SUMMARY

Acutely adept software engineer with over 11 years of experience in the full software development cycle for small to enterprise level apps, decreasing latencies by upwards of 70% and being a key resource in 6-figure revenue boosts amidst a laudable career.

EXPERIENCE

02/2023 - 08/2023

Midgard, YG

Senior Software Engineer
Small Startup Company

No-code solution, second-layer interface over existing site, allowing attachment of anchors, triggers, etc. to any element.

· Engineered 4+ central front-end features based atop the Shadow DOM via React and Redux Toolkit on Webpack 5, with Node.js and Firebase on the back-end, all delivering a performant user experience.
· Delivered long-awaited feature-gating functionality, introducing payment tiers for access to specific features.
· Devised, directed, and configured implementations of React Context and Tailwind CSS, in only my first 3 days.
· Introduced cross-functional capabilities to enhance and decrease build and deploy times by up to 15%.
· Recommended and centralized best practice paradigms, ensuing improved code quality and reduced bugs.
· Modified and furthered 3 user-facing repositories in pivotal initiative to becoming ADA-compliant.

04/2021 - 02/2023

Asgard, YG

Staff Software Engineer
Mid-Level Established Startup Company

High-traffic food delivery service for under-served US markets spanning 3 individualized sets of web and mobile apps.

· Overhauled entirety of primary React and Redux code base, resolving 55+ known bugs, in first 3 months.
· Instituted Webpack and Babel performance solutions, elevating metrics insights of less than 20% to 91-95%, accelerating raw site speed and load times, forecasting a significant surge in fiscal projections.
· Promoted from senior to staff level after 1 year due to direct impact on a supplementary 19% revenue gain.
· Contributed to Elastic Kubernetes and Beanstalk cloud services on AWS, progressing 5 CI/CD pipelines.
· Built 8 micro front-end apps for a new mobile ordering feature at venues, focusing on stability and uptime.
· Fostered a Greenfield project consolidating 3 web applications into one bleeding-edge website based on Next.js, TypeScript, Node.js, and Tailwind CSS, with an MVP available 2 sprint cycles ahead of schedule.

10/2018 - 04/2021

Nidavellir, YG

UI Developer
Almost FAANG-Type Company

Rapid-iteration Agile Scrum enterprise environment for internet, voice, and TV business-level options.

· Collaborated on 15 new robust features wielded by over 1 million users, powered by React and Redux.
· Merged over 30 modular, reusable UI components utilized daily by over 170 engineers into Storybook.
· Reviewed and analyzed Node.js performance, optimizing speeds by 9-12%, shining a light on inconsistencies.
· Coordinated and deployed over 20 urgent bug hotfixes, notably diminishing customer service support tickets.
· Boosted test coverage for client-side products with Jest and React Testing Library from 90% to 95% minimum.

01/2017 - 10/2018

Jotunheim, YG

MEAN Stack Application Developer
Small-To-Mid-Level Established Company

Powerful and customizable SaaS logistics and analytics web applications for fuel delivery services sector.

· Migrated Express.js monolith to a Docker-based Angular ecosystem, improving scalability for 3 large projects.
· Discovered and exposed bottlenecks and oversights, decreasing product estimates and targeted revenue.
· Simplified real-time IoT data into visual representation of KPIs with D3.js, KendoUI, and Angular Material.
· Reduced back-office SQL data overhead by over 17% through optimized MongoDB and Mongoose instances.

07/2012 - 01/2017

Vanaheim, YG

Principal Web Engineer
Small Private Sector Company

Contemporary, state-of-the-art websites for home services industry, working directly with clients for requested features.

· Launched and maintained 8 content-heavy responsive websites, using CSS preprocessors like Sass and LESS.
· Developed 22 landing pages in HTML5, CSS3, and Bootstrap to support desktop and mobile environments.
· Revamped legacy tools with Backbone.js and AngularJS, yielding modern user experiences for 3,500+ users.
