

HUNTING AND FISHING

If an adventurer finds himself with a lack of food while in the wilderness, they have the option of going either hunting or fishing to obtain meat.

FISHING

A Survival check with 10 DC will determine whether or not a fish is caught. If a fish icon is located within the hex the character is fishing in, the Survival check will be rolled with an advantage. If a fish's strength modifier is shown, make an opposing strength check to reel it in.

If a fish is caught, a d100 will be rolled to determine which freshwater or saltwater fish is caught. If the survival check is failed, roll a d100 to determine if the line is broken or not. If the fish rolled is over the rod's maximum weight capacity, the rod will snap.

QUALITY OF FISHING RODS

Each fishing rod has a certain amount of weight it can sustain without snapping. If a survival check is failed when fishing, and the fish's weight exceeds the maximum supported weight of the fishing rod used, the fishing rod will snap.

When a survival check is succeeded, the character will know if the weight of the fish is too much for the rod to handle. If the character wishes to reel it in anyways, they must roll a survival check with a DC of 15, with a disadvantage to determine if the rod snaps.

No matter the rod's maximum weight, a character cannot reel in a fish that exceeds their maximum push, lift, and carry weight.

RODS

Rod	Maximum weight
Wooden rod	10 lbs.
Bamboo rod	30 lbs.
Iron rod	300 lbs.
Steel rod	Bends at 10,000 lbs.

PREPARING FISH

Preparing a fish to be eaten is much simpler than preparing another animal. To determine the length of time it will take, the amount of meat that will be obtained, and the time it will take to spoil, refer to the following chart:

FISH

Weight	Obtainable meat	Time to harvest	Time to spoil
5 lbs. or less	2 lbs.	5 minutes	1 day
10+ lbs.	5 lbs.	10 minutes	1 day
11-40 lbs.	6-20 lbs.	15 minutes	2 days
41-100 lbs.	21-50 lbs.	20 minutes	2 days
101-200 lbs.	51-100 lbs.	25 minutes	2 days
201-300 lbs.	101-150 lbs.	30 minutes	3 days
301-400 lbs.	151-200 lbs.	40 minutes	3 days
401-500 lbs.	201-250 lbs.	1 hour	4 days
501-1,000 lbs.	250-500 lbs.	3 hours	4 days
1,000+ lbs.	500+ lbs.	4+ hours	5 days

HUNTING

Hunting is simply killing and preparing a viable, edible animal to eat or sell.

ANIMALS

Animal	Weight
Buck	180 lbs.
Doe	100 lbs.
Fawn	10 lbs.

Male elk	700 lbs.
Female elk	500 lbs.
Baby elk	30 lbs.
Boar	200 lbs.
Sow	175 lbs.
Piglet	20 lbs.
Male wolf	120 lbs.
Female wolf	90 lbs.
Baby wolf	10 lbs.
Cattle	1,400 lbs.
Male brown bear	600 lbs.
Female brown bear	300 lbs.
Baby brown bear	20 lbs.
Male black bear	300 lbs.
Female black bear	150 lbs.
Baby black bear	10 lbs.
Male polar bear	1,000 lbs.
Female polar bear	500 lbs.
Baby polar bear	40 lbs.

PREPARING MEATS

After killing an animal, its meat and hide may be harvested. If an animal is left dead for around 1 to 2 days, the animal will be almost entirely covered in flies, making the meat unobtainable. The hide however, will stay obtainable for a much longer period of time.

When harvesting an animal, refer to the following list to determine how long it takes to harvest it, how much meat is obtainable, and how long before the meat will spoil.

ANIMALS

Animal	Obtainable meat	Time to harvest	Time to spoil
Buck	80 lbs.	4 hours	2 days
Doe	40 lbs.	2 hours	2 days
Fawn	2 lbs.	30 minutes	1 day
Male elk	325 lbs.	12 hours	3 days
Female elk	225 lbs.	9 hours	3 days
Baby elk	10 lbs.	1 hour	1 day

Boar	90 lbs.	4 hours	2 days
Sow	75 lbs.	3 hours	2 days
Piglet	20 lbs.	1 hour	1 day
Male wolf	55 lbs.	3 hours	2 days
Female wolf	40 lbs.	2 hours	2 days
Baby wolf	2 lbs.	30 minutes	1 day
Cattle	650 lbs.	16 hours	4 days
Male brown bear	225 lbs.	9 hours	3 days
Female brown bear	125 lbs.	6 hours	3 days
Baby brown bear	8 lbs.	1 hour	1 day
Male black bear	125 lbs.	6 hours	2 days
Female black bear	75 lbs.	3 hours	2 days
Baby black bear	4 lbs.	30 minutes	1 day
Male polar bear	425 lbs.	12 hours	3 days
Female polar bear	225 lbs.	9 hours	3 days
Baby polar bear	20 lbs.	2 hours	1 day
