Windows 10 Store Issues

- If your Windows store stopped working here is the troubleshooting steps next going to help you a lot.
- Follow it and get recovered.

Method 1:

• Try clearing the cache

🗐 Run	×
<u>O</u> pen:	Type the name of a program, folder, document, or Internet resource, and Windows will open it for you.
	OK Cancel <u>B</u> rowse

Method 1:

- Sometimes, too much cache might be bloating Windows Store app, causing it to not function efficiently.
- Clearing the cache, is very easy that you need to follow some steps.

Method 1:

- Press Windows key + R.
- Then type wsreset.exe
- OK

Ū	Run		
	Type the name of a program, folder, docur resource, and Windows will open it for you	ment, or Internet	
Open:	WSReset.exe	Ŷ	
	OK N Cancel	Browse	

Windows Store Not Functioning In Windows 10

Method 2 :

- Try disabling any recently installed third-party anti-virus suite.
- If you have recently installed a security suite on your system, that might be preventing Windows 10 App Store from working. So try disabling the anti-virus and then check if Windows Store starts working for you.

indows Defender C status: Windows Defender is OFF	- 0
Home Update History	🚫 Settings 🔻
Windows Defender is off because you have an existing AV program. Uninstall your existing AV program to turn on Windows Defender. Uninstalling your existing AV program will turn on Windows Defender.	Scan options:
Privacy Statement your existing AV program will turn on Windows Defender. Scan details Last scan: No scheduled scan performed	

Go Command Prompt mode Method 3 :

- If Windows Store is still not working for you, click on Windows key + R
- Open Command Prompt

Go Command Prompt mode Method 3 :

- Type the command as assigned in figure of next presentation slide
- powershell -ExecutionPolicy Unrestricted Add-AppxPackage
 -DisableDevelopmentMode -Register
 \$Env:SystemRoot\WinStore\AppxManifest.xml

Use Microsoft's Troubleshooting Tool Method 4:

• Go to Microsoft website and hit the Run button.

• Doing this will download a program on your computer.

Use Microsoft's Troubleshooting Tool Method 4:

- Install the program, this will allow Microsoft to check whether some preset values are correctly specified on your system.
- If not, Microsoft will change it for you.

Thank You
