

## Minecraft: Pocket Edition now Available on IOS in new Zealand, as Universal App

MineCon 2011 the meatspace-based event for everything Minecraft isn't set to begin on Friday, but that hasn't stopped some important announcements from making their way out early. Minecraft: Pocket Edition made the transition to the wider Android Marketplace last month after a long period of exclusivity with the Sony Ericsson Xperia Play mobile phone. While those were definitely more green (blocky) pastures but today's move to iPhone and iPad could open up an even larger world of possibility for the portable sandbox.

Minecraft servers

Minecraft: Pocket Edition was released today on the New Zealand iTunes App Store. This means that one purchase can be used on both the iPhone and iPad. The \$9.99 NZD price will translate to PS4.99 or 6.99 when it is available or the Android Marketplace release.
