

Jonite Stone Grate

Distinct Jonite Stone Gratings Unlike Any Others

Natural stone gratings are typically weaker due to their absence of reinforcements. Worldwide currently, only Jonite enhanced stone is the only stone product tested and accredited according to the BS: EN Standard. Jonite's flexibility in customization likewise enables designers to broaden their imagination outside of Jonite's conventional range of products. Being generally made of stone, our products do not corrode or corrode. This leads to a longer life-span. That is Jonite's primary benefit versus metal gratings. Option of structures and colours is also another big advantage versus metal grates. Metal grates have actually limited variety of colours. They can be repainted, they do not look natural and tailoring designs around metal grates is limited to a couple of designs and textures. Apart from designers who define the design of a project, Jonite items (channel grates/ trench grates) can be used in any development from private houses to industrial buildings to federal government tasks. We serve a big spectrum of clients - everyone from home owners, to commercial builders, to the people in building management can become item owners of Jonite stone gratings. Basically anywhere with an open drain can have a need for usage for our unique stone channel grates.

No matter what your demands are, "3 inch drain cover", "4 inch drain cover", "6 inch drain cover" or "8 inch drain cover", our in home design group can personalize a design and spec to your demands. Jonite can propose a design from our in home team for various outside drainage grates. Jonite will then conceive the ideas through 3D rendering and shop illustrations for your approval.

In the world currently, just Jonite strengthened stone is the only stone product tested and certified according to the BS: EN Standard. Jonite's flexibility in personalization also allows designers to broaden their creativity outside of Jonite's conventional range of items. Apart from designers who specify the design of a task, Jonite items (channel grates/ trench grates) can be used in any development from private houses to industrial buildings to government projects.

Our Stone Grate Range of Products

Channel/ Trench Grates
