Testo P, also known as Testosterone Propionate, is a slower-releasing anabolic steroid with a short half-life. It is available in 10 ml vial and 100mg/ml packaging with international delivery. The users can run

short Testo P cycles that only last for a maximum of 10 weeks. It is a synthetic androstane steroid derivative of an ester of testosterone. Dosage. The half-life of Testo P 100 is short. It starts working after the injection. The recommended dosage for Testo P 100 is 50 to 200 mg per day for men and 25 to 50 mg per day for women. If used with other compounds such as Proviron and Nolvadex, the bulking effects can be improved. Make sure you administer the Testo P 100 steroid ... [look at these guys](#)

Testo-P is injectable steroid which contains the hormone Testosterone Propionate in preparations of 100

mg per ML. The Testosterone Propionate ester is much faster acting (2-3 days) than Enanthate or Cypionate, and thus requires a more frequent injection schedule such as every day or every other day in order to keep blood levels as stable as possible. [take a look at the site here](#)

Among complaints of side effects of Testo P are the most common acne, gynecomastia development, alopecia and hirsutism. Do not forget to read the instructions, and if necessary, seek professional help. A 50 mg dose every day for 4-5 weeks give great weight gain. Warnings: Keep out of reach of children.
