Production Log
Unit 21

DATE	LOCATION	TASK	EDITING DECISIONS MADE	OUTCOMES
26/01/18	Computer Room At College	- Add beginning and ending music sourced from YouTube - Add credits of all cast and crew's names - Add colour correction to all clips	- In terms of colour correction, I added a cooler tone as this is a convention - I used a blur effect on the credits to symbolise that the main character that ends up being the victim was oblivious - The reason why I did the same music at the beginning and the end was to keep symmetry	- Parts of the final film edited to a high standard that I felt satisfied with - I could see my vision coming together - All tasks that were planned to be completed were completed
27/01/18	Computer Room At College	- Ensure that all my timing is correct and made sense - Add the sounds of the kettle and other sounds that I needed - Ensure that I am happy with all my editing choices and that the vision I wish to create is created	- I deliberately chose to use a whistling sound for the kettle in order to build tension - Ensure that the timing of the clips seemed natural, make sense for the narrative, have continuity	- All tasks set were completed - Achieved vision that I wished to create - Completed final draft
