One of the best and easiest changes to make is to download a resource pack or a texture pack, which can change the sounds and appearance of various blocks. Many of these texture packs completely change how the game feels and plays out, and paired with a really good shader, it can make Minecraft feel like a brand-new experience. While there are thousands of texture packs, these ones are worth trying at least once.

## Jehkoba's Fantasy Pack

One of the main issues with Minecraft is that many of its colors and textures look washed out and stale. Jehkoba's Fantasy Pack actually restores the brightness and vibrancy into the game's appearance without altering the actual blocks too drastically.

This is more of a medieval-style fantasy pack, ideal for players who like to make traditional builds and who are looking for a nice visual change for their fantasy RPG survival world. Some of the more dramatic changes are found in glass panes and stone bricks, which have some unique patterns.

## NAPP

NAPP is a bit of a special resource pack, mainly because it aspires to go above and beyond by introducing a whole host of 3D effects into the world. This pack isn't really meant to be played on, but rather for taking cool photos in-game.

Blocks now have highly realistic three-dimensional details on them, rather than being completely flat. For instance, cobblestone blocks will have each piece of cobble carved out into a 3D shape. Needless to say, this isn't a choice for those with a mid or low-end PC, due to how heavy it gets. The screenshot is courtesy of texture-packs.com.

## Coterie Craft

If you'd like only a slight change towards something more medieval and realistic, Coterie Craft does both at the same time. The blocks maintain largely the same appearance with some minor textural tweaks, and planks in particular having a very different appearance to their vanilla version.

This isn't a dramatic change to the game, and maintains most of the original colors of Minecraft as well. It's an ideal pick for anyone who loves vanilla, but wants a bit more out of it.
