Microsoft Drivers for PHP for SQL Server

Welcome to the Microsoft Drivers for PHP for SQL Server PHP 7

The Microsoft Drivers for PHP for SQL Server are PHP extensions that allow for the reading and writing of SQL Server data from within PHP scripts. The SQLSRV extension provides a procedural interface while the PDO_SQLSRV extension implements PDO for accessing data in all editions of SQL Server 2008 R2 and later (including Azure SQL

[Updating Caddy To PHP 7.2](#)

Set up SSL certificate If we chose Caddy, it was to serve over HTTPS hassle-free, so let's get into it. Open up your Caddyfile configuration, remove the http:// to only leave the domain and turn on TLS. Restart your caddy daemon sudo systemctl restart caddy .
