WELCOME TO MIT UNIVERSITY VIETNAM

Welcome to the Mien Dong University of Technology (MIT University Vietnam)

After nearly 10 years of construction and development, Mien Dong University of Technology (MIT) has really risen to become a prestigious multi-disciplinary university in the southern region. The university aims to be a pioneer in building a smart university model oriented towards innovation and entrepreneurship. Gradually raising the school's ranking in the prestigious education rankings, the academic programs are accredited by international educational accrediting organizations.

MIT University has a smart training and management system that nurtures and promotes all potentials of learners. The MIT training model creates a generation of modern students with creative and entrepreneurial skills and capabilities of a 4.0 citizen. MIT University has a team of lecturers with high academic qualifications, who are dedicated teachers, leading scientists in the field of teaching and research. With a modern infrastructure system, beautiful campus, green and peaceful working environment, it will be a "beloved home" for students, faculties and staff.

Along with the constant improvement of the quality of education, MIT especially focuses on experiential learning activities for students. The modern teaching and experiential guidance methods will help young learners truly mature. In addition, the close connection with businesses, economic organizations, social organizations will increase practicality and real-world experiences for students, connecting resources and fostering innovation to help learners become entrepreneurial during their time at the university.
