

Minecraft Pocket Edition Chips off 21 Million Copies

Minecraft Pocket Edition has sold more than 21 million copies, Minecraft's developer Jens Bergensten says in a tweet. To celebrate this incredible number, the Minecraft mobile team will host a live panel broadcast from Mojang offices on April 14, Monday and will allow fans to ask them anything. If they'll be able to answer any questions is entirely up to them.

Players can submit questions to this reddit thread. Mojang will pick the best ones to address the questions live on the internet. There's no set time for the stream yet however, it will be archived. Mojang recommends that you go to the website for more details as they become available.

Mojang wrote "We're grateful to everyone who plays for their dedication and their creativity." "Without that, Minecraft wouldn't be anywhere near as significant as it is today."

Minecraft recently sold 12 million copies on Xbox 360 and 14,000,000 on PC. Minecraft sold 1 million copies in its first month on PS3. Minecraft has sold around 576 squidillion copies across all platforms. [Image: Mojang]
