Dear Jamal,

we are very impressed with the activities you are carrying out in Libya to promote our construction technology.

We are sure that your efforts will lead to great and mutual opportunities for the use of ICF Italia in various sectors of public and private construction.

Therefore, we confirm our complete intention to collaborate with your Company for the above-mentioned purposes with the perspective of consolidating an excellent partnership in the coming years.

We would also like to thank you for the kind invitation to your headquarters in Tunisia, and we will certainly organize a visit in a short time.

For the moment, we will send documentation of our experiences in the construction of public buildings, with particular reference to schools, already built and under construction. If you have specific about what mentioned above, we will be glad to answer them promptly.

Best regards.
