

# DURAPATH<sup>®</sup>

## The only ground support you'll ever need...

Durapath is a durable, permanent ground solution replacing the need for traditional and costly hard standing products. Its tested practical and robust design conforms to the Sustainable Urban Drainage Systems Laws (SUDS). It allows water to permeate through the ground, yet is strong enough to take the heaviest of day to day loads. A full range of colours and marker discs available ensures that there is an option to suit you.

### PERFECT FOR:

- Car Parks
- Pathways
- Outdoor Event Areas
- Cycle Paths
- Drives and Access Roads
- Coastal Erosion
- Helipads

- Permanent fit and forget solution
- Virtually no maintenance
- Easily filled with stone or grassed... or whatever you want
- Markers to designate car park spaces, disabled areas, exits or other signs
- Wide choice of colours for pavers and markers
- Full installation all over the UK

# DURAPATH<sup>®</sup>

## Technical Information

Durapath is manufactured in a choice of materials: recycled or virgin High Density Polyethylene or Polypropylene. All pavers are 500 x 500 x 40mm – so 4 to a square metre.

All these materials can stand the heaviest of everyday loads, and are supplied on pallets up to a maximum of 58m<sup>2</sup> per pallet.

Although Durapath is supplied with a manufacturer's 10 year guarantee this should be greatly exceeded.

It is readily available in black, green, white, mid-grey, beige and clear to cater for everyday requirements. However, order more than 120 m<sup>2</sup> and you can pick your own colour!
