### HISTORY

Karla Sofen grew up the daughter of Marion Sofen a maid to a privileged family. She was forced to be a "playmate" to Deanna Stockbridge, the family's daughter who was her age. Deanna saw Karla as a true friend, but Karla chaffed at being so close to wealth but being unable to call it her own. Still, she developed a talent for manipulating the naïve Deanna for her own amusement. Karla graduated college thanks to her mother working multiple jobs to support her education, and promised she would never be in the same situation herself.

After becoming a psychologist, Karla enjoyed manipulating her patients for her own ends. Since she couldn't afford for her jealous housewife patient to be "cured" of her paranoia just yet, Karla called the house pretending to be a lover of her patient's husband
