Before discussing further in detail about **Top 10 best cars in the world**, we like to make our reader first what is the best car in the world. Best car is nothing but we consider the term is vague especially in the scenario when we talk about the cars, as the one we consider the best car might not you have valued it the best, your terminology of best might be different to what we have taken it. Better before classifying the cars into the category of best, it is necessary we should all come into the same stand before discussing top 10 best cars in the world with their best wallpapers taken from [UHQWallpapers.com](http://UHQWallpapers.com). We will try to limit our discussion about best performance car in the world and nothing else.

The automotive industry is a wide range of companies and organizations involved in the designing, development, manufacture, marketing, and selling of motor vehicles. We believe it is one of the world's most significant economic sectors by revenue. They all are included in a run providing more and more innovative approach, comfortability and ease to the end customer. The automotive industry does not include industries dedicated to the maintenance of automobiles following delivery to the end-user.
