

## THE STORY OF SUMMER SOLSTICE "MYSTIC HUNTER"

Summer lived with her husband and two children, a boy and a girl, in Greece during the early 19th century. They were a very poor family; their only means of survival was the little farm they had. Summer and her husband worked hard day and night to provide food on the table for their little children. During that time, there were disagreements between the witches and the vampires, and this led to a war between the witches and the vampires.

The existence of vampires, witches, and other supernatural creatures was not known to humans. The witches started to sacrifice little children in order to gain powers to defeat the vampires. One certain night, a group of witches went into houses, took the children and burned down the houses. One of the houses which the witches had gone into was the house Summer stayed with her family. The witches took Summer's Children and set the house on fire. Summer barely managed to crawl out of the burning house and was on the brink of death.

There was a vampire who had witnessed everything that happened. Using his Super Speed, he went up to Summer and fed her his blood so that she could survive. When Summer regained consciousness and recalled everything that happened, she was devastated and angry; She swore to take revenge on the witches.

Summer was a very special Vampire. Not only was she incredibly fast and strong like other vampires; she also had the power of Fire Manipulation. Other vampires believe this ability could be because she was almost burned to death. She joined the vampire clan called the « Bloody Wanderers » and went by the name « Mystic Hunter ».
