

## HISTORY AND ORIGIN

IMUREGEN is a unique dietary supplement **developed more than eighty years ago**. It was developed by a leading Czech immunologist, Dr D. Rakus, who wanted to create an **all-natural and non-chemical product to promote immune system enhancement and cell regeneration to be a better alternative in providing strong assistance for serious illnesses**.

Dr. Rakus strongly believed that animal extracts and plant tissues can positively influence the immune system. He based his product purely on natural materials which included Amino Acids, Nucleotides, Peptides, Oligopeptides, Organic Salts and Minerals and Vitamins.

After World War 2, Czechoslovakia became a communist state with a planned economy that made it difficult to commercially compete with the growing pharmaceutical drug companies within struggling Europe. The domination of the health pharmaceutical industry by the USA had already begun.

This was also the early beginnings of the cold war between Russia and the United States which had a silent effect on other European countries. The USA was devoted to come up with better technology and medical breakthroughs and chemotherapy was introduced. Unfortunately, the growing popularity of chemotherapy and other drugs made natural supplement primitive in the eyes of industrialized communities.

After the death of Dr. Rakus, Bedrich Dolezel continued his quest and development of this 'Natural Healer' that would later be called IMUREGEN. **He started a highly specialized procedure that involved 90 days of preparation, in order to extract nucleotides and proteins from bovine tissue.**

In 1989, full democracy was restored in Czechoslovakia and in 1993, the country formally separated into two independent countries, the Czech Republic and Slovakia. With a new economic freedom, UNIREGEN Ltd., a small family company was founded in 1995, in 1998 reintroduced the patented IMUREGEN with the intention of retailing.

The Czech Academy of Sciences submitted IMUREGEN for testing to some of the top scientific institutions in former Czechoslovakia, Poland and Russia. **The testing confirmed that IMUREGEN is a unique product with an exceptional ability to promote cell regeneration and increase immunity.**

In 2001, the Czech ministry of health also conducted a comprehensive independent study of IMUREGEN, under the leadership of Dr. Josef Richter, a representative of the World Health Organization (WHO) in the Czech Republic. The purpose of the study was to find a natural supplement that could be used by the general population to increase immunity and thus improve their health. **The outcome of this independent study was to recommend IMUREGEN as an excellent source to fulfill this requirement.**

During the last decade, the increased interest in the use of natural products in the United States to address health needs has set the stage for the unveiling of one of Eastern Europe's best kept secrets, IMUREGEN, offered by Forever Healthy Products. We can now experience the multiple natural health benefits the Europeans have experienced for years from IMUREGEN.
