Dear Hiring Manager:

As a seasoned Cloud Infrastructure and Big Data Analytics professional, I came across your posting regarding the opportunity to work as a Senior Site Reliability Engineer and believe I would be a wonderful asset. My experience aligns well within the qualifications focused around cloud infrastructure, automation, and Python. In particular, my role as AWS Cloud Administrator and Big Data Operations with XYZ Company, among other relatable experience

With more than 4+ years of experience and progressing through the accelerated management program at XYZ Company, I've been involved in many unique roles. I am proficient in AWS Cloud, Big Data, software development, and steering senior executive meetings. My analytical and architecture skill-set has resulted in notable achievements such as:

- Providing Solution Architecture roadmaps and ingestion mapping for AWS and Hadoop Environments
- Provisioned variety of AWS Services for deployment
- Developed Python Scripts to automate and deploy AWS infrastructure
- Developing BI dashboards and back-end software development utilizing SQL, Python, VBA to Tableau
- Infrastructure as Code Automations have saved over $50k annually, reducing manual processes by 90%
- Establishing KPIs and Continues improvement tracking for various lines of business (LOB)
- Aligning multiple LOBs to ensure transparency and communication silos are removed
- Steering senior executives and directors in project review meetings, resulting in increased autonomy

In addition to my experiences and personal qualities, I have passion for software and cloud infrastructure/SRE. I welcome the opportunity to meet with you for an interview to discuss my capabilities in greater detail and thank you in advance for your consideration.

Kind Regards,
Batman
