Product Debug Series 7R*

**MISUNDERSTOOD WORDS AND CYCLES OF
ACTION**

MISUNDERSTOOD WORDS AND NO PRODUCT

A misunderstood word can prevent a person from understanding the remainder of what is heard or written.

I have now discovered that: A MISUNDERSTOOD on any given subject CAN PREVENT THE COMPLETION OF A CYCLE OF ACTION related to that subject.

Therefore, those people who don't complete cycles of action on certain subjects have a misunderstood word on them. This, then, results in no-product situations.

Therefore, when you are getting no product, look for the misunderstood word on the subject, no matter how long and arduous it is. It's there. And when it's found, the person can go on and complete a cycle of action and get a product.

CAUTION: Make sure the person actually does have an inability to complete a cycle of action before you get into handling him. You don't handle somebody who is completing cycles of action that result in production.

MISUNDERSTOODS AND PERCEPTION

Misunderstoods can also act as perception shut-offs. They can actually interrupt a person's perception.

It is quite astonishing that perceptions such as sight, sound and even touch can be shut off by misunderstood words.

This opens the door to the fact that people apparently do not see, hear, notice or handle outnesses when they have misunderstoods on them.

This also may open the door to people who have perceptic shut-offs, such as poor eyesight, deafness or other perception difficulties.

MISUNDERSTOODS AND COMPLEXITY

Misunderstoods lead to complexity. People who have mis-understoods in an area are inclined to develop vast complexities. They can generate confusions and complexities beyond belief.

People do this because, having misunderstoods, they do not confront and duplicate in the area and so get into a lot of think-think and unnecessary significance. Their ability to get things done in that area dwindles as a result - and at the bottom of all this is simply misunderstood words.

MISUNDERSTOODS AND TOTAL ORGANIZE

When you see an area that is organizing only, you know that area is loaded with misunderstoods.

When people have incomplete cycles due to misunderstoods, they get bogged down into organization.

You can tell when people have misunderstoods —they are totally involved in organize, organize, organize. They don't know what they are doing.

There is a level below this - they have overts and withholds which prevent even organizing.

Below that level people are PTS.

Lacking a sense of organization actually lies below this. It is below the level of misunderstoods, overts and withholds and PTS'ness - and you'd have to go north through PTS'ness and overts and withholds to even get to the misunderstoods.

MISUNDERSTOODS AND NO ORGANIZE

There can also exist a condition where someone does not organize any corner of his area or work or organizations or lines. This manifests itself by irrational demands to only produce and to prevent any organization so that production can occur. At the bottom of this you are very likely to find misunderstood words, particularly on the purpose of the production or why one is producing. It is in this sector that you get overt products most frequently.

HANDLING

The exact procedure for handling these Mis-U's is given in HCOB 17 June 79, *CRASHING MIS-US: THE KEY TO COMPLETED CYCLES OF ACTION AND PRODUCTS*.

Crashing mis-understands finding is done as part of HCO PL 23 Aug 79 I, *DEBUG TECH*. Additional data on the location of Crashing Mis-U's is found in HCOB 23 Aug. 79 I, *CRASHING MIS-US, BLOCKS TO FINDING THEM* and HCOB 16 July 1979, *THE "ELUSIVE" MIS-U OR CRASHING MIS-U*. With this knowledge we can now handle all the factors that prevent the completion of cycles of action and products.
