

Clinic Management system for Clinics

The Doctor mobile App is the mobile application which keeps the health records of an individual patient and gives the clinics and hospitals to get rid of handling of papers and documents which are not only difficult to store and maintain but also prone to wear and tear. Read more about Why Hospital Management System is Better Option for Hospitals

With this advanced application, clinics and hospital can keep a systematic record of patient's history with medical prescriptions, previous medical treatment received etc.

Clinic Management System make the hospitals and clinic more efficient and by transforming the entire system into automation. The application helps in printing out prescriptions, patient records, and billings. It maintains accounts and creates the profile of individual patient. It schedules appointments and sends notification. It keeps the patients away with the chances of wrong treatment because entire system is automatic and patient can choose the doctor of their own choice.
