

Salary of Aerospace Engineer USA

Aerospace Engineer Job Responsibilities:

- Using mathematics, scientific, and engineering principles to design, repair, and improve air and spacecraft, component parts, facilities, materials, safety regulations, and manufacturing processes.
- Researching and analyzing information to develop designs and solve problems.
- Testing aircraft, rockets, and spacecraft to find and correct potential problems and to ensure compliance with quality, safety, and functionality requirements.
- Designing and assembling control panels, propulsion systems, guiding systems, computer systems, and other necessary parts and systems.
- Reviewing, developing, and improving production methods, facilities, and safety regulations.
- Coordinating activities with production, research, testing, and other departments to optimize safety and efficiency.
- Developing safety and quality standards, budgets, and timelines and ensuring projects comply with these regulations.
- Writing design proposals, reports, manuals, and other technical documents.
- Staying current on industry developments, technology, materials, trends, and regulations.
