of agriculture wastes. Scope and importance of bio energy, and generation of Bio-gas.
- e) Major insect pests and diseases of rice, wheat, jute, sugarcane, potato and mango and their control measures.
- f) Pesticides - their formulation, mode of action, methods of application residual effects with safety measures. Economic injury level and LD50. Integrated pest management (IPM) -concept, prospects and limitations.
- g) The principles and practices of agricultural extension with special emphasis on program planning, transfer of technologies, communication, diffusion and leadership. Importance of rural youth, rural women and landless farmers in agricultural extension and their empowerment.

**AGRICULTURE**  
Part-II  
Marks-100

- i) Plant genetic resources (PGR) -diversity of PGR and their conservation methods.
- ii) Crop improvement- introduction, selection, hybridization and mutation breeding. Development of hybrid and modern varieties (MVs). Concepts of variety Act and intellectual property right (IPR), seed certification and variety release.
- iii) Bio-technology in Agriculture: Tissue culture, genetic engineering. GMO and bio- safety regulations-environmental, social, legal and ethical issues.
- iv) Plant growth regulators, growth retardants and phytohormones. Ripening chemicals- uses and abuses.
- v) Concept and significance of seed viability and seed vigor. Testing seeds for purity, moisture, germination and vigor. Principles of seed crop production.
- vi) Weed competition and factors affecting crop-weed competition. Allelopathic effects of weeds on crops and vice-versa. Herbicidal weed control in rice, jute, cotton and sugarcane. Integrated Weed Management (IWM).
- vii) Environmental degradation and pollution (soil, water and air pollutions)-causes and impact on Bangladesh Agriculture. Management of drought, flood and soil salinity and other current environmental issues.
- viii) Concept and scope of agro-forestry, present status of forest resources in Bangladesh, possible improvement of present land use system through sustainable agro-forestry. Multistoried tree production system, hill cultivation-SALT practices and their different models.
- ix) Economic importance of fiber, oil, timber, medicine, rubber, narcotic and beverage crop plants and their products. Tapping system, composition and latex coagulation of rubber. Manufacturing process and changes in chemical composition in tea leaves.

## AGRICULTURAL ECONOMICS

(POST RELATED)

Subject Code: 811

Total Marks-200

## Part-I

Marks-100

**Agricultural Economics:** Definition and scope of Agricultural Economics-Concepts and tools used in Agricultural Economics. Importance of the study of the discipline.

**Production Economics :** Production and cost functions, types of production function, stages of production, law of diminishing return, economic efficiency and profit maximization. Production with two variable inputs, least cost combination of factors; Enterprise combinations- Returns to scale and equilibrium in the long run.

**Farm Management:** Principles and functions of management, economic principles in farming. Data collection methods. Types of data collected by survey; sampling techniques. Analytical techniques: - cost accounting gross margin analysis, operating statement. Measures of whole farm performance, farm planning and budgeting.

**Economic Growth and Development:** Meaning and theories of economic growth. Characteristics of economic growth. Growth versus Equity. Economic and social indicators of development; Salient features of Bangladesh Agriculture: Employment problems. Government policies and strategies for agricultural development in Bangladesh.

**Land Resource Economics:** Concepts of land and land resources, factors affecting supply of land resources for economic use. Population and land resources, application of proportionality in land resources; land use intensity; economic returns of land resources land development costs and conservation of land resources. Tenancy and leasing arrangements; land reforms and land use planning in Bangladesh.

## AGRICULTURAL ECONOMICS

## Part-II

Marks-100

**Agricultural Prices:** Meaning, role and functions of agricultural prices. Characteristics of agricultural prices. Factors affecting pricing of agricultural products. Determinants of demand, determinants of supply and relation to costs and production function. Factors influencing agricultural supply. Price variations over time and over space. Role of government in price determination and price support policies in Bangladesh.

**Agricultural Marketing:** Basic concepts of marketing approaches to the study of marketing, marketing functions and marketing institutions, marketing channels. Marketing cost, margin, efficiency and marketing mix, market organization and integration. Input and output marketing. Government intervention in farm products, co-operative marketing.

**Rural Development and Institutions:** Importance and scope of rural development. Models of rural developments. Co-operatives as institution for rural development. Traditional co-operatives and new two-tier co-operatives, Principles and practices co-operation, Organization of cooperatives, Determinants of success and failure of old co-operatives. Integrated Rural Development-Stages of two tier co-operatives, and their position in institution building, poverty alleviation and women's development programmes of present day co-operatives.

**Agricultural Finance:** Its nature and scope, financial institutions in agriculture, role and classification of credit, evaluation of credit capacity, factors affecting cost of credit. Loan repayment plans and methods of computing loan repayment. Risks and uncertainties in agriculture, Strategies to reduce risks. Farm credit systems of Bangladesh Krishi Bank and BRDB Co-operatives. Poverty situation in Bangladesh. Micro credit and poverty situation.

**AGRICULTURAL ENGINEERING**

(POST RELATED)

Subject Code: 821

Total Marks-200

Part-I

Marks: 100

1. Agricultural Machinery : Type of primary and secondary tillage implements, principles of operations and their specific use; mechanical functions of seeding machines and planers, their types and uses and their maintenance; Functions and use of combine harvester, fertilizing, spraying and plant protection machines, weeding and thinning equipments; Present status and scope of utilization of power tillers, tractors and other power sources at the farm level of Bangladesh; Soil implement mechanics and Biomass resources and utilization in Bangladesh.
2. Irrigation & water management :  
Importance of irrigation and drainage practices in food and fodder production sources and quality of irrigation water. Advantages and disadvantages of surface and groundwater utilizations. Technological innovation in the field of water lifting devices: - traditional and modern methods. Reliability of irrigation water resulting from climate/geological phenomenon and O & M difficulties. Hydrostatic pressure on surfaces, Euler's equation, Bernoulli's equation, Flow through-orifice, pipes, Flow over notches, open channels, Boundary layer theory. Scheduling of irrigation water and irrigation water distribution system.
3. Food Engineering Principles:  
Food preservation principles and processes. Processes for preservation of vegetables, fruits, fish and meat products. Village processing food based on low level technologies in Bangladesh. Cold storage design, performance and operational characteristics. Sanitation and control of microbiological problems involved in the processing and storage of food. Quality control requirements of processed foods. Design and selection of food machinery, packaging materials, Homogenization and pasteurization.
4. Food Engineering:  
Food preservation principles and processes, Selection of good machinery, Food plant design and layout, Material handling systems and packaging aspects of food industries, Safety and hygienic measures in food plant, Water treatment and utilization in food plant, Water treatment and utilization in food plant, selection, operation and maintenance of food machineries.

**AGRICULTURAL ENGINEERING**

Part-II

Marks: 100

1. Advanced Agricultural Machinery:  
Design requirement and development aspects of various agricultural machineries and implements. Soil and tillage inter-action and its application in the design of tillage tools maintenance and trouble shooting of farm machineries and implements. Force system, equilibrium condition, frictional force system, centroids, structures, kinetics of particles and rigid bodies. Design of machine members, bearings, gears, and flexible power transmission elements. Welding, planer machine, shaper machine, milling machine. Primary and secondary tillage implements, fertilizer, sprayers, crop harvesting equipments.
2. Irrigation Engineering:  
Criteria for installation of water diversion and control structures and selection of water lifting devices including pumps. Methods of irrigation of different crops in given soil and topography; Factors causing water losses and estimation of application, conveyance, water use efficiencies. Importance of irrigation need at various stages of growth of important crops and its implication in irrigation system design.
3. Quality and environmental control requirements for processed food, Principles and methods of freeze drying, filtration, sedimentation and concentration, process extraction, distillation, chilling methods and cold storage; Processes for preservation of vegetables, fruits, meat, milk, fish and food products; Food regulations and compliance. Village level technologies of food processing.
4. Concept, scope and problems of On-farm water management; Influence of climatic factors and agricultural meteorology, Hydraulic machinery theories and types of pumps. Design of various hydraulic structures, earth embankments and their problems; Ground water and wells, problems of ground water development and management in Bangladesh, evaluation and assessment of irrigation project.

**ANIMAL HUSBANDRY**

(POST RELATED)

Subject Code: 831

Total Marks-200

## Part-I

Marks-100

Contribution of livestock in the farming system of Bangladesh. Classification of common farm and domestic animals with the description of different breeds of cattle, buffalo, goat and sheep.

Judging of goat and sheep for meat, milk and wool. Judging and selection of cattle and buffalo for productive purposes.

Chemical composition and microscopic structure of hides, skins and wool. Factors affecting the quality of hides and wool.

Prospect, potential and constraints of development of meat industry in Bangladesh. Factors affecting the quantity and quality of meat. Marketing of meat and meat products.

Development of technologies for processing and treatment of animal wastes. Environment pollution through animal wastes.

Farm planning and evaluation for commercial beef and buffalo production.

Ruminant and non-ruminant nutrition. Feed nutrients and their utilization in animal body.

Reduction of methane production by ruminants and improved productivity to dietary manipulation in the rumen.

Animal feed resources-conventional and unconventional. Nutritional evaluation of feeds. Production and prospect of green forages in the existing crop farming system. Preservation of forages and its feeding to animals. Processing and utilization of feedstuffs and agro-industrial by products as animal feed.

Nutrient requirement of different types of animals. Formulation of ration for different animals for different purposes. Feeding during scarcity periods, like flood, drought etc.

Factors affecting nutritive value of feedstuffs. Anti-nutritional factors of feedstuffs.

Prediction of feed intake for livestock. Importance, present status and future scope of feed milling industry in Bangladesh.

Characteristics of important dairy cattle breeds. Selection of site for dairy farm. Judging and condition scoring of dairy cow. Role of cooperative in dairy development.

Definition, composition and structure of milk and colostrum. Factors affecting composition of milk. Food value, standard, grades and classes of milk. Milk collection, transportation and payment. Processing, transport and marketing of milk and milk products.

Methods of preservation of milk.

Factors affecting the success of dairy farm (operating quality and quantity of milk).

Factors responsible for development of dairy industry in Bangladesh. Problems of dairy industry in Bangladesh and their possible solution. Dairy by-product in Bangladesh. Preparation of butter, ghee, ice-cream.

Dairy farm planning. Layout and prospects for successful dairy operation. Feeding, housing and management of dairy cows, calves and heifers. Planning for year-round feeds and fodder supply in dairy farm. Record keeping for successful dairy operation.

Origin, domestication and distribution of different poultry species. Classes, breeds, varieties and strains of chicken and ducks.

Housing principles of poultry. Poultry feed ingredients, their classification, and nutritive value.

Artificial incubation, fertility and hatchability eggs. Selection of hatching eggs. Economics of hatchery business.

Production of duck, quail, geese and pigeon. Poultry processing plant.

Parent stock and commercial layer production. Egg production in small holder farmer's condition.

Marketing of eggs-its problems and solution. Commercial broiler production and management in Bangladesh. Importance of poultry and poultry products.

Poultry farm planning and management. Bio-security in planning and designing of poultry farm.

Commercial poultry farming on village level-problem, utility and caution.

Production and control measures for common poultry disease in Bangladesh.

Genetics and its contribution to livestock development. Linkage, crossing over and chromosome mappings, immunogenetics, mutation. Genotype-environment interaction and its implication in livestock production partitioning of causes, phenotypic variation into its components.

Chemical basis of inheritance, genetic engineering, recombinant DNA technology and its application in livestock.

Estimation of heritability repeatability and genetic correlation. Estimation of breeding value, transmitting ability, most probable producing ability. Animal selection-aids to selection, selection purpose, selection limit.

Use of specialized computer programs for solving breeding problems. Genetic diversity, animal genetic resources, out breeding, out crossing, cross breeding, line crossing, and up-grading. Open Nucleus Breeding System (ONBS), community breeding programme.

Portraits of economic importance, selection and breeding plan for the improvement cattle, buffalo, goat sheep and poultry.

### **ANIMAL HUSBANDRY**

#### **Part-II**

Marks-100

Importance of livestock in the socio-economic conditions of Bangladesh. Characteristics and constraints of livestock development in Bangladesh. Existing livestock production, marketing and disease prevention situation.

Livestock development strategies-dairy cattle, beef cattle, buffalo, goat, sheep, chicken, duck etc.

Animal slaughtering and meat quality aspect-status, problems, prospects.

Balanced feed-criteria, formulation procedure, problems, prospects and quality control.

Green feeder- Status, ways and means to attain self-sufficiency.

Livestock development through breeds and breeding-genetic resources, matching genotype, genotype-environment interaction, appropriate breeding tools, prevention of genetic crossbreeding. In-situ breeding and conservation programme for valuable native animal genetic resources.

Major constraints of small holder dairy development in Bangladesh and ways and means to overcome them. Multiple ovulation and embryo transfer (MOET) technology in dairy cattle breeding.

Production of clean and safe milk and milk products in Bangladesh. Importation of powdered milk-causes, risk and ways of minimize it.

Small holder poultry production- an economic vehicle for rural women's livelihood-problems and prospects causes of poor production of indigenous chicken. Selection and care of hatching eggs. Principles of poultry feeding. Factors regulating profit margin from poultry farming.

## VETERINARY SCIENCE

(POST RELATED)

Subject Code: 841

Total Marks-200

## Part-I

Marks-100

1. (i) Definition and scope of veterinary science.  
(ii) Horizon of veterinary activities.  
(iii) Contribution of livestock and poultry to national GDP, employment and rehabilitation of distressful women.
2. (i) Important task of animal health and hygiene : General measurement for the prevention and control of infectious diseases, effect of environment on animal health.  
(ii) Digestion and metabolism of carbohydrate, protein and fat in simple and compound stomach animals.  
(iii) Puberty and sexual maturity, factors affecting puberty and sexual maturity in ruminants.  
(iv) Reproductive hormones, estrous cycle, gestation, parturition and lactation.  
(v) Endocrine glands, secretions, functions and regulations.
3. (i) Livestock and poultry industry : Programme of a farm activities in relation to each type of herd and flock health management including feeding, breeding, housing, application of biosecurity and harvesting of animal products and their marketing.  
(ii) Formulation and preparation of ration for cattle, sheep, goat and poultry.  
(iii) Breeds of animal and poultry and their important characters.  
(iv) Animal by-products including hides, skins and leathers, their marketing at home and abroad.
4. (i) Isolation and identification of common bacteria, virus and fungus and collection of samples for bacteriological, virological and mycological examinations.
5. (i) Clinical tests for examination of blood, feces, urine and skin scrapings with their interpretations.  
(ii) Principles and interpretations of different tests for liver and kidney functions.  
(iii) Interpretation of hemostatic disorders such as coagulation time, bleeding time, prothrombin time and thrombocyte count.  
(iv) Techniques of postmortem examination in animals and birds and systematic investigation of infectious, non-infectious diseases and other pathologic disorders.  
(v) Methods of collection, preservation, fixation, processing and staining of pathologic specimens including dispatching them to diagnostic laboratory.
6. (i) Clinical Examination of animals.  
(ii) Determination of sex and age.  
(iii) Clinical diagnosis of diseases.  
(iv) Livestock and poultry diseases : Clinical findings, postmortem lesions, diagnosis, treatment, prevention and control of important parasitic (ascariasis, haemonchosis, fascioliasis, babesiosis, coccidiosis), infectious (anthrax, black quarter, hemorrhagic septicaemia, tuberculosis, paratuberculosis, enterotoxemia, foot and mouth disease, rabies, PPR, Gumboro disease, Newcastle disease, Marek's disease, salmonellosis, fowl cholera, colibacillosis, mycoplasmosis), non-infectious including metabolic diseases (milk fever, ketosis pregnancy toxemia, grass tetany), diseases caused by nutritional (copper, cobalt, iron, zinc) and vitamin ( A, D, E, B vitamins) deficiencies.  
(v) Important diseases of small animal and zoo animal (hookworm, heartworm, mange, tuberculosis, anthrax, canine distemper, infectious canine hepatitis, psittacosis, amoebiasis) their diagnoses, treatment, prevention and control.  
(vi) Diagnosis, treatment, prevention and control of important reproductive diseases (cysts in ovary and mesovarium, pyometra, endometriosis, retained placenta, abortion and stillbirth).  
(vii) Uses of antibiotics, anthelmintics, insecticides, steroids and other hormones. Drug withdrawal and residue avoidance.
7. (i) Sampling procedures and use of  $t$  &  $F$  test for statistical analysis of the result of a scientific experiment.
8. Animal disease Act and Animal Slaughter Act and their implementation.
9. Importance of Veterinary Public health in Bangladesh and its drawback in comparison to developed countries.
10. Improved Variety feeds and fodder available in the country and their characteristics.

**VETERINARY SCIENCE**

Part-II

Marks-100

1. (i) The etiology, clinical findings, gross pathological changes, diagnosis, prognosis and treatment of common diseases of digestive, respiratory, cardiovascular, hematological and urogenital, nervous and integumentary systems.
- (ii) Principle of epidemiology, methods of epidemiological investigation, their application in the control of important infectious and non-infectious diseases of domestic animals and poultry.
- (iii) Common frauds practiced in sell of livestock and livestock products.
- (iv) Veterinary ethics and laws. Legislation against animal diseases in Bangladesh.
  
2. (i) Common characters and pathogenicity of following bacteria : Bacillus, clostridium, streptococcus, staphylococcus, eschedrichia, pseudomonas, brucella, salmonella, actinobacillus, actionomyces, shigella, pasteurella, listeria, leptospira, corynebacterium, mycobacterium and following fungus: Aspergillus, blasstomyces, cryptococcus, histoplasma, rhinosporidium, candida, microsporum, trichophyton of domestic animals and poultry.
- (ii) Common characters and pathogenicity of following viruses : The viruses of Goat pox, fowl pox, Marek`s disease, malignant catarrhal fever, IBR, infectious canine hepatitis, duck hepatitis, FMD, NCD, PPR, canine distemper, rabies, IBD of domestic animals and poultry.
- (iii) Immunity and its classification, types of immune response, cells responsible for immune response, antigen, vaccines, antibody, antibody production and serological test (Rapid plate agglutination test, HA, HI, FAT and ELISA).
  
3. (i) Principles of sedation, analgesia and premedication, common intravenous and inhalation agents used in anaesthesia.
- (ii) Methods of producing various local and regional anaesthesia, hazards associated with anaesthesia.
- (iii) Operative technique of the common surgical diseases (Bloat, impaction, dystocia, dermoid cyst, cataract, glaucoma, atresia ani, abdominal hernias, phimosis, paraphimosis) including postoperative care.
  
4. (i) Properties and exposure factors of x-rays.
- (ii) Hazards of radiation and the protective measures.
- (iii) Radio-diagnosis and radio-therapy.
- (iv) Examination of animal for soundness and certificate writing.
  
5. (i) Diseases and accidents associated with parturition : metritis, utero-vaginal prolapse, downers cow syndrome.
- (ii) Collection and preservation of liquid and frozen semen of bulls and bucks.
- (iii) Techniques of artificial insemination (AI) in cows and does, health management of AI bulls and bucks.
- (iv) Venereal and semen borne diseases in ruminants.
- (v) Livestock population and cattle breeding policy in Bangladesh.
  
6. (i) Methods, standardization and evaluation of common drugs used in veterinary practice.
- (ii) Poisonous plants (Datura, abrus, ricinus, strychnos), mycotoxins (aflatoxins, ergot) and minerals (arsenic, copper, lead, selenium, zinc) concerning the veterinarians.
  
7. (i) Role of veterinarian in public health.
- (ii) Prevention and control of common zoonotic diseases (Anthrax, brucellosis, rabies, hydatidosis, scabies).
- (iii) Food Home infections and intoxications.
- (iv) Meat inspection and meat borne diseases.
  
8. Criteria to be followed for establishing a small scale dairy, goat and poultry farm.
  
9. Role of Drug control Authority and BSTI in Veterinary drug and product control.
  
10. The quarantine procedures to be followed to prevent disease transmission across the borders.

**FISHERIES**  
(POST RELATED)  
Subject Code: 851  
Total Marks-200

Part-I  
(Fisheries Biology and Management)  
Marks-100

- (i) General Ichthyology: Classification of major groups of fishes. External morphology: Body forms, shape and size, appendages and their origin. Scales and skeleton, coloration in fishes and its significance. Anatomy of different internal organ system: Respiratory, Digestive, Circulatory, Excretory and Reproductive. Swim bladder: origin and its role in buoyancy. Adaptive radiation in fishes. Receptors.
- (ii) Biodiversity and Fishery Systematic: Definition, different types of biodiversity. Economic and ecological values of biodiversity. Causes of the loss of biodiversity: natural variation in time and space. Red list: present status of aquatic biodiversity and endangered aquatic species of Bangladesh. Protected areas of Bangladesh-important haor, river and lakes, exotic species. Conventional Biological Diversity (CBD), Sundarban, Coastal and Marine Biodiversity, Conservation-in situ and ex-situ. Scope of fishery systematic, species concepts and speciation in fish. Taxonomic characters, criteria for taxonomic categorization. Zoological nomenclature: Rules, International code, validity of names, homonymy, synonymy.
- (iii) Fish Physiology: Classification of fish on thermal regulation. Physiology of Respiratory, Digestive, Circulatory, Excretory and Reproductive systems. Osmoregulation and Endocrine system. Special organs-light and electric organs.
- (iv) Genetics and Fish Breeding: Mendel's laws of inheritance, principles of independent assortment. Interaction of genes, theory of chromosome inheritance and manipulation, gametogenesis. Sex-influenced and sex-limited inheritance, mutation. Genetic variance and hybridization, heterosis and hybrid vigor, impact of hybridization. Gene and Brood banking. Importance of fish-hatchery, status and rule of hatcheries in Bangladesh. Brood stock rearing strategy. Hatchery operation and management methods including cry preservation of fish gametes. Natural and artificial spawning of indigenous and exotic species, larvae and fry rearing techniques. Transportation of live fishes.
- (v) Ecology: Concept of ecosystem, ecological niche, food chain, homeostasis and ecological balance. Population concepts, density, rates, nasality, mortality, age distribution and growth. Carrying capacity and ways of increasing the carrying capacity. Types of interaction between two species. Ecological classification of fresh water organisms.
- (vi) Limnology: Physical characteristics of inland water (light, colour, turbidity, temperature). Chemical characteristics of inland water (pH, oxygen, carbon-dioxide and other dissolved gases). Dissolved solids (phosphorus, nitrogen, calcium, magnesium, sodium, potassium, iron and silica). Role of nutrients in primary production. Biogeochemical cycles of nitrogen, phosphorus, carbon, silicon and iron.
- Factors affecting primary and secondary production estimation of primary and secondary production. Bioturbation and its effects on productivity.
- Phytoplankton: Characteristics, types, life history, flotation, distribution, seasonal succession and eutrophication. Phytoplankton bloom: factors, effects, control interaction with other organism.
- Zooplankton: Characteristics, abundance, food and feeding habits, reproduction, movement, phytoplankton-zooplankton relations.
- Benthos: Significance, distribution, factors, affecting distribution.
- Periphyton: Major groups, characteristics, abundance, substrates, distribution in lentic and lotic habitats, Importance and relations with other organisms.
- Bacteria: Roles in bio-geochemical cycles, relations of plankton and benthos with bacteria. Aquatic vascular plants: Major groups, importance and influence on aquatic environment.

- (vii) **Fish Population Dynamics:** The concept of unit stock, estimation of relative and absolute abundance of population, length-weight relationship, selectivity of fishing gear. Procedures for estimating the parameters of the von Bertalanffy growth curve using data from length frequency analysis and hard part analysis; Stock-recruitment relationships, determination of spawning season and fecundity estimation. Definition and types of fish mortality, estimation of fishing mortality and natural mortality. Basic concept of fish yield, estimation of maximum sustainable yield (MSY) and maximum economic yield (MEY).
- (viii) **Fisheries Management:** Importance and relation of life history data in fisheries Management. Protection against hazards-fish pass. Habitat improvement devices and measures. Restoration and conservation of open water fisheries: New fisheries management policy (NEMP), Community Based fisheries Management (CBFM) (Jalamohal, Oxbowlakes, Haors, Baors, rivers and Coastal fisheries). Fish Sanctuary, Fishery Regulations. Management problems and their mitigation measures. Role, principles, objectives, problems, and activities of Fisheries cooperative. Fish markets and marketing systems in Bangladesh. Recreational fisheries.

**FISHERIES**

Part-II

(Aquaculture and Industrial Fisheries Technology)

Mark-100

- (i) **Aquaculture:** Resources, site selection, pond construction, pond preparation, pre-stocking management and post-stocking management. Extensive, semi-intensive and intensive aquaculture. Specialized aquaculture: cages, pen raceway and integrated farming system. Carps, pangas, freshwater prawn and tilapia culture. Use of Geographical Information System (GIS) for aquaculture planning and development. Coastal aquaculture: Shrimp, crabs, mollusks and seaweeds. Impact of coastal shrimp culture on the socio-economic condition of rural community. Basic engineering principle and designs for aqua farming, present status and future prospects. Feeding and aeration techniques in aqua farming. Wastewater treatment and disposal methods.
- (ii) **Disease and parasites:** General signs of diseased fish. Significance and factors producing diseases: Parasitic Bacterial, Fungal and viral diseases in fish. Characteristics, pathogens, clinical signs, diagnosis and prevention and control measures. Prevention and control measures against common protozoan and metazoan fish parasitic diseases, disease of shellfish. Physiological factors of fish diseases. Prevention and control of zoonotic diseases.
- (iii) **Fish Nutrition:** Role of nutrition in aquaculture. Dietary protein, lipid, carbohydrates, mineral and vitamins requirement for fish and crustaceans. Feed stuffs of Bangladesh: proximate composition, cost, nutrient bioavailability, palatability and formulation methods. Commercial feed types. Antinutritional factors in feed stuffs and feed, Brood stock nutrition, role of live food in nutrition.
- (iv) **Fish harvesting, handling and preservation:** Types and use of commercial modern fishing gears and crafts. Techniques of location of fishing grounds. Fish finding techniques-radio direction finder (RDF), RADAR, LORAN( long range navigation) Dhaka, Navigator system, Satellite.  
Fish detection: Acoustic equipment-echo sounder, Eco-Ranger, SONAR (sound navigation and ranging), net monitoring system. Aquaculture Harvesting system: Seine netting, falling gears, traps fishing, FAD (Fish aggregating devices).  
Commercial handling of fish and shellfishes: Principles, methods, types, storage and distribution.  
Fish chilling and freezing: Principles, methods, types, storage and distribution.  
Packaging of fresh fish: Materials for wholesale, traditional retail and airfreight packing.
- (v) **Fish processing:** Fish curing: drying and dehydration, salting fermentation, smoking; Principles, raw materials steps, types and examination of processed product.  
Fish canning: Principles, preparation of raw materials, methods, types of can materials, examination of processed product storage.  
HACCP: Principles application in fish processing industry.  
Planning and design of cold storage and fish processing plant.
- (vi) **Fishery Products and By-products:** Fishery products and by-products of Bangladesh Scientific and technological development in fishery products.  
  
Various minced and surimi based fish and shrimp products, fishcakes, fish pickles and fish soup powder.  
  
Fishery by-products: Fish meal, fish Protein Concentration (FPC), fish Oil, shark fin rays, icing glass, fish maws, pearl, essence gelatin, fish glue, fish silage and pharmaceutical products.

**MARINE SCIENCE**  
(POST RELATED)  
Subject Code: 861  
Total Marks-200

Part-I  
Mark-100

Marine Ecology:

- a. Major ecological division of marine environment and its related flora and fauna;
- b. floral and faunal study of sandy, muddy and rocky shore (St. Martin's Island, Kutubdia Island, Moheshkhali Island, Sonadia Island);
- c. Energy flow in the marine environment
- d. Biogeochemical cycle in the coastal and marine ecosystem.

2. Mangrove Ecosystem:

- (i) Occurrence and distribution of mangrove;
- (ii) Habitat;
- (iii) Ecological role;
- (iv) Economic role;
- (v) Flora and fauna of mangrove forest;
- (vi) Afforestation and deforestation;
- (vii) Problem in the mangrove forest (top dying disease, sedimentation).

3. Seaweed:

- i. Occurrence and distribution;
- ii. Habitat;
- iii. Ecological role;
- iv. Biology of seaweed;
- v. Economic role;

4. Estuarine and Coastal Process:

- i. Definition and general characteristics;
- ii. Types of estuaries;
- iii. Human activities and their implications;
- iv. Port and harbor activities;
- v. Dredging and waste disposal;
- vi. Fishing;
- vii. Study of the estuaries of Bangladesh (Karnafully river estuary, Pashur river estuary, Meghna estuary).

5. Oceanography:

- a. Global distribution of land and water;
- b. Physical-chemical properties of sea water;
- c. Tide, wave & current of the Bay of Bengal;
- d. Different elements in sea water (major, minor, trace and radioactive);
- e. Dissolved gases & nutrient distribution in sea water;
- f. Marine natural products chemistry;
- g. Importance of Plankton (Phytoplankton, Zooplankton);
- h. Hydrocarbon resources of the Bay of Bengal & its commercial uses.

**6. Navigation and Communication:**

- a. Navigation equipments:
  - I. Magnetic
  - II. Gyro compass
  - III. Sextant
  - IV. Radar
  
- b. Means of communication :
  - I. Signaling in morse code by light
  - II. Sound signal
  - III. International code of signals by code flags
  - IV. Semaphore
  - V. Wireless communication
  
- c. Ship hygiene and safety precaution
  - I. Ship hygiene
  - II. Fire fighting and life saving appliances

**7. Environmental Pollution:**

- a. Types of marine pollution;
- b. Oil pollution and its impact on marine environment ;
- c. Green house gases and effect;
- d. Eutrophication;
- e. International convention for the protection of marine environment; (MARPOL/SOLAS) & biodiversity (CBD);
- f. Impacts of development activities: Farakka barrage & Flood protection; embankment, destruction of mangrove forest due to coastal aquaculture, human interferences in St. Martin coral island.

## MARINE SCIENCE

Part-II

Marks-100

**1. Fish biology :**

- a. Biology of commercially important fin and shell fishes of marine and coastal water of the Bay of the Bengal (Physiology, Feeding , Breeding, Life cycle, Migration, Seasonal Occurrence, Abundance, Distribution, Biodiversity)
- b. Stock assessment methods and population dynamics of fin and shellfish of the Bay of Bengal.
- c. Crafts and gears used in the Bay of Bengal.

**2. a. Marine Invertebrates & Chordates:**

1. Classification and salient features of marine invertebrates of the Bay of Bengal.
2. Classification and geographical distribution of marine chordates with special reference of fishes of the Bay of Bengal.

**b. Integrated Coastal Zone Management (ICZM):**

1. Definition and objectives of ICZM, multiple uses & issues of coastal zone anagement, tools for coastal zone management plan.

**3. Hatchery operation and management:**

- a. Breeding criteria of marine species under controlled condition;
- b. Hatchery facilities and equipments;
- c. Hatchery design;
- d. Water quality management;
- e. Brood stock transportation;
- f. Hatchery techniques;
- g. Phytoplankton culture( Skeletonema costatum, Tetraselmis, Chlorella);
- h. Rotifer culture;
- i. Artemia production;
- j. Fry transportation and marketing.

**4. Culture of marine species:**

- a. Fish culture (Tilapia, Pangus, Mullet, Seabass);
- b. Shrimp (Peneaus monodon) farming;
- c. Prawn (Macrobrachium rosenbergii) farming;
- d. Pond and cage culture of crab;
- e. Mollusk culture;
- f. Seaweed Caulerpa racemosa, Hypnea spp.) farming;
- g. Fish and shrimp nutrition;
- h. Disease of cultured species (fish and shrimp);
- i. Feed preparation;

**5. Processing and microbiology:**

- a. Processing and preservation of marine species (fish,shrimp, crab);
- b. spoilage of fish shrimp and control methods;
- c. Detection and isolation of pathogenic organisms.

**6. Marking of cultured species:**

- a. Local and international market;
- b. Value chain;
- c. Future possibility.

**7. Sustainable Aquaculture in Bangladesh:**

- a. Introduction to sustainability;
- b. Environmental interactions :
  - i. Impacts of the environment on aquaculture
  - ii. Impacts of aquaculture on the enviornment
- c. Nutrient load of aquaculture
- d. Government policy on shrimp culture
- e. Organic aquaculture :
  - i. Definition
  - ii. Importance of organic aquaculture
  - iii. Practice of organic aquaculture in Bangladesh

**FORESTRY**  
(POST RELATED)  
Subject Code: 871  
Total Marks-200

Part-I  
Marks-100

1. Scope and importance of Forestry in Bangladesh. Principal forest types and silvicultural and Management Systems followed in Bangladesh.
2. Silviculture of Teak, Sal, Garjan, Dhakijam, Gamar, Chapalish, Champa, Sundari, Keora, Bain, Gewa, Golpata and Bamboos.
3. Regeneration, Tree reproduction, Clonal propagation, Seed technology, Nursery practices, Planting, Tending and cultural operations practiced in forest plantation in Bangladesh.
4. Importance and practices of Agro forestry, Social forestry and Forest Extension in Bangladesh.
5. Mangrove Silviculture and coastal afforestation in Bangladesh.

**FORESTRY**  
Part-II  
Marks-100

1. Forest Policy of 1979 and Forest (Amendment) Act 1927 of Bangladesh.
2. Influence of Forest on environment and of environment on Forests.
3. Diameter height and basal area measurement and volume estimation of trees. Formulae for measuring logs. Aerial photography, volume estimation of trees with the help of aerial photographs.
4. Outdoor recreation, wildlife management, national, Zoological and botanical parks management in Bangladesh.
5. Methods of felling, logging transportation in use in Bangladesh.
6. Objective, importance and common methods of wood seasoning and preservation.
7. Manufacturing process of paper and fiber boards.
8. Distribution and uses of Bamboo, Cane, Golpata, Sungrass and Khoir.
9. Major diseases and pests in forest nurseries and of important trees and of their control.

**CIVIL ENGINEERING**

(POST RELATED)

Subject Code: 881

Total Marks-200

Part-I

Marks-100

**Structure-40**

- Analysis of statically determinate and indeterminate structures by various methods.
- Space truss analysis. Deflection of beams, frames and trusses using different methods.
- Influence lines for statically determinate beams, truss, and frames.
- Analysis of bridge truss, and frames.

**Water Resources Engineering-30**

Importance of irrigations: sources and quality of irrigation water, soil-water relationship; consumptive use and estimation of irrigation water requirements; methods of irrigation; field-irrigation structures; irrigation canal system; irrigation pumps and wells; problems of irrigated lands; land drainage; flood and its mitigation; methods of river training and bank protection.

**Environmental Engineering-30****Water Supply:**

Planning and design consideration of water treatment plant, various methods (Sedimentation, coagulation, filtration, disinfection, chemical precipitation) of water treatment, distribution system, environment impact assessment (EIA). Design of water supply system.

**Sewage:**

Physical, chemical and biological treatment of sewage, planning and design of sewage treatment, industrial wastes and their treatment, solid waste management, microbiology of waste water, introduction to aerobic and anaerobic treatment of waste water, self-purification of stream BOD removal kinetics. Design of domestic and storm sewers.

**CIVIL ENGINEERING****Part-II****Marks-100****Structure-40****R.C.C. Part:**

Introduction of high rise building structure, structural forms of tall building, analysis of multistoried building frames subjected to wind and earthquake forces.

Working stress and ultimate strength analysis and design of reinforced concrete beams, columns, footing, two ways slab, flat slab, and flat plate structure.

**Pre-stressed Part:**

Pre stressed concrete materials and their properties; pre-stressing system; losses of pre-stress, shape, selection and tendon profile; analysis & design of section for flexure, shear, bond, and bearing.

**Transportation Engineering-30****Highway:**

Design, construction and maintenance of rigid and flexible pavements. Characteristics, sub-grade, sub-base, base and asphaltic surface courses, soil stabilization, brick and block pavements, cement concrete pavements. Highway maintenance, highway drainage, airways and air-ports, waterways and terminals.

Transportation engineering, modes of transport planning of transportation system.

Highway planning, geometric design, vehicle operating characteristics, traffic survey, traffic flow and control traffic management and administration, highway materials.

**Railway:**

Railway alignment, gradient and curves, permanent way track construction and maintenance, points and crossings, signaling and interlocking.

**Foundation Engineering-30**

Engineering properties of soils, shear strength, permeability, consolidation, settlement and compaction. Analysis and design of spread footings pile foundations, mat foundation, settlement analysis, large excavation underpinning etc.

**ELECTRICAL ENGINEERING**

(POST RELATED)

Subject Code: 891

Total Marks-200

Part-I

Marks-100

## 1. Electrical Circuits:

Circuit variables and elements: Voltage, current, power, energy, independent and dependent sources, resistance. Basic laws: Ohm's law, Kirchoff's current and voltage laws. Simple resistive circuits: Series and parallel circuits, voltage and current division, wye-delta transformation. Techniques of circuit analysis: Nodal and mesh analysis including supernode and supermesh. Network theorems: Source transformation, Thevenin's Norton's and superposition theorems with application in circuits having independent and dependent sources, maximum power transfer condition and reciprocity theorem. Energy storage elements: Inductors and capacitors, series parallel combination of inductors and capacitors. Responses of RL and RC circuits: Natural and step responses.

Sinusoidal functions: Instantaneous current, voltage, power, effective current and voltage, average power, phasors and complex quantities, impedance, real and reactive power, power factor. Analysis of single phase ac circuits: Series and parallel RL, RL and RLC circuits, nodal and mesh analysis, application of network theorems in ac circuits, circuits with non-sinusoidal excitations, transients in ac circuits, passive filters. Resonance in ac circuits: Series and parallel resonance, Magnetically coupled circuits. Analysis of three phase circuits: Three phase supply, balanced and unbalanced circuits, power calculation.

## 2. Electrical Machines:

Transformer: Ideal transformer-transformation ratio, no-load and load vector diagrams: actual transformer-equivalent circuit, regulation, short circuit and open circuit tests. Three phase induction motor: Rotating magnetic field, equivalent circuit, vector diagram, torque-speed characteristics, effect of changing rotor power, no-load test, blocked rotor test, starting and braking and speed control. Single phase induction motor: Theory of operation, equivalent circuit and starting.

Synchronous Generator: Excitation systems, equivalent circuit, vector diagrams at different loads, factors affecting voltage regulation, synchronous impedance, synchronous impedance method of predicting voltage regulation and its limitation. Parallel operation: Necessary conditions, synchronizing, circulating current and vector diagram. Synchronous motor: Operation, effect of loading under different excitation condition, effect of changing excitation, V-curves and starting. DC generator: Types, no-load-voltage characteristic, effect of speed on no-load and load characteristics and voltage regulation. DC motor: Torque, counter emf, speed to-torque characteristics, starting and speed regulation. Introduction to wind turbine generators Construction and basic characteristics of solar cells.

## 3. Electronics:

P-N junction as a circuit element: Intrinsic and extrinsic semiconductors, operational principle of p-n junction diode. Diode circuits: Half wave and full wave rectifiers, rectifiers with filter capacitor, characteristics of a zener diode, zener shunt regulator, clamping and clipping circuits. Bipolar junction transistor(BJT) as a circuit element: Bipolar junction transistor, current components, BJT characteristics and regions of operation, BJT as an amplifier, biasing the BJT for discrete circuits, small signal equivalent circuit modes, BJT as a switch, Single stage mid-band frequency BJT amplifier circuits. Metal-oxide-semiconductor field-effect-transistor (MOSFET) as circuit element: Structure and physical operation of an enhancement MOSFET, threshold voltage, current-voltage characteristics of an enhancement MOSFET, biasing discrete and integrated MOS amplifier circuits, single-stage MOS amplifiers, MOSFET as a switch, CMOS inverter.

Single-stage and cascode amplifiers, frequency response of differential amplifiers. Operational amplifiers (Op-Amp): Non-inverting and inverting amplifiers, inverting integrators, differentiator, weighted summer and other applications of Op-Amp circuits. Negative feedback: properties, basic topologies, feedback amplifiers with different topologies, stability, frequency compensation.

Basic logic functions, Boolean algebra, combinational logic design, minimization of combinational logic. Sequential circuits: different types of latches, flip-flops and their design using ASM approach, timing analysis and power optimization of sequential circuits. Modular sequential logic circuit design: Shift registers, counters and their applications.

BJT, MOSFET, SCR, IGBT, BTO, TRIAC, UJT and DIAC. Rectifiers: Uncontrolled and controlled single phase and three phase. Regulated power supplies: Linear-series and shunt, switching buck, buck boost, boost and Cuk regulators. AC voltage controllers: single and three phase, Choppers. CD motor control, single phase cycloconverter. Inverters: Single phase and three phase voltage and current source, AC motor control. Stepper motor control, Resonance inverters, Pulse width modulation control of static converters.

## ELECTRICAL ENGINEERING

Part-II

Marks-100

1. **Power Systems:**

Network representation: Single line and reactance diagram of power system and per unit. Line representation: Equivalent circuit of short, medium and long lines. Load flow: Gauss-Siedel and Newton Raphson Methods. Power flow control: Tap changing transformer, phase shifting, booster and regulation transformer and shunt capacitor. Fault analysis: Short circuit current and reactance of a synchronous machine. Symmetrical fault calculation methods: Symmetrical components, sequence networks and unsymmetrical fault calculation. Protection: Introduction to relays, differential protection and distance protection Introduction to circuit breakers, Typical layout of a substation. Load curves: Demand factor, diversity factor, load duration curves, energy load curve, load factor, capacity factor and plant factor.

Transmission lines cables: Overhead and underground. Stability: swing equation, power angle equation, equal area criterion, multi-machine system, step by step solution of swing equation. Factors affecting stability, Reactive power compensation. Flexible ac transmission system (FACTS). High voltage de transmission system. Power quality: harmonics, sag and swell.

Power plants: General layout and principles, steam turbine, gas turbine, gas turbine, combined cycle gas turbine, hydro and nuclear. Power plant instrumentation. Selection of location: Technical, economical and environmental factors. Load forecasting. Generation scheduling: Deterministic and probabilistic. Electricity tariff: formulation and types.

2. **Telecommunication Systems:**

Communication systems: Basic principles, fundamental elements, system limitations, message source, bandwidth requirements, transmission media types, bandwidth and transmission capacity. Noise: Source, characteristics of various types of noise and signal to noise ratio. Information theory: Measure of information, source encoding, error free communication over a noisy channel, channel capacity of a continuous system and channel capacity of a discrete memory less system. Communication Systems: Analog and digital. continuous wave modulation: Transmission types, base-band transmission, carrier transmission; Amplitude modulation: Introduction, double side band, single side band, vestigial side band, quadrature; spectral analysis of each type, envelope and synchronous detection; Angle modulation-instantaneous frequency, frequency modulation (FM) and phase modulation (PM), spectral analysis, demodulation of FM and PM. Pulse modulation: Sampling-sampling theorem, Nyquist criterion, aliasing, instantaneous and natural sampling; pulse amplitude modulation-principle, bandwidth requirements; Pulse code modulation (PCM) : quantization principle , quantization noise, non-uniform quantization, signal to quantization error ratio, differential PCM, demodulation of PCM; Delta modulation (DM) : Principle, adaptive DM; line coding-formats and bandwidths. Digital modulation: Amplitude-shift keying-principle, ON-OFF keying, bandwidth requirements, detection, noise performance; Phase-shift keying (PSK): Principle, bandwidth requirements, detection, differential PSK, quadrature PSK. noise performance; Frequency-shift keying (FSK) : Principle, continuous and discontinuous phase FSK, minimum shift keying, bandwidth requirements , detection of FSK.

Multiplexing time: Division multiplexing (TDM) principle, receiver synchronization, frame synchronization, TDM of multiple bit rate systems; frequency-division multiplexing: Principle, de-multiplexing; wavelength-division multiplexing, multiple access network-time-division multiple-access, frequency-division multiple access; code-division multiple-access (CDMA): Spread spectrum multiplexing, coding techniques and constraints of CDMA. Communication system design: design parameters, channel selection criteria and performance simulation.

Mobile Cellular Telephone: Concept, evolution and fundamentals. Analog and digital cellular systems. Cellular Radio System; Frequency reuse, co-channel interference, cell splitting and components. Mobile radio propagation: Propagation characteristics, models for radio propagation antenna at cell site and mobile antenna, Frequency management and Channel Assignment; Fundamentals spectrum utilization, fundamentals of channel assignment, fixed channel assignment, non-fixed channel assignment, traffic and channel assignment. Handoffs and Dropped calls: Reasons and types, forced-handoffs, mobile assisted handoffs and dropped call rate. Diversity Techniques: Concept of diversity branch and signal paths, carrier to noise and carrier to interference ration performance. Digital cellular systems: Global system for mobile, time division multiple access and code division multiple access.

**MECHANICAL ENGINEERING**

(POST RELATED)

Subject Code: 901

Total Marks-200

Part-I

Marks-100

Properties of gases and various, Law of thermodynamics and their corollaries, Ideal gases and their cycles. Study of steam generators, their accessories and mountings, Steady state conduction of one dimensional heat in different geometrics and composite structures. Transient heat conduction in solids with negligible internal resistance and surface resistance. Laws of radiation heat transfer, Net radiation interchange between two infinite parallel plates. Concept of refrigeration and its application.

Continuity, momentum and energy equation and their applications. Pressure, velocity and flow measurement devices. Basic conception about pumps and turbines.

Stress analysis: Axially loaded member, thermal and centrifugal stresses, stresses in thin and thick walled cylinder and spheres. Shear force and bending moment diagram of beams. Combined stress. Types of fits, Design for static and fatigue strength, Design of screws, fasteners and connections and columns.

**MECHANICAL ENGINEERING**

Part-II

Marks-100

Power transmission by belts, clutches & brake, gear and gear trains, static and dynamic balancing. Static and dynamic balancing. Undamped free vibration with one and two degrees of freedom. Velocity and acceleration of mechanisms. Damped free and forced vibration with single degree of freedom.

Basic engine types, their operation and testing. Combustion in SI engines, CI engines and gas turbine. Compression process. Source of energy, production of power, steam power plants. The variable load problem of power plant.

Mechanism of Convective heat transfer, free convection from exterior surfaces of common geometrics. Concept of air condition and its uses. Cooling load calculation.

Principle of measurements. Different types sensing elements, measurements of displacement, pressure, temperature, heat flux flow, force torque, and strain

Sampling theory estimation hypothesis testing. Control charts, X, P and C charts. Regression analysis, analysis of variance. Concept of quality circle.

Basic of casting, welding, metal removing processes such as turning, drilling, shaping and milling; Tool geometry.

Various type of organization and management information systems, concepts and scope of application. Ogranization structure, Personal management. Technology management.

**CHEMICAL ENGINEERING**

(POST RELATED)

Subject Code: 911

Total Marks-200

Part-I

Marks-100

- I. Chemical Engineering and its application, Principles of chemical engineering Calculations; flow of fluids in closed conduits and measurement of different parameters, calculation power requirement for transport of different fluids; different modes of heat transfer and design of heat exchangers. Design of equipment for mass Transfer operator.
- II. Principle of the design of chemical process equipments such as distillation, absorption and extraction towers, chemical reactors, procedures for control system design of chemical plants and equipments.
- III. Principle of corrosion and material protection, selection of construction materials for industries.

**CHEMICAL ENGINEERING**

Part-II

Marks-100

- I. Economics and management of chemical processes, cost estimation for process plants, profitability analysts, project management, safety and environmental analysis. Economic analysis projects, CPM and IRR.
- II. Energy situation and sources in Bangladesh. Design of energy efficient process, energy crisis and its effect on Bangladesh economy.
- III. Fertilizer, paper and other chemical industries in Bangladesh, Design operation and future of industries.
- IV. Sources of natural gas in Bangladesh and its production, selection of processing and equipments.
- V. Water and air pollution: source and source control, municipal water treatment and waste water treatment.
- VI. Environment issues of Bangladesh.

**METALLURGICAL ENGINEERING**

(POST RELATED)

Subject Code: 921

Total Marks-200

## Part-I

Marks-100

1. Classification of Engineering Materials and their main Characteristics:  
Metals, ceramics, glasses, polymers, composites and electronic materials. Atomic bonding, crystal structure and x-ray diffraction.
2. Properties of Materials:  
Strength, ductility, hardness, toughness, creep and fatigue, etc. Corrosion and degradation characteristics.
3. Phase diagrams:  
Common binary equilibrium diagrams, isothermal reactions, Iron-iron carbide thermal equilibrium diagram.
4. Heat Treatment:  
Annealing, normalizing, quenching, I-T and CCT diagrams, tempering austempering martempering.
5. Surface hardening:  
Carburizing, nitriding, carbonitriding, flame hardening and induction hardening.

**METALLURGICAL ENGINEERING**

Part-II

Marks-100

1. Fabrication of Materials:  
Industrial fabrication techniques for metals, ceramics, glasses and polymers,
2. Non-metallic Materials:  
Conventional and engineering ceramics, thermoplastic and thermosetting plastics.
3. Steel making:  
Raw materials, basic oxygen and electric steel making processes.
4. Engineering Alloys:
  - (a) Ferrous alloys: Plain carbon steel, common alloy-steels, stainless steels, tool steels, HSLA steels, etc. Cast irons including malleable and ductile cast iron.
  - (b) Non-ferrous alloys: Copper base-, aluminum base- and nickel base alloys, bearing metals etc.

**ARCHITECTURE**  
(POST RELATED)  
Subject Code: 931  
Total Marks-200

Part-I  
Marks-100

1. **Art & Architecture:**  
A general survey of Art and Architecture. Art and Architecture of the sub-continent from ancient to modern times. Modern Architecture.
2. **Planning & Urban Design:**  
Basic Planning theories, Development of urban space through history: Principles and technique for urban design. Urban renewal, Urbanism in Bangladesh.
3. **Housing:**  
Housing and community: their influence of individuals, developer built and public housing, Housing finance, low cost housing, Housing problems in Bangladesh. User's response in high-rise apartments and its comfort and convenience conditions. Housing infrastructure, Rural housing.
4. **Building & finish Materials:**  
Preparation, manufacture, Properties, Use and application of brick, Cement, Concrete, Timber, Steel, Glass, Tile, Stone, Terrazzo and Paint.

**ARCHITECTURE**  
Part-II  
Marks-100

1. **Building type and functional facilities:**  
Objectives, principles and technique for the design of commercial building, Industrial building, Recreational buildings, Institutional buildings, educational building, Health care and Hospitals, Sports centers and terminal buildings and airports.
2. **Structure & Form:**  
Modular system of design, Construction methods, Space frame, Membrane structure, Folded Plates, Shell, High-rise Structure, Geodesic Dom and Cable Structure.
3. **Environmental studies:**  
Elements of climate, microand macroclimate. Climate conscious design, green architecture, day lighting, method of passive cooling in building, Ventilation and air movement in building, Building Acoustics.
4. **Landscape Design:**  
Elements of space organization, ecosystem, site development and environment design, Site analysis, Site Planning, Plants and planding design, history of garden design, Public Parks and Plaza, conservation, landscape as climate modifier.
5. **Professional Practice:**  
Building construction rules, Bangladesh National Building Code (BNBC), Professionals ethics, Conditions of engagement and types of contacts.

**NAVAL ARCHITECTURE AND MARINE ENGINEERING**  
(POST RELATED)  
Subject Code: 941  
Total Marks-200

Part-I  
Marks-100

Calculation of areas, volumes, weights and displacement related to ships. Centre of gravity, Centre of buoyancy, Moments, Conditions of equilibrium, Transverse metacentre, Moment of inertia, Transverse BM, Met centric height, Inclining experiment. Effects of loading, unloading and flooding on trim, Launching calculations, Statical stability, Dynamical stability.

The Trochoidal wave theory, Load curves, Shearing force and bending moment curves, Smith correction, Approximations for maximum bending moments and shearing forces, Modulus and stress calculations, Stresses in the inclined condition of a ship. Resistance of ship structures to bucking.

Natural vibration, Forced vibrations, Damping, Natural vibrations with viscous damping. Forced vibrations with viscous damping, Transverse vibration of beams, Schlick's formula, Todd's formula and Burrill's formula for the natural frequency of vibration of ship, Lockwood Taylor's formula for the frequencies of torsional vibration of a ship. Hydrodynamic inertia coefficients and added virtual weight, Elastic mountings for marine engines.

**NAVAL ARCHITECTURE AND MARINE ENGINEERING**

Part-II  
Marks-100

The frictional resistance, wave-making resistance, eddy-making resistance, air resistance and appendage resistance of a ship, Prediction of the total resistance of a ship by testing a model in a towing tank, Froude's Law of Comparison.

Propeller types, Design of screw propellers, The momentum theory and the blade-element theory of screw propellers, Slip, Wake fraction, Thrust deduction fraction, Quasi propulsive coefficient, Cavitations.

Sinusoidal water waves, Velocity, length and period of waves, Addition of wave trains, Standing wave, Pressure in a wave, Energy in a wave, Group velocity, A ship in waves, Head sea, Following sea, Beam sea, Frequency of encounter, Uncoupled heaving, pitching and rolling motions of a ship, Motion stabilization.

**TEXTILE TECHNOLOGY**

(POST RELATED)

Subject Code: 951

Total Marks-200

Part-I

Marks-100

1. Definition of textile fibres, classification of fibres with examples.
2. Study of cellulosic fibres:  
Cotton-cultivation and harvesting, growth, composition, physical and chemical structure and properties, geographical distribution, ginning, grading and classification. End uses.  
Bast fibres-Cultivation and harvesting of different types of bast fibres with special reference to jute, growth, composition, physical and chemical structure and properties. Retting, study of fibre ultimates, sorting, grading and classification.
3. Study of protein fibres:  
Wool-Growth, composition, physical and chemical structure and properties. Geographical distribution of main wool producing countries. Silk- Growth, composition, physical and chemical structure and properties. Sericulture and methods of production. Geographical distribution. End uses
4. Textile raw Materials:  
Definition and classification of chemical fibres. Principles of different spinning systems. Different fibre structures and their effects on fibre properties.  
  
Present trends of chemical fibres production and their economic and social aspects.
5. Textile Technology:  
Characteristics of fibre considered by a spinner. Flow-Chart for the production of carded and combed yarns. Importance of mixing and blending.  
  
Blow Room-Principles of opening and Cleaning, Study of blow room machines for blending, opening, cleaning and control of regularity of mass per unit length. Extraction and control of waste, settings for waste, Blow room fibres for different purposes, sue of suitable sequences.  
  
Carding-Principles and objects of carding; detailed study of the revolving flat card; types and care of wire, stripping and grinding, doffing mechanism. Extraction and control of waste and dust. Can coiling. Speeds, productions, settings, cleaning efficiency, control of nep and fibre damage, variation in sliver mass per unit length.
6. Fabric Manufacturing Technology:  
Chronological development of looms. Loom drive and brakes. Different types of sheds. Features of automatic looms. Weft replenishment, methods of weft patterning, warp protector motion, Side & centre weft fork motion, Warp stop motions. Jacquard Weaving: Classification of Jacquards. L.L.S.C., D.L.S.C. & D.L.D.C, open shed, centre shed fine pitch and cross border jacquard shedding. Systems of harness mounting. Methods of increasing the figuring capacity of Jacquard costing out. Card cutting and lacing. Jacquard calculations.
7. Yarn Manufacturing Technology:  
Detailed study of projectile, Rapier, Jet and multiphase weaving machines.
8. Fabric Manufacturing Technology:  
Weaving Preparation, winding, warping, sizing, weaving mechanism. Knitting.

## TEXTILE TECHNOLOGY

Part-II

Marks-100

**1. Applied Chemistry:**

Water and its importance in wet processing (hydrogen bonding, cluster formation, Heat of evaporation, dissolving ability), general concepts of soaps, classification of detergents, Detergency (Mono molecular layer, micelle formation, Surface and interface tension, wetting and dispersing).

## a. Pretreatment and Bleaching:

Flow-chart of wet processing, chemistry of various impurities in fibres and their removals; singeing, desizing scouring of cotton, Jute, wool and silk fibres. Methods of bleaching of cotton, Jute, wool and silk fibres.

## c. Technology of Printing:

Flow-chart of Printing, Thickeners (types of thickeners rheology). Methods and styles of printing; machineries used for printing; printing processes for different fibres with direct, acid, basic and vat dyes.

## d. Technology of dyeing:

Structure and application of sulphur, azoic, reactive and Disperse dyestuffs on different fibres; stripping. (Assistants used in printing operations and their functions; Structure of pigments, Pigment printing.)

## e. Technology of finishing:

Definition and classification of finishing. Physical and Mechanical Finishing of Cotton. Jute, wool and Silk fabrics. Shearing and Cropping different types of calendering, measuring and cutting, making up of different jute goods. Hoop-length and dead weight measurement calculations, raising, beetling, breaking, folding sanforising; chemical finishing; mercerisation and parchmentsation, resin finishing, water repellency, flame retardancy.

**2. Applied Chemistry:**

Water treatment (Estimation and Removal of Hardness). Different types of surface active agents (Synthesis, Effects, Degradability); Chemistry, properties and uses of various acids, alkalies salts, oxidizing agents and reducing Agents in Textile Wet Processing.

## a. Dyeing:

Dye Aggregation; interaction of dyes and fibres. Mechanism of dyeing, dyeing kinetics, (Diffusion, Pre Model, Free volume model). Thermodynamics of dyeing (Dyeing Isotherms, Affinity/standard Chemical Potential difference).

## b. Printing:

Special types of thickeners (Synthetic Polymers, Emulsion thickeners); Methods of screen and roller preparation; detailed study on screen printing technology.

## c. Finishing:

Softening agents-different types, applications. Special finishing treatments (rot-proofing, mildew proofing, insect and bactericidal finishes, soil lease finishes).

**3. Garment Technology:**

Historical development of Garments Industry in Bangladesh and other countries of the world. Garments terms and definitions.

Germs terms and definitions

Garments manufacturing sequence

General discussion on pattern making

Sample garments making

Sample garments making

Components of shirt, trouser & their types, Standard body measurement for Gents, Standard body measurement for ladies, Principle of pattern making for shirt & trouser, Pattern grading.

- a. Sewing: Seam properties, types & usages; Stitch types, properties & usages; Principle of lock stitch & chain stitch formation; Sewing machine feed mechanism. needles Sewing thread, sewing problem and remedies, sewing machines, Work aids in sewing, simple automatic machines.  
Alternative methods of joining fabrics – Welding, adhesives, Fusing, Moulding and their comparison.
- b. Trimmings : Discussion on label and motifs, Chain, Buttons, lining, Hook & loop fastening, shoulder pad, lace braid & elastic, performance of trimmings.
- c. Pressing and Finishing: Objects, types, methods, & International care labelling codes.
- d. Folding & Packing: Types, methods, equipments, symbol and marking.

#### 4. Textile:

Introduction to Textile Testing, Importance of Textile Testing, Sampling methods for fibre.

- a. Yarn Testing- Sampling methods, Zoning, stratified samples, Measurement of tensile strength of yarn; single thread, skein or lea strength and ballistic test; comparison of results, CRT, CRE and CRL machines and methods of loading.  
Silver, roving and yarn irregularity; measurement by cutting and weighing methods, thickness under compression, capacitance and other methods, length variance curves. Use of spectrogram for analysis of periodic, random and drafting wave variation, Measurement of imperfections. Comparison of results with Uster statistics.

- b. Measurement of yarn hairiness.

Fabric Testing: Fabric dimensions, measurement of length, width, thickness; ends and picks per unit length in woven fabric; courses and wales per unit length in knitted fabric. Crimp of yarn in woven and knitted fabric.

Methods of measurement for tensile, tearing, ballistic and bursting tests. Relationship of fibre, yarn and fabric strength.

Measurement of fabric stiffness and its relation to handle and drape.

Measurement of air, water permeability/retention, water pressure; crease recovery. Serviceability, wear and abrasion tests, pilling of fabrics. Flame retardant/flame resistance tests.

Measurement of fastness to light, washing and rubbing. Estimation of damage to materials caused by physical & chemical treatments. viz. Singeing scouring, bleaching, Determination of size and filling.

Carpet testing: carpet thickness, compression and durability, Identification of fibres.

**LEATHER TECHNOLOGY**

(POST RELATED)

Subject Code: 961

Total Marks-200

Part-I

Marks-100

**Hides and Skins:**

Histological structure and Chemical Composition, Marketing channel of hides and skins and constraints at different stages. Supply Position in Bangladesh, Curing of Hides and Skins, evaluation of different methods of curing, antemortem, post mortem and industrial defects of Hides and Skins.

**Wet processing:**

Soaking, liming, delimiting, bating, degreasing, tanning, neutralization, re-tanning, dyeing, fat-liquoring.

**Chrome Tanning:**

Historical development, theories of Chrome tanning, Factors affecting Chrome tanning, chrome tanning and its impact on environment, recycling, reduce and reuse of chrome liquors, defects of chrome tanning, and their remedies, control in chrome tanning.

**Other tanning Operation:**

Aluminum and titanium tanning, Vegetable tanning, Synthetic Tanning, Aldehyde Tanning, Oil-tanning, Resin and Polymeric tanning,

**Neutralization:**

Neutralizing agents, degree of neutralization and their impact on dyeing, fat-liquoring and finish leather.

**Dyeing:**

History and development of dyes, Nomenclature and classification of dyes, structure of natural and synthetic dyes, Azo dyes: Preparation, azo coupling and diazotization, classification, stereoisomerism and tautomerism of azo dyes, reaction mechanism between azo dyes and protein fibre, banned amines in azo dyes, commercial azo dyes, and their application. Metal complex dyes-their chemistry mechanism, toxicity and application. Reactive dye-their chemistry and application, selection of leather dyes, leather dyes in colour index.

**Fat liquoring:**

Objective, Selection of Fat liquors and oils, influencing factors of the fat liquoring operation, Quality control during fat-liquor.

**Mechanical Operations:**

Fleshing, Samming, Setting out, Splitting, Shaving, Vacuum drying and Drumming.

**Leather Drying:**

Introduction, types of leather drying, theory of leather drying, principles of heat and mass transfer, equilibrium moisture content, rate of drying, constant drying and falling rate periods, factors affecting the drying of leather, defects of leather drying.

**Environmental Impact and Pollution Control:**

Pollution results during Pre-tanning, Tanning and Post-tanning stage, nature of effluent and solid wastes, treatment of effluent, central effluent treatment plan(CETP), chrome recovery plant. ISO 14000 and its application for leather industry.

**Health Hazards and Safety:**

Safety measurements during leather productions, chemicals handling, Banned amines and their effect of health. Pentachlorophenol (PCP), Chromium (vi), and formaldehyde hazards, social and international trade barrier due to health and safety requirements.

**LEATHER TECHNOLOGY**

Part-II

Marks-100

**Leather Finishing:**

Introduction, history of finishing, aim and purpose, Classification of Leather Finishing, requirements of Leather finishes, dimensions of the finish as a protecting layer and characteristics of the finish film, formulation of leather finishes, different layers in finish coat.

**Mechanical Operation for Finishing:**

Buffing, snuffing, de-dusting, flesh coating, staining/colour impression, ironing, glazing, plating selection.

**Theory of Leather Finishing:**

Basic concept of coating, ground coating, season coating, top coating, preparation of leather surface for finishing, coating, of leather, theory of adhesion, theory and mechanism of film formation, gloss and gloss retention, plasticization of finish film, techniques of leather coating, ironing and embossing during coating, evaluation and control of leather finishing.

**Leather finishing materials:**

Introduction, aqueous and non-aqueous finishing materials, different types of finishing materials-protein, shellac, resin binder, liquid dyestuffs, pigment, plasticizer, preservatives, wetting agents, dispersing agents, defoamers, plate release agents, penetrators, optical brighteners, polishing agents, flow improver, cross-linking agents and hardeners, leveling agents, filling agents, thickeners, matting agents, fluorescent agents, crackle lacquers, silicones, modifiers, slip and fixing agents.

**Pigment:**

Definition, objects of pigmentation, properties of pigments classification, organic and inorganic pigments, different forms of pigments powder and pastes. Evaluation and control of their brilliance, opacity, particle size, resistance to solvent heat and light and colour matching, application of colour circle for colour matching, pigment dyeing-their advantages and limitation.

**Polymeric materials and their chemistry and application:**

Chemistry and application of acrylics, polyurethane and Cellulose derivatives. Solvents and Diluents.

**Formulation of Leather finishes:**

Plain finishes, glazing finish, shellac finish, wax finish, pigment finishes, pigment finish of a simple type, side leather finish for corrected leather, finish for glazes lining leather, suede leather finishes, patent and wet look leather.

**Physical tests:**

Physical tests essential for leather, footwear and leather products manufacture, principles of different physical tests such as tensile strength, present elongation at break, bursting strength, tearing strength, flexing endurance test, vamp flexing, water vapour permeability test, air permeability of leather, dynamic water proofness test, apparent and real densities, scuffing and abrasive resistance, absorption of water, water penetration, resistance of cracking of grain and crack index, perspiration resistance of leather, leather softness, fogging tendency of leather.

**Standards for leather testing:**

International standards, national standards, testing of different leather chemicals, computer use for quality control in the leather industries, selection of tests, description of different test methods, quality requirement of upper leather, garment leathers, furniture leather, lining and book-binding leather.

**Quality control for different stages of leather:**

Sorting and selection of hides and skins, unit operation of leather processing, their objects and principles, techniques of controlling of chemical processes such as web-processing, tanning, neutralization, dyeing and finishing, control of mechanical operation.

## COMPUTER SCIENCE

(POST RELATED)

Subject Code: 971

Total Marks-200

## Part-I

Marks-100

## (a) Computer Programming:

Introduction to computer programming. Assembling language programming. Problem solving techniques, algorithm specification and development. Programming style, testing and debugging. Program design techniques: Structured and modular program design. Programming languages and paradigms: classification. Programming in C: Data type, statements, control structures, arrays, pointers, strings, functions, preprocessor directives, structures, unions and bit-fields, files. Introduction to object oriented programming: Encapsulation, inheritance and polymorphism, Mechanic Language Programming, Template functions and classes multi-threads exceptions, Class and object. Introductory programming with C++/JAVA.

## (b) Digital System:

Number system: binary, octal, hexadecimal and BCD. Data representation. Logic gates and Boolean algebra: Combinational circuits. Circuit design using logic gates. Circuit and expression minimization: Karnaugh map and Quine-McCluskey. Basic flip-flops (FF), Design of half and full adder. Basic counters and register. Basic decoders, encoders, multiplexers and demultiplexers. ADC and DAC circuits. PLA design, Pulse mode and fundamental mode logic, Pulse & switching units, Newtrivibrations , Digital LC: DTL, TTL, III, CMOS MOS gates, Memory system, LED, LCD applications of Op-Amps. Comparators.

## (c) Discrete Mathematics:

Propositional and predicate calculus: Basic concept. Theory of sets: set operations, algebra of sets. Mathematical induction. Basic concept of relations and its representation. Functions and its classification and pictorial representation. Graph theory and its application. Elementray number system. Principles of counting. Reversion, generating, functions, recurrence relation.

## (d) Numerical Analysis:

Solving linear systems with Gaussian elimination and Gauss-Jordan elimination method. Interpolation: Newton's formula, Lagrange's formula. Numerical differentiations and integrations: Trapezoidal, Simpson's 1/3<sup>rd</sup> and 3/8<sup>th</sup> rule. Romberg integration. Solutions and Newton-Ralphson's method. Solution of ordering differential equation and least square approximation of functions.

## (e) Data Structures:

Arrays: Representation and operations. Sparse and dense matrices: Concept and operation. Stacks and queues: Concept, structures and basic operations. Quick-sort and Polish notation: Applications of stack. Recursion: Concept and applications. Linked lists: Representation and various operations. Trees: Binary trees, traversing binary trees. Binary search trees: Various opeations. Binary heaps: Heap sort. Huffman's algorithm. Graphs: Representations and operations. Spanning trees, shortest path and topological sorting. Internal sorting: Insertion sort, selection sort, merge-sort, radix sort, Basic hashing techniques.

## (f) Microprocessor and Interfacing:

Microprocessor and microcomputers. Evolution of microprocessor. Architecture of a general purpose microprocessor and its operation. Addressing modes. Common instruction types: Basic assembly instruction set. Intel 8086 microprocessor: Internal architecture, register structure, programming model, addressing modes and instruction sets. Interrupts its classification and interrupt handling, Memory management in Intel 80<sub>x</sub>86 family: Real-mode memory management, segmentation and segmented to physical address translation. Protected mode memory management: Segmentation and virtual addressing, segment selectors and descriptors and tables. Intel 80386 and 80486 register formats. Paged memory operation and TLB structure I/O port organization and accessing. Interfacing the keyboard, printer and monitor. Structure and operation of certain chips as 8255A, 8253, 8272, 8259A, 8237. Bus interfaces and micro controllers.

## (g) Computer Organization and Architecture:

Fundamentals of computer design. Processor and ALU design. Control design: Hardware control and micro-programmed control. Caches Memory organization. Exceptions System organization Bus and hazards I/O subsystem and I/O processor. Parallel processing: Concept, pipeline processors. Interrupts systolic arrays and fault-tolerant computers.

## (h) Compiler and theory of computation. Introduction to compiliary. Basic issues, logical analysis, hexical analysis, syntax analyses. Semantic analysis, type cheeking, run-time environments, code generation, code optimization and language theory.

## COMPUTER SCIENCE

Part-II

Marks-100

## (a) Algorithm:

Algorithm and complexity: Asymptotic notations. Basic algorithm techniques and analysis: Divide and conquer, dynamic programming, greedy method, branch and bound, string matching, computational geometric problems, graph algorithms, spanning trees, shortest paths, max-flow problem, searching algorithms. Techniques for analysis of algorithms, approximation algorithms, parallel algorithms.

## (b) Operating System:

Introduction, evolution, goals and components of OS. Types of OS Process management: Process states PCB, job and process scheduling. CPU scheduling algorithms, critical section problems and solutions. Semaphores, Inter-process communication techniques. Deadlock handling methods. Memory management techniques: Paging, segmentation and page replacement policies. Secondary storage management: Disk scheduling algorithms. File management: File system structure, organization, FCB, space allocation, tree structured file system. Protection and security: classification and handling techniques.

## (c) Database Management System:

Definition of DBMS, types of DBMS, its advantages and disadvantages, Data model: ER model and relational model. Integrity constraints. Functional dependencies. Assertions and triggers. File organization: Definition of various file organization, classification and Representation. Indexing techniques: sparse and dense indexing. B+ tree indexing, hash indexing. Relational database design: normalization, 2NF, 3NF and BCNF. Query processing: Various notations, cost estimation of selection operation and join operation. Transaction concept and concurrency control: Lock based protocol, deadlock handling. SQL and application using SQL.

## (d) Software Engineering:

Introduction, Software process. Project management. Requirements engineering processes. System models: Context, data, behavioral and object models. Object oriented design techniques. Real-time software design. System design with reuse. Critical system design dependability, software maintenance, critical system specification and development Verification and validation. Software testing. Software cost estimation: COCOMO model Halstead formula, Graph: Cel analysis of complexity measures, software reliability and availability, Quality assurance.

## (e) Data Communication:

Introduction to OSI and TCP/IP protocol. Data transmission basics: analog and digital data, spectrum and bandwidth. Transmission impairments. Data rate channel capacity. Transmission media: Twisted pair, coaxial cable and optical fiber, wireless transmission. Data encoding: NRZ, NRZI, Manchester and differential Manchester modulation techniques-AM, FM, PM, DSSS modulation, compounding Equations, ASK, PSK, FSK, QPSK. QAM sampling theorem, PCM. PPM. PAM. Data transmission: Synchronous and asynchronous and asynchronous. NULL modem configuration. Data link control error and flow control CRC and HDLC. Multiplexing: FDM, TDM, statistical TDM. Basic circuit switching and packet switching techniques.

## (f) Computer Network and the Internet:

Protocol, fundamentals of control protocol, Introduction and network types, LAN, MAN, WAN. Topologies: Star, switched, bus, ring. Ethernet LAN standards. Internetworking: Network interconnection, bridges, routers. Network layer protocols: IP, ARP, ICMP, IP addresses. Unicast and multicast routing protocols. IPV6 congestion control, Transport layer protocol: TCP and UDP. Introduction to wireless LAN, VSAT, analog and digital cellular system. Network security: Types of attack, encryption techniques and digital signatures. ATM switches, ATM protocol; DNS, HTTP, Email.

## (g) Artificial Intelligence:

Overview of AI. General concepts of knowledge. Introduction to PROLOG. Knowledge representation. Intelligent agents. First order logic. Knowledge organization and manipulation: Search strategies, matching techniques and game planning. Natural language processing, Probabilities reasoning, expert systems and computer vision, Knowledge acquisition: Learning in symbolic and non-symbolic representation.

**STATISTICS**  
(POST RELATED)  
Subject Code: 981  
Total Marks-200

Part-I  
Marks - 100

1. Introduction to Statistics: Definition and scope, Scope of Statistics, Classification, Variables.
2. Presentation of Data: Charts or Diagrams, Types of diagrams.
3. Grouping Data: Frequency Distribution, General rules for forming frequency, Graphical presentation of frequency distribution, Relative frequency distribution.
4. Measures of Central Tendency: The Arithmetic mean, the Median, The Mode, The Geometric Mean. The Harmonic Mean, Finding Measures of Central tendency from Grouped data, Graphical determination of Measures of Central tendency, Comparative discussion on measures of central tendency.
5. Measures of Dispersion: Dispersion or variation, Measures of dispersion from grouped data, Interpretation of Standard deviation, Chebyshev rule, Normal rule, Relative dispersion: Co-efficient of Variation.
6. Skewness and Kurtosis: Skewness, Kurtosis, Skewness and kurtosis from graphical displays, Descriptive measures of skewness and kurtosis.
7. Regression and correlation: Simple regression and correlation. Least squares estimates of simple linear regression, regression coefficient and correlation coefficient. Rank correlation, correlation ratio and partial correlation. Multiple regression and multiple correlation coefficient. Coefficient of determination.
8. Demography: Crude birth and death rates, Fertility rate, Age specific and total fertility rates, Population growth in Bangladesh, Migration, Nuptiality.
9. Index Number: Definition, Properties of index numbers, Significance of index numbers, Classification of index numbers, Simple Index Number, Un weighted indices, Simple average of price index, Simple Aggregate Index, Weighted Indices, Laspeyres index, Paasche method, Fisher's Ideal Index, Weighted average of relatives.
10. Time Series Analysis: Components of a time series. Measurement of secular trend, seasonal variations, cyclical variations and measurement of irregular variations.
11. Sampling: Statistical population and sample. Advantages and disadvantages of sampling over census. Sample design. Probability and non-probability sampling. Simple random sampling, stratified random sampling and systematic sampling. Cluster sampling, sampling error and non-sampling error. Determination of sample size.

**STATISTICS**  
Part-II  
Marks - 100

1. Concept of probability: Basic Definitions, Approaches of Defining probability, Basic properties of probabilities, Notation and Graphical displays for events.
2. Rules of Probability: Special Addition rule, The complementation Rule, General Addition rule, Bivariate data and Contingency table. Joint and marginal probabilities, Multiplication rules, Conditional probabilities, Concept of Bayes' Theorem.
3. Random Variables and probability Distributions : Random variable, Discrete Probability Distribution, Binomial Probability, Hypergeometric distribution, Poisson distribution, Normal distribution.
4. Sampling Distribution: Sampling distribution of the sample mean for a normally distributed variable, The Central Limit Theorem (CLT), Sampling Distribution of the Sample Mean, Sampling distribution of the sample proportion, Sampling distribution of function of mean and proportion. Confidence interval, Confidence interval of Population mean. Determination of Sample size, Sampling for estimating mean, Sampling for estimating proportion.
5. Basic Concepts of Hypothesis Testing : Null and Alternative hypothesis, simple and composite hypotheses, Test statistic, acceptance and rejection regions, type I and type II errors, the significance level, one tailed and two tailed tests, general procedure for test of hypothesis. Tests based on normal, student's t, F, and  $X^2$  distribution. The Z- test for two population means. The pooled t-test for two population means. The paired t-test for two population means.
6. Analysis of Variance : Concept of analysis of variance, treatment, response, extraneous variables, One-Way Anova Model, Estimate of The Model Parameters, Hypothesis Testing In Anova. Two-Way Anova, significance of Correlation and rank correlation coefficients. Multiple comparison test. Two-way analysis of variance with and without interaction.
7. Experimental Designs: Basic principles of Experimental Design. Randomization, Replication and Local control. The completely Randomized Design (CRD), Randomized Complete Block Design (RCBD) and Latin square Design.

**URBAN DEVELOPMENT**

(POST RELATED)

Subject Code: 991

Total Marks-200

Part-I

Marks-100

1. **Urbanization:**  
Concepts of urbanization and urban growth. The nature of urbanization in Bangladesh and comparison with urbanization in the western world. The growth and development of towns and cities in Bangladesh. Effects of urbanization on economic and social development of a country.
2. **Urban function:**  
Causes of origin and evolution of towns and cities. The important functions for which the towns and cities, exist. The reasons in the variation of sizes of urban areas. The rural-urban relationship. The sphere of influence of urban areas. The meaning of land use. The major of land use components of urban areas; CBD, neighborhood unit, recreational space.
3. **Urban Development:**  
Meaning of Development in urban planning. Necessity of development control in urban areas. Methods of development control: Enabling legislation; Police power; Zoning; building control regulation; Town Improvement Act. Paurashava ordinance. Urban planning institution.
4. **Urban Transportation and Housing:**  
Different pattern of urban road network system and their advantages and disadvantages. Hierarchy of urban roads and the functions of different hierarchies. Cross-sectional elements of roadways. National Housing Policy of Bangladesh and its objectives, strategies and salient features.

**URBAN DEVELOPMENT**

Part-II

Marks-100

1. **Urban Form and Structure:**  
Theories on size, spacing and distribution of urban areas; Christaller Model. Spatial structure of urban areas; Concentric Zone theory, Sector theory; Multiple Nuclei theory; Utopian ideas of urban planning; Garden City of Sir Ebenezer Howard, Linear City of Soria-Y-Mata, Vertical City of Le Corbusier, Neighborhood idea of Clarence Perry, Radburn Layout of Clarence Stein.
2. **Methods and Techniques of Urban Planning and Management:**  
Urban Development Plan. Structure Plan. Master Plan. Detail Area Plan. Sites and Services Program. Land Readjustment Technique. Upgrading of Low-income Settlements. Urban conservation. Strategies for managing the growth of cities.
3. **Urban and regional Economics:**  
Economic base of cities; the basic and non-basic concepts: Export activities and Residentiary activities. Economic function of cities. Models of urban economic growth. Spatial organization of regional economic activities. Regional economic growth models; Place prosperity vs. people prosperity; economic development vs. regional growth; dispersal vs. concentration; balance vs. imbalance; growth vs. welfare; polarisation and trickle down effect.
4. **Transportation and Site Planning:**  
Traffic generation in urban area; land use and transport interaction. Urban transportation study; volume study, O-D survey, parking survey, inventory of physical infrastructure. Characteristics and role of different transport modes. Principle of site planning. Different patterns of layout design. Principles of designing with cut-de-sacs. Principles of planning pedestrian pathway system.
