Proactive and motivated developer focused on Front-end accessible websites and software applications that create high-quality experiences for all users. Looking to leverage 10 years of professional experience working with a wide array of clients and needs including cloud-based CX solutions, sports and medical fields, using the latest web standards, HTML5, CSS3, JavaScript ES6, and libraries such as React while bringing them to life with RESTFUL Api's.

SKILLS

WEB DEVELOPMENT	HTML, CSS, PHP, JavaScript, jQuery, React, Electron, TWIG, BEM Methodology, SASS, Stylus, GIT, NPM, Gulp, Grunt, Craft CMS, ExpressionEngine CMS, Kentico CMS, Hubspot CMS, RESTFUL API's
WEB DESIGN	Adobe Photoshop, Adobe Illustrator, Sketch, Figma

EXPERIENCE

Software Company
JavaScript Developer   February 2019 - Present

Creating functional programs and applications for call centers in order to help build better relations between agents and customers and improve the customer service experience for all.

- Translate Figma designs and wireframes into reusable components and develop user interfaces for the entire product suite.
- Convert static HTML/CSS/JavasScript/PHP pages into React Components.
- Conduct browser-based debugging and performance testing across a vast array of web-capable devices and browsers.
- Collaborate with the backend developers to integrate RESTful and socket API's data into the user interface.
- Perform code reviews for teammates to ensure components and interfaces are optimized for maximum performance and usability with TypeScript in conjunction with ESlint.
- Serve as a knowledge base for teammates between different repos in the codebase.

Marketing Agency
Developer (Jr. Developer 2014 - 2017)   May 2014 - November 2018

Worked alongside a team of developers across the country to build and maintain enterprise level websites and applications for clients in a wide range of industries.

- Used CSS preprocessors such as SASS and Stylus with BEM methodology, to create more structured and understandable stylesheets for easier collaboration with the development team.
- Collaborated directly with the UX/UI designers to quickly dissolve any issues that might affect the outcome of client and user expectations.
- Used Gulp and Grunt to automate testing and deploy linted code to expedite development.
- Spearheaded the creation of accessibility process documentation for implementation of WCAG 2.0 AA guidelines on clients sites which generated quarterly reports and revenue.
- Conducted rigorous browser testing across all major browsers including mobile with BrowserStack and iOS Simulator to make sure user-experience was synonymous.

Company
Front-End Developer   October 2013 - May 2014

Worked with a small team of developers to maintain the national organization's website as well as the network of associations across the country.

- Created and conducted CMS(ExpressionEngine) training for a wide variety of administrators in the USATF association network. Worked
- remotely with onsite events team across the country to problem-solve and update event results for national organization site.
- Took creative responsibility to develop user experience for websites used at on-site events.
