**Wow 3! 51 year old Grab driver Chua Y.L. (Cai Y.L.) told me he has \$1 million. How come Teo En Ming don't even have \$15,000 in his bank account? (2023-03-06 16:54) - Turritopsis Dohrnii Teo En Ming**

Subject: Wow 3! 51 year old Grab driver Chua Y.L. (Cai Y.L.) told me he has \$1 million. How come Teo En Ming don't even have \$15,000 in his bank account?

Wow! 51 year old Grab driver Chua Y.L. (Cai Y.L.) told me he has \$1 million. How come Teo En Ming don't even have \$15,000 in his bank account?

This is the breakdown.

CPF OA + SA + MA + HDB Flat = \$1 million

Investment portfolio, more than \$100K

He told me he held a senior ranking position in the Singapore Armed Forces (SAF) previously.

=====

Subject: Wow! Even a mentally disabled person has \$200,000 and an un-educated cleaner has \$330,000 in their bank accounts. How come Teo En Ming don't even have \$15,000 in his bank account?

Wow! Even a mentally disabled person has \$200,000 and an un-educated cleaner has \$330,000 in their bank accounts. How come Teo En Ming don't even have \$15,000 in his bank account?

You can refer to the following newspaper articles.

The Straits Times: How a man with a mental disability was cheated of \$200,000

Link: <https://www.straitstimes.com/business/invest/how-a-man-with-a-mental-disability-was-cheated-of-200000>

Asia One: \$49 left in bank account: Cleaner loses \$330k of life savings to 'China police' scammers

Link: <https://www.asiaone.com/singapore/49-left-bank-account-cleaner-loses-330k-life-savings-china-police-scammers>

Even a man with mental disability has \$200,000 in his bank account! Even an un-educated cleaner has \$330,000 in his bank account! I don't have a mental disability. In fact I have a NUS university degree with 2 polytechnic diplomas. My academic qualifications are: (1) Bachelor of Engineering (Honours) in Mechanical Engineering from National University of Singapore (Graduated Dec 2006), (2) Diploma in Mechatronics Engineering from Singapore Polytechnic (Graduated 1998) and (3) Diploma in Computer Networking from Singapore Polytechnic (Graduated 2017).

But how come I don't even have \$15,000 in my bank account? I am already 45 years old! This is because I am a Targeted Individual. A Targeted Individual is a person who is persecuted, targeted, blacklisted and marked by the government. I offended Minister Mentor Lee Kuan Yew 16 years ago in the year 2007. As a result, I am blacklisted by the Singapore Government. For the past 16 years, I frequently get fired from jobs. I am extremely under-employed for a person who has a university degree. Governments also arrange for Targeted Individuals to have numerous health and medical problems (aka "Slow Kill", aka government-induced health and medical problems). Because I frequently get fired from jobs for the past 16 years, I frequently complain on the internet and social media about government persecution. My situation only start to improve in the year 2017 by a little bit. My working life proper only starts when I am 39 years old, in the year 2017.

Since 2017, I have been working as an IT Consultant and IT Support Engineer, albeit only for about 4 years. I may not have stellar/amazing IQ but I shouldn't be doing so badly right?! As compared to the mentally disabled person and un-educated cleaner. How come I don't even have \$15,000 in my bank account? I am already 45 years old! This is because I am a Targeted Individual! A Targeted Individual is a person who is persecuted, targeted, blacklisted and marked by the government. I am persecuted, targeted, marked and blacklisted by the Singapore Government after offending Minister Mentor Lee Kuan Yew in the year 2007, some 16 years ago. Because I offended Minister Mentor Lee Kuan Yew in 2007, I frequently get fired from jobs for more than 10 years after university graduation in Dec 2006. That's why I have super super low savings in my bank account. And that's why I also have super super low savings in my CPF account.

Most people at my age in Singapore should have about \$300,000 in their bank accounts. I have less than \$15,000 in my bank account.

Most people at my age in Singapore should have around \$500,000 in their CPF accounts. I only have about \$100,000 in my CPF account, just surpassed the \$100,000 mark when I am 45 years old.

Most people in Singapore own a HDB flat worth about \$700,000 to \$800,000. But my parents's HDB flat was CHEATED OFF by the Singapore Government. I have nothing to inherit from my parents at all.

How come I am thousands of times worse off than a man with mental disability and an un-educated cleaner??????

How come I have no money for scammers to cheat???????

My name is Mr. Turritopsis Dohrnii Teo En Ming. I live in Singapore. I am 45 years old. I am a Targeted Individual.

**I discovered that Magix Movie Studio 2023 Platinum uses open source Qt 5 (2023-03-05 22:43)**  
**- Turritopsis Dohrnii Teo En Ming**

Subject: I discovered that Magix Movie Studio 2023 Platinum uses open source Qt 5

Good day from Singapore,

I discovered that Magix Movie Studio 2023 Platinum uses open source Qt 5.

The version of Magix Movie Studio 2023 Platinum that offers tremendous speed increases in 4K video rendering is:

Version 22.0.3.171 (UDP3)

UG code 8473 KA1

=====

Subject: 4K Video Rendering Speed with Magix Movie Studio 2023 Platinum on my Home Desktop Computer

NOTE: An update to Magix Movie Studio 2023 Platinum is mandatory/compulsory/required for the tremendous speed increase.

It only took about 18 mins to render a 52-min (close to 1 hour) 4K video on my home desktop computer.

Reference 4K video: "Japanese" Schoolgirl Sissi (First Class Beauty) The Movie - Part 2

Link: [1]<https://www.youtube.com/watch?v=-ceUpXDUcvg>

Technical Specs of my home desktop computer:

(1) MSI GeForce GTX1650 4 GB GDDR5 GPU

(2) AMD Ryzen 3 3200G with Radeon Vega 8 Graphics GPU (4 cores, 4 threads, 3.6 GHz)

=====

Subject: 4K Video Rendering Speed with Magix Movie Studio 2023 Platinum on my Aftershock gaming laptop

NOTE: An update to Magix Movie Studio 2023 Platinum is mandatory/compulsory/required for the tremendous speed increase.

It only took about 18 mins to render a 40-min 4K video on my Aftershock gaming laptop.

Reference video: Teo En Ming's Pretty Wife Hong Ling at Mediacorp Let's Talk About Health Fair FIX MY LIFE MEET AND GREET 4 Mar 2023 Sat

Link: [2]<https://www.youtube.com/watch?v=SduoNz-2LmE>

Technical Specs of my Aftershock gaming laptop:

(1) NVIDIA GeForce GTX 1050 TI GPU

(2) Intel HD Graphics 630 GPU

=====

GPU Hardware Acceleration is compulsory/mandatory for 4K video rendering. Magix Movie Studio 2023 Platinum can take advantage of multiple GPU cards at the same time.

Magix Movie Studio 2023 Platinum is very very very (EXTREMELY) fast at rendering 4K videos with mid-tier GPU cards, with the appropriate update. You don't have to buy the most expensive \$5000 top performance GPU card.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

## Turritopsis Dohrnii Teo En Ming's CPF Account as of 5 Mar 2023 (2023-03-05 15:53) - Turritopsis Dohrnii Teo En Ming

Subject: Turritopsis Dohrnii Teo En Ming's CPF Account as of 5 Mar 2023

CPF Ordinary Account \$41,732

CPF Special Account \$28,865

CPF Medisave Account \$6,907

CPF Investment Scheme \$26,702

Total CPF \$104,206

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 16 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty for eternity. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

Mr. Turritopsis Dohrnii Teo En Ming, 45 years old as of 5 Mar 2023, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

Wow! 51 year old Grab driver Chua Y.L. (Cai Y.L.) told me he has \$1 million

This is the breakdown.

CPF OA + SA + MA + HDB Flat = \$1 million

Investment portfolio, more than \$100K

He told me he held a senior ranking position in the Singapore Armed Forces (SAF) previously.

Subject: Wow! Even a mentally disabled person has \$200,000 and an un-educated cleaner has \$330,000 in their bank accounts. How come Teo En Ming don't even have \$15,000 in his bank account?

Wow! Even a mentally disabled person has \$200,000 and an un-educated cleaner has \$330,000 in their bank accounts. How come Teo En Ming don't even have \$15,000 in his bank account?

You can refer to the following newspaper articles.

The Straits Times: How a man with a mental disability was cheated of \$200,000

Link: <https://www.straitstimes.com/business/invest/how-a-man-with-a-mental-disability-was-cheated-of-200000>

Asia One: \$49 left in bank account: Cleaner loses \$330k of life savings to 'China police' scammers

Link: <https://www.asiaone.com/singapore/49-left-bank-account-cleaner-loses-330k-life-savings-china-police-scammers>

Even a man with mental disability has \$200,000 in his bank account! Even an un-educated cleaner has \$330,000 in his bank account! I don't have a mental disability. In fact I have a NUS university degree with 2 polytechnic diplomas. My academic qualifications are: (1) Bachelor of Engineering (Honours) in Mechanical Engineering from National University of Singapore (Graduated Dec 2006), (2) Diploma in Mechatronics Engineering from Singapore Polytechnic (Graduated 1998) and (3) Diploma in Computer Networking from Singapore Polytechnic (Graduated 2017).

But how come I don't even have \$15,000 in my bank account? I am already 45 years old! This is because I am a Targeted Individual. A Targeted Individual is a person who is persecuted, targeted, blacklisted and marked by the government. I offended Minister Mentor Lee Kuan Yew 16 years ago in the year 2007. As a result, I am blacklisted by the Singapore Government. For the past 16 years, I frequently get fired from jobs. I am extremely under-employed for a person who has a university degree. Governments also arrange for Targeted Individuals to have numerous health and medical problems (aka "Slow Kill", aka government-induced health and medical problems). Because I frequently get fired from jobs for the past 16 years, I frequently complain on the internet and social media about government persecution. My situation only start to improve in the year 2017 by a little bit. My working life proper only starts when I am 39 years old, in the year 2017.

Since 2017, I have been working as an IT Consultant and IT Support Engineer, albeit only for about 4 years. I may not have stellar/amazing IQ but I shouldn't be doing so badly right?! As compared to the mentally disabled person and un-educated cleaner. How come I don't even have \$15,000 in my bank account? I am already 45 years old! This is because I am a Targeted Individual! A Targeted Individual is a person who is persecuted, targeted, blacklisted and marked by the government. I am persecuted, targeted, marked and blacklisted by the Singapore Government after offending Minister Mentor Lee Kuan Yew in the year 2007, some 16 years ago. Because I offended Minister Mentor Lee Kuan Yew in 2007, I frequently get fired from jobs for more than 10 years after university graduation in Dec 2006. That's why I have super super low savings in my bank account. And that's why I also have super super low savings in my CPF account.

Most people at my age in Singapore should have about \$300,000 in their bank accounts. I have less than \$15,000 in my bank account.

Most people at my age in Singapore should have around \$500,000 in their CPF accounts. I only have about \$100,000 in my CPF account, just surpassed the \$100,000 mark when I am 45 years old.

Most people in Singapore own a HDB flat worth about \$700,000 to \$800,000. But my parents's HDB flat was CHEATED OFF by the Singapore Government. I have nothing to inherit from my parents at all.

How come I am thousands of times worse off than a man with mental disability and an un-educated cleaner??????

How come I have no money for scammers to cheat???????

My name is Mr. Turritopsis Dohrnii Teo En Ming. I live in Singapore. I am 45 years old. I am a Targeted Individual.

That's why I have super super low savings in my bank account. And that's why I also have super super low savings in my CPF account.

Most people at my age in Singapore should have about \$300,000 in their bank accounts. I have less than \$15,000 in my bank account.

Most people at my age in Singapore should have around \$500,000 in their CPF accounts. I only have about \$100,000 in my CPF account, just surpassed the \$100,000 mark when I am 45 years old.

Most people in Singapore own a HDB flat worth about \$700,000 to \$800,000. But my parents's HDB flat was CHEATED OFF by the Singapore Government. I have nothing to inherit from my parents at all.

How come I am thousands of times worse off than a man with mental disability and an un-educated cleaner???????

How come I have no money for scammers to cheat???????

My name is Mr. Turritopsis Dohrnii Teo En Ming. I live in Singapore. I am 45 years old. I am a Targeted Individual.

**Wow! Even a mentally disabled person has \$200,000 and an un-educated cleaner has \$330,000 in their bank accounts. How come Teo En Ming don't even have \$15,000 in his bank account? (2023-03-04 13:46) - Turritopsis Dohrnii Teo En Ming**

Subject: Wow! Even a mentally disabled person has \$200,000 and an un-educated cleaner has \$330,000 in their bank accounts. How come Teo En Ming don't even have \$15,000 in his bank account?

Wow! Even a mentally disabled person has \$200,000 and an un-educated cleaner has \$330,000 in their bank accounts. How come Teo En Ming don't even have \$15,000 in his bank account?

You can refer to the following newspaper articles.

The Straits Times: How a man with a mental disability was cheated of \$200,000

Link: <https://www.straitstimes.com/business/invest/how-a-man-with-a-mental-disability-was-cheated-of-200000>

Asia One: \$49 left in bank account: Cleaner loses \$330k of life savings to 'China police' scammers

Link: <https://www.asiaone.com/singapore/49-left-bank-account-cleaner-loses-330k-life-savings-china-police-scammers>

Even a man with mental disability has \$200,000 in his bank account! Even an un-educated cleaner has \$330,000 in his bank account! I don't have a mental disability. In fact I have a NUS university degree with 2 polytechnic diplomas. My academic qualifications are: (1) Bachelor of Engineering (Honours) in Mechanical Engineering from National University of Singapore (Graduated Dec 2006), (2) Diploma in Mechatronics Engineering from Singapore Polytechnic (Graduated 1998) and (3) Diploma in Computer Networking from Singapore Polytechnic (Graduated 2017).

But how come I don't even have \$15,000 in my bank account? I am already 45 years old! This is because I am a Targeted Individual. A Targeted Individual is a person who is persecuted, targeted, blacklisted and marked by the government. I offended Minister Mentor Lee Kuan Yew 16 years ago in the year 2007. As a result, I am blacklisted by the Singapore Government. For the past 16 years, I frequently get fired from jobs. I am extremely under-employed for a person who has a university degree. Governments also arrange for Targeted Individuals to have numerous health and medical problems (aka "Slow Kill", aka government-induced health and medical problems). Because I frequently get fired from jobs for the past 16 years, I frequently complain on the internet and social media about government persecution. My situation only start to improve in the year 2017 by a little bit. My working life proper only starts when I am 39 years old, in the year 2017.

Since 2017, I have been working as an IT Consultant and IT Support Engineer, albeit only for about 4 years. I may not have stellar/amazing IQ but I shouldn't be doing so badly right?! As compared to the mentally disabled person and un-educated cleaner. How come I don't even have \$15,000 in my bank account? I am already 45 years old! This is because I am a Targeted Individual! A Targeted Individual is a person who is persecuted, targeted, blacklisted and marked by the government. I am persecuted, targeted, marked and blacklisted by the Singapore Government after offending Minister Mentor Lee Kuan Yew in the year 2007, some 16 years ago. Because I offended Minister Mentor Lee Kuan Yew in 2007, I frequently get fired from jobs for more than 10 years after university graduation in Dec 2006. That's why I have super super low savings in my bank account. And that's why I also have super super low savings in my CPF account.

Most people at my age in Singapore should have about \$300,000 in their bank accounts. I have less than \$15,000 in my bank account.

Most people at my age in Singapore should have around \$500,000 in their CPF accounts. I only have about \$100,000 in my CPF account, just surpassed the \$100,000 mark when I am 45 years old.

## **Actions taken during Disaster Recovery for client whose IBM Megaraid controller has failed (2023-02-25 12:29) - Turritopsis Dohrnii Teo En Ming**

Subject: Actions taken during Disaster Recovery for client whose IBM Megaraid controller has failed

Good day from Singapore,

We have a client, an engineering company, in Woodlands Link Singapore. They have an old IBM System X server (hereinafter referred to as the Old Server).

Their IBM Megaraid controller (FRU 46C9111) malfunctioned recently.

This is the error message:

Critical Message

L2/L3 Cache error was detected on the RAID controller. Please contact technical support to resolve this issue. Press 'X' to

continue or else power off the system, replace the controller and reboot.

Enter Your Input Here:

As a result of the RAID controller malfunction, their Windows Server 2012 R2 cannot boot up.

On 21 Feb 2023 Tuesday, I had to prepare a new temporary server and perform data restore (aka Disaster Recovery).

Client has issued an Asus ExpertCenter D700SA SFF PC with Windows 10 Home.

However Veritas Backup Exec 22 Server cannot be installed on Windows 10 Home. It has to be installed on a Windows Server with a Domain Controller. Backup Exec cannot be installed in a Read Only Domain Controller (RODC).

These are the actions I have performed.

1. Format Windows 10 Home on Asus ExpertCenter D700SA SFF PC (this is the new temporary server).
2. Install Windows Server 2022 Standard evaluation copy on the new temporary server.
3. Install Active Directory Domain Services role on Windows Server 2022 Standard.
4. Promote Windows Server 2022 Standard to Domain Controller.
5. Install Veritas Backup Exec 22 Server in Windows Server 2022 Standard.
6. Unjoin Synology NAS DS920+ from Old domain controller since the ServerBackup folder cannot be accessed.
7. Turn off Windows Firewall in Windows Server 2022 Standard for simplicity.
8. Join Synology NAS DS920+ to the New domain controller. ServerBackup folder can now be accessed. Now we can go to the next step.
9. Import Backup Sets residing on Synology NAS DS920+ (this was created by Veritas Backup Exec Server on the Old Server).
10. Click Inventory and Catalog Now in Veritas Backup Exec 22 Server so that we can see the Backup Sets.
11. Perform data restore (this took 31 hours in total, restoring 1.48 TB of data).
12. Create shared folders on the new temporary server so that all users could access restored data in the interim.
13. Convert the new temporary server into a Print Server by installing printer drivers for all printers and sharing out the printers so that all users can print.
14. Install Microsoft SQL Server 2019 Standard trial version and SQL Server Management Studio version 19 so that Helen could restore WinPack database (15 GB) on the new temporary server.
15. By 23 Feb 2023 Thursday afternoon, users could access restored data on the new temporary server.

On 24 Feb 2023 Friday, the replacement RAID controller arrived. I reached the seller at Changi Business Park Central 2 Singapore to collect the replacement RAID controller at 9.00 AM in the morning. However, the replacement RAID controller came without an add-on card.

These are what I have done on the morning of 24 Feb 2023 Friday.

1. Remove FAULTY RAID controller from the Old Server.
2. Detach add-on card from the faulty RAID controller.
3. Install add-on card on the replacement RAID controller.
4. Install replacement RAID controller on the Old Server.
5. Power up the IBM System X server.
6. Windows Server 2012 R2 boots up automatically without any configuration on the replacement RAID controller.
7. Now all users can access the Old Server. Everyone is happy.

We are going to propose a new hardware server for the client. Please suggest specifications for the new hardware server and new operating system.

Thank you very much.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Republic of Singapore

**CVE-2023-20032 and CVE-2023-20052 Latest security flaws in Cisco's open source ClamAV antivirus engine (2023-02-20 22:03) - Turritopsis Dohrnii Teo En Ming**

Subject: CVE-2023-20032 and CVE-2023-20052 Latest security flaws in Cisco's open source ClamAV antivirus engine

Good day from Singapore,

I have just come across this article at The Register. Thought of sharing it.

Article: Antivirus apps are there to protect you – Cisco's ClamAV has a heckuva flaw

Link: [1][https://www.theregister.com/2023/02/17/cisco\\_clamav\\_critical\\_flaw/](https://www.theregister.com/2023/02/17/cisco_clamav_critical_flaw/)

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Turning on and using GPU Hardware Acceleration

=====

Click File > Settings > Program.

Click Device options tab.

Import: NVIDIA GeForce GTX 1050 Ti

Processing: NVIDIA GeForce GTX 1050 Ti

Export: NVIDIA GeForce GTX 1050 Ti

Click OK.

Adding watermarks

=====

Click Templates on the right pane.

Under Title templates, click My Own.

Add your watermark text in the Title field.

Font: Arial Black

Font Size: 8

Click Bold.

Click Align center in the text box.

Click Shadow.

Under Options, un-click Only apply visible TV area.

Under Title object, click Center titles horizontally.

Export movie

=====

Click File > Export movie > Video as MPEG-4

Presets: MP4 UltraHD 3840x2160 25p

Resolution: 3840x2160

Frame rate: 25

Ratio: 16:9

Interlace: Progressive

Media: Video+Audio

Stereo3D: Standard (2D)

Click Advanced.

Average bit rate (kBit/s): 30000

Maximum bit rate (kBit/s): 45000

Coding quality: Balanced

hardware encoding: multiple GPU

Click OK.

Click OK.

**I cannot render 4K videos any more using Vegas Movie Studio 15.0 Platinum after Windows Update (2023-02-13 22:56) - Turritopsis Dohrnii Teo En Ming**

Subject: I cannot render 4K videos any more using Vegas Movie Studio 15.0 Platinum after Windows Update [QUESTION]

Good day from Singapore,

I cannot render 4K videos any more using Vegas Movie Studio 15.0 Platinum after Windows Update.

When I use NVIDIA GPU acceleration, the rendered 4K videos are corrupted and not playable.

When I switch to AMD IGD GPU acceleration, the rendered 4K videos are fine.

Apparently Windows Updates made some crippling changes to NVIDIA GPU drivers.

How can I resolve this issue?

Looking forward to your reply.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Singapore

12 Feb 2023 Sunday

[ANSWER]

Hi,

This issue happens on both my Aftershock gaming laptop and home desktop computer. So it is definitely not a hardware problem.

I have upgraded my NVIDIA GPU driver on my Aftershock gaming laptop from version 22.21.13.8205 (release date 1/5/2017) to version 528.49 WHQL (release date 2023.2.8) (GeForce Game Ready Driver).

However, it still did not solve the problem. Vegas Movie Studio 15.0 Platinum still churned out corrupted 4K videos which are not playable using NVIDIA GPU hardware acceleration. There are no issues with NVIDIA GPU driver.

I suspect Magix made some changes to Vegas Movie Studio 15.0 Platinum to make 4K video rendering using NVIDIA GPU hardware acceleration impossible, resulting in corrupted and unplayable 4K videos.

I was forced to upgrade to Magix Movie Studio 2023 Platinum for USD \$50 on 12 Feb 2023 Sunday. Now I able to render 4K videos using NVIDIA GPU hardware acceleration without corruption. Rendered 4K videos are now playable.

As the issue has been resolved by spending money to upgrade my video editing software, I will close this ticket.

Thank you very much.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Singapore

Subject: I have successfully mounted iSCSI targets from Synology NAS in Debian 11 Linux server for a construction company at Defu Lane 10, Singapore on 10 Feb 2023 Fri

Good day from Singapore,

I have successfully mounted iSCSI targets from Synology NAS in Debian 11 Linux server for a construction company at Defu Lane 10, Singapore on 10 Feb 2023 Friday.

These are the 5 reference guides I have followed. Please use the following guides in sequence.

[1] How to Configure Static IP on Debian 10

Link: [1]<https://www.snel.com/support/how-to-configure-static-ip-on-debian-10/>

[2] Debian SourcesList

Link: [2]<https://wiki.debian.org/SourcesList>

[3] About the /etc/resolv.conf File

Link: [3]<https://docs.oracle.com/en/operating-systems/oracle-linux/6/admin/about-etc-resolve.html>

[4] iSCSI: Introduction and Steps to Configure iSCSI Initiator and Target

Link: [4]<https://calsoftinc.com/blogs/2017/03/iscsi-introduction-steps-configure-iscsi-initiator-target.html>

[5] How Do You Make an iSCSI Target in Synology?

Link: [5]<https://linuxhint.com/make-iscsi-target-synology/#b6>

Please also note that openssh-server was not installed. To install it, run

```
# apt install openssh-server
```

```
Edit /etc/ssh/sshd_config
```

```
and set
```

```
PermitRootLogin yes
```

```
# systemctl restart sshd
```

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**VMware ESXi servers are massively hacked worldwide due to heap-based buffer overflow in OpenSLP (2023-02-09 22:15) - Turrishops Dohrnii Teo En Ming**

Subject: VMware ESXi servers are massively hacked worldwide due to heap-based buffer overflow in OpenSLP

Good day from Singapore,

I am sharing this article for more awareness.

Article: Hackers are mass infecting servers worldwide by exploiting a patched hole

Link: [1]<https://arstechnica.com/information-technology/2023/02/hackers-are-mass-infecting-servers-worldwide-by-exploiting-a-patched-hole/>

[QUOTE]

The vulnerability being exploited to infect the servers is CVE-2021-21974, which stems from a heap-based buffer overflow in OpenSLP, an open network-discovery standard that's incorporated into ESXi. When VMware patched the vulnerability in February 2021, the company warned it could be exploited by a malicious actor with access to the same network segment over port 427. The vulnerability had a severity rating of 8.8 out of a possible 10. Proof-of-concept exploit code and instructions for using it became available a few months later.

[/QUOTE]

Thank you.

Regards,

Mr. Turrishops Dohrnii Teo En Ming

## **Turritopsis Dohrnii Teo En Ming's CPF Account as of 3 Feb 2023 (2023-02-03 21:43)** **- Turritopsis Dohrnii Teo En Ming**

Subject: Turritopsis Dohrnii Teo En Ming's CPF Account as of 3 Feb 2023

CPF Ordinary Account \$41,196

CPF Special Account \$28,687

CPF Medisave Account \$6,678

CPF Investment Scheme \$27,638

Total CPF \$104,199

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 15 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty for eternity. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

Mr. Turritopsis Dohrnii Teo En Ming, 44 years old as of 3 Feb 2023, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

**What is Google doing with its open source teams? (2023-02-03 21:13) - Turritopsis Dohrnii Teo En Ming**

It's all about the money. TCI leader Sir Christopher Hohn, who is reported to have paid himself £1.5 million ( \$1.8 million) a day in 2022, knows all about that. That's six Google employees' yearly salaries a day for those counting at home.

But wait, there's more! Hohn also wants Google to cut "excessive employee compensation." That's rich from someone paying himself over \$75,000 an hour whether he's awake, drinking, or sleeping.

Google would be wisest to stop listening to pushy investors and pay more attention to preserving their real wealth: the company's brilliant developers and leaders.

**January**

**Turritopsis Dohrnii Teo En Ming's CPF Account as of 29 Jan 2023 (2023-01-29 17:49)****- Turritopsis Dohrnii Teo En Ming**

Subject: Turritopsis Dohrnii Teo En Ming's CPF Account as of 29 Jan 2023

CPF Ordinary Account \$40,660

CPF Special Account \$28,508

CPF Medisave Account \$6,449

CPF Investment Scheme \$27,665

Total CPF \$103,282

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 15 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty for eternity. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

Mr. Turritopsis Dohrnii Teo En Ming, 44 years old as of 29 Jan 2023, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

**[REVISIONS] How to install SSL Certificate on Dovecot and Postfix (2023-01-29 17:34)**  
**- Turritopsis Dohrnii Teo En Ming**

Subject: [REVISIONS] How to install SSL Certificate on Dovecot and Postfix

Good day from Singapore,

Author: Mr. Turritopsis Dohrnii Teo En Ming (TARGETED INDIVIDUAL)

Country: Singapore

Date of Implementation: 6 Jan 2023 Friday

**SECTION ON DOVECOT**

=====

```
# cd /etc/dovecot/conf.d
# nano 10-ssl.conf
ssl = yes
ssl_cert = </home/teo-en-ming-corp/2023.crt
ssl_key = </home/teo-en-ming-corp/2023.key
ssl_ca = </home/teo-en-ming-corp/inter2023.crt
# nano /etc/dovecot/dovecot.conf
protocols = imap pop3
!include conf.d/*.conf
```

**SECTION ON POSTFIX**

=====

```
# nano /etc/postfix/main.cf
smtpd_use_tls = yes
smtpd_tls_auth_only = yes
smtpd_tls_key_file = /etc/postfix/2023.key
smtpd_tls_cert_file = /etc/postfix/chain2023.crt
smtpd_tls_CAfile = /etc/postfix/inter2023.crt
Note: chain2023.crt is made by combining 2023.crt and inter2023.crt
```

```
# nano /etc/postfix/master.cf
submission inet n - n - - smtpd
smtps inet n - n - - smtpd
tlsmgr unix - - n 1000? 1 tlsmgr
```

That's all.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Targeted Individual in Singapore

**Singaporean packed up his bags and left for Australia, says life is better overseas (2023-01-29 17:28)****- Turritopsis Dohrnii Teo En Ming**

[1]

**SGWhispers**  
on Friday

#9262: Life is better overseas

Lol. I was a singaporean, currently Australian. Am in my 30s. Recently watch Lawrence wong video on "heart" work and income disparity. Please la.

I graduated from ITE. my whole life, everyone in sg looked down at me. When I started working as an ite grab, I was only paid \$1.6k and was told I "deserve" that pay as I am from ite.

Packed my bags, left for aussie and am now a plumber. I earn more than 100k here, even after paying my taxes, I am easily earning 80k.

What kinda ite grad, in sg, doing hands work like plumbing, can earn 80k after taxes. Moreover, I am nt a boss of a plumbing company. Just a simple plumber.

Ppl like us, in nursing, construction, plumbing all should leave sg. Other places better. Pls la, minister in sg talk cock only. End of the day, the poor plumber pay will increase from 1.6k to 1.8k max lo. Coz in sg, always will have cheaper labour across the causeway mah.

**Turritopsis Dohrnii Teo En Ming's CPF Account as of 6 Jan 2023 (2023-01-22 21:28)**  
**- Turritopsis Dohrnii Teo En Ming**

Subject: Turritopsis Dohrnii Teo En Ming's CPF Account as of 6 Jan 2023

CPF Ordinary Account \$40,663

CPF Special Account \$28,508

CPF Medisave Account \$7,894

CPF Investments \$26,640

Total CPF \$103,705

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 15 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty for eternity. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

Mr. Turritopsis Dohrnii Teo En Ming, 44 years old as of 6 Jan 2023, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

**[Virtualmin] Samsung email client on my Android phone rejects Let's Encrypt SSL certificates installed on Dovecot and Postfix after server migration (2023-01-18 22:55) - Turritopsis Dohrnii Teo En Ming**

Subject: [Virtualmin] Samsung email client on my Android phone rejects Let's Encrypt SSL certificates installed on Dovecot and Postfix after server migration

Good day from Singapore,

I have actually installed Thunderbird email client on my Windows 10 laptop and it DOES NOT complain about Let's Encrypt SSL certificates installed on Dovecot and Postfix after server migration.

However, when I try to add email accounts using Samsung email client on my Android phone, it rejects Let's Encrypt SSL certificates installed on Dovecot and Postfix after server migration, and email messages refuse to sync.

It's only when I choose SSL (Accept all certificates) and TLS (Accept all certificates) in Server Settings in Samsung email client, that email messages start to sync.

What could be the cause of the problem?

I am trying to resolve the issue on 2 affected domain names.

teo-en-ming.com

teo-en-ming-corp.com

When I try to run SSL Checker at [1]<https://www.sslshopper.com/ssl-checker.html> against mail.teo-en-ming-corp.com:993, it says:

"The certificate is not trusted in all web browsers. You may need to install an Intermediate/chain certificate to link it to a trusted root certificate. Learn more about this error. The fastest way to fix this problem is to contact your SSL provider."

IMAP SSL Server uses port 993.

Please advise.

Thank you very much.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Singapore

## Successful Migration of Slave DNS Server (Webmin only) from CentOS 7.9 to Rocky Linux 9.1 (2022-12-18 19:28) - Turritopsis Dohrnii Teo En Ming

Subject: Successful Migration of Slave DNS Server (Webmin only) from CentOS 7.9 to Rocky Linux 9.1

Good day from Singapore,

I have successfully migrated my slave DNS server (Webmin only) from CentOS 7.9 to Rocky Linux 9.1 on 18 Dec 2022 Sun.

I have shared my guides at the following links.

Post: Migrating Slave DNS Server (Webmin only) from CentOS 7.9 to Rocky Linux 9.1

Link: [1][https://tdtembook2.blogspot.com/2022/12/migrating-slave-dns-server-web min-only.html](https://tdtembook2.blogspot.com/2022/12/migrating-slave-dns-server-web-min-only.html)

Post: Migrating Slave DNS Server (Webmin only) from CentOS 7.9 to Rocky Linux 9.1

Link: [2][https://tdtembook2.wordpress.com/2022/12/18/migrating-slave-dns-server -webmin-only-from-centos-7-9-to-rocky-linux-9-1/](https://tdtembook2.wordpress.com/2022/12/18/migrating-slave-dns-server-webmin-only-from-centos-7-9-to-rocky-linux-9-1/)

I hope you will find my guides useful.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Singapore

## Migrating Slave DNS Server (Webmin only) from CentOS 7.9 to Rocky Linux 9.1 (2022-12-18 19:19) - Turritopsis Dohrnii Teo En Ming

Subject: Migrating Slave DNS Server (Webmin only) from CentOS 7.9 to Rocky Linux 9.1

Good day from Singapore,

Author: Mr. Turritopsis Dohrnii Teo En Ming (TARGETED INDIVIDUAL)

Country: Singapore

Date: 18 Dec 2022 Sunday

I have successfully migrated my slave DNS server (Webmin only) from CentOS 7.9 to Rocky Linux 9.1 on 18 Dec 2022 Sunday from 4.40 PM to 6.20 PM. Singapore Time.

Detailed instructions are shown below.

### DETAILED INSTRUCTIONS

=====

Backing up the Slave DNS Server running CentOS 7.9

=====

There are only 7 files to backup:

[a] /etc/named.conf

[b] 6 hosts files in /var/named/slaves

Reinstalling Virtual Private Server (VPS) from CentOS 7.9 to Rocky Linux 9.1

=====

Login to Contabo Portal.

Reinstall your VPS from CentOS 7.9 to Rocky Linux 9.1. The process only takes a few minutes. It is blazingly fast.

```

CPU load averages

0.17 (1 min) 0.15 (5 mins) 0.08 (15 mins)

Real memory

225.22 MiB used / 541.21 MiB cached / 7.5 GiB total

Local disk space

11.64 GiB used / 184.11 GiB free / 195.76 GiB total

FOLLOW SECTION G - Install Firewalld on the Slave Server

Follow the notes in Section G of the Master Reference Guide.

FOLLOW SECTION H - Configuring Firewalld on the Slave Server Using Webmin

Follow the notes in Section H of the Master Reference Guide.

FOLLOW SECTION I - Install BIND DNS Server on the Slave Server

=====

Follow the notes in Section I of the Master Reference Guide.

```
# yum install bind
# systemctl enable named
# systemctl start named
# systemctl status named
```

Reference Guide: Menu item in Webmin > Servers missing for "BIND DNS Server".

Link: [8]<https://archive.virtualmin.com/node/59786>

Go to Webmin on your Slave server.

Click Refresh Modules on the left menu.

You should now see BIND DNS Server under Servers.

FOLLOW SECTION J - Open Additional Firewall Ports on the Slave Server Using Webmin

=====

Follow the notes in Section J of the Master Reference Guide.

After creating all the firewall rules in this section,

Apply rules to: Click eth0 then click Apply

Then click Reload FirewallD.

Verification step:

```
[root@vmi701385 ]# firewall-cmd --list-all
public (active)
target: default
icmp-block-inversion: no
interfaces: eth0
sources:
services: cockpit dhcpv6-client ssh
ports: 10000/tcp 53/udp 53/tcp 10001-10010/tcp
protocols:
forward: yes
masquerade: no
forward-ports:
source-ports:
icmp-blocks:
rich rules:
```

RESTORE /ETC/NAMED.CONF AND 6 HOSTS FILES ON THE NEW ROCKY LINUX 9.1 - THIS IS VERY IMPORTANT!!!

=====

```
# mv /etc/named.conf /etc/named.conf.original
```

Upload /etc/named.conf and all the 6 hosts files to the new Rocky Linux 9.1.

```
# systemctl restart named
```

Troubleshooting: DNS Zones Don't Show Up in Webmin (Slave DNS Server) with Rocky Linux 9.1

```
=====
=====
```

```
# chown root:named /etc/named.conf
```

```
# chmod 640 /etc/named.conf
```

```
# cd /var/named/slaves
```

```
# chown root:named *
```

From Iliia (Virtualmin Staff):

[QUOTE]

Hi,

It's known caching bug and @Jamie is aware of it.

To fix this, delete the following file and refresh the page:

```
/etc/webmin/bind8/zone-names
```

[/QUOTE]

Reference guide: DNS zone created in Virtualmin but not showing up in Webmin

Link: [9]<https://forum.virtualmin.com/t/dns-zone-created-in-virtualmin-but-not-showing-up-in-webmin/104389>

```
# cd /etc/webmin/bind8/
```

```
# rm -f zone-names
```

Contents of file zone-names:

```
pidfile _config=/run/named/named.pid
```

```
pidfile=/var/run/named.pid
```

```
version=4
```

```
base=/etc
```

```
no_chroot_config=0
```

CONCLUSION

```
=====
```

You have successfully migrated your slave DNS server (Webmin only) from CentOS 7.9 to Rocky Linux 9.1. Congratulations!

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**[UPDATE 1] How do I migrate my slave DNS server from CentOS 7.9 to Rocky Linux 9.1?**  
(2022-12-17 19:20) - Turritopsis Dohrnii Teo En Ming

Subject: [UPDATE 1] How do I migrate my slave DNS server from CentOS 7.9 to Rocky Linux 9.1?

Good day from Singapore,

I have successfully migrated my Virtualmin master server from CentOS 7.9 to AlmaLinux 9.1.

See [1]<https://forum.virtualmin.com/t/successful-migration-of-virtualmin-master-server-from-centos-7-9-to-almalinux-9-1/118208>

However, I still haven't migrate my slave DNS server.

My slave DNS server is still running CentOS 7.9 and has Webmin installed. Virtualmin is not installed. Since Virtualmin is not installed, there is no Backup and Restore function.

How can I migrate my slave DNS server from CentOS 7.9 to Rocky Linux 9.1 under this circumstance?

Please advise.

Thank you very much.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

## Migrating Virtualmin Master Server from CentOS 7.9 to AlmaLinux 9.1 (2022-12-15 19:12) - Turritopsis Dohrnii Teo En Ming

Subject: Migrating Virtualmin Master Server from CentOS 7.9 to AlmaLinux 9.1

Good day from Singapore,

Author: Mr. Turritopsis Dohrnii Teo En Ming (TARGETED INDIVIDUAL)

Country: Singapore

Date: 15 Dec 2022 Thursday

I have successfully migrated Virtualmin Master Server from CentOS 7.9 to AlmaLinux 9.1 on 14 Dec 2022 Wed from 4.00 PM to 7.30 PM Singapore Time.

Even though I have a fever of 38.5 degrees C on 14 Dec 2022 Wed, I still managed to carry out the migration.

As of 15 Dec 2022 Thursday at 4.30 PM, I still have a mild fever of 37.5 degrees C.

Below are the detailed instructions. Special thanks to Jamie Cameron at Virtualmin.com for providing guidance.

I am not migrating the slave DNS server yet. It is still running CentOS 7.9.

### DETAILED INSTRUCTIONS

=====

#### SECTION A - Installing Virtualmin 7.0.0 on new AlmaLinux 9.1 VPS

=====

```
# wget [1]https://software.virtualmin.com/gpl/scripts/install.sh
```

```
# /bin/sh install.sh
```

Running Virtualmin 7 pre-installation setup:

Syncing system time ..

.. done

Updating CA certificates ..

.. done

Welcome to the Virtualmin GPL installer, version 7.0.0

This script must be run on a freshly installed supported OS. It does not perform updates or upgrades (use your system package manager) or license changes (use the "virtualmin change-license" command).

The systems currently supported by install script are:

Red Hat Enterprise Linux and derivatives

- RHEL 8 and 9 on x86\_64

- Alma and Rocky 8 and 9 on x86\_64

- CentOS 7 on x86\_64

Debian Linux and derivatives

- Debian 10 and 11 on i386 and amd64

- Ubuntu 20.04 LTS and 22.04 LTS on i386 and amd64

If your OS/version/arch is not listed, installation will fail. More

details about the systems supported by the script can be found here:

[2]<https://www.virtualmin.com/os-support>

The selected package bundle is LAMP and the size of install is full. It will require up to 650 MB of disk space.

Exit and re-run this script with `-help` flag to see available options.

Continue? (y/n) y

Cleaning up

[SUCCESS] Installation Complete!

[SUCCESS] If there were no errors above, Virtualmin should be ready

[SUCCESS] to configure at [3]https://vmi1122973.contaboserver.net:100 00 (or [4]https://217.76.54.74:10000).

[SUCCESS] You may receive a security warning in your browser on your first visit.

[SUCCESS] Chromium based browsers, to bypass security warning screen may require

[SUCCESS] you to type 'thisisunsafe' to get to the login page.

Post-Installation Wizard

=====

Introduction

=====

This post-installation wizard allows you to configure Virtualmin optimally for your system. You can make selections depending on whether you want to host websites, email or databases, and based on your system's memory and CPU power.

To continue, click the Next button below. To skip it and use the default settings, click Cancel.

Click Next.

Memory use

=====

Virtualmin can be tuned to improve performance in its user interface and email processing, but at the cost of increased memory use. The best choice depends on how your system will be used.

Preload Virtualmin libraries? Choose Yes, faster UI with more RAM used ( $\approx 40\text{M}$ )

Run email domain lookup server? Choose Yes, faster mail processing with more RAM used ( $\approx 70\text{M}$ )

Click Next.

If your system is going to host domains that will receive a large amount of email, scanning incoming messages for viruses can generate high CPU load. Because scanning is done using the ClamAV scanning server clamd, it will consume RAM even when not processing email. If your system will not be hosting email, virus scanning can be disabled.

Enable virus scanning with ClamAV? Choose Yes, uses up to 2G of RAM

Click Next.

Spam filtering

=====

If your system is going to host domains that will receive a large amount of email, filtering incoming messages for spam can generate significant CPU load. This is due to CPU use by the SpamAssassin mail filter when it is started, which can be avoided by running the SpamAssassin filter server spamd in the background. This consumes RAM, but reduces CPU load and makes mail processing faster.

Run SpamAssassin server filter? Choose Yes, faster mail processing with more RAM used ( $\approx 30\text{M}$ ) and no per-domain settings

Click Next.

Database servers

=====

Virtualmin supports both the MariaDB and PostgreSQL database servers, but you might want to run only one (or neither) on your system. Each consumes RAM when running, even if they are not being used.

Depending on the websites and applications you plan to host, running MariaDB only may be enough, as most web applications do not support or require PostgreSQL. If your system will only be used for mail or DNS hosting, there is no need to run either.

Run MariaDB database server? Yes

Run PostgreSQL database server? No

Click Next.

MariaDB password

=====

To prevent other users on your system from managing the MariaDB database, a password for the root user should be set. Currently the MariaDB password is not set, which is highly insecure.

Set MariaDB password: <removed>

Click Next.

DNS configuration

=====

For DNS zones created by Virtualmin to be resolvable, the primary nameserver record for each zone must be set to something that can itself be resolved by other systems on the Internet.

Primary nameserver: ns1.turritopsis-dohrnii-teo-en-ming.com

Click Skip check for resolvability.

Secondary nameservers (optional): ns2.turritopsis-dohrnii-teo-en-ming.com

Click Next.

All done

=====

Virtualmin post-installation configuration is now complete!

However, you can continue with the wizard to configure optional features.

Click Next.

Password storage

=====

Virtualmin gives you the option of storing plain-text passwords for virtual servers and mailboxes, or storing only one-way encrypted (hashed) passwords. Plain text passwords are more convenient, but less secure if your system is compromised. However, with hashed passwords enabled, password recovery for virtual servers will not be possible, and database password for new servers will be different from the administration password, and will be randomly generated.

Password storage mode: Only store hashed passwords

Click Next.

MariaDB database size

=====

MariaDB can be configured to trade off memory use for performance, depending on how much RAM your system has and how heavily you expect the database to be used.

MariaDB configuration size: Keep MariaDB system defaults

Click Next.

SSL key directory

=====

Virtualmin gives you the option of keeping SSL certificates and keys in each virtual server’s home directory, or another location under /etc. The former is easier to manage, but introduces the risk that server owners may cause your webserver to fail to start if they delete the certificate file.

Location for SSL certificates: Per-domain directory under /etc/ssl/virtualmin

Click Next.

Virtualmin can create a default virtual server that will serve web requests to your system that don’t match any other domain. It can also be used to request a Let’s Encrypt SSL certificate for use by Virtualmin’s own UI.

Setup default virtual server? No, thanks

Click Next.

Additional post-installation configuration is now complete!

Click Finish.

### SECTION B - Backing up Virtualmin Virtual Servers on old CentOS 7.9 VPS

=====

Refer to my guide.

Reference guide: Have I performed my backups using Virtualmin GUI correctly?

Link a: [5]<https://sourceforge.net/p/webadmin/mailman/message/37744989/>

Link b: [6]<https://marc.info/?l=webmin-l &m=167038794008036 &w=2>

### SECTION C - Transferring Backup Files From CentOS 7.9 VPS to AlmaLinux 9.1 VPS

=====

Download all the 20 backup files from CentOS 7.9 Linux server to your laptop using WinSCP.

Upload all the 20 backup files from your laptop to AlmaLinux 9.1 server using WinSCP.

The backup files should be uploaded to /restore directory on AlmaLinux 9.1 server.

### SECTION D - Restore Backups in AlmaLinux 9.1 Server

=====

Login to Virtualmin.

Click Backup and Restore.

Click Restore Virtual Servers.

Restore Virtual Servers Page

=====

Source and format

=====

Restore source: Local file or directory

Click and choose /restore

Features and settings

=====

Features to restore: Restore all features

Virtualmin settings to restore: Select all

Other restore options

=====

Re-allocate UIDs and GID: Yes

Just re-import server details: No

Delete and re-create virtual servers: No

IPv4 address for restored servers: Shared, on IP 217.76.54.74

IPv6 address for restored servers: Shared, on IP 2a02:c206:2112:2973:0000:0000:0000:0001

Click Show What Will Be Restored

Checking contents of the backup ..

.. found 6 virtual servers and 8 global virtualmin settings

Information! The following features were enabled in one or more of the domains in the backup, but are not enabled : Webalizer reporting

Without them, some functions of the restored virtual servers may not work.

Warning! Are you sure you want to restore the selected domains and features from local file /restore? Any existing data for the features in these domains will be over-written!

SECTION E - Changing IP Address of Virtualmin Master Server (Primary DNS Server) at your Domain Registrar

=====

Refer to the following guide.

Reference guide: [NAMECHEAP] How can I update my personal nameserver's IP address?

Link: [7]<https://www.namecheap.com/support/knowledgebase/article.aspx/292/10/how-can-i-update-my-personal-nameservers-ip-address/>

## SECTION F - Checking Virtualmin Configuration

=====

The status of your system is being checked to ensure that all enabled features are available and properly configured ..

Your system has 7.5 GiB of memory, which is at or above the Virtualmin recommended minimum of 256 MiB

BIND DNS server is installed

Mail server Postfix is installed and configured

Postfix is configured to support per-domain outgoing IP addresses

PHP execution mode fcgid was selected in the default template, but is not supported on this system, and now will be changed to none

Apache is installed

CGI scripts can be executed using FCGIwrap

Apache supports HTTP/2 on your system

The following PHP execution modes are available : fpm

The following PHP-FPM versions are available : 8.0.20 (php-fpm)

PHP versions have changed to 8.0 since last check. Regenerating any missing php.ini files

Webalizer does not appear to be installed on your system, or has not yet been set up properly in Webmin's Webalizer Logfile Analysis module. If your system does not use Webalizer, it should be disabled in Virtualmin's module configuration page

.. your system is not ready for use by Virtualmin

## SECTION G - System Information

=====

System hostname

vmi1122973.contaboserver.net (217.76.54.74)

Operating system

AlmaLinux 9.1

Webmin version

2.001

Usermin version

1.860

Virtualmin version

7.3

Authentic theme version

20.01.1:5

Time on system

Wednesday, December 14, 2022 10:35 AM

Kernel and CPU

Linux 5.14.0-162.6.1.el9\_1.x86\_64 on x86\_64

Processor information

AMD EPYC 7282 16-Core Processor, 4 cores

System uptime

19 hours, 12 minutes

Running processes

171

CPU load averages

0.28 (1 min) 0.37 (5 mins) 0.41 (15 mins)

Real memory

2.43 GiB used / 4.71 GiB cached / 7.5 GiB total

Local disk space

17.53 GiB used / 178.22 GiB free / 195.76 GiB total

Package updates

All installed packages are up to date

SECTION H - Tying up some loose ends for the Slave DNS Server

=====

Part 1

=====

Because I haven't migrate the slave DNS server (it is still running CentOS 7.9), we need to tie up some loose ends.

Use the following guide.

Reference guide: [PART 8 - DRAFT 2] [Virtualmin and Webmin] Teo En Ming's Notes for Setting Up Slave DNS Server

Link a: [8]<https://sourceforge.net/p/webadmin/mailman/message/37373922/>

Link b: [9][https://marc.info/?l=webmin-l &m=163528877500627 &w=2](https://marc.info/?l=webmin-l&m=163528877500627&w=2)

Link c: [10]<https://pastebin.com/raw/hVShREH6>

Part 2

=====

Then you need to login to the Webmin of the slave DNS server.

Click Servers > BIND DNS Server

For EACH AND EVERY DNS Zone, click on the DNS Zone.

Click Edit Zone Options.

Master servers: 217.76.54.74

Allow transfers from.. Click Listed.. and then specify 217.76.54.74

Click Save.

Part 3

=====

Putty/SSH into the slave DNS server.

# systemctl restart named

Run the below command for every domain name.

# rndc reload <domain name>

Reference guide: Force dns zone transfer

Link: [11]<https://archive.virtualmin.com/node/14479>

## CONCLUSION

=====

You have successfully migrated your Virtualmin master server from CentOS 7.9 to AlmaLinux 9.1!

## ADDITIONAL READING MATERIALS

My previous pair of Frank Williams black leather shoes is spoilt after about 10.5 months.

**Have I performed my backups using Virtualmin GUI correctly?** (2022-12-08 21:30)**- Turritopsis Dohrnii Teo En Ming**

Subject: Have I performed my backups using Virtualmin GUI correctly?

Good day from Singapore,

I would like to find out if I have performed my backups using Virtualmin GUI correctly. In particular, I would like to find out if my 100,000 email messages spanning several mailboxes have been backed up. This is very important because I am planning to migrate CentOS 7.9 to Rocky Linux 9.1, AlmaLinux 9.1 or RHEL 9.1. Please advise. Thank you.

## DETAILED STEPS

=====

Login to Virtualmin.

Click Backup and Restore.

Click Backup Virtual Servers.

Backup Virtual Servers Page

=====

Virtual servers

=====

Servers to save: All virtual servers

Click "Include sub-servers of those selected"

Limit to servers on plan: Any plan

Features and settings

=====

Features to backup: Backup all features

Virtualmin settings to also backup: Click "Select all"

Destination and format

=====

Backup destinations: Local file or directory

/virtualmin-backup

Additional destination options: ignore these options for the moment

Backup format: One file per server

Action on error: Halt the backup immediately

Backup compression format: Default

Backup level: Full (all files)

Click Backup Now.

## **Turritopsis Dohrnii Teo En Ming's CPF Account as of 6 Dec 2022 (2022-12-06 21:37)** **- Turritopsis Dohrnii Teo En Ming**

Subject: Turritopsis Dohrnii Teo En Ming's CPF Account as of 6 Dec 2022

CPF Ordinary Account \$38,874

CPF Special Account \$26,724

CPF Medisave Account \$7,496

CPF Investments \$26,872

Total CPF \$99,966

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 15 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty for eternity. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

Mr. Turritopsis Dohrnii Teo En Ming, 44 years old as of 6 Dec 2022, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

**Are Meta/Facebook servers using Fedora Linux? (2022-12-06 21:12) - Turritopsis Dohrnii Teo En Ming**

Subject: Are Meta/Facebook servers using Fedora Linux?

Good day from Singapore,

I have just come across this article.

Article: Fedora's FESCo Rejects The Idea Of "-fno-omit-frame-pointer" As Default Compiler Flag

Link: [1]<https://www.phoronix.com/news/Fedora-Rejects-No-Omit-FP>

[QUOTE]

As a change proposal first initiated by Meta/Facebook developers, they wanted -fno-omit-frame-pointer and -mno-omit-leaf-frame-pointer to be added to the default C/C++ compilation flags.

...snipped...

Meta engineers believe that any performance cost is small and worth it while SUSE engineers previously cited around possible 5 10 % regressions.

[/QUOTE]

From the above quotes, I thought that Meta/Facebook servers are using Fedora Linux, or at least Linux servers.

Anyone can confirm?

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**Can I become a domain registrar by installing FRED? (2022-11-23 22:28)**  
- Turritopsis Dohrnii Teo En Ming

Subject: Can I become a domain registrar by installing FRED?

Good day from Singapore,

Can I become a domain registrar by installing FRED?

I already have a web hosting control panel (Virtualmin). If I can become a domain registrar, it will be very good.

I always want to become an entrepreneur.

Looking forward to your reply.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**RHEL 9.1, AlmaLinux 9.1, Rocky Linux 9.1: Which one works BEST with Virtualmin?  
(2022-11-23 22:26) - Turritopsis Dohrnii Teo En Ming**

Subject: RHEL 9.1, AlmaLinux 9.1, Rocky Linux 9.1: Which one works BEST with Virtualmin?

## SYSTEM INFORMATION

OS type and version

CentOS 7.9

Webmin version

2.001

Virtualmin version

7.3

Related packages

## SUGGESTED

Good day from Singapore,

I am planning to migrate my CentOS 7.9 to either one of RHEL 9.1, AlmaLinux 9.1 or Rocky Linux 9.1. But I cannot make up my mind at all. I have no idea which one is the best to install Virtualmin. Please advise which OS works BEST with Virtualmin, without any hiccups.

You can read more about my consideration at the following links.

[1] Can I use the Elevate tool to migrate my CentOS 7.9 with Virtualmin/Webmin to AlmaLinux 9.0?

Link: [1]<https://lists.almalinux.org/archives/list/users@lists.almalinux.org/thread/7PNBCQ-AJ2W7AFWV5OD6TTF5NMKR6AAVR/>

[2] Is it possible to upgrade CentOS 7.9 with Virtualmin/Webmin to Rocky Linux 9.0?

Link: [2]<https://lists.resf.org/archives/list/rocky@lists.resf.org/thread/JFDR44IFLRDNKASO2YQ5MIFOHPEURE36/>

Please advise whether it is possible to migrate CentOS 7.9 to RHEL 9.1, AlmaLinux 9.1 or Rocky Linux 9.1. I am wondering if a FRESH installation of RHEL 9.1/AlmaLinux 9.1/Rocky Linux 9.1 and FRESH installation of Virtualmin is the only way and the best way out. But how can I transfer all the websites, blogs, forums, and mailboxes FROM CentOS 7.9 if I do a FRESH installation of everything???

Please advise. Thank you.

Mr. Turritopsis Dohrnii Teo En Ming

Singapore

## I have discovered that pfSense firewall is using Unbound DNS resolver (2022-11-19 22:05) - Turritopsis Dohrnii Teo En Ming

Subject: I have discovered that pfSense firewall is using Unbound DNS resolver

Good day from Singapore,

I have discovered that my pfSense community edition firewall version 2.6.0 is using Unbound DNS resolver.

To verify this for yourself, please login to the web configurator of pfSense firewall. Click Status -> Services.

You will be able to see Unbound in the list of firewall services.

This goes to show that Unbound is a high quality open source software project, because it is being used in the \*MOST POPULAR\* open source firewall in the world.

As pfSense firewall is based on FreeBSD, can I use Unbound DNS resolver in Linux distros?

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**Publishing DNS NS records for dnsmdist DNS load balancers (2022-11-18 23:22)**  
**- Turrishops Dohrnii Teo En Ming**

Subject: Publishing DNS NS records for dnsmdist DNS load balancers

Good day from Singapore,

If I deploy 2 dnsmdist DNS load balancers, one as primary and the other as secondary, I would only need to publish DNS NS records for these 2 DNS load balancers?

I do not need to publish DNS NS records for the backend DNS servers, which are not DNS load balancers.

Am I right?

Please advise.

Thank you.

## Can I use the Elevate tool to migrate my CentOS 7.9 with Virtualmin/Webmin to AlmaLinux 9.0? (2022-11-16 22:54) - Turrishops Dohrnii Teo En Ming

Subject: Can I use the Elevate tool to migrate my CentOS 7.9 with Virtualmin/Webmin to AlmaLinux 9.0?

Good day from Singapore,

I understand both CentOS Linux and AlmaLinux follow Red Hat Enterprise Linux (RHEL).

I have 2 CentOS 7.9 Linux virtual private servers (VPS) in Europe. They are running Virtualmin/Webmin web hosting control panel in master and slave configuration.

Unfortunately, the end of life (EOL) date for CentOS 7.9 is 30 June 2024, which is less than 2 years away.

Can I use the Elevate tool to migrate my CentOS 7.9 with Virtualmin/Webmin to AlmaLinux 9.0? Is it technically impossible or will result in too many complications?

Should I install AlmaLinux 9.0 from fresh and then install Virtualmin instead? If I choose this route, I will need to ask Virtualmin developers how I can migrate the web hosting control panel from CentOS 7.9 to AlmaLinux 9.0.

Please advise.

Thank you.

Regards,

**GUI configuration utility for NSD DNS nameserver (2022-11-16 20:08) - Turritopsis Dohrnii Teo En Ming**

Subject: GUI configuration utility for NSD DNS nameserver

Good day from Singapore,

Is there a GUI configuration utility for NSD DNS nameserver? I would like to be able to configure the DNS server, zone files and DNS records using GUI like what we do for the DNS server in Windows Server Active Directory Domain Controller. I am used to using the GUI configuration interface.

Thank you.

**Is it possible to upgrade CentOS 7.9 with Virtualmin/Webmin to Rocky Linux 9.0? (2022-11-16 20:05)**

- Turrishops Dohrnii Teo En Ming

Subject: Is it possible to upgrade CentOS 7.9 with Virtualmin/Webmin to Rocky Linux 9.0?

Good day from Singapore,

I understand both CentOS Linux and Rocky Linux follow Red Hat Enterprise Linux (RHEL).

I have 2 CentOS 7.9 Linux virtual private servers (VPS) in Europe. They are running Virtualmin/Webmin web hosting control panel in master and slave configuration.

Unfortunately, the end of life (EOL) date for CentOS 7.9 is 30 June 2024, which is less than 2 years away.

Is it possible to upgrade CentOS 7.9 with Virtualmin/Webmin to Rocky Linux 9.0? Is it technically impossible or too troublesome and complicated?

Please advise.

Thank you.

**There are so many ways of installing Keycloak Server (2022-11-15 23:41) - Turritopsis Dohrnii Teo En Ming**

Subject: There are so many ways of installing Keycloak Server

Good day from Singapore,

Referring to the guides at [1]<https://www.keycloak.org/guides>

There are so many ways of installing Keycloak Server.

1. Install on bare metal
2. Install on Docker
3. Install on Podman
4. Install on Kubernetes
5. Install on Openshift

Which one should I choose?

**How do I install and configure ISC Kea DHCP Server on RHEL 9.0?** (2022-11-15 00:02)  
- Turritopsis Dohrnii Teo En Ming

Subject: How do I install and configure ISC Kea DHCP Server on RHEL 9.0?

Good day from Singapore,

I understand Kea is a relatively new implementation.

How do I install and configure ISC Kea DHCP Server on RHEL 9.0?

Are there any well written documentation?

Not sure whether to use the classic/legacy ISC DHCP Server or the new ISC Kea DHCP Server.

Thank you.

**Do most commercial firewall appliances and VPN routers have OpenVPN-powered SSL VPN?  
(2022-11-14 23:56) - Turrishops Dohrnii Teo En Ming**

Subject: Do most commercial firewall appliances and VPN routers have OpenVPN-powered SSL VPN?

Good day from Singapore,

On 10 Nov 2022, I saw the logs from Sophos XG210 Firewall SSL VPN client for Windows. Below are a few lines from the logs.

2022-11-10 14:10:03 WARNING: Compression for receiving enabled. Compression has been used in the past to break encryption. Sent packets are not compressed unless "allow-compression yes" is also set.

2022-11-10 14:10:03 DEPRECATED OPTION: --cipher set to 'AES-128-CBC' but missing in --data-ciphers (AES-256-GCM:AES-128-GCM). Future OpenVPN version will ignore --cipher for cipher negotiations. Add 'AES-128-CBC' to --data-ciphers or change --cipher 'AES-128-CBC' to --data-ciphers-fallback 'AES-128-CBC' to silence this warning.

2022-11-10 14:10:03 OpenVPN 2.5.6 Windows-MSVC [SSL (OpenSSL)] [LZO] [LZ4] [PKCS11] [AEAD] built on Apr 22 2022

2022-11-10 14:10:03 Windows version 10.0 (Windows 10 or greater) 64bit

2022-11-10 14:10:03 library versions: OpenSSL 1.1.1n 15 Mar 2022, LZO 2.10

Without question, this goes to show that the SSL VPN Server in Sophos XG210 firewall appliance is powered by OpenVPN.

Do most commercial firewall appliances and VPN routers have OpenVPN-powered SSL VPN? Is there an official list?

Thank you.

Regards,

Mr. Turrishops Dohrnii Teo En Ming

**Apache HTTP Server dependency on OpenSSL (2022-11-10 22:31) - Turritopsis Dohrnii Teo En Ming**

Subject: Apache HTTP Server dependency on OpenSSL

Good day from Singapore,

I read that Apache HTTP Server depends on/requires OpenSSL 1.1.1 to operate a TLS 1.3 web server.

Can we use OpenSSL 3.0.7 instead of OpenSSL 1.1.1? Is it supported?

OpenSSL versions 3.0.0 through 3.0.6 have CVE-2022-3602 and CVE-2022-3786 security vulnerabilities, so we need to avoid these versions.

Please advise.

Thank you.

**Is it possible for ClamWin Free Antivirus to have on-access real-time protection scanner in the near future? And ransomware protection as well? (2022-11-10 22:27) - Turritopsis Dohrnii Teo En Ming**

Subject: Is it possible for ClamWin Free Antivirus to have on-access real-time protection scanner in the near future? And ransomware protection as well?

Good day from Singapore,

Is it possible for ClamWin Free Antivirus to have on-access real-time protection scanner in the near future? And ransomware protection as well?

Are there any technical difficulties in implementing real-time protection for ClamWin Free Antivirus?

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**Facebook post by Nicole Ling (2022-11-07 22:33) - Turritopsis Dohrnii Teo En Ming**

I just saw a Bangkok condo for rent. Comes fully furnished with a nice bed, sofa, kitchenette, washing machine and living area with gym and swimming pool. I'd say it's pretty decent if you are not looking for luxury accommodation.

Rental? 5500 baht which is SGD180 per month.

Yes you can live comfortably in a condo for \$180 per month in Bangkok. I know it sounds crazy because the condo is much better than your HDB flat.

People who say they can't live outside Singapore because overseas living is expensive should do some math work.

You live in Singapore but you are afraid of the cost of living in other countries?? Are you kidding me?

Housing is way cheaper anywhere else. Grocery is incredibly cheap. Anywhere else from Singapore is way more affordable... Plus higher standard of living.

## I have identified and resolved LAN IP address conflicts and solved the issue of connecting to SAP server over Fortigate firewall site to site IPsec VPN tunnel on 3 Nov 2022 Thursday (2022-11-06 11:44)

- Turritopsis Dohrnii Teo En Ming

Subject: I have identified and resolved LAN IP address conflicts and solved the issue of connecting to SAP server over Fortigate firewall site to site IPsec VPN tunnel on 3 Nov 2022 Thursday

Good day from Singapore,

I have identified and resolved LAN IP address conflicts and solved the issue of connecting to SAP server over Fortigate firewall site to site IPsec VPN tunnel on 3 Nov 2022 Thursday.

HQ LAN network 192.168.44.0

Branch Office LAN network 192.168.42.0

JW had reported she couldn't access shared folders on the Windows Server Domain Controller in their branch office. Her office desktop computer has both LAN and Wi-Fi connection. I remoted into her office computer and discovered that there are IP address conflicts in their Local Area Network (LAN) by running Advanced IP Scanner on the Domain Controller. There is another device with the same IP address but different MAC address. To address the issue, I have changed JW's IP address from 192.168.42.63 to 192.168.42.201.

For SL, her office desktop computer also has the same IP address with a HP ProCurve Network Switch 2510G-24 which has a different MAC address. To address the issue, I have changed SL's IP address from 192.168.42.62 to 192.168.42.202.

The IP addresses of their office computers are configured statically, and not managed using DHCP auto configuration.

My client had another issue. They could not connect to the SAP server on the HQ LAN network. To address this issue, I have accessed their Fortigate firewall and restarted (bring down and then bring up) the site to site IPsec VPN tunnel. This simple solution solved the SAP connection issue.

My client's branch office is located near Orchard Road, Singapore.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**Turritopsis Dohrnii Teo En Ming's CPF Account as of 6 Nov 2022 (2022-11-06 10:58)****- Turritopsis Dohrnii Teo En Ming**

Subject: Turritopsis Dohrnii Teo En Ming's CPF Account as of 6 Nov 2022

CPF Ordinary Account \$38,443

CPF Special Account \$26,581

CPF Medisave Account \$7,360

CPF Investments \$25,521

Total CPF \$97,905

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 15 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty for eternity. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

Mr. Turritopsis Dohrnii Teo En Ming, 44 years old as of 6 Nov 2022, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

**BIND DNS Server named.conf and chroot error after upgrading Virtualmin (2022-11-02 22:26)**

- Turritopsis Dohrnii Teo En Ming

Subject: BIND DNS Server named.conf and chroot error after upgrading Virtualmin

Good day from Singapore,

I have upgraded Virtualmin web hosting control panel Master Server to the following versions on the evening of 1st Nov 2022 Tuesday.

Webmin version: 2.001

Virtualmin version: 7.3

Usermin version: 1.860

Authentic theme version: 20.01.1:5

However, after the Virtualmin and Webmin upgrade, I get the following error messages.

Information!

Virtualmin's configuration has not been checked since it was last updated. Click the button below to verify it now.

Button: Re-check and refresh configuration

Checking Configuration

=====

The status of your system is being checked to ensure that all enabled features are available and properly configured

..

Your system has 7.63 GiB of memory, which is at or above the Virtualmin recommended minimum of 256 MiB

The BIND DNS server version 8 or 9 does not appear to be installed on your system, or has not yet been set up properly in Webmin's BIND DNS Server module. If your system does not use BIND, it should be disabled in Virtualmin's module configuration page

.. your system is not ready for use by Virtualmin

Then I navigate to Webmin > Servers > BIND DNS Server. It says:

The primary configuration file for BIND /var/named/chroot/etc/named.conf does not exist, or is not valid. Create it?

Options:

- Setup nameserver for internal non-internet use only
- Setup as an internet name server, and download root server information
- Setup as an internet name server, but use Webmin's older root server information

Button: Create Primary Configuration File and Start Nameserver

All along, ever since the initial deployment of my Virtualmin web hosting control panel on 18 Oct 2021, I have never run BIND DNS Server in a chroot environment. After upgrading Virtualmin last night, the configuration was suddenly and unexpectedly changed to running BIND DNS Server in a chroot environment. I have no idea why and what happened.

So I did a Google search and found the following discussion threads.

[1] BIND DNS Server is uninstalled after the last upgrade

Link: [1]<https://archive.virtualmin.com/node/32314>

[2] Prevent OS updates from chrooting Bind

Link: [2]<https://archive.virtualmin.com/node/53785>

## Solution

=====

After reading through the above discussion threads, I have solved the problem by performing the following steps.

Click Webmin > Servers > BIND DNS Server

Click Module config at the top left hand corner.

Chroot directory to run BIND under: choose None

Is named.conf under chroot directory? choose No

Click Save.

And now BIND DNS Server should be back running normally, without chroot environment. It will revert back to using /etc/named.conf and zone files in /var/named.

Problem solved! I hope this guide is useful to you.

**SSH Weak Key Exchange Algorithms Enabled on UniFi Wireless Access Points (2022-10-27 21:48)****- Turritopsis Dohrnii Teo En Ming**

Subject: SSH Weak Key Exchange Algorithms Enabled on UniFi Wireless Access Points

Good day from Singapore,

I have discovered that UniFi Wireless Access Points are powered by Busybox.

Vulnerability scanning of my client's corporate network shows SSH weak key exchange algorithms enabled on UniFi wireless access points.

Article: SSH WEAK KEY EXCHANGE ALGORITHMS ENABLED

Link: [1]<https://www.virtuesecurity.com/kb/ssh-weak-key-exchange-algorithms-enabled/>

According to the above article, we must make changes to `/etc/sshd/sshd_config`, especially the `KexAlgorithms` directive.

However, when I putty/SSH into Busybox, I cannot find the file `/etc/sshd/sshd_config`. What SSH server is running inside Busybox?

How can I make changes to the SSH server within Busybox so that I can disable the SSH weak key exchange algorithms?

Please advise.

Thank you.

By the way, I also noticed that Hikvision Face Recognition Terminal Door Access Systems are also powered by Busybox.

I am doing this for an investment company at Keppel Road, Singapore.

**I have successfully installed Godaddy Wildcard SSL certificate in 9 units of Hikvision DS-K1TA70MI-T / DS-K1T341AMF Face Recognition Terminal Door Access Systems on 27 Oct 2022 Thursday (2022-10-27 21:45) - Turritopsis Dohrnii Teo En Ming**

Subject: I have successfully installed Godaddy Wildcard SSL certificate in 9 units of Hikvision DS-K1TA70MI-T / DS-K1T341AMF Face Recognition Terminal Door Access Systems on 27 Oct 2022 Thursday

Good day from Singapore,

Author: Mr. Turritopsis Dohrnii Teo En Ming

Country: Singapore

Date: 27 Oct 2022 Thursday

I have successfully installed Godaddy Wildcard SSL certificate in 9 units of Hikvision DS-K1TA70MI-T / DS-K1T341AMF Face Recognition Terminal Door Access Systems on 27 Oct 2022 Thursday.

Login to the web GUI.

Go to System > Security > Certificate Management

Import Passwords - refer to SSL Private Key

=====

Certificate Type: HTTPS

Upload Certificate: plain.txt

Click Install.

Import Communication Certificate - refer to chained SSL certificate from commercial certification authority

=====

Certificate Type: HTTPS

Upload Certificate: chain.crt

Click Install.

Import CA Certificate - self explanatory

=====

Custom ID: maindoor

Upload Certificate: gd\_bundle-g2-g1.crt

Click Install.

Reboot Hikvision Face Recognition Terminal. You MUST reboot for changes to take effect!

You should now be able to access [1]<https://hikvision.teo-en-ming-corp.com>

I have done this for an investment company at Keppel Road, Singapore.

## I notice that UniFi Cloud Key Gen 2 Plus is missing the nginx package (2022-10-26 22:20) - Turrishops Dohrnii Teo En Ming

Subject: I notice that UniFi Cloud Key Gen 2 Plus is missing the nginx package

Good day from Singapore,

UniFi Cloud Key Gen 2 Plus is powered by Debian GNU/Linux 9.

I notice that it is missing the nginx package.

Can I solve the problem by simply installing the nginx package?

apt install nginx ?? Will it work?

May I know why the UCK G2 Plus is missing the nginx package while all the reference guides on the internet mention that UCK G2 Plus is supposed to have nginx web server?

I saw instructions to stop and start nginx in the UCK G2 Plus.

```
# service nginx stop
```

```
# service nginx start
```

Thank you.

## I have finally figured out how to export Private Key from Fortigate firewall and successfully install Godaddy Wildcard SSL certificate in UniFi Cloud Key Gen 2 Plus Network Controller (2022-10-26 22:16) - Turritopsis Dohrnii Teo En Ming

Subject: I have finally figured out how to export Private Key from Fortigate firewall and successfully install Godaddy Wildcard SSL certificate in UniFi Cloud Key Gen 2 Plus Network Controller

Good day from Singapore,

Author: Mr. Turritopsis Dohrnii Teo En Ming

Country: Singapore

Date: 26 Oct 2022 Wednesday

I have finally figured out how to export Private Key from Fortigate firewall and successfully install Godaddy Wildcard SSL certificate in UniFi Cloud Key Gen 2 Plus Network Controller because I have finally found the correct reference guides! Please refer to the following list.

### Reference Guides

=====

Youtube video: Ubiquiti Networks UniFi OS SSL Certificate Installation

Link: [1]<https://www.youtube.com/watch?v=WxhY71ebc9o>

Guide: Extracting Private Key from FortiGate Firewall

Link: [2][https://infosecmonkey.com/extracting-private-key-from-fortigate-firewall /](https://infosecmonkey.com/extracting-private-key-from-fortigate-firewall/)

Guide: Extracting private key from FortiGate SSL Certificates

Link: [3][https://www.linkedin.com/pulse/extracting-private-key-from-fortigate-s sl-kuganesan-srijeyanthan](https://www.linkedin.com/pulse/extracting-private-key-from-fortigate-s-sl-kuganesan-srijeyanthan)

Guide: How to decrypt an RSA private key and then use it in kyrtool to merge the SSL certificates.

Link: [4][https://support.hcltechsw.com/csm?id=kb\\_article &sysparm\\_article=KB0098900](https://support.hcltechsw.com/csm?id=kb_article&sysparm_article=KB0098900)

Guide: How to Fix an Encrypted SSL Private Key

Link: [5]<https://serverpilot.io/docs/how-to-fix-an-encrypted-ssl-private-key/>

### DETAILED INSTRUCTIONS FROM TEO EN MING

=====

Login to the Fortigate 201F firewall and run the following commands using CLI.

```
config vpn certificate local
```

```
edit <certificate-name>
```

```
show full
```

You will see something like:

```
—BEGIN ENCRYPTED PRIVATE KEY—
```

```
<—snipped—>
```

```
—END ENCRYPTED PRIVATE KEY—
```

Save the above encrypted private key as encrypted.txt in notepad or notepad++ in Windows Server.

Then decrypt the encrypted private key using the openssl linux command.

```
openssl rsa -in encrypted.txt -out plain.txt
```

Download and install Keystore Explorer in Windows Server.

Launch KeyStore Explorer 5.5.1.

Click Create a new KeyStore.

Click JKS.

Click OK.

Click Import Key Pair.

Click OpenSSL.

Click OK.

Uncheck Encrypted Private Key.

Browse OpenSSL Private Key File. (plain.txt)

Browse Certificate(s) File. (chain.crt generated from Godaddy Wildcard SSL certificate)

Click Import.

Enter Alias: unifi

Click OK.

Enter New Password: aircontrolenterprise

Confirm New Password: aircontrolenterprise

Click OK.

Click OK.

Click Save.

Enter New Password: aircontrolenterprise

Confirm New Password: aircontrolenterprise

Save KeyStore As: keystore (filename without extension)

Click Save.

Launch WinSCP in Windows Server.

Transfer keystore file to /srv/unifi/data.

Browse to /data/unifi-core/config. Create backup folder.

Move default/original unifi-core.crt and unifi-core.key to above backup folder.

Upload plain.txt to /data/unifi-core/config as unifi-core.key.

Upload chain.crt (generated from Godaddy Wildcard SSL certificate) to /data/unifi-core/config as unifi-core.crt

Reboot UniFi Cloud Key Gen 2 Plus network controller. You MUST reboot for it to take effect!

SUCCESS!

Browse to [6]<https://cloudkey.teo-en-ming-corp.com> on your favorite web browser. You should see a padlock icon on the browser address bar. This means that the Wildcard SSL certificate was installed correctly.

I started doing it at 5.00 PM and completed doing it at 6.00 PM Singapore time on 26 Oct 2022 Wednesday.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

## I have achieved PARTIAL SUCCESS in installing Godaddy SSL Certificate in UniFi Cloud Key Gen 2 Plus (2022-10-25 22:24) - Turritopsis Dohrnii Teo En Ming

Subject: I have achieved PARTIAL SUCCESS in installing Godaddy SSL Certificate in UniFi Cloud Key Gen 2 Plus

Good day from Singapore,

I am posting here because UniFi Cloud Key Gen 2 Plus is powered by Debian GNU/Linux 9.

I have found many reference guides on installing SSL certificate in UniFi Cloud Key. Please refer to the following list.

[1] How to install a SSL Certificate on Unifi Cloud Key

Link: [1]<https://community.ui.com/questions/How-to-install-a-SSL-Certificate-on-Unifi-Cloud-Key/944dbbd6-cbf6-4112-bff5-6b992fcbf2c4#:text=Rename%20your%20purchased%20SSL%20certificate,Upload%20to%20Cloud%20Key%E2%80%9D%20folder.&text=Before%20we%20restart%20our%20Cloud,your%20SSL%20certificate%20is%20installed>

[2] How to install an SSL Certificate on Unifi Cloud Key?

Link: [2]<https://www.ssldragon.com/blog/install-ssl-certificate-on-unifi-cloud-key/>

[3] Protect the UniFi Cloud Key with a custom SSL certificate

Link: [3]<https://clemens.ms/protect-the-unifi-cloud-key-with-a-custom-ssl-certificate/>

[4] Deploy dehydrated generated certificate to Unifi controller

Link: [4]<https://gist.github.com/jrotello/18ab3e1982d46b04a269dfbc63aa097f>

[5] How to quickly setup SSL certificate on Unifi Cloud Key

Link: [5]<https://community.ui.com/questions/How-to-quickly-setup-SSL-certificate-on-Unifi-Cloud-Key/d991c17f-d7e0-4778-be83-f2a91c47bc63>

[6] Unable to import the certificate into keystore

Link: [6]<https://community.ui.com/questions/Unable-to-import-the-certificate-into-keystore/c9a42223-1d36-40bf-954a-059508d52263>

However, only 2 reference guides worked for me. They are:

[A] How to quickly setup SSL certificate on Unifi Cloud Key (Java method)

Link: [7]<https://community.ui.com/questions/How-to-quickly-setup-SSL-certificate-on-Unifi-Cloud-Key/d991c17f-d7e0-4778-be83-f2a91c47bc63>

[B] Unable to import the certificate into keystore

Link: [8]<https://community.ui.com/questions/Unable-to-import-the-certificate-into-keystore/c9a42223-1d36-40bf-954a-059508d52263>

I shall detail my attempts at following the instructions below. It is not possible to install SSL certificate in the UniFi Cloud Key using Web GUI at all. The only way to do it is through the Command Line Interface (CLI). There is no other way out.

1st Attempt FAILED - following the guide at [9]<https://www.ssldragon.com/blog/install-ssl-certificate-on-unifi-cloud-key/>

```

4th and FINAL ATTEMPT - SUCCESS (using Java method)
```

```
=====
root@Teo-En-Ming-Corporation:/usr/lib/unifi # java -jar lib/ace.jar import _cert 94d3a5414bcb5742.crt gd_bundle-g2-g1.crt
parse gd_bundle-g2-g1.crt (PEM, 3 certs):
found [Go Daddy Secure Certificate Authority - G2]
found [Go Daddy Root Certificate Authority - G2]
found [OU=Go Daddy Class 2 Certification Authority, O="The Go Daddy Group, Inc.", C=US]
parse 94d3a5414bcb5742.crt (PEM, 1 certs): cloudkey.teo-en-ming-corp.com
Importing signed cert[cloudkey.teo-en-ming-corp.com]
... issued by [Go Daddy Secure Certificate Authority - G2]
... issued by [Go Daddy Root Certificate Authority - G2]
... issued by [OU=Go Daddy Class 2 Certification Authority, O="The Go Daddy Group, Inc.", C=US]
Certificates successfully imported. Please restart the UniFi Network application.
```

```
# service unifi start
```

Please note that our UniFi Cloud Key Gen 2 Plus is a standalone device. It is not an UniFi Controller at all.

When I say I have gotten partial success, it is because the Godaddy SSL certificate was installed for HTTPS port 8443. As you all know, 8443 is the standard port for the UniFi Controller.

Godaddy SSL certificate was NOT installed for HTTPS port 443 at all. In other words, the Godaddy SSL certificate was NOT installed for

```
[12]https://cloudkey.teo-en-ming-corp.com
```

The Godaddy SSL certificate was installed for [13]https://192.168.90.2:8443 instead. We can view the SSL certificate details below.

SSL Certificate details

```
=====
```

Issued To

Common Name (CN)

cloudkey.teo-en-ming-corp.com

Issued By

Common Name (CN)

Go Daddy Secure Certificate Authority - G2

Organization (O)

GoDaddy.com, Inc.

Organizational Unit (OU)

<http://certs.godaddy.com/repository>

Validity Period

Issued On

Tuesday, October 25, 2022 at 3:12:39 PM

Expires On

Wednesday, October 25, 2023 at 3:12:39 PM

As you can see from the above certificate details, the Godaddy SSL certificate was correctly installed for [14]<https://192.168.90.2:8443>

However, when we try to access [15]<https://cloudkey.teo-en-ming-corp.com:8443>, it says that SSL Protocol is not supported. Something like that. I can't remember the exact error message.

I guess this happens because there is no UniFi Controller running at HTTPS port 8443. Only the standalone UniFi Cloud Key UniFi OS is running at HTTPS port 443.

Also, I guess that the correct/default location for the Java Keystore is `/usr/lib/unifi/data/keystore`

It should not be located at `/etc/ssl/private/unifi.keystore.jks`

Please advise.

Thank you very much.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Targeted Individual in Singapore

Subject: Greetings from Mr. Turritopsis Dohrnii Teo En Ming before all the GIMP mailing lists shut down

Good day from Singapore,

My name is Mr. Turritopsis Dohrnii Teo En Ming. I am a targeted individual living in Singapore.

In my spare time, I am a hobbyist photographer and videographer who likes to add watermarks on my photos and videos. I use GIMP photo editing software occasionally.

I am also an IT Consultant with a Systems Integrator (SI)/computer firm in Singapore. I am an IT enthusiast too.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Subject: I have upgraded my pfSense firewall appliance from version 2.4.5 (FreeBSD 11.3) to version 2.6.0 (FreeBSD 12.3) on 7 Oct 2022 Friday at about 7.30 pm

Good day from Singapore,

I have upgraded my pfSense firewall appliance from version 2.4.5 (FreeBSD 11.3) to version 2.6.0 (FreeBSD 12.3) on 7 Oct 2022 Friday at about 7.30 pm.

FreeBSD is an excellent network operating system for firewalls!

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

How to Configure Aruba 7005 Wireless Controller with ArubaOS 8.9.0.3 (2022-10-02 00:18)

- Turritopsis Dohrnii Teo En Ming

Subject: How to Configure Aruba 7005 Wireless Controller with ArubaOS 8.9.0.3

Teo En Ming's Learning Notes - 7 Sep 2022 Wednesday

=====

PHASE 1 - LEARNING PHASE

=====

Information Gathering

=====

0. Look for DHCP Server in the network.

192.168.1.1

1. Need to get serial number of the 2 access points. Use the serial number as the password to login to the access points.

—snipped—

—snipped—

2. Get the following information for the Aruba 7005 wireless controller.

a. IP address: 192.168.1.7

b. Subnet mask: 255.255.255.0

c. Default gateway 192.168.1.1

3. Copy the license keys from ArubaOS 6.5.4.23

Policy Enforcement Firewall (PEF) license key: —snipped—

Access Point (AP) license key: —snipped—

RF Protect (RFP) license key: —snipped—

4. Find out the AP groups. AP Group: Internal, not using default AP group

AP Name, AP Group, AP IP, AP Type, AP MAC Address, AP Serial Number

Finance Dept, Internal, 192.168.1.9, 335, —snipped—, —snipped—

Near Entrance, Internal, 192.168.1.10, 335, —snipped—, —snipped—

5. Find out SSID and wireless password.

SSID: Teo En Ming Corporation Wi-Fi

Password: password

NEED TO HIDE SSID

6. Check if using RADIUS server or ClearPass.

Not using RADIUS authentication.

7. Check how many VLANs.

Only got 1 VLAN. VLAN: 1

SECTION 1 - FACTORY RESET THE ARUBA INSTANT IAP-335 ACCESS POINTS

=====

Youtube video: Aruba Controller: Access Point Configuration and Setup

Link: [1][https://www.youtube.com/watch?v=j-rpge\\_g\\_ho](https://www.youtube.com/watch?v=j-rpge_g_ho)

To factory reset INSTANT AP

=====

Putty to Console port on Aruba Instant AP

Hit <Enter> to stop autoboot:

Commands:

factory \_reset

saveenv

boot

Login to the web UI of the Aruba Instant AP using its IP address.

Username: admin

Password: admin

Click on Maintenance.

Click Convert tab.

Convert one or more Access Points to:

Campus APs managed by a Mobility Controller

Hostname or IP Address of Mobility Controller: 192.168.1.7

Click Convert Now.

It will download the image from the controller.

To factory reset a CAMPUS AP

=====

Putty to console port of the Campus AP.

Hit <Enter> to stop autoboot:

Commands:

purgeenv

saveenv

boot

=====

Need to ensure there is DHCP server in the network, so that the APs can obtain IP addresses after factory reset.

=====

## SECTION 2 - CONFIGURE THE STANDALONE CONTROLLER

=====

Youtube video: AOS8.0 Setup on Standalone Mobility Controller

Link: [2]<https://www.youtube.com/watch?v=vsfCnkBC590>

Gather the following information for the Aruba 7005 wireless controller.

1. IP address
2. Subnet mask
3. Default gateway

=====

Get the license keys and key in below.

Configuration > System > Licensing > Installed Licenses

=====

Configuration > System > Licensing > Usage

Enable PEF and RF Protect

=====

Disable Control Plane Security as below.

Configuration > System > CPSEC

=====

Provision Access Points FIRST

=====

THEN Create WLANs

- Find out the SSID
- Find out the wireless password

=====

Youtube video: Aruba Wireless controller | Basic Installation and Configuration | AOS 8.8

Link: [3]<https://www.youtube.com/watch?v=Ig8hrn6ITME>

Section 3 - Configure Control Plane Security from above Youtube video (OPTIONAL)

=====

```

configure t
control-plane-security
auto-cert-prov
cpsec-enable
end
show control-plane-security
write memory
show control-plane-security

```

Other controller commands:

=====

```
show ap database
```

=====

```
show version
```

=====

Section 4 - GOOD YOUTUBE VIDEO TO WATCH

=====

Youtube video: ArubaOS 8.9 Series – Part 1 – Virtual Mobility Controller (VMC)

Link: [4]<https://www.youtube.com/watch?v=U0A2747YY7c>

PHASE 2 - ACTUAL IMPLEMENTATION PHASE - IMPLEMENTED ON 22 SEP 2022 THUR AT CUSTOMER SITE

=====

Step 1. There is NO NEED to factory reset the 2 units of Aruba access points.

Step 2. Login to the web GUI of ArubaOS 6.5.4.23.

Step 3. Upgrade the firmware to version 8.9.0.3 straight away.

Step 4. Aruba 7005 wireless controller will reboot.

Step 5. Perform factory reset of the Aruba 7005 wireless controller using ArubaOS 8.9.0.3. You must connect to the console port.

configure t

write erase

The controller will reboot again.

Step 6. Perform initial configuration of the Aruba 7005 wireless controller using the console port. This can only be done through the console port.

(a) full-setup

(b) standalone

Step 7. Login to the web GUI of ArubaOS 8.9.0.3.

Step 8. Activate the AP, PEF and RFP license keys.

Step 9. You need to approve the 2 units of unapproved access points.

Step 10. Then configure WLAN, that is, the SSID.

Step 11. Optional steps.

(a) Enable PEF license and RF Protect license

(b) Enable firewall visibility and deep packet inspection

(c) Hide the SSID.

That's all.

===THE END===

Mr. Turritopsis Dohrnii Teo En Ming

**Hackers targeted 8 Shangri-La hotels between May and July, guests' data potentially leaked (2022-10-01 22:44) - Turritopsis Dohrnii Teo En Ming**

Link: [1]<https://www.straitstimes.com/singapore/data-breach-at-shangri-la-hotels-occurred-during-asias-top-security-summit-guests-data-potentially-leaked>

1. <https://www.straitstimes.com/singapore/data-breach-at-shangri-la-hotels-occurred-during-asias-top-security-summit-guests-data-potentially-leaked>

**Turritopsis Dohrnii Teo En Ming's CPF Account as of 1 Oct 2022 (2022-10-01 22:42)**  
**- Turritopsis Dohrnii Teo En Ming**

Subject: Turritopsis Dohrnii Teo En Ming's CPF Account as of 1 Oct 2022

CPF Ordinary Account \$37,946

CPF Special Account \$26,414

CPF Medisave Account \$7,573

CPF Investments \$25,856

Total CPF \$97,789

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 15 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty for eternity. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

Mr. Turritopsis Dohrnii Teo En Ming, 44 years old as of 1 Oct 2022, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

**How long does it take to learn the R programming language?** (2022-09-28 23:39)

- Turritopsis Dohrnii Teo En Ming

Subject: How long does it take to learn the R programming language?

Good day from Singapore,

How long does it take to learn the R programming language?

Is it easy? Is there a steep learning curve?

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Targeted Individual in Singapore

**[DRAFT 26 SEP 2022] HDB refuses to reduce monthly rental fees of my rental flat despite many appeals (2022-09-26 23:39) - Turritopsis Dohrnii Teo En Ming**

Subject: [DRAFT 26 SEP 2022] HDB refuses to reduce monthly rental fees of my rental flat despite many appeals  
DRAFT 26 SEP 2022

FOR IMMEDIATE RELEASE

My name is Mr. Turritopsis Dohrnii Teo En Ming. I am 44 years old. I am a Targeted Individual (TI) living in Singapore. A Targeted Individual is a person who is persecuted, targeted, marked and blacklisted by the government.

After graduation from the National University of Singapore in Dec 2006, I started working in Defense Science and Technology Agency (DSTA) as an IT Engineer. But I offended Singapore Minister Mentor Lee Kuan Yew in the year 2007. When I was having a private conversation with my manager Mr. Loh Choon Fah in his office, I said: "When Lee Kuan Yew is gone, Singapore would be more democratic.". This is how I offended Singapore strongman Lee Kuan Yew. Within a few months, I started hearing threatening and menacing voices from the Singapore government. Hearing voices is also known as schizophrenia (mental illness).

There are MILLIONS of Targeted Individuals in every country all over the world. Most Targeted Individuals, especially in the Western Hemisphere, agree that mental illness was invented by government(s) to punish Targeted Individuals and make their lives miserable for life. However, we do not know for sure which specific government invented mental illness. It could be a group of governments as well. Then every government in every country possessed the technology capable of rewarding people with mental illness. This technology is known as Mind Control Technology.

In the year 2007, the Singapore Government rewarded / awarded me with mental illness after I offended Minister Mentor Lee Kuan Yew. 2 years later, in 2009, when I was working as an IT support engineer in Asiasoft Pte Ltd, I offended Lee Kuan Yew again. This time the targeting became much worse. This is because I had used Lee Kuan Yew to make a bet. My manager at Asiasoft Pte Ltd, Melvin Lee, had challenged me to complete an IT project in 2-3 weeks. In response, I replied that if I could not complete the project in time, Lee Kuan Yew would be a wang ba dan (in hanyu pinyin, wang ba dan refers to a tortoise or turtle). So I have offended Lee Kuan Yew again by using him in a bet with my manager Melvin Lee and the targeting became much much worse in 2009. The threatening and menacing voices from the Singapore Government inside my head became very bad.

For the past 15 years after graduation from National University of Singapore, I frequently get fired from jobs. Yes, I frequently get fired from jobs for the past 15 years. I am super duper under-employed. It was only in late 2017 that my employment situation improved a little bit. My 2nd longest held job was in Pedia Pte Ltd as an IT support engineer from Nov 2017 to Nov 2018, a period of 1 year. My top longest held job, which is my present job as an IT Consultant, was from Jun 2020 to Sep 2022, a period of 2 years 3 months. In between, I still get fired from jobs. Hence, at the ripe old age of 44 years old, I have only been employed for 3-4 years effectively without getting fired.

To make matters worse, I do not own a HDB flat. By right, children will inherit HDB flats from their parents. But the Singapore Government also rewarded my mother with a mental illness (schizophrenia). The Singapore Government tricked my mother into believing her neighbors are scolding her all the time by making her hear voices. This had the effect of making my mother selling and buying HDB flats repeatedly. We shifted from Bedok North to Yishun to Bukit Batok to Bedok Reservoir. In the end, we were reduced to extreme poverty because of frequent selling and buying of HDB flats. My mother genuinely believed that her neighbors were scolding her all the time. This is a trickery used by the Singapore Government to rob us of our HDB flat. The HDB compulsorily acquired our 3-room HDB flat in Bedok Reservoir in the year 2011 because we could not pay the mortgage loans. From 2011, we no longer own any HDB flat and we have to rent a flat from HDB.

Misfortunes don't end. Because I frequently get fired from jobs for the past 15 years, I have super low savings in my bank accounts and CPF account. At the time of this writing, I only have roughly \$5000 in my bank accounts (POSB and UOB) and \$98,000 in my CPF account. Please note that my CPF Ordinary Account does not have \$98,000. \$98,000 is my Ordinary Account + Special Account + Medisave Account all combined together. I have the lowest personal savings and CPF savings in Singapore due to government persecution.

A few years ago, the monthly rent for my 1-room HDB flat was only \$26. After I found a job as an IT Consultant in Jun 2020 with a monthly gross salary of \$2500, HDB increased the monthly rent of my 1-room rental flat from

from \$26 to \$333. Because HDB is going to demolish HDB rental flats at Toa Payoh after Feb 2023, it offered me 2-room rental flat. I have moved into my 2-room HDB rental flat on 19 June 2022. But the monthly rent was increased to \$414.

Over the past few years, I have been asking my MPs Dr Ng Eng Hen and Saktiandi Supaat to appeal to HDB to reduce my monthly rent numerous times. I have lost count of how many times I have approached Dr Ng Eng Hen and Saktiandi Supaat. But the HDB still rejected my appeal to reduce monthly rent.

When I moved into my 2-room rental flat on 19 Jun 2022, I approached Yio Chu Kang MP Yip Hon Weng and Ang Mo Kio Social Service Office to appeal to HDB to reduce my monthly rent. I also told HDB principal estate manager Mr. Fam Ting Siong of all my past history. But the HDB still stubbornly rejected my appeal to reduce the monthly rent. No empathy at all.

Isn't it the duty of the government to reduce the burden on its citizens instead of increasing the burden on its citizens? Oh wait. I offended Minister Mentor Lee Kuan Yew 15 years ago in 2007. So the Singapore Government is taking steps to increase the burden on me by increasing the monthly rent of my HDB rental flat. No matter how many times I appeal, the Singapore Government will never agree to reducing my HDB monthly rent. I suspect the Singapore Government had already passed down instructions and orders to HDB never to reduce my monthly rent. If Mr. Fam Ting Siong has acted otherwise and reduced the monthly rent for me, he would most likely have lost his job as a HDB principal estate manager.

The primary objective of the government is to remove targeted individuals from the job workforce and prevent us from earning money. So I am not surprised that the government is taking back huge chunks of my salary when I have a job. The objective is to prevent me from having any savings.

You can refer to the letter which was published by the United Nations Office of the High Commissioner for Human Rights. This letter was submitted by a Targeted Individual living in India. The link to the letter is

[1]<https://www.ohchr.org/Documents/Issues/Torture/Call/Individuals/Militarygrade.pdf>

Excerpt from the letter published by the United Nations:

"A primary goal in these 'slow-kill', 'no-touch'/'soft-kill' programs is to remove TIs from the job workforce – so that they are in range at home for longer times to facilitate more testing, refining of weapons and for training more operators and neural programmers. The combined impact of all these together – physical wounds, 24×7 psychotronic warfare, career systemically made to vanish IS DEVASTATING to TIs, to say the least."

TIs = Targeted Individuals

Title: Autobiography of Singaporean Targeted Individual Mr. Turritopsis Dohrnii Teo En Ming (Very First Draft, Lots More to Add in Future)

It is getting late at night. I still haven't write about how Anglican Care Centre is increasing my room fees from \$130 to \$170 to \$545 per month in May 2022. In short, daylight robbery! I will get around to writing this when I have the time.

**Teo En Ming's Laptops as at 26 Sep 2022 (2022-09-26 21:57) - Turritopsis Dohrnii Teo En Ming**

Subject: Teo En Ming's Laptops as at 26 Sep 2022

Good day from Singapore,

I own the following laptops.

[1] Refurbished HP Elitebook 840 G1 SGD \$250

Bought on 30 Dec 2020 Wed

Serial number: 5CG\*\*11MHX

[2] BDF HL-1088A3 Netbook SGD \$118

Bought on 17 Apr 2020

CPU: Allwinner A33

Quad-core Cortex-A7

Display: 10.1" TFT 1024x600

Memory: 1 GB/8 GB

Input: 5V2A

Remarks: This is a USELESS Android laptop. I can't do anything with it because it is TOO CHEAP.

[3] Acer E5-574G-50JB, MFG Date: 2016/04/05, bought using Courts Megastore Installment Plan, SGD \$699 I think

Serial number: NXG3BSG00361\*\*\*\*\*E7600

Remarks: This laptop is already SPOILT / MALFUNCTIONED. Even though I have replaced the laptop battery at Sim Lim Square, Windows 10 still complains laptop battery is missing. Need to use AC adapter at all times, which defeats the purpose of having a laptop.

[4] Second Hand Aftershock MX-15 Elite (N850HK1) gaming laptop SGD \$699

Subject: I have bought a second hand Aftershock MX-15 Elite (N850HK1) gaming laptop in 3 equal monthly installments on 19 Sep 2022 Mon

I have bought a second hand Aftershock MX-15 Elite (N850HK1) gaming laptop in 3 equal monthly installments on 19 Sep 2022 Mon.

Atome Buy Now Pay Later (BNPL) Financing Model

=====

1st monthly installment on 19 Sep 2022 (Atome): SGD \$233

2nd monthly installment on 19 Oct 2022 (Atome): SGD \$233

3rd and FINAL monthly installment on 18 Nov 2022 (Atome): SGD \$233

Grand total for Aftershock MX-15 Elite (N850HK1) gaming laptop: SGD \$699 (comes with a FREE \$7.90 wireless mouse and laptop charger)

Justification for buying Aftershock gaming laptop

=====

My old HP Elitebook 840 G1 laptop took 3.5 hours to render 1 hour 6 mins 4K video - Sherr Ng Birthday Party 15 Sep 2022 - REFERENCE.

My Aftershock MX-15 Elite (N850HK1) gaming laptop took 1 hour 25 mins to render similar 1 hour 6 mins 4K video, using NVIDIA Geforce GTX 1050 TI GPU acceleration in Vegas Movie Studio Platinum 15.

This is a significant improvement in 4K video rendering speeds. I feel it is worth it to buy this used Aftershock gaming laptop.

## Upgrading Linux Kernel on Red Hat Enterprise Linux 9.0 (2022-09-22 23:33) - Turrishops Dohrnii Teo En Ming

Subject: Upgrading Linux Kernel on Red Hat Enterprise Linux 9.0

Good day from Singapore,

My RHEL 9.0 has Linux kernel 5.14.0. Can I manually compile and upgrade the Linux kernel to version 6.0-rc6? Will it adversely affect the stability of RHEL 9.0?

Thank you.

Regards,

Mr. Turrishops Dohrnii Teo En Ming

Subject: Teo En Ming's Power Zoom Bridge Cameras as at 17 Sep 2022

Good day from Singapore,

I own the following power zoom bridge cameras.

[1] Panasonic DC-FZ10002 (Panasonic FZ1000 Mark 2)

Serial number: WM9\*\*\*01371

Notes: Bought it brand new for \$1118 on 3 Nov 2019 Sunday, shortly before the Covid-19 pandemic

[2] Nikon Coolpix B700

Serial number: \*\*\*00329

Notes: I have forgotten when I bought it. Brand new set.

[3] Sony RX10M4 (Sony RX10 Mark 4)

Serial number: \*\*\*9569

Notes: Bought it used/2nd hand for \$1050 on 12 Sep 2022 Monday

Mr. Turritopsis Dohrnii Teo En Ming, 44 years old as of 17 Sep 2022, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

**AMD VCE Preset missing in Vegas Movie Studio Platinum 15 (2022-09-16 22:01)**  
**- Turritopsis Dohrnii Teo En Ming**

Subject: AMD VCE Preset missing in Vegas Movie Studio Platinum 15

Good day from Singapore,

I have refurbished HP Elitebook 840 G1 laptop. There are Intel HD Graphics 4400 and AMD Radeon HD 8750M GPUs.

However, in Vegas Movie Studio Platinum 15, I only see Intel QSV preset. I don't see AMD VCD preset at all.

I have already enabled GPU acceleration of video rendering. I can see AMD OLAND.

My OS is Windows 10.

I have already installed AMD Adrenalin 22.6.1 graphics driver but I still don't see AMD VCE preset. AMD VCE is missing.

I am using licensed copy of Vegas Movie Studio Platinum 15.

I am looking forward to your replies.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Total CPF \$97,919

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 15 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty for eternity. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

Mr. Turritopsis Dohrnii Teo En Ming, 44 years old as of 7 Sep 2022, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

**Turritopsis Dohrnii Teo En Ming's CPF Account as of 15 Aug 2022 (2022-08-15 17:40)****- Turritopsis Dohrnii Teo En Ming**

Subject: Turritopsis Dohrnii Teo En Ming's CPF Account as of 15 Aug 2022

CPF Ordinary Account \$36,922

CPF Special Account \$26,073

CPF Medisave Account \$7,198

CPF Investments \$26,638

Total CPF \$96,831

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 15 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty for eternity. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

Mr. Turritopsis Dohrnii Teo En Ming, 44 years old as of 15 Aug 2022, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

**Which Cisco products are capable of broadband access aggregation (bba)? (2022-08-15 16:59)**

- Turritopsis Dohrnii Teo En Ming

Subject: Which Cisco products are capable of broadband access aggregation (bba)?

Good day from Singapore,

May I know which Cisco products are capable of broadband access aggregation (bba)?

[QUOTE]

Broadband access aggregation is the means by which connections are made among multiple technologies. These technologies include ISDN, DSL, cable, Ethernet, and wireless devices that are connected to corporate virtual private networks (VPNs), third-party applications, and the Internet. Subscriber demand for high-speed services, including multi-player gaming, video-on-demand, home security, digital audio, streaming video, and many other applications, require the delivery of IP services, regardless of the access medium.

Because so many different technologies are involved in broadband access aggregation, it is important that the service provider understand their network both in terms of the hardware that makes up the installation, which determines what type of sessions need to be established, but also in terms of what kinds of services their subscribers expect to receive. The demands placed on large service provider installations can often result in the need to contend with millions of sessions and provide flexible and reliable configurations for widely diverse consumer needs.

This module contains conceptual information about broadband access aggregation.

[/QUOTE]

**Missing power adapters for various Cisco routers and appliances (2022-08-15 16:51)**  
**- Turrishops Dohrnii Teo En Ming**

Subject: Missing power adapters for various Cisco routers and appliances

Good day from Singapore,

The following is a list of Cisco routers and appliances which I have but for which the power adapters are missing.

1. Cisco 877 Router
2. Cisco 881 Router
3. Cisco 881 Router
4. Cisco 1841 V06 Router
5. Cisco 2811 V05 Router
6. Cisco ASA 5510 V03 Firewall
7. Cisco S170 Web Security Appliance
8. Cisco 881 Router
9. Cisco 1921 Router
10. Cisco 1841 Router
11. Cisco 1921 Router
12. Cisco 881 Router
13. Cisco 877 Router
14. Cisco 1721 Router

Please give me the brand, model number and part number of the power adapters for the above Cisco devices so that I can purchase them in Singapore. We use 240V AC in Singapore.

Thank you very much.

**Does NetApp still sell physical file servers? (2022-08-15 16:49) - Turritopsis Dohrnii Teo En Ming**

Subject: Does NetApp still sell physical file servers?

Good day from Singapore,

Does NetApp still sell physical file servers?

I read from Wikipedia that NetApp, Inc. is an American hybrid cloud data services and data management company headquartered in San Jose, California. It has ranked in the Fortune 500 from 2012–2021. Founded in 1992 with an IPO in 1995, NetApp offers cloud data services for management of applications and data both online and physically.

I see that NetApp has ventured into the cloud.

Thank you.

## Can I integrate Apache Lucene with Dovecot POP3/IMAP incoming mail server to perform indexing and fast searching of email messages? (2022-08-15 16:44) - Turritopsis Dohrnii Teo En Ming

Subject: Can I integrate Apache Lucene with Dovecot POP3/IMAP incoming mail server to perform indexing and fast searching of email messages?

Good day from Singapore,

I have a Virtual Private Server (VPS) in Germany running Virtualmin/Webmin web hosting control panel. Virtualmin uses Dovecot incoming mail server by default.

I used to have more than 200,000 email messages in my Inbox. At that point in time, I cannot even search for any email message at all. Dovecot will throw an error message. My workaround is to reduce the number of email messages in my Inbox drastically by deleting USELESS email messages.

But the number of email messages in my Inbox will continue to grow. Can I integrate Apache Lucene with Dovecot to perform indexing and fast searching of email messages? I have to cater for a time when my Inbox will grow to millions of email messages.

Thank you.

**Wireshark is a great open source packet analyzer! (2022-08-15 16:30) - Turritopsis Dohrnii Teo En Ming**

Subject: Wireshark is a great open source packet analyzer!

Good day from Singapore,

Wireshark is a great open source packet analyzer! I have used Wireshark (Windows binary) recently to determine the unknown IP address of the ILO of HPE StoreEasy 1860 NAS Server by sending out ARP broadcast packets.

This is the guide I have used.

Reference guide: Using Wireshark to get the IP address of an Unknown Host

Link: [1]<https://www.comparitech.com/net-admin/wireshark-ip-address-unknown-host/>

I hope that this information is useful to you.

Thank you.

## How did Edward Joseph Snowden use GnuPG to uncover the secrets of the National Security Agency? (2022-08-15 16:27) - Turritopsis Dohrnii Teo En Ming

Subject: How did Edward Joseph Snowden use GnuPG to uncover the secrets of the National Security Agency?

Good day from Singapore,

[QUOTE]

Arguing that you don't care about the right to privacy because you have nothing to hide is no different from saying you don't care about free speech because you have nothing to say. – Edward Snowden

Using encryption helps to protect your privacy and the privacy of the people you communicate with. Encryption makes life difficult for bulk surveillance systems. GnuPG is one of the tools that Snowden used to uncover the secrets of the NSA.

[/QUOTE]

How did Edward Joseph Snowden use GnuPG to uncover the secrets of the National Security Agency?

I am very interested to know. Are there any detailed write-ups?

Thank you.

**Upgrading iptables firewall on Red Hat Enterprise Linux 9.0 (2022-08-15 16:24)**  
**- Turritopsis Dohrnii Teo En Ming**

Subject: Upgrading iptables firewall on Red Hat Enterprise Linux 9.0

Good day from Singapore,

The following RPM packages are installed on my Red Hat Enterprise Linux 9.0 virtual machine.

iptables-libs-1.8.7-28.el9.x86\_64

iptables-nft-1.8.7-28.el9.x86\_64

Is it possible to upgrade iptables firewall to the latest version 1.8.8?

Thank you.

**Is Maemo still in active development? (2022-08-15 16:17) - Turritopsis Dohrnii Teo En Ming**

Subject: Is Maemo still in active development?

Good day from Singapore,

Is Maemo still in active development?

Snippet from Wikipedia:

"Maemo is a software platform originally developed by Nokia, now developed by the community, for smartphones and Internet tablets. The platform comprises both the Maemo operating system and SDK. Wikipedia

Default user interface: Hildon

Developer: Nokia

Original author: Nokia

Latest release: 5.0 PR 1.3.1 / 1 November 2011; 10 years ago

Programming languages: C++, C, Mono"

From Wikipedia, it says that the latest release of Maemoo was 10 years ago.

**Is it possible to make Gentoo LiveGUI ISO image GUI environment look like Windows 10/11?**  
(2022-08-15 15:50) - Turrishops Dohrnii Teo En Ming

Subject: Is it possible to make Gentoo LiveGUI ISO image GUI environment look like Windows 10/11?

Good day from Singapore,

Is it possible to make Gentoo LiveGUI ISO image GUI environment look like Windows 10/11?

I believe many people will find Linux easy to use (user friendly) if the GUI environment looks like Windows 10/11.

It will also drive up the number of downloads and installations.

Post: New Gentoo LiveGUI ISO and artwork / branding contest!

Link: <https://www.gentoo.org/news/2022/04/03/livegui-artwork-contest.html>

Thank you.

Regards,

Mr. Turrishops Dohrnii Teo En Ming

## How do I deploy OpenStack open source cloud software on Red Hat Enterprise Linux 9.0? (2022-08-15 15:40) - Turritopsis Dohrnii Teo En Ming

Subject: How do I deploy OpenStack open source cloud software on Red Hat Enterprise Linux 9.0?

Good day from Singapore,

How do I deploy OpenStack open source cloud software on Red Hat Enterprise Linux 9.0?

I have just downloaded RHEL 9.0 ISO using RHEL Free Developer Subscription and installed it as a virtual machine inside Oracle VM VirtualBox. Windows 10 on my laptop is the host.

Alternatively, can I deploy Red Hat OpenStack Platform in a Virtual Private Server (VPS)? I can make another order for a VPS just for this purpose. I already have 2 VPS servers just for deploying Virtualmin/Webmin web hosting control panel.

If you can give me links to excellent and well-written guides and tutorials, it would be most useful.

I want to try out open source software developed by NASA.

Also, I have deployed Nextcloud previously. Now I want to try out OpenStack.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**Which linux distro is more conducive for learning the Python programming language?  
(2022-08-15 15:37) - Turrishops Dohrnii Teo En Ming**

Subject: Which linux distro is more conducive for learning the Python programming language?

Good day from Singapore,

May I know which linux distro is more conducive for learning the Python programming language?

Since I have absolutely and totally FREE RHEL developer subscription (I don't need to spend a single cent), can I use Red Hat Enterprise Linux version 9.0 to learn Python?

Is it the most popular linux distro for learning Python?

I just want to know which linux distro and version is more conducive for learning Python. Because there are thousands of linux distros out there. And I just want to settle down on a particular linux distro and version.

Thank you.

**Virtualmin and Webmin web hosting control panel are written in Perl 5 (2022-08-01 20:04)**  
**- Turritopsis Dohrnii Teo En Ming**

Subject: Virtualmin and Webmin web hosting control panel are written in Perl 5

Good day from Singapore,

I understand that Virtualmin and Webmin web hosting control panel are written in Perl 5.

Source: In which perl framework is webmin written into?

Link: <https://archive.virtualmin.com/node/36615>

If I want to learn Perl programming language from scratch having totally no knowledge of it, how long (in terms of months or years) would it take before I can confidently and proficiently modify Virtualmin and Webmin code?

Hopefully there is no steep learning curve.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**Wow! Even a mentally disabled person has \$200,000 and an un-educated cleaner has \$330,000 in their bank accounts. How come Teo En Ming don't even have \$15,000 in his bank account? (2022-07-29 21:41) - Turritopsis Dohrnii Teo En Ming**

Subject: Wow! Even a mentally disabled person has \$200,000 and an un-educated cleaner has \$330,000 in their bank accounts. How come Teo En Ming don't even have \$15,000 in his bank account?

Wow! Even a mentally disabled person has \$200,000 and an un-educated cleaner has \$330,000 in their bank accounts. How come Teo En Ming don't even have \$15,000 in his bank account?

You can refer to the following news articles.

The Straits Times: How a man with a mental disability was cheated of \$200,000

Link: [1]<https://www.straitstimes.com/business/invest/how-a-man-with-a-mental-disability-was-cheated-of-200000>

Asia One: \$49 left in bank account: Cleaner loses \$330k of life savings to 'China police' scammers

Link: [2]<https://www.asiaone.com/singapore/49-left-bank-account-cleaner-loses-330k-life-savings-china-police-scammers>

Even a man with mental disability has \$200,000 in his bank account! Even an un-educated cleaner has \$330,000 in his bank account! I don't have a mental disability. In fact I have a NUS university degree with 2 polytechnic diplomas. My academic qualifications are: (1) Bachelor of Engineering (Honours) in Mechanical Engineering from National University of Singapore (Graduated Dec 2006), (2) Diploma in Mechatronics Engineering from Singapore Polytechnic (Graduated 1998) and (3) Diploma in Computer Networking from Singapore Polytechnic (Graduated 2017). I have been working as an IT Consultant and IT Support Engineer for about 3 years, since 2017. I may not have stellar/amazing IQ but I shouldn't be doing so badly right?! How come I don't even have \$15,000 in my bank account? Because I am a Targeted Individual! I am persecuted, targeted, marked and blacklisted by the Singapore Government after offending Minister Mentor Lee Kuan Yew in the year 2007, some 15 years ago. Because I offended Minister Mentor Lee Kuan Yew in 2007, I frequently get fired from jobs for more than 10 years after university graduation in Dec 2006. That's why I have super super low savings in my bank account. And that's why I also have super super low savings in my CPF account.

Most people at my age should have about \$300,000 in their bank accounts. I have less than \$15,000 in my bank account.

Most people at my age should have around \$500,000 in their CPF accounts. I have less than \$100,000 in my CPF account.

How come I am thousands of times worse off than a man with mental disability and an un-educated cleaner??????

How come I have no money for scammers to cheat???????

My name is Mr. Turritopsis Dohrnii Teo En Ming. I live in Singapore. I am 44 years old as of 29 July 2022. I am a Targeted Individual.

**Is there anything I can do to improve the security of SPF records for my domains? (2022-07-29 20:43)**

- Turritopsis Dohrnii Teo En Ming

Subject: Is there anything I can do to improve the security of SPF records for my domains?

Good day from Singapore,

SPF record for my domain turritopsis-dohrnii-teo-en-ming.com:

Link: [1]<https://mxtoolbox.com/SuperTool.aspx?action=spf%3aturritopsis-dohrnii-teo-en-ming.com&run=toolpage>

SPF record for my domain teo-en-ming.com:

Link: [2]<https://mxtoolbox.com/SuperTool.aspx?action=spf%3ateo-en-ming.com&run=toolpage>

SPF record for my domain teo-en-ming-corp.com:

Link: [3]<https://mxtoolbox.com/SuperTool.aspx?action=spf%3ateo-en-ming-corp.com&run=toolpage>

Please let me know how I can improve on the security of my SPF records.

My SPF records were automatically generated by Virtualmin/Webmin web hosting control panel. Are they ideal or prone to email spoofing?

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

## **This is how I have installed Docker CE manually using downloaded RPMs on Red Hat Enterprise Linux 7 (2022-07-28 22:42) - Turritopsis Dohrnii Teo En Ming**

Subject: This is how I have installed Docker CE manually using downloaded RPMs on Red Hat Enterprise Linux 7

Good day from Singapore,

This is how I have installed Docker CE manually using downloaded RPMs on Red Hat Enterprise Linux 7.

My steps are below.

```
$ sudo rpm -ivh containerd.io-1.2.2-3.el7.x86_64.rpm
```

```
$ sudo yum install libtool-ltdl
```

```
$ sudo rpm -ivh docker-ce-cli-18.09.2-3.el7.x86_64.rpm
```

```
$ sudo yum install libcgroup
```

```
$ sudo yum install policycoreutils-python
```

```
$ sudo rpm -ivh container-selinux-2.107-3.el7.noarch.rpm
```

```
$ sudo rpm -ivh docker-ce-18.09.2-3.el7.x86_64.rpm
```

```
$ rpm -qa | grep docker | grep -v nvidia
```

```
docker-ce-cli-18.09.2-3.el7.x86_64
```

```
docker-ce-18.09.2-3.el7.x86_64
```

I am wondering whether I have installed Docker CE correctly.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

## How do I install and configure Varnish Cache web application accelerator/caching HTTP reverse proxy in front of Apache HTTP web server? (2022-07-28 21:54) - Turritopsis Dohrnii Teo En Ming

Subject: How do I install and configure Varnish Cache web application accelerator/caching HTTP reverse proxy in front of Apache HTTP web server?

Good day from Singapore,

How do I install and configure Varnish Cache web application accelerator/caching HTTP reverse proxy in front of Apache HTTP web server?

Though I have graduated with a Diploma in Computer Networking (3 Distinctions and 1 A) from Singapore Polytechnic in 2017, I am not that good and experienced with networking. The course curriculum is based on CCNA Routing and Switching.

Hence I would appreciate any advice. If you can show me a network topology diagram of the Apache HTTP web server, Varnish Cache, firewall, router and network switch, it would greatly help me in my understanding.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**About Apache Karaf (2022-07-28 21:34) - Turritopsis Dohrnii Teo En Ming**

Subject: About Apache Karaf

Good day from Singapore,

I have been told Apache Karaf is superseding Apache ServiceMix. Apache ServiceMix is becoming redundant.

Is this correct?

Thank you.

## Is it possible to protect OpenSSH Daemon logins with 2nd factor authentication (2FA)? (2022-07-25 22:34) - Turritopsis Dohrnii Teo En Ming

Subject: Is it possible to protect OpenSSH Daemon logins with 2nd factor authentication (2FA)?

Good day from Singapore,

Is it possible to protect OpenSSH Daemon logins with 2nd factor authentication (2FA)?

If it is possible, could you give me the links to excellent and well-written guides on how to do so?

Thank you very much.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**digiKam - What is a digital photo manager? (2022-07-25 22:20) - Turritopsis Dohrnii Teo En Ming**

Subject: digiKam - What is a digital photo manager?

Good day from Singapore,

I have never used a digital photo manager before. I simply keep and organize my photos in folders on file systems in Linux or Windows.

What does a digital photo manager do?

Please pardon me for my ignorance.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**Do all Android phones use KDE desktop GUI? (2022-07-25 21:49) - Turritopsis Dohrnii Teo En Ming**

Subject: Do all Android phones use KDE desktop GUI?

Good day from Singapore,

I am just being curious.

Do all Android phones use KDE desktop GUI? Or some other type of GUI?

I am using Samsung Galaxy A32 5G by the way.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**Red Hat Enterprise Linux 9.0 uses GNOME 40 (2022-07-25 21:23) - Turritopsis Dohrnii Teo En Ming**

Subject: Red Hat Enterprise Linux 9.0 uses GNOME 40

Good day from Singapore,

Red Hat Enterprise Linux 9.0 uses GNOME 40. You can refer to the release notes.

Article: 9.0 Release Notes

Link: [https://access.redhat.com/documentation/en-us/red\\_hat\\_enterprise\\_linux/9/html-single/9.0\\_release\\_notes/index](https://access.redhat.com/documentation/en-us/red_hat_enterprise_linux/9/html-single/9.0_release_notes/index)

I will be installing and trying out RHEL 9.0 soon to see how GNOME 40 looks like.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

[nautilus] Is it possible to speed up copying of thousands of small files? (2022-07-25 21:21)

- Turritopsis Dohrnii Teo En Ming

Subject: [nautilus] Is it possible to speed up copying of thousands of small files?

Good day from Singapore,

I understand it is very much faster to copy a very big file but transfer speeds will drop a lot when it comes to thousands of small files.

Is there a way to speed up copying of thousands of small files?

Thank you.

**Can I activate Windows Server 2019 Standard license key on a Windows Server 2016 Standard virtual machine? (2022-07-07 22:19) - Turritopsis Dohrnii Teo En Ming**

Subject: Can I activate Windows Server 2019 Standard license key on a Windows Server 2016 Standard virtual machine?

Good day from Singapore,

Can I activate Windows Server 2019 Standard license key on a Windows Server 2016 Standard virtual machine?

Is it compulsory / mandatory for me to make a request to Hewlett Packard Enterprise for a Windows Server 2016 Downgrade Kit?

The physical server in question is a HPE Proliant Gen10 server. Do I make a request to HPE using the following form?

Form: Windows Server Downgrade and Recovery Media

Link: <https://ebiz3.mentormediacorp.com/HPEDGRCR/>

If I do not order a Windows Server 2016 downgrade kit, I won't be able to activate all of my Windows Server 2016 Standard virtual machines??

I am looking forward to your reply.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Singapore

**Error generating PDF report to send by email using Schedule Manager (2022-07-07 22:04)**

- Turritopsis Dohrnii Teo En Ming

Subject: Error generating PDF report to send by email using Schedule Manager

Good day from Singapore,

I have solved a MAJOR PROBLEM with the SolarWinds Orion Platform on the morning of 27 May 2022.

When you try to send PDF reports by EMAIL using the Schedule Manager, you get the following error message in the PDF report.

The Page Failed to Load

A connection attempt was refused.

When you are editing the Schedule inside Schedule Manger, you get the following warning.

WEBSITE ADDRESS MISMATCH

Website address in browser (<https://hostname01.project.domain.com/>) is different from the one which was set up by Configuration Wizard (<http://hostname01:8787/>).

This may lead to receive Login page instead of Report. Please make sure you have configured https following this SolarWinds KB article and assigned webpage matches the one specified in certificate.

Click OK to proceed or CANCEL to correct data.

Apparently the engineer(s) responsible for setting up SolarWinds Orion Platform for the project a few years ago made a few configuration mistakes.

I google searched and found the following resources.

Resource: How to Change the Port in the Report Scheduler

Link: <https://thwack.solarwinds.com/product-forums/network-performance-monitor-npm/f/forum/65929/how-to-change-the-port-in-the-report-scheduler>

Resource: enable SSL connections to the SolarWinds Orion Web Console

Link: [https://support.solarwinds.com/SuccessCenter/s/article/Enable-SSL-connections-on-Windows-Server-2012?language=en\\_US](https://support.solarwinds.com/SuccessCenter/s/article/Enable-SSL-connections-on-Windows-Server-2012?language=en_US)

After reading the above resources, I made changes to the SQL database inside the Solarwinds Orion Database Manager.

I changed ServerName from hostname01 to hostname01.project.domain.com inside the database table.

I changed Port from 8787 to 443 inside the database table.

I changed SSLEnabled from 0 to 1 inside the database table.

Problem solved. I have solved the problem. Now we are getting the correct PDF reports sent by EMAIL using the Schedule Manager.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Singapore

## How to join RHEL 7 Linux Server to Active Directory Domain (2022-07-07 21:34) - Turritopsis Dohrnii Teo En Ming

Subject: How to join RHEL 7 Linux Server to Active Directory Domain

Good day from Singapore,

I didn't realize it is so easy to join RHEL 7 Linux server to Active Directory Domain.

You only need a few simple commands.

```
# yum install sssd realmd oddjob oddjob-mkhomedir adcli samba-common samba-common-tools krb5-workstation  
openldap-clients policycoreutils-python -y
```

```
# realm join -v --user=[domain user account] addc01.project.domain.com
```

```
# realm list
```

```
project.domain.com
```

```
type: kerberos
```

```
realm-name: PROJECT.DOMAIN.COM
```

```
domain-name: project.domain.com
```

```
configured: kerberos-member
```

```
server-software: sssd
```

```
required-package: oddjob
```

```
required-package: oddjob-mkhomedir
```

```
required-package: sssd
```

```
required-package: adcli
```

```
required-package: samba-common-tools
```

```
login-formats: %U@project.domain.com
```

```
login-policy: allow-realm-logins
```

That's it.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

## Turritopsis Dohrnii Teo En Ming's CPF Account as of 7 Jul 2022 (2022-07-07 20:41) - Turritopsis Dohrnii Teo En Ming

Subject: Turritopsis Dohrnii Teo En Ming's CPF Account as of 7 Jul 2022

CPF Ordinary Account \$36,388

CPF Special Account \$25,895

CPF Medisave Account \$7,011

CPF Investments \$26,301

Total CPF \$95,595

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 15 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty for eternity. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

Mr. Turritopsis Dohrnii Teo En Ming, 44 years old as of 7 Jul 2022, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

**FreeBSD is a great operating system! (2022-07-06 22:31) - Turritopsis Dohrnii Teo En Ming**

Subject: FreeBSD is a great operating system!

Good day from Singapore,

I think FreeBSD is a great operating system! I support FreeBSD because the most popular pfSense firewall, the extremely popular OPNsense firewall and the BSD Router Project are all powered by FreeBSD! macOS is also based on FreeBSD!

I use pfSense community edition firewall in my home. I am planning to try out OPNsense firewall next.

I will continue to support FreeBSD! It is a great operating system! FreeBSD is a very good network operating system.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**Rehousing/Moving house expenses 2022 as of 4 July 2022 Mon UPDATE 2 (2022-07-04 22:44)**  
**- Turritopsis Dohrnii Teo En Ming**

Rehousing/Moving house expenses 2022 as of 4 July 2022 Mon UPDATE 2

=====

Very accurate expenditure list according to May, Jun and July 2022 POSB bank e-statements

=====

AUDITOR-GENERAL'S OFFICE (AGO), TEO EN MING'S GOVERNMENT OF THE UNIVERSE AND MUL-TIVERSE

=====

TEO EN MING'S GOVERNMENT PUBLISHING OFFICE

=====

=====

HDB promises to give every household affected by the HDB public rental rehousing project a sum of \$2500 rehousing allowance, but we can only get it 2 months later??

Only after we have surrendered the old rental flat. By then I would have used up all my savings and start begging on the streets of Orchard Road in Singapore,

because I have used FAR TOO MUCH money moving house already, as you can see below. I have VERY LITTLE money left in all of my bank accounts.

=====

30 Apr Sat - Deposit for new metal bed frame (super strong for my 120 kg weight) - \$100

14 May Sat - Balance payment for new metal bed frame (super strong for my 120 kg weight)- \$160

3 Jun Fri - Sign letter of acceptance for new 2-room rental flat at HDB Hub at 9.10 AM - Free of charge

3 Jun Fri - buying 15 carton boxes and masking tapes in the late afternoon - \$61.40

3 Jun Fri - Comfort taxi - \$8.95

4 Jun Sat - buying 10 carton boxes and masking tapes - \$39.00

4 Jun Sat - Comfort taxi - \$7.45

11 Jun Sat - buying 5 carton boxes and masking tapes - \$17.50

11 Jun Sat - Taxi or Grab - ??? (unable to account for, lost track of this transaction)

14 Jun Tue - Payment to Housing and Development Board (HDB) for NEW 2-room rental apartment (collection of keys at 2.30 PM) - \$685.39

14 Jun Tue - buy red packet envelopes - \$1.50

14 Jun Tue - buy padlock at Japan Home - \$12.90

14 Jun Tue - Grab from McDonald's to Anglican Care Center at 10.25 PM - \$12.80

15 Jun Wed - Buy pineapple, 2 kg rice, 2 kg sea salt, rice container (pack of 6 microwave oven containers) and mixing spoon at NTUC Fairprice - \$20.35

- 15 Jun Wed - Grab from City Square Mall to new rental flat at 9.45 AM - \$14.20
- 15 Jun Wed - Red packet for 1st Buddhist monk to bless the new HDB rental apartment - \$88

=====

HDB promises to give every household affected by the HDB public rental rehousing project a sum of \$2500 re-
housing allowance, but we can only get it 2 months later??

Only after we have surrendered the old rental flat. By then I would have used up all my savings and start begging
on the streets of Orchard Road in Singapore,

because I have used FAR TOO MUCH money moving house already, as you can see below.

===== -
=====
=====

30 Apr Sat - Deposit for new metal bed frame (super strong for my 120 kg weight) - \$100

14 May Sat - Balance payment for new metal bed frame (super strong for my 120 kg weight)- \$160

3 Jun Fri - Sign letter of acceptance for new rental flat at HDB Hub at 9.10 AM - Free of charge

3 Jun Fri - buying 15 carton boxes and masking tapes in the late afternoon - \$61.40

3 Jun Fri - Comfort taxi - \$8.95

4 Jun Sat - buying 10 carton boxes and masking tapes - \$39.00

4 Jun Sat - Comfort taxi - \$7.45

11 Jun Sat - buying 5 carton boxes and masking tapes - \$17.50

11 Jun Sat - Taxi or Grab - ??? (unable to account for, lost track of this transaction)

14 Jun Tue - Payment to Housing and Development Board (HDB) for NEW 2-room rental apartment (collection of
keys at 2.30 PM) - \$685.39

14 Jun Tue - buy red packet envelopes - \$1.50

14 Jun Tue - buy padlock at Japan Home - \$12.90

14 Jun Tue - Grab from McDonald's to Anglican Care Center at 10.25 PM - \$12.80

15 Jun Wed - Buy pineapple, 2 kg rice, 2 kg sea salt, rice container (pack of 6 microwave oven containers) and
mixing spoon - \$20.35

15 Jun Wed - Grab from City Square Mall to new rental flat at 9.45 AM - \$14.20

- 15 Jun Wed - Red packet for 1st Buddhist monk to bless the new HDB rental apartment - \$88
- 15 Jun Wed - Red packet for 2nd Buddhist monk to bless the new HDB rental apartment - \$88
- 15 Jun Wed - Buy 30 Watt LED light bulb at Simbun Trading @ Bugis at night - \$25
- 15 Jun Wed - Buy AIG Home Insurance - \$70.62
- 17 Jun Fri - Buy 4 more LED light bulbs at Japan Home - \$16.50
- 18 Jun Sat - Grab from old rental flat to new rental flat at 10.14 AM (fetch bottles of cleaning liquid, cleaning rags and plastic chair) - \$12.80
- 18 Jun Sat - SP group and PUB turn on water and electricity at new HDB rental apartment at 11 AM - free of charge
- 18 Jun Sat - buy cleaning equipment and sixth 12W LED light bulb - \$36.20
- 18 Jun Sat - buy toilet brush set and 38 mm padlock - \$11.80
- 18 Jun Sat - buy 6 AA batteries for Casio label printer (Error printing due to low battery) - \$6
- 18 Jun Sat - Payment to Cleaner Auntie (4 hours of cleaning the new HDB rental apartment from 2.30 PM to 6.30 PM) - \$80
- 19 Jun Sun - Move in to new HDB rental apartment
- 19 Jun Sun - Payment to transport company - \$448
- 19 Jun Sun - Tips for a team of 3 mover personnel led by Aaron - \$30
- 19 Jun Sun - Take Grab Taxi from old rental flat to new rental flat (cannot travel in transport company's 15 feet lorry) - \$12.20
- 19 Jun Sun - Move in completed by 2 PM
- 19 Jun Sun - buy Dettol antiseptic body shampoo (pack of 2) - \$12.50
- 20 Jun Mon - Clear up the old rental flat in the evening after work MYSELF - free of charge
- 21 Jun Tue - Return keys of old rental flat to HDB in the morning (surrender old rental flat) - free of charge
- 21 Jun Tue - Last / final rent payment for old HDB rental flat (pro-rated) - \$230
- 24 Jun Fri - Relocation of M1 fiber broadband (internet connection) from old rental flat to new rental flat - \$58
- 24 Jun Fri - Installation of fiber termination point in the bedroom at the new rental flat - \$160
- 24 Jun Fri - buy mirror cabinet - \$65.90
- 24 Jun Fri - buy towel holder (suction-mounting) - \$9.90
- 24 Jun Fri - buy bath towel - \$7.90
- 24 Jun Fri - buy 12 wall hooks for hanging clothes - \$8.70
- 24 Jun Fri - Installation charges for mounting mirror cabinet in the bathroom and installing 8 wall hooks in the bedroom - \$50
- 24 Jun Fri - buy 4 more 12W LED light bulbs (2 to replace FAULTY ones and 2 more as SPARE light bulbs) - \$27.60
- 25 Jun Sat - Visit to Buddhist temple in the morning - Free of charge
- 25 Jun Sat - Installation charges for mounting praying table on the wall (cost of the praying table and L brackets included) - \$100
- 25 Jun Sat - buy towel holder (screw-mounting) (suction-mounting keeps falling off) - \$8.90
- 25 Jun Sat - re-mounting towel holder in the bathroom (need to drill holes using power drill) - free of charge

=====

Total expenses - \$2805.96 Singapore Dollars

=====

Upcoming / futuristic expenses

=====

Supreme Buddha statue - \$138 (confirmed)

Guanyin Goddess of Mercy statue - \$268 (confirmed)

Red packet for Buddhist monks (ritual to invite Supreme Buddha and Guanyin Goddess of Mercy to my new house) - \$100 (estimated, could be more)

Installation of water pipe and drainage for OLD washing machine at new HDB rental apartment - \$150 (confirmed)

Install curtain at new HDB rental apartment (hall and bedroom) - around \$50??

Buy small bar refrigerator cheap cheap - \$150??

Buy cheap cheap PORTABLE air con and installation charges (not wall-mounted) - \$360 + \$80?? (purchase can be delayed for several months, I don't need it now)

Replace existing 4 inch mattress - \$25??

Replace existing pillow - \$10??

## SSSD Service cannot start: Someone deleted /etc/sss/sss.conf and /etc/krb5.keytab from RHEL 7 server (2022-06-22 22:23) - Turritopsis Dohrnii Teo En Ming

Subject: SSSD Service cannot start: Someone deleted /etc/sss/sss.conf and /etc/krb5.keytab from RHEL 7 server

Good day from Singapore,

Today 22 Jun 2022 Wednesday, I discovered that someone deleted /etc/sss/sss.conf and /etc/krb5.keytab from one of the Red Hat Enterprise Linux (RHEL) 7 servers. Hence System Security Services Daemon (SSSD) cannot start.

I have solved it by copying /etc/sss/sss.conf from another RHEL 7 server and generating kerberos keytab file on the Active Directory Domain Controller Windows Server.

Here is an edited sample of our /etc/sss/sss.conf file.

```
[sss]
domains = project.domain.com
config_file_version = 2
services = nss, pam
[domain/project.domain.com]
ad_server = addc01.project.domain.com
ad_domain = project.domain.com
krb5_realm = PROJECT.DOMAIN.COM
realmd_tags = manages-system joined-with-adcli
cache_credentials = True
id_provider = ad
krb5_store_password_if_offline = True
default_shell = /bin/bash
ldap_id_mapping = True
use_fully_qualified_names = True
fallback_homedir = /home/ %u %d
access_provider = ad
```

The 2 Windows Server commands I used to create a kerberos keytab are:

```
[1] setspn -A host/rhel7.project.domain.com rhel7
```

```
[2] ktpass /princ host/rhel7.project.domain.com@PROJECT.DOMAIN.COM /out rhel7.keytab /crypto All /ptype KRB5_NT_PRINCIPAL -desonly /mapuser PROJECT\rhel7 $ +setupn +rndPass +setpass +answer
```

After generating rhel7.keytab on the Active Directory Domain Controller Windows Server, copy the keytab file to the target RHEL 7 server as /etc/krb5.keytab.

As we do not have direct SSH access to the target RHEL 7 server, I have to copy out rhel7.keytab from the Windows Server using winscp. Then I use winscp again to upload rhel7.keytab to another intermediate RHEL 7 server. From the intermediate RHEL 7 server, I used the following Linux command to transfer rhel7.keytab to the target RHEL 7 server.

```
$ scp rhel7.keytab user@<IP address of target RHEL 7 server>:/home/user/rhel7.keytab
```

On the target RHEL 7 server, run the following Linux commands:

```
$ sudo cp rhel7.keytab /etc/krb5.keytab
```

Then

```
$ su -
```

```
# systemctl start sssd.service
```

```
# systemctl status sssd.service
```

I have solved the problem!

## How to install and configure SNMPv3 in RHEL 7, then open UDP port 161 using firewalld (2022-06-13 22:08) - Turritopsis Dohrnii Teo En Ming

Subject: How to install and configure SNMPv3 in RHEL 7, then open UDP port 161 using firewalld

Good day from Singapore,

These are my notes on installing and configuring SNMPv3 in RHEL 7 and then opening UDP port 161 using firewalld on 13 Jun 2022 Mon.

Step 1 - Checking if SNMP was installed and configured previously

```
=====
```

```
# service snmpd status
```

```
Redirecting to /bin/systemctl status snmpd.service
```

```
Unit snmpd.service could not be found.
```

```
# systemctl status snmpd
```

```
Unit snmpd.service could not be found
```

```
# cd /etc/snmp
```

```
-bash: cd: /etc/snmp: No such file or directory
```

```
# find / -name snmpd.conf
```

```
No output
```

Step 2 - Installing net-snmp in RHEL 7

```
=====
```

```
# yum install net-snmp net-snmp-utils net-snmp-devel -y
```

Step 3 - Creating SNMPv3 User

```
=====
```

```
# systemctl stop snmpd
```

```
# net-snmp-config --create-snmpv3-user -A [authentication password] -X [encryption password] -a SHA -x AES [username]
```

adding the following line to /var/lib/net-snmp/snmpd.conf:

```
createUser [username] SHA [authentication password] AES [encryption password]
```

adding the following line to /etc/snmp/snmpd.conf:

```
rwuser [username]
```

```
# systemctl enable snmpd
```

```
created symlink from /etc/systemd/system/multi-user.target.wants/snmpd.service to /usr/lib/systemd/system/snmpd.service.
```

```
# systemctl start snmpd
```

Step 4 - Checking if snmpd service is listening

```
=====
```

```
# netstat -anp | grep snmpd
```

```
tcp
```

```
0
```

```
0 127.0.0.1:199
```

```
0.0.0.0:*
```

```
LISTEN
```

```
26932/snmpd
```

```
udp
```

```
0
```

```
0 0.0.0.0:161
```

```
0.0.0.0:*
```

```
26932/snmpd
```

```
Step 5 - Checking existing iptables firewall rules
```

```
=====
```

```
# iptables -S
```

```
-A IN_public_allow -p udp -m udp --dport 111 -m conntrack --ctstate NEW,UNTRACKED -j ACCEPT
```

```
Step 6 - Opening UDP port 161 using firewalld
```

```
=====
```

```
# which firewalld
```

```
/sbin/firewalld
```

```
# firewall-cmd --state
```

```
running
```

```
# firewall-cmd --list-all
```

```
public (active)
```

```
target: default
```

```
icmp-block-inversion: no
```

```
interfaces: ens192 ens224 ens256
```

```
sources:
```

```
services: dhcpv6-client http ssh
```

```
ports: 22/tcp 11/tcp 111/tcp 111/udp 971/udp 5901/tcp 5902/tcp 5903/tcp 5904/tcp 5905/tcp 5906/tcp 5907/tcp 5908/tcp
```

```
protocols:
```

```
masquerade: no
```

```
forward-ports:
```

```
source-ports:
```

```
icmp-blocks:
```

```
rich rules:
```

```
# firewall-cmd --list-ports
```

```
22/tcp 11/tcp 111/tcp 111/udp 971/udp 5901/tcp 5902/tcp 5903/tcp 5904/tcp 5905/tcp 5906/tcp 5907/tcp 5908/tcp
```

```
# firewall-cmd --add-port=161/udp
```

```
success
```

```
# firewall-cmd --runtime-to-permanent
```

```
1090
```

success

```
# firewall-cmd --list-all
```

public (active)

target: default

icmp-block-inversion: no

interfaces: ens192 ens224 ens256

sources:

services: dhcpv6-client http ssh

ports: 22/tcp 11/tcp 111/tcp 111/udp 971/udp 5901/tcp 5902/tcp 5903/tcp 5904/tcp 5905/tcp 5906/tcp 5907/tcp 5908/tcp 161/udp

protocols:

masquerade: no

forward-ports:

source-ports:

icmp-blocks:

rich rules:

Step 7 - Add RHEL 7 server as a node in Solarwinds Orion platform

=====

Click "Add Node"

Click "Most Devices: SNMP and ICMP"

SNMP Version: SNMPv3

SNMP Port: 161

Click "Allow 64 bit counters"

SNMPv3 Credentials

SNMPv3 Username: [username]

SNMPv3 Context: leave empty

SNMPv3 Authentication

Method: SHA1

Password: [authentication password]

Uncheck "Password is a key"

SNMPv3 Privacy / Encryption

Method: AES128

Password: [encryption password]

Uncheck "Password is a key"

Click "Test"

Result: Test Successful!

You can now see the node in Solarwinds Orion web console by clicking Settings > Manage Nodes.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Link: [1][https://support.hpe.com/hpesc/public/docDisplay?docLocale=en\\_US&docId=emr\\_na-a00026111en\\_us#N10439](https://support.hpe.com/hpesc/public/docDisplay?docLocale=en_US&docId=emr_na-a00026111en_us#N10439)

1. [https://support.hpe.com/hpesc/public/docDisplay?docLocale=en\\_US&docId=emr\\_na-a00026111en\\_us#N10439](https://support.hpe.com/hpesc/public/docDisplay?docLocale=en_US&docId=emr_na-a00026111en_us#N10439)

**Turritopsis Dohrnii Teo En Ming's CPF Account as of 8 Jun 2022 (2022-06-08 22:25)****- Turritopsis Dohrnii Teo En Ming**

Subject: Turritopsis Dohrnii Teo En Ming's CPF Account as of 8 Jun 2022

CPF Ordinary Account \$35,852

CPF Special Account \$25,716

CPF Medisave Account \$6,793

CPF Investments \$27,234

Total CPF \$95,595

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 15 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty for eternity. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

Mr. Turritopsis Dohrnii Teo En Ming, 44 years old as of 8 Jun 2022, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

## Did I configure forwarding Linux server logs to Kiwi Syslog Server on Windows Server correctly? (2022-06-08 21:27) - Turritopsis Dohrnii Teo En Ming

Subject: Did I configure forwarding Linux server logs to Kiwi Syslog Server on Windows Server correctly?

Good day from Singapore,

I am just wondering if I have configured forwarding Linux server logs to Kiwi Syslog Server correctly.

The OS is Red Hat Enterprise Linux (RHEL) 7.x 64-bit virtual machine inside VMware ESXi 6.7.0 Update 3.

The commands I have used on 1st June 2022 are as follows.

```
# nano /etc/rsyslog.conf
*.* @@<IP address of Kiwi Syslog Server>:514
# systemctl restart rsyslog
# netstat -anp | grep <IP address of Kiwi Syslog Server>
tcp
0
1 <IP address of local server>:51314
<IP address of Kiwi Syslog Server>:514
SYN_SENT
32755/rsyslogd
```

We haven't install and configure Kiwi Syslog Server on Windows Server 2016 Standard yet.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

## Is Tails Linux able to protect Targeted Individuals against government surveillance? (2022-05-27 22:38) - Turritopsis Dohrnii Teo En Ming

Subject: Is Tails Linux able to protect Targeted Individuals against government surveillance?

Good day from Singapore,

The home page of Tails Linux says:

"Tails is a portable operating system that protects against surveillance and censorship."

Excerpt from the following news article.

News article: Tails 5.0 Linux users warned against using it "for sensitive information"

Link: [1]<https://www.bleepingcomputer.com/news/security/tails-50-linux-users-warned-against-using-it-for-sensitive-information/>

[QUOTE]

Tails (short for The Amnesic Incognito Live System) is a Linux distro focused on protecting the users' anonymity (e.g., activists and journalists) and helping them circumvent censorship by forcing all connections to and from the Internet through the Tor network.

[/QUOTE]

My question is: Is Tails Linux able to protect Targeted Individuals against government surveillance? We know governments are able to read our minds and thoughts using mind control technology (aka synthetic telepathy or remote neural monitoring).

Looking forward to your reply.

Thank you very much.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**[OPEN COMPLAIN AND PROTEST LETTER] [DAYLIGHT ROBBERY!] HDB increases rent of rental flat from \$26 to \$500, Anglican Care Center increases boarding fees of psychiatric sheltered home from \$130 to \$500 (2022-05-26 22:30) - Turritopsis Dohrnii Teo En Ming**

Subject: [OPEN COMPLAIN AND PROTEST LETTER] [DAYLIGHT ROBBERY!] HDB increases rent of rental flat from \$26 to \$500, Anglican Care Center increases boarding fees of psychiatric sheltered home from \$130 to \$500

FOR IMMEDIATE WORLD WIDE RELEASE

26 MAY 2022

I seriously doubt this post will ever become viral because Singaporeans are WORLD FAMOUS for being extraordinarily afraid of the government (myself included). Majority of the people in Singapore will tremble/shiver with fear, urinate and/or defecate (pass motion) when the word government is being mentioned (myself included). As such, it is expected that nobody will ever like and share this post. News media outlets in Singapore will never publish any article submissions from me because my name is politically sensitive and I believe there is a gag order from the Singapore government. Without explicit written approval from the Singapore Government, news media outlets in Singapore will never dare to publish any story about me. Even opposition politicians and political activists in Singapore do not dare to mention my name on social media for fear of reprisals from the government or incurring the wrath of the government. Nobody will ever stand up and speak up for me. I am deeply saddened. But still I must post. I repeat: I seriously doubt this post will ever become viral.

The chief complaints in this open letter are as follows:

[1] HDB increases rent of rental flat from \$26 to \$500 per month.

[2] Anglican Care Center also follows suit by increasing boarding fees of psychiatric sheltered home from \$130 to \$500 per month.

[3] Therefore the Singapore Government is making life extremely hard for me.

You may refer to my autobiography, published at the Indiana University, USA, on 10 Nov 2019, for more historical background information.

Article: Autobiography of Singaporean Targeted Individual Mr. Turritopsis Dohrnii Teo En Ming (Very First Draft, Lots More to Add in Future)

Link: [1]<https://lkml.iu.edu/hypermail/linux/kernel/1911.1/02472.html>

Question: What is a Targeted Individual? Answer: A Targeted Individual is a person who is persecuted, targeted, marked and blacklisted by the government.

In the year 2007, while working at the Defense Science and Technology Agency (DSTA) as an IT engineer, I made some disparaging remarks about Singapore strongman and Minister Mentor Lee Kuan Yew to my manager Mr. Loh Choon Fah in his office. Within a few months, I started hearing threatening and menacing voices in my head from the government. The government leverages mind control TECHNOLOGY to make targeted individuals hear voices. In my Youtube video, I asserted that mental illnesses were INVENTED by governments to punish targeted individuals. In the same vein that many people believe Covid-19 is a man-made invented virus rather than a naturally occurring virus. Hence mental illness does not occur naturally but is a TECHNOLOGY-induced mental condition. Mental illnesses were INVENTED and designed by governments to punish anyone whom they don't like. If you say anything which the government doesn't like, your government can easily reward or award you with mental illness. You do not need to know government top secrets to become a targeted individual, as what some die-hard government supporters like to argue. Merely saying things which displeases the government can get you rewarded or awarded with mental illness from the government. The government is the awarding authority for mental illness. Schizophrenia is a term for hearing voices when nobody is around. It is one of the many different types of mental illnesses invented by governments.

Youtube video: Mental illnesses were invented by governments to punish targeted individuals [2]

Link: [2]<https://www.youtube.com/watch?v=540StgxqDNg>

Remarkably, the UNITED NATIONS Office of the High Commissioner for Human Rights had OFFICIALLY published a letter from a Targeted Individual in India. The link to the letter published by the UNITED NATIONS is

[3]<https://www.ohchr.org/Documents/Issues/Torture/Call/Individuals/Militarygrade.pdf>

The legitimate internet domain name for the UNITED NATIONS Office of the High Commissioner for Human Rights is OHCHR.ORG. This shows that the Targeted Individual phenomenon is wide spread in every country all over the world. Governments love to reward or award those people whom they do not like with mental illness. In the letter published by the UNITED NATIONS, the targeted individual from India also argues that governments leverages mind control technology to reward/award targeted individuals with mental illness. The author also posits that a primary goal in these ‘slow-kill’, ‘no-touch’/‘soft-kill’ programs is to remove Targeted Individuals from the job workforce.

According to the American newspaper The Washington Post, American man Harlan Girard says he became targeted and started hearing voices from the government after he made disparaging remarks about former U.S. President George W. Bush.

Article: Mind Games New on the Internet: a community of people who believe the government is beaming voices into their minds. They may be crazy, but the Pentagon has pursued a weapon that can do just that.

Source: The Washington Post

Link: [4]<https://www.washingtonpost.com/archive/lifestyle/magazine/2007/01/14/mind-games-span-classbankheadnew-on-the-internet-a-community-of-people-who-believe-the-government-is-beaming-voices-into-their-minds-they-may-be-crazy-but-the-pentagon-has-pursued-a-weapon-that-can-do-just-that-span/a0d09db6-d7aa-4fcd-a829-2a3ebc56df9d/>

To reinforce the Targeted Individual concept, I will also mention another targeted individual from Singapore. His name is CHEONG WEI CHANG.

The story of Cheong Wei Chang who is persecuted by the Singapore Government. He sued Prime Minister Lee Hsien Loong in the Supreme Court.

News reporting on Cheong Wei Chang

=====

Article: Man’s suit against Lee Hsien Loong alleging woes caused by PM’s ‘department’ thrown out

Link: [5]<https://sg.news.yahoo.com/mans-suit-lee-hsien-loong-alleging-woes-caused-pms-department-thrown-124212754.html>

Article: Plaintiff tries to sue Lee Hsien Loong, claims Prime Minister made him shit blood

Link: [6]<https://theindependent.sg/plaintiff-tries-to-sue-lee-hsien-loong-claims-prime-minister-made-him-shit-blood/>

Cheong Wei Chang sued Prime Minister Lee Hsien Loong in the Supreme Court for numerous reasons.

I shall list 2 major reasons here.

Reason #1: He keeps getting failed job interviews

Reason #2: He keeps shitting blood (aka slow kill)

Regarding reason #1, he implies that the Singapore Government is exerting pressure and influence to prevent Cheong Wei Chang from ever getting a job and to induce poverty.

Regarding reason #2 (aka slow kill), he implies that the Singapore Government has secretly/covertly introduced harmful substances / slow acting poison into his food and drinks.

Yes, so now we know that a primary goal in these targeted individual programs is to prevent targeted individuals from having a job, so as to induce poverty. Governments want targeted individuals to remain in poverty forever.

With reference to my earlier paragraph, I mentioned that I offended Singapore strongman Lee Kuan Yew in the year 2007. I graduated from the National University of Singapore with a mechanical engineering degree in Dec

2006. I also have a Diploma in Computer Networking (year 2017) and a Diploma in Mechatronics Engineering (year 1998) from Singapore Polytechnic.

Between 2007 and 2017, which is a span of 10 long years, I frequently get fired from jobs. I say frequently. I did not say always. To prove that I frequently get fired from jobs for 10 years after university graduation, here is the summary of my CPF account to show that I am extremely under-employed for the past 15 years. I never climb up the social ladder.

Turritopsis Dohrnii Teo En Ming's CPF Account as of 5 May 2022

CPF Ordinary Account \$35,316

CPF Special Account \$25,538

CPF Medisave Account \$6,637 (subject to fluctuations)

CPF Investments \$27,654 (subject to fluctuations)

Total CPF \$95,145

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/I-NSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/I-NSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 15 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty forever. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

My employment situation only managed to improve slightly after year 2017.

Coming round to my rental fees.

Before 15 June 2020, the rent for my HDB 1-room rental flat was \$26 per month. After 15 June 2020, the rent for my HDB 1-room rental was increased from \$26 to \$333 per month. HDB responded that the increase was justified because I have found a job as an IT Consultant getting \$2500 per month gross. After CPF deduction, my take home pay is only \$2000 per month. Last year, in 2021, HDB announced the intention to demolish my block of HDB rental flats in Feb 2023. We have to relocate. HDB offered me a 2-room rental flat, but now I have to pay about \$500 per month for rent.

On 23 May 2022 Monday, my case manager at Anglican Care Center (ACC) psychiatric sheltered home informed me that my boarding fees is to be increased beginning June 2022. When I moved in to the psychiatric sheltered home in Oct 2020, the boarding fees for my ACC psychiatric sheltered home was about \$130 per month. Several months ago, it was increased to about \$170 per month. Now they are increasing the boarding fees for the psychiatric sheltered home to \$500 per month. ACC told me that the increase was justified because now I have a job as an IT Consultant which pays \$2500 per month gross. As of recent review, the Singapore Ministry of Health reduced my subsidy level to 28 % for the Means Testing.

You know GST recently increased from 7 % to 8 % by 1 percentage point right? But do you know my HDB rent increased by 1823 percentage points from \$26 to \$500? Do you know my ACC psychiatric sheltered home boarding fees increased by 284 percentage points from \$130 to \$500? This is sheer government-backed/state-backed DAYLIGHT ROBBERY! This is preposterous and outrageous!

So now I have to pay \$500 for my HDB rent and ANOTHER \$500 for my psychiatric sheltered home. This is a total of \$1000 per month and it is a HUGE CHUNK of my \$2000 take home pay. 50 % leh!! Besides HDB and ACC rent, I also need to pay for other bills, 3 meals and transport expenses every day. Obviously my \$2000 take home pay isn't even enough to cover everything. I think the government's intention is to TAKE BACK HUGE CHUNKS of my salary so that I won't have money for anything else, effectively nullifying my efforts to have a

job. There is a famous saying among the masses: Singapore government give you only a chicken wing, but expect to take back the whole chicken. By increasing my HDB and ACC rent by so much, the government is taking back HUGE CHUNKS of my take home salary, effectively nullifying my efforts of having a job. Why do I have to work when most of my salary will go back to the government anyway?

Do you agree that the Singapore Government is trying to make my life extremely hard? When I protested to HDB and ACC, both organization argued that the rent increases were justified because now I have a job which pays me a lot of money. Really? Is my \$2000 take home pay really a lot of money? Then what about the million dollar salaries of government ministers in Singapore? If my take home pay of \$2000 is a lot of money, then their million dollar salaries must be really obscene and astronomical!

Want me to pay and pay and pay and pay after allowing me to have a job after 2017? But who is going to be responsible and accountable when the Singapore Government refuses to allow me to work for 10 long years from 2007 to 2017 during the prime of my life, by making me hear threatening and menacing voices? And sometimes by exerting pressure on the companies I work in to fire me.

My employment situation only started to improve marginally in the year 2017. My longest held jobs are IT support engineer in 2 Systems Integrator (SI) companies AFTER 2017. I stayed on in the 1st SI company for 1 full year. I am presently working as an IT Consultant (2nd SI company) for very close to 2 years. One person told me his longest held job is 36 years spent in a company. My longest held job after university graduation is only 2 years! What a joke! What an irony! I am now 44 years old with a lot of government-induced health/medical problems.

You may refer to my international postings all over the world at the following search engines.

[1] [7]<https://lore.kernel.org/all/?q=teo+en+ming>

[2] [8]<https://www.mail-archive.com/search?a=1 &l=all &haswords= &x=19 &y=24 &from=teo+en+ming &subject= &datewithin=1d &date= &notwords= &o=newest>

[3] [9]<https://marc.info/?w=2 &r=1 &s=teo+en+ming &q=a>

[4] [10]<https://markmail.org/search/?q=teo %20en %20ming #query:teo %20en %20ming %20order %3Adate-backward+page:1+state:facets>

[5] [11]<https://seclists.org/search.html?q=teo+en+ming>

Before closing, I would like to say that no one else can be poorer than me in Singapore.

[1] Most people in Singapore at my age (40+) should have around \$300,000 dollars or more in their bank accounts. In stark contrast, I only have a few thousand dollars in my bank accounts at the age of 44. This is because I frequently get fired from jobs over the course of the past 15 years. The famous Steven Lim mentioned that he has a life savings of about \$300K in his instagram post.

[2] Most people in Singapore at my age (40+) should have around \$300,000 dollars or more in their CPF accounts. In stark contrast, I only have a total of about \$95,000 in my CPF account at the age of 44 (Ordinary account + Special account + Medisave account + CPF investments all combined). This is because I frequently get fired from jobs over the course of the past 15 years.

[3] Majority of the people in Singapore (80 %) own a HDB flat. My family used to own a HDB flat many donkey years ago. But the Singapore Government resorted to trickery and tricked my mother into frequently selling and buying HDB flats by making my mother think that her neighbours are always scolding her by making my mother hear voices. After tricking my mother into frequently selling and buying HDB flats, the Singapore government successfully reduced my family to extreme poverty. Since the year 2011, my family does not own any HDB flat at all. We do not own any HDB flat under our names. We have to rent rental flats from HDB. Such is the trickery the Singapore Government used to rob us of our HDB flat. Government make my mother hear voices and let her think her neighbours are always scolding her all the time. Resulting in my mother frequently selling and buying HDB flats. Frequently selling and buying HDB flats in such haste and without careful planning can do a lot of harm to you financially. If I am already incapable of buying a HDB flat, do you think I will be able to own a condominium?

Mr. Turritopsis Dohrnii Teo En Ming

Targeted Individual in Singapore

DRAFT 26 May 2022

PS. This is still a draft.

**What does HAProxy do? (2022-05-24 21:14) - Turritopsis Dohrnii Teo En Ming**

Subject: What does HAProxy do?

Good day from Singapore,

I notice that my company/organization uses HAProxy. What does it do?

How do I setup and configure it? Are there excellent and well written guides on doing so?

Just being curious.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

## I have just discovered that Linux operating system is powering F5 BIG-IP network devices (2022-05-18 23:00) - Turritopsis Dohrnii Teo En Ming

Subject: I have just discovered that Linux operating system is powering F5 BIG-IP network devices

Good day from Singapore,

I have just discovered that Linux operating system is powering F5 BIG-IP network devices. Please refer to the following news article.

Article: Critical F5 BIG-IP vulnerability exploited to wipe devices

Link: <https://www.bleepingcomputer.com/news/security/critical-f5-big-ip-vulnerability-exploited-to-wipe-devices/>

[QUOTE]

As the exploit gives attackers root privileges in the Linux operating systems powering BIG-IP devices, the `rm -rf /*` command will be able to delete almost every file, including configuration files required for the device to operate correctly.

[/QUOTE]

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

**I have just discovered that Sophos XG210 firewall uses Snort IPS engine today! (2022-05-06 22:59)**  
**- Turritopsis Dohrnii Teo En Ming**

Subject: I have just discovered that Sophos XG210 firewall uses Snort IPS engine today!

Good day from Singapore,

While configuring email alert notifications on Sophos XG210 firewall for my client today, 5 May 2022, I discovered that the firewall uses Snort as its IPS engine.

I saw it in the release notes for firmware version SFOS 18.5.3 MR3-Build408.

I am wondering if the Sophos XG Firewall Free Home Use Edition uses Snort IPS engine as well.

If Sophos XG Firewall Free Home Use Edition also uses Snort IPS engine, I am going to try it out very soon! Because I am a Snort Intrusion Prevention System fan!

I also notice Sophos XG210 firewall uses another open source software, exim mail transport agent (mta).

Looking forward to your advice.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

## How to successfully install Cisco Duo Security 2FA MFA in Windows Server using Active Directory Group Policy Objects (GPO) (2022-05-05 22:51) - Turritopsis Dohrnii Teo En Ming

Subject: How to successfully install Cisco Duo Security 2FA MFA in Windows Server using Active Directory Group Policy Objects (GPO)

Dear all,

I have finally solved the problem on 4 May 2022 Wednesday morning in Singapore.

These are what you have to do.

Refer to the following guide.

Reference guide: Duo Authentication for Windows Logon (RDP) - Active Directory Group Policy

Link: [1]<https://duo.com/docs/winlogon-gpo>

Create the 1st Group Policy Object (GPO) using the above guide, under the section "Creating the Duo Authentication for Windows Logon GPO".

DO NOT create the 2nd Group Policy Object (GPO) under the section "Deploying Duo Authentication for Windows Logon to clients using Active Directory". This is because Cisco Duo Group Policy MSI installer (.msi) is incompatible with and cannot install on Windows Servers. The MSI installer only installs on domain member workstations like Windows 8, Windows 10, and Windows 11.

Since my task is to install Cisco Duo client on Windows Server 2012 R2 Datacenter, I repeat, DO NOT create the 2nd Group Policy Object (GPO).

Download and install the Cisco Duo client (.exe) and follow the instructions from the following guide.

Reference guide: Duo Authentication for Windows Logon and RDP

Link: [2]<https://duo.com/docs/rdp>

That's all. You have successfully installed Cisco Duo client on Windows Server 2012 R2 Datacenter, which is a domain member server.

I have figured out all of these on my own.

Thank you.

Regards,

Mr. Turritopsis Dohrnii Teo En Ming

Singapore

## Turritopsis Dohrnii Teo En Ming's CPF Account as of 5 May 2022 (2022-05-05 22:15) - Turritopsis Dohrnii Teo En Ming

Subject: Turritopsis Dohrnii Teo En Ming's CPF Account as of 5 May 2022

CPF Ordinary Account \$35,316

CPF Special Account \$25,538

CPF Medisave Account \$6,637

CPF Investments \$27,654

Total CPF \$95,145

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Mrs Goh Chok Tong, wife of former Singapore Prime Minister Goh Chok Tong, once said that \$600,000 is peanuts. So Teo En Ming's CPF account is hundreds of thousands of times worse than peanuts.

Why is Teo En Ming's total CPF account so shockingly LOW/MEDIOCRE/MEAGRE/PEANUTS/NEGLIGIBLE/INSIGNIFICANT? Because Turritopsis Dohrnii Teo En Ming is a TARGETED INDIVIDUAL. A Targeted Individual is a person who is persecuted, marked and targeted by the government. He is frequently fired from his jobs for the past 15 years after graduation from the National University of Singapore in December 2006. He is persecuted, targeted, and marked by the Singapore Government after offending the late Minister Mentor of Singapore Lee Kuan Yew in 2007. The Singapore Government is punishing Teo En Ming to ensure that he lives in extreme poverty for eternity. Governments will also arrange for targeted individuals to have numerous health/medical problems (aka "slow kill").

Mr. Turritopsis Dohrnii Teo En Ming, 44 years old as of 5 May 2022, is a TARGETED INDIVIDUAL living in Singapore. He is an IT Consultant with a System Integrator (SI)/computer firm in Singapore. He is an IT enthusiast.

**[uclibc-ng] Unpatched DNS bug affects millions of routers and IoT devices (2022-05-05 21:25)**  
- Turrishops Dohrnii Teo En Ming

Subject: [uclibc-ng] Unpatched DNS bug affects millions of routers and IoT devices

Good day from Singapore,

I have just come across this article. I saw uclibc-ng being mentioned, so I thought of sharing this article.

Article: Unpatched DNS bug affects millions of routers and IoT devices

Link: <https://www.bleepingcomputer.com/news/security/unpatched-dns-bug-affects-millions-of-routers-and-iot-devices/amp/>

[QUOTE]

The library uClibc and its fork from the OpenWRT team, uClibc-ng. Both variants are widely used by major vendors like Netgear, Axis, and Linksys, as well as Linux distributions suitable for embedded applications.

[/QUOTE]

Does it affect my TP-link AC1200 wireless router?

Regards,

Mr. Turrishops Dohrnii Teo En Ming
