

Gentle Bloom CBD Oil® Get Gentle Healing With Gentle Bloom {Special Offer} Reviews

Gentle Bloom CBD Oil is becoming one of the hottest new products on the market today. In fact, annual sales of CBD oil products in 2018 was nearly 600 million and is estimated to be growing at a rate exceeding 107 percent annually. Prior to 2017, CBD products were available only in head shops, natural food stores, and at a few doctor's offices. Since that time, the market has exploded and CBD products are now available in natural food stores, national food stores, beauty salons, nail salons, convenience stores, and even gas stations. But, are these CBD products manufactured from safe CBD oil?

The advertisement features a central image of a smiling female doctor in a white lab coat with a stethoscope. To her right, the Gentle Bloom logo is displayed with several award seals (30, 100, USA, THC). Below the logo, the text reads "EXPERIENCE THE POWER OF GENTLE BLOOM TINCTURES" and "CHEMIST FORMULATED". A quote states: "Made from CBD organically grown & harvested in the USA, and medically proven to offer therapeutic benefits." A list of benefits includes: "REDUCTION OF INFLAMMATION+", "SUPPRESS FEELINGS OF ADDICTION+", "COMBAT FEELINGS OF ANXIETY+", and "SUPPORTS FOCUS & CLARITY+". At the bottom left, three bottles of Gentle Bloom CBD Oil are shown, labeled "PREMIUM FORMULA CBD OIL" and "100MG". A large green arrow at the bottom center contains the text "ACT NOW TO CLAIM YOUR FREE BOTTLE!". On the right side, there is a sign-up form with the heading "Internet Exclusive Offer Available to US Residents Only" and a notification "13 others are viewing this offer right now!". The form asks for "First Name", "Last Name", "Address", "City", "Country" (set to United States), "State" (a dropdown menu), "Zip Code", "Phone", and "Email". A prominent orange button at the bottom right of the form says "RUSH MY ORDER!".

First of all, let's examine what we mean by safe CBD oil. Some reports indicate that as much as 40% of the CBD products on the market tested positive for heavy metals like lead and arsenic, concentrated chemical pesticides, bacteria, fungi, toxic mold, THC, and numerous other dangerous impurities. Most people would agree that products containing these impurities would be considered to be unsafe.

Most of these unsafe CBD oil products [Gentle Bloom CBD Oil](#) are grown and manufactured in China, Mexico, and numerous third world countries that do little or no oversight in the products they sell.

One of the most common and dangerous impurities commonly found in tainted CBD products is chemical pesticides. These chemicals are used to kill insects and other organisms that can be harmful to the plant. According to the Toxics Action Center, "Pesticides have been linked to a wide range of human health hazards, ranging from short-term impacts such as headaches and nausea to more serious health problems like cancer, reproductive damage, and endocrine disruption." It could be very dangerous to ingest any type of tainted CBD product if it is contaminated with pesticides.

The advertisement features three bottles of Gentle Bloom CBD Oil (100MG) on the left. In the center, a couple is shown embracing joyfully. On the right, there are two smaller photos: one of a couple sitting together and another of a person running on a trail. A large green cannabis leaf is positioned at the bottom right. The background is a mix of green and white with decorative elements like a yellow oil drop and a blue and green pill icon.

The best and safest products available on the market are those in which the hemp is grown in the United States and the oil is produced in a food-grade facility. And, of course, it must be tested by a reliable, third-party facility. If you're looking for a safe CBD oil product with consistent high-quality and levels of CBD, look for suppliers located in the U.S. who use only U.S. grown hemp. In addition, look for suppliers whose products are thoroughly tested for purity, quality, and cleanliness. And, as an added measure of safety and quality, many of these manufacturers are regulated by state agencies.

As an example of this type of state oversight, [Gentle Bloom CBD Oil](#) manufacturers located in Colorado must register with the Colorado Department of Public Health and Environment (CDPHE). Then, they must meet several requirements such as demonstrating that industrial hemp produced in that facility does not contain more than three-tenths of 1 percent of THC, the psychoactive compound in marijuana that causes one to get high.

BENEFITS OF CBD OIL

Supports Neurological, Physical & Mental Health

CALM

HEALTH

ENERGY

Gentle Bloom Tinctures positively modulates the ECS system, improving mental clarity, sleep cycles, healthy inflammatory response, cognitive function & more.

SUPPORTS COGNITIVE FUNCTION†

CBD OIL supports optimal cognitive function, improving focus, mental clarity, and memory recall. It also helps slow down the age-related decline in cognitive health.

SUPPORTS JOINT HEALTH†

CBD OIL lubricates the joints to support improved flexibility and mobility. It also helps deliver essential cannabinoids to reduce inflammation.

COMBATS ANXIETY & STRESS†

CBD OIL has a positive impact on mood patterns and sleep cycles. This helps promote a feeling of calm and relaxation to combat stress and anxiety.

When you purchase from suppliers located in Colorado or if your supplier uses other third party organizations that certify that you are buying safe products, you can be assured that CBD products like bath bombs, CBD drops, gummies, gel caps, relief creams, ointments, and more are safe to consume and use.

All types of cannabinoids attach to some specific receptors in your body to create a special effect. And the same applies to CBD as well. Actually, your body produces some types of cannabinoids automatically. Also, it has two powerful receptors for CBD: CB 2 receptors and CB1 receptors.

As far as CB1 receptors are concerned, they are found across your body. However, many are found in your [Gentle Bloom CBD Oil](#) brain as well. The ones found in the brain help with memories, appetite, thinking, mood, emotions, pain, movement and many other functions. And these are the receptors THC attaches to. On the other hand, CB2 receptors are quite common in your immunity system, and they have an impact on pain and inflammation.

GENTLE BLOOM TINCTURES

Enriched with Cannabidiol Extract (CBD)

Cannabidiol is a non-psychoactive component of CBD that has been clinically tested to offer a wide range of therapeutic health benefits. **Gentle Bloom Tinctures** is formulated with CBD extract that is organically grown & harvested in the USA and is patented (under Patent #6,630,507) to support nutritional health of aging bodies.

When used as directed, Gentle Bloom Tinctures supports mood patterns, improves sleep cycle, triggers a healthy inflammatory response, and boosts cognitive performance.†

AVAILABLE
WITHOUT
PRESCRIPTION

In the past, researchers believed that CBD2 receptors are the receptors that CBD attaches to, but now they know that CBD won't attach to any of the receptors. In fact, it looks like it helps your body get better use of its own cannabinoids.

[Gentle Bloom CBD Oil](#) stands for cannabidiol oil. It is used to treat different symptoms even though its use is rather controversial. There is also some confusion as to how exactly the oil affects our bodies. The oil may have health benefits and such products that have the compound are legal in many places today.
