Creator(s): Kelly, Matthew

Abstract: This brief essay describes the difficulties and impromptu workarounds that emerged when utilizing the video sport Minecraft as the central educating software in several professional writing seminars. Extra particularly, the creator discusses a key moment within the semester the place college students wanted to move between college and non-college know-how infrastructures in an effort to create multiplayer gamespaces that were accessible to their friends. In narrating this experience, the author will demonstrate how a discourse of entry can be used to look at the oft-invisible insurance policies, procedures, and restrictions that shape the best way we compose, circulate and make seen digitally-native work. Furthermore, the writer will discuss how a vital emphasis on entry might help teachers and students better mediate the connection between internal or college-provided technological infrastructures and external platforms when creating interactive digital initiatives. The underlying motivation of this essay is not to lambaste universities for lack of institutional assist nor is it to champion business organizations as saviors for helping teachers efficiently use digital platforms within the classroom. As an alternative, the purpose of this brief essay is to spur discussions surrounding the following questions: how may we use points regarding access to higher look at and navigate the exhausting-to-define boundaries that separate university-sanction know-how use from non-college sanctioned technology use? How might calling students' attention to access refine the bigger studying aims for Digital Humanities or DH-associated courses? This brief essay describes the difficulties and impromptu workarounds that emerged when using the video game Minecraft because the central instructing device in a number of professional writing seminars.
