Splash under the Sea Of The Dolphin Treasure Slot

The 9, 10, J, Q, K, and A symbols, which are most frequently seen on games like Double Double Bonus Poker machines, are the smallest of Dolphin Treasure's emblems. With the angelfish, values start to significantly rise; they then continue to rise with the octopus, starfish, seahorse, and sea turtle. The game's Scatter is a traditional treasure chest icon, and the Wild is a stunning golden sunset.

The biggest number of coins are awarded by this symbol, which may be used to replace all other symbols other than the treasure chest. This is especially true when five of them appear on the reels at once. Any of the animal symbols begin entertaining animations when they are a part of a win, and anytime the sunset Wild is activated, our friend the dolphin jumps out of the ocean.
