

GeForce Now Shortcuts

- 1. Ctrl + G:** Toggle in-game overlay - This shortcut allows you to toggle the in-game overlay, which provides access to various features and settings within GeForce Now.
- 2. Ctrl + 1:** Save a screenshot - Pressing this combination will save a screenshot of your current gameplay. The screenshot is typically saved in a designated folder on your computer.
- 3. Ctrl + ↑ / Shift + 0:** Toggle instant replay on/off - This shortcut enables or disables the instant replay feature, which allows you to capture and review gameplay moments after they have occurred.
- 4. Ctrl + 0:** Save last recorded minutes/seconds - When instant replay is enabled, pressing this combination saves the last recorded minutes or seconds of gameplay as a video file.
- 5. Ctrl + 9:** Start/Stop recording - This shortcut initiates or stops your gameplay recording. The recorded video is typically saved in a specified location on your device.
- 6. Ctrl + M:** Toggle microphone - Pressing this combination toggles the microphone on or off during gameplay. It lets you control whether your voice is transmitted to other players or recorded in videos.
- 7. Ctrl + Alt + F6 (When playing a game):** Advanced gaming stats - This shortcut displays advanced gaming statistics while you are actively playing a game on GeForce Now. These stats provide detailed information about your performance, such as FPS (frames per second), latency, and more.
- 8. ⌘ Option + ⌘ Cmd + F6 (Mac, When playing a game):** Advanced gaming stats - Mac users can use this shortcut to access advanced gaming statistics while playing a game on GeForce Now.
