When you are working on the spreadsheet but it lost by mistake, application crashed, and the computer freezes, this is the worst feeling. But now you can recover your files with auto recover feature. In this blog, you will learn how to enable auto recover feature in MS Excel.

Enable Auto Recover in Excel:

100 C	·	application Support			
Applications Control Desktop Control Documents Control Documents C	ce Container.plist per Container.plist Data Data Container.plist Data Liew Liew Liew Liew Liew Liew Liew Liew	 CFUserTextEncoding Desktop Documents Downloads Library logs Movies Music Pictures 	 Application Scripts Application Support Audio Caches Calendars ColorPickers ColorSync ColorSync Components Compositions Dictionaries Favorites Filters FontCollections 		

Enable Auto Recover in Excel for Mac:

For this, first you have to Launch Excel and then you have to open any workbook. After this, click Excel and then Preferences. In the Excel Preferences dialog you have to click on Save option, which is in the Sharing and Privacy section. Excel's Save options is now visible on the computer screen, with check box. Just you have to select Save Auto Recover info in every xx minutes when no check mark is present. After this, you have to Close the Preferences interface so that you can return to your Excel session.

Enable Auto Recover in MS Excel for Windows:

For this, first you have to Launch Excel and then you have to open any workbook. After this, just Select File and then select Options. Here the Excel Options interface will be displayed on your screen. Just you have to Select Save option, which is in the left menu pane. Excel's Save options will be visible with the check box. Now you have to Select Save Auto Recover information every xx minutes when no check mark is present. The default setting in Excel is 10 minutes. At the end just you have to Select OK button to return to your Excel session.
