

# Satta Gambling

A Game that changes fate.

सट्टा न्यूज़

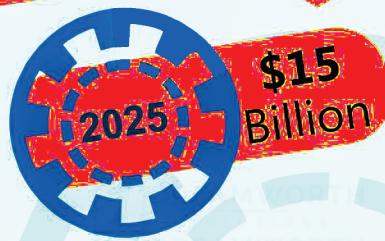

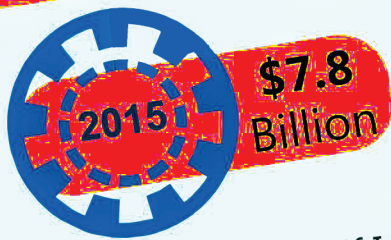

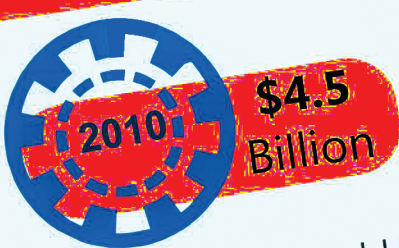

Satta, betting, gambling - whatever you call it, but this lottery system in India is a thriving business. It is also known as 'Matka gambling', this lottery system has its roots deeper back in history of Bombay or Mumbai. The lottery system is around for many decades now but there have been few changes in the game's basic rules. Satta gambling is the only quasi-legal form of betting that is still widespread in India and people enjoy it.

Today **Satta Matka** is an association and is completely smooth running in order to ensure that there are no frauds in the business. The owners have full control over the satta market and they make sure that business expands on people's trust because it's the only thing that can help them grow in the market.

## Rising market value of Gambling in India:

According to the reports the Gambling market value in India in 2010 was about \$4.5 billion, in the year 2015 the value market value of gambling increased approximately to \$7.8 billion. It has been forecasted that by the year 2025 the market value of Gambling will reach overwhelming amount of approximately \$15 billion.

Some more time should be taken in analyzing if India is ready to legalize betting in the sports. Even though it would minimize match fixing and illegal gambling to a great extent but since it is not our culture, we should take this step very carefully.

**IF YOU WIN, YOU WILL BE HAPPY  
IF YOU LOSE, YOU WILL BE WISE.**
