3.3 Advisors' Board

DMO has an advisory council which is composed of a number of specialist doctors and senior house officers from different medical and dental specialties. Their duty is advising the Organization and providing scientific evaluation for the projects. As well as they are a great scientific support for the DMO .

3.4 Activities

What are the activities of DMO ? DMO is concerned with medical activities that ranges from online awareness to field projects. Our projects are diverse and include any type of actions that is in service of the community health like (medical education, public health awareness, charity and service programs, health sector development, concerning about human rights and peace etc...).

DMO implies on charity and health service programs in order to be a good aid to the people who need a hand to help them on our community.

4

Areas of DMO

DMO has four areas, each of which is concerned with a specific field in health sector.

4.1 Medical Area

Medical has the central role in DMO , as the medicine is the critical point among all the other health sciences. In this area our member are hardly working to provide public health awareness of medical importance as well as providing medical education programs for the medical students and graduates. Also it is emphasizing on human rights that are included with the medical field.

4.2 Dentistry Area

Dental field: we have not forgotten the impressive role of dentistry as the humanity needs the continuous effort from the dentists and dental students to provide the community with public dental awareness. As well as our dental field is emphasizing on providing dentistry education programs for the students and graduates in order to raise the needed skills and gain the required knowledge.

4.3 Pharmaceutical Area

Pharmaceutical field: The drugs are everywhere! So we have to be concerned with pharmacy strongly. The pharmaceutical field is aiming to deliver a scientific based public awareness about the drugs and there related topics. As the other fields, our pharmacy field tries to provide pharmaceutical education programs for the students and graduates from pharmacy colleges, as the learning and gaining new skills is a continuous agenda.

4.4 Nursing and Health Sciences

DMO is a broad Organization that has covered almost all the fields within health sector. Field of nursing and health sciences is working along with medical field to provide public health awareness as well as providing education programs to learn nursing and lab techniques for all the students and graduates from nursing colleges and other health science colleges.

Doctor media organization seeks for gathering of power of individuals in order to put them in the service of humanity. Our works aren't based on being proud rather are based on being interested in helping. Remember that the human health is the treasure that we cannot restore whenever it is lost. So let's to live a healthy life together. Keep your eyes on DMO publishings to get what is new about medicine and health. Be aware of DMO's projects and services to stay healthy.
