## SOFTWARE ENGINEER

---

Experienced Software Engineer adept in all stages of advanced web development. Knowledgeable in the user interface, testing, and debugging. Expertise in web systems design, installation, testing, and maintenance. Creative, analytical, and innovative team player with a solid background in Object-Oriented programming.

## TECHNICAL SKILLS

---

Javascript, React, React-Native, Typescript, Figma, HTML, CSS3, SCSS, GSAP, Gatsby, Three.js, Ruby-on-Rails, C#, Next.js, Postgress SQL Server

## TECHNICAL PROJECTS

---

### GOAT Shop - [Github](#) | [Demo](#) | [Showcase](#)

A shoe store with a cart feature that allows users to browse shoes

- Written exclusively in JavaScript with cross-platform technology using React-Native
- Directly fetches data on demand from a third-party JSON API
- Built 7 dynamic screens and navigation tabs. Utilized React-Native libraries and Async-storage to visualize data in the front-end

### GetFit - [Github](#) | [Demo](#)

A responsive web application that lets users easily browse through exercises

- Built in React around an API-based design that separates data and presentation layer
- Implemented a Rapid API and YouTube API to fetch 222 exercises and related videos
- Provided a search and filtering feature that supports complex filters.

### SheTrades- [Github](#) | [Demo](#)

A trading application that is designed to educate women on how to invest in cryptocurrency

- Retrieves from 2 external APIs to render the 6 most popular coins
- Designed RESTful routes and 6 functional components
- Implemented features that allow users to filter coins by price and search for coins alphabetically

## EXPERIENCE

---

### QsrSoft

Software Engineer Intern

New York, NY

08/2022 - current

- Developed app features using scripts, and programming languages such as Vue.js, Node.js, and AWS
