

GeForce Experience Shortcuts

- 1. Alt + Z:** This shortcut opens the overlay UI, allowing users to access various features and settings within GeForce Experience.
- 2. Alt + F1:** Pressing this combination takes a screenshot of the current screen and saves it to the gallery.
- 3. Ctrl + Win + Alt + F1:** This shortcut captures a screenshot of the entire desktop, including all open windows and applications.
- 4. Alt + F12:** Toggling this combination on/off enables or disables the FPS (Frames Per Second) counter, which displays the current frame rate during gameplay.
- 5. Alt + F10:** Users can save the last 5 minutes of recorded gameplay footage by pressing this combination. This feature is known as "ShadowPlay Highlights."
- 6. Alt + F9:** This shortcut allows users to toggle manual recording on/off and save the recorded footage.
- 7. Alt + F8:** Toggle broadcasting on/off - This shortcut lets you quickly turn your broadcast on or off. When you press Alt + F8, GeForce Experience will start or stop your broadcast, depending on the current state.
- 8. Alt + F7:** Pause/resume broadcasting - If you need to pause your broadcast for any reason, you can use this shortcut to do so. Pressing Alt + F7 will pause your broadcast, and pressing it again will resume it.
- 9. Alt + F6:** Toggle the camera on/off while broadcasting - If you want to turn off your camera while broadcasting, you can use this shortcut. Pressing Alt + F6 will toggle your camera on or off, depending on the current state.
- 10. Alt + F5:** Toggle custom overlay on/off while broadcasting - GeForce Experience allows you to add custom overlays to your stream, and this shortcut allows you to toggle them on or off while you're broadcasting. Pressing Alt + F5 will toggle the custom overlay on or off, depending on the current state.
